EVEREADY

PORTABLE LIGHTING OUTFIT

EVEREADY'S newest success—a lighti ng outfit consisting of one 6-8 volt, 2 C.P. Lamp, 10 feet of cotton cord, bayonet socket, all ready to attach to a "Hot Shot" Battery. The ideal form of lighting for camps, cottages, closets, outbuildings, motor-boats, and for side or tail lights on vehicles. The complete outfit is packed in an attractive carton and retails at $2.75.

The average amount of use that can be obtained with this outfit from one 1561 Hot Shot Battery is as follows:—

One hour per day	80 days	service	80 hours
Two hours per day	35 days	service	70 hours
Three hours per day	20 days	service	60 hours
Four hours per day	14 days	service	55 hours
Five hours per day	10 days	service	50 hours
Continuous burning	40 hours	service	

Although the 1561 Hot Shot is recommended for use with one six-volt, 2 C. P. lamp, it is, of course, more economical to use the 2562 Hot Shot, which gives 35 to 50% more service on the same use than two 1561 Hot Shots used one after the other.

Order your stock through your jobber now and be prepared for the camping and vacation season. There is an all-year-round sale for this lighting outfit for indoor use in the home and on the farm.

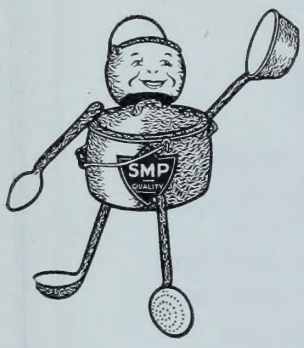
Sold Over the Counter

—and You make the Profit!

When a woman wants to buy a Diamond Ware or a Pearl Ware pan there's only one way she can buy it. And that is—right over the counter.

She has to buy it in a store. The dealer gets all the business and his fair profit. He isn't competing with any agent, student, or house-to-house salesman. He isn't losing good trade through the door-to-door activities in his territory of some wandering peddler.



Mr. SMP.

Your Customers?

Diamond Ware and Pearl Ware are sold over the counters in stores. In no other way!

Some makes of kitchen utensils, however, are being sold to women by this house-to-house method. Your customers, perhaps, have bought from these men. Lost trade!

These women would otherwise have come to your store to buy utensils. In the store they would have had your whole stock to choose from. And ten to one they would have bought other goods too.

Other makes of kitchen utensils are frequently offered as premiums and prizes in guessing contests. Here again you are losing business rightfully yours.

Diamond Ware and Pearl Ware cannot be offered as premiums and prizes in guessing contests, nor any other goods that we make.

Our Sales Policy

The simple reason is that we have a sales policy from which we never deviate. A policy which looks after the interest of SMP dealers.

Right Over the Counter! That's how Pearl Ware and Diamond Ware are sold from coast to coast in Canada. That's how all our goods are sold.

If you appreciate our sense of business ethics in this Sales Policy we also appreciate any business with which you might favor us.

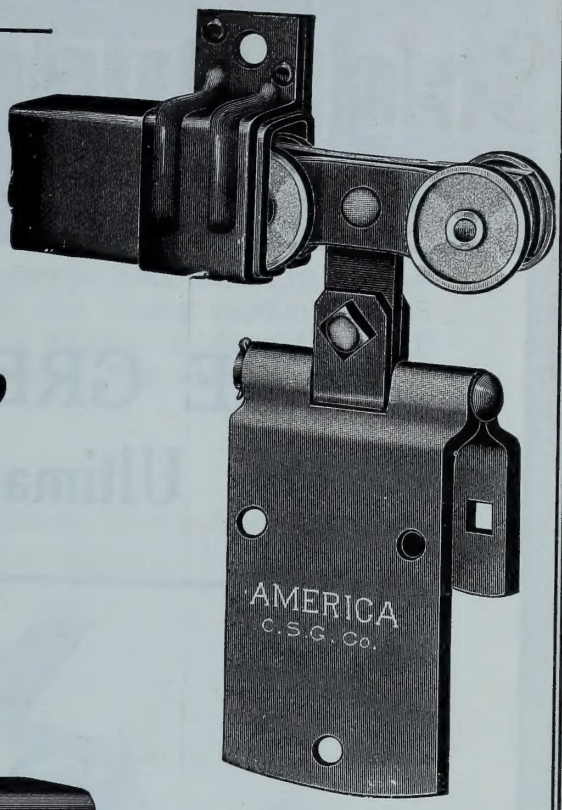
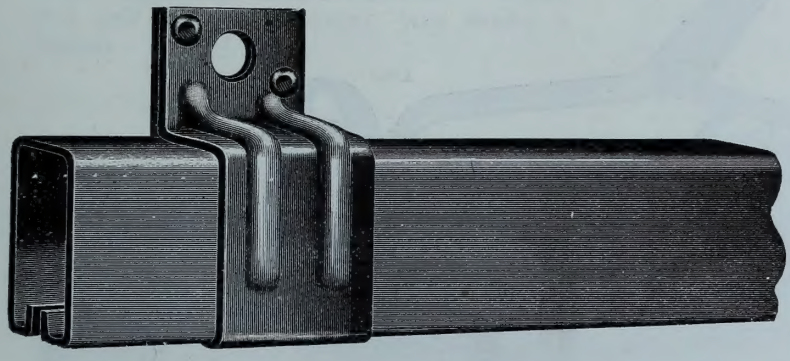
Don't Overlook This Opportunity—

Consistent Profitable Sales From

"America"
Trolley Hangers





Steel Trolley Track

The "America" operates in the Hatch Trolley Track — the only track supported by the famous corrugated track brackets. These brackets are naturally much stronger and better than ordinary plain track brackets.

This trolley hanger has the largest sales of any in the Dominion and consequently is exceptionally popular with the Canadian trade.

Unequalled for warehouse, factory, garage, and barn doors. It has tandem trucks, hardened roller bearings and an apron 6 in. long, 3 x ¼ in. wide. Simple in adjustment, anti-friction forged steel yokes and ability to stand hard usage. With each pair of Hangers are included two End Caps and Bolts for Hangers.

Packed one pair in a box complete with screws and bolts. Weight per dozen pairs, without Brackets, 95 pounds.

BROCKVILLE, CANADA

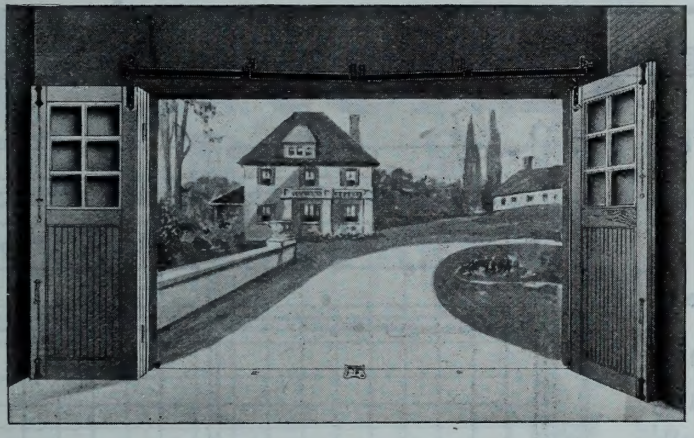
St. John Montreal Toronto Winnipeg Vancouver

You Can't Sell It

A CAREFUL car-owner won't build-in a garage door that can be easily blown shut or open—usually just at the wrong moment. You can't sell it to him. He will always insist on having a door that will slide open—and slide easily—that can't be blown open or shut—and that is not a harbour for birds.

The **Riteway** Garage Door Outfit in 3, 4, or 5 door sets, appeals immediately to the class of man who carefully builds or remodels his garage. It answers the most exacting requirements. When you sell him a Riteway you make a friend.

Riteway Garage Door Outfits are always neatly packed in complete sets. All screws and parts necessary for erecting are included. Keep a sample on hand for demonstrating purposes.



There will be more of these sold in 1922 than any other garage door outfit. The owners are going to ask for them.

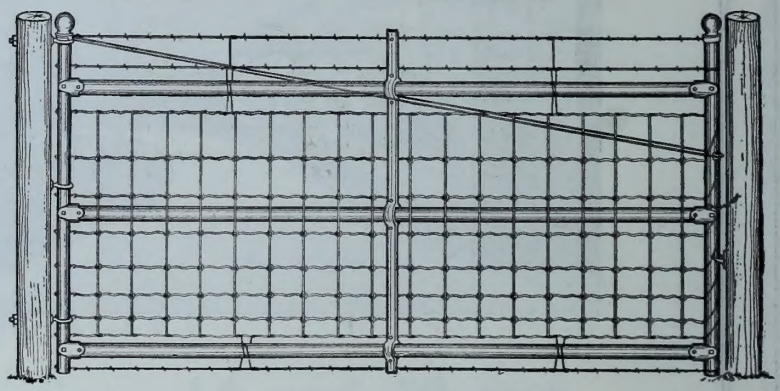
DAVIDSON

The Story "In a Nutshell" of Why

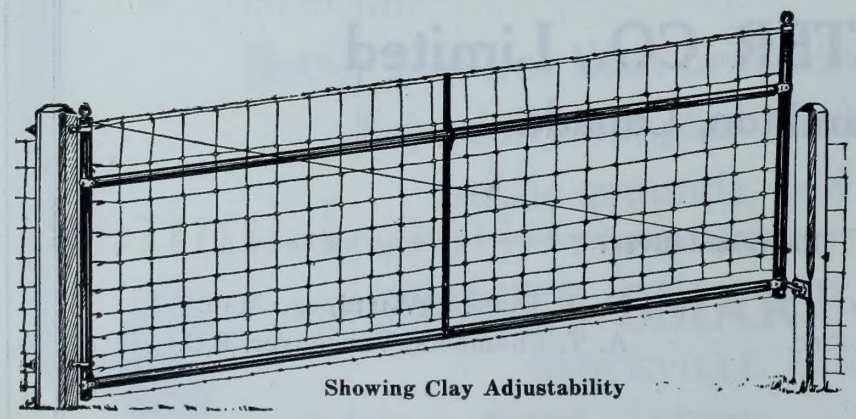
CLAY GATES

Meet Canadian Conditions so Effectively and Sell so Well

These gates please your stock and cattle customers because they are plain, common-sense gates—horse-high, bull-strong and pig-tight.



Clay Bull Gate



Showing Clay Adjustability

They have all the advantages of good construction. Without going into technical details, we point out that they are strong—high carbon steel tubing; malleable iron castings; two-piece angle iron center brace and heavy brace wire.

These gates are easily and instantly adjustable. They are durable, economical, and fully guaranteed. Before you forget it, write for our catalogue, which explains fully the many good features of these excellent gates.

The Perfect Grip

An ordinary hammer will slice the head off a nail, because it gets a grip on the head and not on the nail. With the head off, it's all off.

Williams' perfectly balanced Hammers will grip the *body* of a nail and pull it, head and all, clear through a plank. All nails are trailers to Williams' hammers.

Heads on or heads off, for drive or pull, Williams' Superior Drop-Forged Hammers are the bosses in the nail world. Good workmen want them because they fit the hand, are perfectly balanced and are good all through.

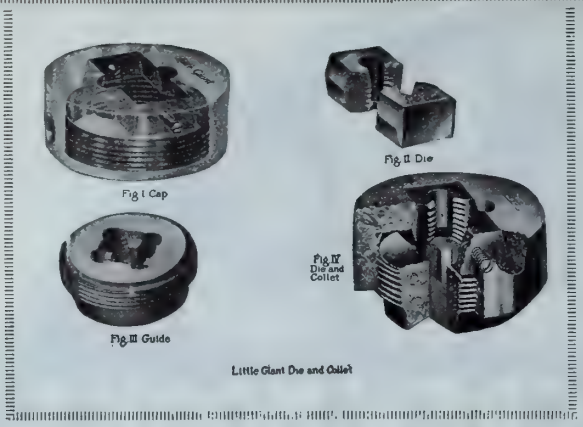
Little Giant



Little Giant Die and Collet

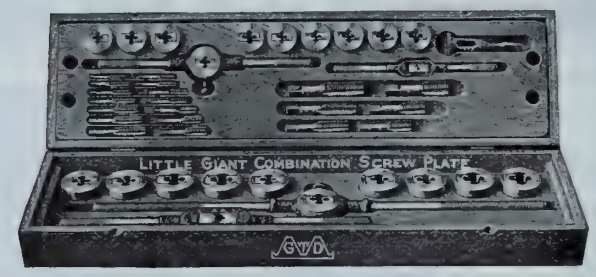
Screw Plates

Regiments of Repairmen "Fix it" with GTD tools

By fifty years of real service to the metal-working industries GTD has won a place of honor at the side of the *Man who makes things*, and the *Man who Fixes things*.

And we are proud especially of our service to the repair man, the *Man who Fixes things*, typified by the GTD "Little Giant" Combination Screw Plate shown herewith. Probably no thread cutting outfit has ever had wider distribution in every corner of the world than the "Little Giant."

We want to tell you more about GTD tools. Write for descriptive literature.



This is the "threading tool chest" that every repairman ought to have. Dies are adjustable to loose or tight fit, and are reversible in the collet.

Where the Buyer Benefits

How More Favorable Buying Conditions Are Being Created by Advertising in This Paper at This Time

Through regular advertising, sellers are making buying opportunities, instantly available. By publicly committing themselves in their advertising, they are giving you a strong assurance of faithful performance.

Advertisers are cutting sales costs through the use of advertising as a SALES MACHINE just as they reduce production costs by improved machinery methods.

This means ability to make LOWER PRICES to you.

Advertising in a buyer's own paper caters to his convenience; it saves the buyer's time: it helps the buyer weigh and balance rival claims; when the salesman calls, it saves the time of both buyer and salesman by providing the foundation for intelligent judgment.

None but good concerns are admitted to the advertising pages of members of The Associated Business Papers, Inc.

The seller who is building reputation through advertising will jealously guard that reputation in every transaction, beginning with the merit of the merchandise.

Advertising indicates progressiveness, not alone in selling, but throughout the entire business.

By advertising, the seller is publicly displaying his ability and desire to serve you, instead of silently relying upon the necessity of the buyer to produce orders.

You are invited to consult us freely about Business Papers or Business Paper Advertising

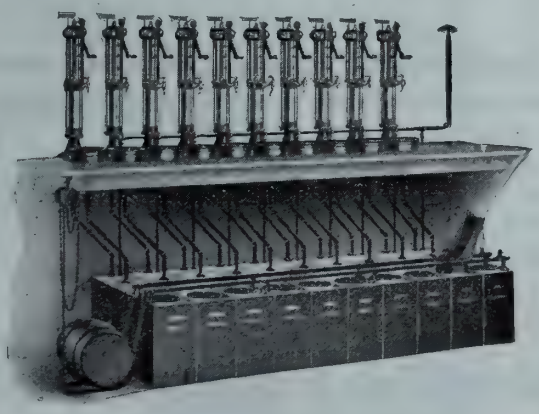
Bowser Oil Handling Equipment Pays Dividends

You are interested in eliminating waste and increasing your profit on paint and lubricating oil. Oils cannot be handled economically by the old fashioned methods.

Bowser Oil Storage and Handling Equipment is the remedy. The all-metal, evaporation-proof Bowser Tanks prevent leakage and gumming. The Piston-Type Measuring Pump delivers exactly the amount required, eliminating spillage. This absolute prevention of waste means worth-while savings.



And the same features which make Bowser Equipment economical also keep oils *clean*.

Let us show you how Bowser Equipment will put your oil business on a better profit making basis.

STAR HACK SAWS

This is No Time to Carry Excess Stock

In these days of careful buying and selling, wise dealers are cutting down their line to only a few brands of hack saws. Many find that they need no more than the Star Saws to satisfy every customer.

Owing to the early appearance of Star blades upon the market and their large distribution in advance of all other hack saws, they are subject to less selling resistance than other brands.

The leadership enjoyed by Star Hack Saws for 38 years makes this the logical brand for you to push.

Star Saws are now sold direct from the factory in Middletown, New York, where they have always been manufactured.

CURTIS AIR COMPRESSOR and TANK OUTFITS

Note these Special Features of this Garage Equipment:

1—**Controlled-splash, self-oiling system. No excess oil in cylinder, no external leakage or waste of oil, no oil gets into the tires. Enclosed crankcase keeps out dust.**
2—Uses about one-tenth of the oil used by any competing machine; saving in oil alone soon pays price of machine.
3—High and low level oil-filling gauge, so you can tell at a glance the amount of oil in the crankcase.
4—Fan flywheel cools cylinder; increases capacity.
5—Inspectable valves, light weight, large area.
6—Valves cannot drop into cylinder and wreck machine.
7—Hand unloader permits starting compressor against full tank pressure without burning out motor, blowing fuses or burning or jumping of belt.
8—Drop forged crankshaft. Adjustable, renewable, non-cutting die-cast bearings.
9—Head removable without breaking or bending any pipe connection or pipe fittings; only one gasket.

Welded Steel Pressure Tanks

For Air, Gas and Liquid

We make these tanks of best quality copper, steel welded throughout and thoroughly tested under Air Pressure to 300 lbs. before leaving our factory. Write for price list and further particulars. Send names of prospective customers to whom we may mail literature.

We also make baths, steel factory equipment, gasoline tanks, truck tanks, etc.

Arrowhead Saws

Vanadium Steel

How you sell saws depends partly on your salesmanship. You can sell a poor saw but once; to sell saws successfully and build yourself a permanent business you must sell good saws. To give good saws distinction and individuality they must have the desirable selling points of superior saws.

Arrowhead saws have those points; the hang, set, temper and finish are right, and they sell right. Arrowhead saws attract, sell and satisfy your customers. Their satisfactory performance in service creates confidence in your store, and in your other lines of goods.

The Publisher's Page

TORONTO MARCH 25, 1922

"You missed sending me last week's copy," writes a Western Canada city hardware merchant. "How do you expect me to do my buying when I haven't the weekly current Price List? Don't miss any more like that because in these times I can't afford to buy in the dark."

So writes an old friend of ours because he was not getting HARDWARE AND METAL. We were much concerned to think that any subscriber had been treated this way and investigated at once to find why.

And then we found it.

This merchant, though highly valuing HARDWARE AND METAL, had failed to renew his yearly subscription.

Invoices had been sent to him but they never got past the boy who opened the mail. A draft had gone to him in the usual business way, but he was out of town. And he had quite forgotten when his subscription fell due.

Now, HARDWARE AND METAL is audited by the Audit Bureau of Circulation who are very strict about carrying subscribers much in arrears—so when we got no reply from this retailer we were forced to believe he had no further use for the paper, and so stopped sending it. Then he was angry with us.

When renewals are sent in promptly, all this inconvenience is saved. The subscriber continues to receive his paper and is not annoyed by missing copies he may be specially interested in—for it's always the special copy that you wanted most that got lost, isn't it.

We'll send you a regular invoice in plenty of time before your expiration. Then—

Just a cheque pinned to your letterhead—a three-cent stamp and the thing is done for another year.

No trouble, no inconvenience—everything business-like and accurate.

And your trade paper—your business newspaper—always at your elbow!

Hardware and Metal Circulation Dominates in Western Canada Because:—

Hardware and Metal is the *only* hardware paper giving a weekly market service from Winnipeg.

Hardware and Metal is the *only* hardware paper giving a weekly news section for Western Canada.

Hardware and Metal is the *only* hardware publication giving the trade in Western Canada a weekly market service from Montreal, Toronto, Hamilton, London and Pittsburgh —and Westerners are even more interested than any others in the activities in the primary markets of the East.

Hardware and Metal is the *only* publication in Canada giving the Western hardware trade a weekly service covering the activities of the hardware trade in a National way.

Hardware and Metal is the *only* hardware publication giving the Western Canada trade a weekly market service on paints, oils, varnishes, etc.

Hardware and Metal is the *only* hardware publication giving the trade any Western Canada weekly information regarding, "What Other Merchants Are Doing," Legislation, New Hardware Goods, Illustrated Articles on Display, Advertising, Etc.

Hardware and Metal during the twelve months of the year, supplies the Western Canada hardware trade with more market information, more new goods information, publishes more illustrations of window displays, store interiors, and retailers' advertisements than all the other Canadian hardware trade publications combined.

Incidentally, Hardware and Metal is the *only* hardware trade publication in Canada that will supply you with an Audit Bureau of Circulations statement, thus proving what it really has in the way of circulation in Western Canada.

MORAL—*If you are interested in Western Canada trade, advertise in the paper that is read by the Westerners and has gained its present dominating position in the West, as well as in other parts of Canada through 34 years of honest effort to give the trade each week the best in hardware trade newspaper service.*

There are many reasons why Hardware and Metal covers Western Canada as thoroughly

Retailers Sales Tax is Now Suggested

Much Opposition at Ottawa to Extension to Retailers of Present Sales Tax—Suggestion That Wholesalers and Manufacturers Sales Tax be Merged Into Single Tax Covering Final Sale to Retailer—Proposal to Reduce Tax on Imports From 2% to 1½%

Editor's Note:—In connection with the forthcoming taxation plans of the government at Ottawa which will shortly be made known, the suggestion of a retail sales tax, being an extension to the retail trade of the present sales tax now applying to wholesalers and manufacturers, has evidently been put forward according to the political correspondent of The Financial Post in this week's issue. Developments at Ottawa in connection with this suggested tax and also with regard to a proposal that the two taxes of 1½% each on the manufacturer and wholesaler should be changed to a single tax covering the final sale to the retailers, are dealt with in detail in the following article:

OTTAWA.—Whatever amendments may be made to the Acts dealing with income and other war tax revenues, the opinion prevails at the Parliament Buildings that a retail sales tax has no earthly chance of being considered seriously and brought forward as a government measure this session. Indeed it is hardly a matter of temporary hesitation; the reasons that are held to be strong enough to prevent action for the present seem likely to weigh just as seriously for the future.

The argument that naturally carries the greatest weight around the buildings is that a retail tax, say of one cent for every one dollar purchase, is an impossibility from a political standpoint. This is a very direct form of taxation as the present tax on the manufacturer and wholesaler is not, and a close student of taxation ventured the assertion that such a tax if imposed "would render every corner store throughout the country a hot-bed of opposition to any government that dared to place it on the statute books." If this is a correct summary, such a tax proposal runs up against a veritable stone wall of sentiment among the legislators.

Hard to Collect; Might be Dodged

From a department standpoint the chief objections appear to be the difficulty of collecting it thoroughly, and the openings that would exist for violating the act. It is pointed out that the present corporation tax and the old excess business profits tax with the graded scale, applied mainly to the centres of population, and that taxing officers could be maintained at local points and supervise individual cases with comparatively little trouble or expense, while a tax applying to dealings in every retail store in the country would require a large army of men to enforce. On the other hand this argument loses some force when it is considered that the enforcement of the penalties provided would act as a fairly efficient detective even where the department officers could not visit every store, while the collection of the income tax covers an infinitely wider field and one that naturally is far more difficult to check up. And yet it is believed the proportion eligible to pay this income tax is being reached in a steadily increasing percentage of cases.

Object to Any Decreases

In the meantime proposals are being made that the two taxes of 1½ per cent. each on the manufacturer and wholesaler should be changed to a single tax covering the final sale to the retailer, that is the manufacturer if he sells direct to the retailer, or the wholesaler. In the latter case there would be no tax on the sale from the manufacturer to the wholesaler. Another proposal is to reduce the tax on imports from 2½ to 1½ per cent. To all these proposals an objection is raised that the revenue from the tax would be decreased. Mr. Crerar proposed the abolition of the sales tax entirely, but brought forward no alternative form of taxation, and—the government needs, and must have the money.

There is all the more determined attitude not to cut down in any direction this sales tax, as it is felt that for 1921 and 1922 and perhaps for some years to come, the income tax will decline considerably over what is regard as "the high water mark of 1920."

May Drop 40 p. c.

The 1921 tax will start to be paid on April 30 next, and one estimate made for Hardware and Metal was that it would not net more than 60 per cent. of the previous year's, as a result of profits being cut down, and salaries and mechanics' wages.

Revenue of Over $100,000,000

It is possible now to get a fairly correct estimate of what this revenue will be for the fiscal year ending March 31, 1922. Up to the end of February the amount collected in the eleven months, was $75,887,025, of which $1,770,538 came into the treasury in February, or about 2½ per cent. A total approaching $78,000,000 may be received.

For the corresponding 11 months of 1921 the receipts were only $32,666,940, and for the twelve months ending March 31, 1921, $46,381,824.

Business Profits About $24,000,000

The business profits tax will continue to filter in for a whole year or so, and the $20,696,676 received up to the end of February may run up to $23,500,000 or $24,000,000 by the end of March, making a total exceeding $100,000,000 for the two. This compares with a total of $40,841,401 business profits tax for the twelve months ending March 31, 1921. For the fiscal year of 1921 the total of the two taxes was $87,223,000, so that the 1922 total will run ahead at least $15,000,000. With the business profits tax not applying except for arrears and superseded by the "corporation" tax with lower returns, and the income tax certain to drop, the prospects are that the 1923 fiscal year will see the total far below that even of 1921.

No proposals, therefore, to lighten the present load, seem likely to meet with much Departmental approval.

War Stocks of Metals Still Appearing

Current Consumption of Ingot Metals Still Far Below Available Supply—Prices on Most Ingot Metals Show Considerable Declines Since Beginning of This Year—Loss for Those Who Made Commitments in January

ACCORDING to the opinion expressed to Hardware and Metal by certain prominent dealers in metals, the recent developments in the ingot markets reflect the salient feature that the volume of current consumption continues to remain far in the rear of the visible supply.

"Just when a small streak of daylight seems to be breaking ahead," stated this jobber, "the clouds of depression again darken, huge stocks of war-surplus materials being dumped on the markets at intervals by various governments."

The result is the almost chaotic conditions which exist to-day, and the realization that considerable time must elapse before conditions surrounding ingot metals in general will be removed, and the markets come "out of the woods."

Prices Sag

Quotations on copper, tin, lead, spelter, antimony and aluminum, have recently continued to sag, and it is now noticeable that the prevailing levels are much lower comparatively than the prices which existed at the commencement of the present year. This applies to both the domestic and primary markets.

The natural outcome of such a conditions is to destroy the buyer's confidence and shake the consumer's faith in future commitments. It also entails large losses for both large and small metal dealers, and the opinion was expressed that the war-profits of many such corporations is to destroy the buyer's confidence continued depression and dullness evident during recent months.

It was also pointed out as an example that in January, copper, tin, spelter and antimony, were all quoted higher than the prevailing price levels, with the result that the buyer who went into the market at that time and placed commitments for two or three months delivery, is now faced with a situation entailing a direct loss. It is apparent that the financial position of the purchaser would have remained infinitely better had less courage in this respect been displayed.

Cautious Attitude

Examples of future contracting undoubtedly tend to tone up the markets in normal times, but it was stated that when such ventures result as outlined above, it is usually reflected in the adoption of an extremely cautious attitude on the part of buyers in general, and through current orders covering immediate requirements only. Consequently, the flat appearance of the prevailing market is accounted for, and prospects for improvement in the future primarily depend upon the ultimate removal of such restrictions to both market freedom and consuming demand.

Following the easier prices noted on ingot metals in general, the view is still expressed in certain quarters that such quotations can hardly sag any further, and that the present levels represent a full measure of liquidation, and will likely form the basis of recovery in many respects. In this connection, however, it is noted that similar expressions were tabulated some time ago, with the result that metal speculators in general are continually searching for any stimulant which will give a semblance of improvement, however temporary, to the market.

Speaking of the possibilities regarding active construction work throughout the coming season, attention was drawn to the lack of commercial building upon an extensive scale, and while a large number of small erections are undoubtedly under way, in the aggregate this condition only left a minor opportunity for contracting of a volume sufficient to reflect stimulated activity in the metal industries.

SPRING GOODS MOVING

Kingston, Ont.—Local hardware dealers are this week aggressively advertising paint and the slogan "Save the Surface and You Save All," is again to the front. Another slogan used is, "A coat of paint will cover up all the worn places and make your home look bright and clean for spring."

All the merchants report quite a brisk business the past week in spring goods.

Think Their Employees Hold The Record

SEVERAL lists of long service employees among various firms have appeared recently in Hardware and Metal. In this connection the following letter and list has been received from Walter Woods, Ltd., wholesale woodenware, Hamilton, Ont.:—

Editor, Hardware and Metal,
Toronto.

We have been very much interested in several lists of "old employees" which have appeared in Hardware and Metal during the past year, especially one on Dec. 17 and one in February last.

We have always thought that our employees held the record for long service in the wholesale trade and are submitting a list of their names and length of service. Every one on the list is at present and has been actively engaged in our business for time mentioned.

If any other firm in the wholesale trade can beat our record we would be pleased to hear from them.

Group Selling of House Cleaning Needs

Official Spring Opening Brings Heavier Trade for Usual Housecleaning Requirements—Wholesalers Report Activity—Group-selling Brings Good Results, Including Electrical Labor-Saving Devices—Paint Will be Next Active Line

THE official opening of Spring this week brings the commencement of a more active period in the hardware store. After the quiet winter months, the latter part of March ushers in the season of early Spring business, marked by a more active movement of house-cleaning requirements. This line of merchandise, which the housewife requires almost annually, is confined for the most part to the hardware store. There are mops, pails, brushes, polishes, polishing mops, carpet sweepers, carpet beaters, clothes lines, brooms, paint, varnishes, stains, wax, etc., etc., all of which are to be found in hardware stores.

"It takes very little of such weather as we have enjoyed during the past week, to bring about a buying movement in seasonable lines," said one large wholesaler to Hardware and Metal. "While still a little early to expect the opening of Spring, it reminds us that the more active season for the trade is fast approaching, and in a few weeks we will be in the midst of Spring in earnest."

Lines such as outlined above were stated to be best sellers, each and every order having more or less of these goods included. "From every appearance, we will have a repetition of last year's buying methods, orders generally are for small quantities which will likely be followed by repeats throughout the season," he continued. An instance of this was pointed out, where polishing mops were laid out in quarter and half dozen lots. These same customers buying in one and two dozen lots in former years.

Retailers in Line

Retailers, too, have already realized what the present month brings about. Although there is still some ice and snow in some districts, store windows announce the approach of warmer weather, these being now dressed featuring spring household goods. Speaking with a hardware merchant in one of the outlying sections of the city, he stated that actual purchases of these lines were not yet very numerous, but interest on the part of women passers-by was manifest in the manner in which a number would hesitate in front of the store, and comment if accompanied by another person. Getting the housewife interested at this season usually brings good results all through the following months, according to this dealer. The first purchase is likely to be some article now on display, which had come to her notice when passing, but this would only be the commencement. There would be the painting and renovating period for her, which usually lasted until the warmer weather of the summer months.

Group Selling

The window was featured by price tickets on broom handles, in front of a group of articles, or in a pail containing scrub brush, bottle of polish, etc. Cards read as follows: This group $1——; pail, mop and brush, $——; Polishing mop and polish, $——; Clothes basket, 3 dozen pins and line, $——. The woman buyer usually required more than an individual article in these goods when commencing her housecleaning and by offering suggestions, through grouping in this way, sales of an article were very often made where otherwise some item might be overlooked. When asked if any reduction was made in the total price quoted, he said that in some cases there was a "knocking-off" of a few cents, but the idea was not a sale, and the slight reduction was only offered to encourage quantity buying. Each individual article was clearly marked showing the price, and the purchaser could see the advantage herself. In this way the advantage worked both ways, the store benefiting by the number of articles sold, and at the same time it was not a price-cutting idea.

Electrical Lines Featured

This merchant also makes a practice of featuring a number of electrical lines in connection with house-cleaning, particularly from the standpoint of labor saving. Vacuum cleaners, electric washers, etc., will help greatly to lighten the burden of spring cleaning and may be grouped with other seasonable lines at this time.

The first paint window of the spring season will be dressed this week, as a

Continued on page 31

Grouping various lines of housecleaning necessities is an effective way to stimulate business. Note how a number of necessary lines for spring cleaning are arranged herewith including mop wringers, pails, galvanized cans, carpet sweepers, washing machines, etc.

Collection of Interest on Overdue Accounts Insecured by Trade Form

Editor, Hardware and Metal:

I am getting out a new counter check book and wish to ask whether, if printed on this that interest will be charged on overdue accounts it would be legal without any signature of the purchaser to that effect.

Judges here take the stand that interest cannot be charged on open accounts even though it be past due, unless it is covered by an agreement to that effect or by note or by judgment. Kindly give me this information.

(Signed) J. W. Richardson,
North Bay, Ont.

THE LEGAL rate of interest is 5 per cent. where no other amount is mentioned in the undertaking. A maximum of 1 per cent. a month or 12 per cent. a year is allowed by law to be stated. It is necessary that the rate of interest on overdue accounts be agreed to in writing by the debtor in some way. This appears to be the law as it applies to the province of Ontario. However, each province and state has its own mercantile laws so that it would be necessary to obtain legal opinion on these.

It would therefore appear that merely placing the words "interest at 7 per cent. per annum charged on overdue accounts," on statement form does not give the seller proper legal protection in the matter, though it is the accepted business policy to do so. It would be necessary that this should appear on a contract or some such signed document.

The following advice on this point is from a legal authority on the subject:

"In cases where collection is made without suit, the laws of Canada do not allow for recovery from debtor, of the charges sustained by you.

"Where suit is undertaken, the party defending, should the action prove successful, is bound by law to pay whatever expense the court has been put to. In certain cases, the doctor is also bound to pay some of plaintiff's attorneys fees, but never commission on the amount recovered for the plaintiff. In the Division Courts of Ontario, debtors pay actual court costs, but you are held liable for commission and attorneys' fee for conducting the action. The latter varies anywhere from $3.50 to a full 10 per cent of the amount involved.

Must be Undertaking by Debtor

"With reference to interest, the legal rate of 5 per cent applies automatically to any note, acceptance or judgment. You are quite within your rights in asking for 7 per cent. on overdue accounts, but you cannot enforce payment of same, not even 5 per cent. unless the other party signifies his willingness to the arrangement—in other words there must be an undertaking on the part of the debtor, to pay interest before you can enforce the same."

A recent ruling on this subject given in Saskatchewan is as follows:

The rule in allowing interest is founded either on the ground of (1) a contract expressed or implied to pay interest, or (2) as damages for the improper withholding of money or for the breach of some contract or violation of some duty, or (3) where it is given under the provisions of some statute.

Chapter 39 of the Statutes of Saskatchewan, being King's Bench Act, is the statute which deals with interest in Saskatchewan, and in section 28 it provides that interest shall be payable in all cases in which it is now payable by law or in which it has been usual for a jury to allow it Subsections 1 and 2 of section 29, however, are the sections which we would be particularly interested in, as subsection 1 provides that upon the trial of an issue or upon an assessment of damages, upon a debt or sum certain, payable by virtue of a written instrument at a time certain, interest may be allowed from the time when the debt or sum became payable; while subsection 2 provides "if such debt or sum is payable otherwise than by virtue of a written instrument at a time certain, interest may be allowed from the time when a demand of payment was made in writing, informing the debtor that interest would be claimed from the date of the demand."

Some Cases in Point

In Hart vs. Greer, 9 W.W.R. p. 709, the district court judge held that the printed words on an account, "interest at 10 per cent chargeable after thirty days," together with verbal references to these words and notification that interest is being charged, constitute a demand in writing sufficient to support a claim for interest after the expiration of the thirty days.

In the Last West Lumber Company vs. Haddad, 9 W.W.R. p. 578, the Supreme Court en blanc of Saskatchewan held that in all cases where, in the opinion of the court, payment of a just debt has been improperly withheld, and it seems to be fair and equitable that the party in default should make compensation by payment of interest, it is incumbent upon the court to allow interest for such time and at such rate as the court may think right.

In Marshall Wells vs. Eaton & Gordon, 8 W.W.R. p. 789, the district court judge of the Calgary Judicial District stated in his judgment as follows:

"It has also been held that a general intimation on a tradesman's statement of account, that interest will be charged after a certain period of credit, is not a sufficient notice of demand of interest within s. 28 of 3 and 4, William IV., ch. 42, in re Edwards, Williams vs. Trench, 61 L.J., ch. 22. This decision still stands as an authority on this particular point, but in so far as it decided that an agreement to pay interest would not be implied by the courts (in respect of moneys due on an account for goods sold and delivered) from the past dealings of the parties, it has been overruled by the Court of Appeal, in re Anglesey, Wilmot vs. Gardner (1901), 2 ch. 548, 70 L.J., ch. 810, which lays down the same principle as that contained in Higgins vs. Sargeant and Nichol vs. Thompson, that an agreement to pay interest may be reasonably inferred from the previous dealings of the parties, and that in such cases it is recoverable."

In that case he decided that in the absence of some special usage of trade or of some stipulation expressed or implied, a trader is not entitled to interest on the price of goods sold and delivered. An agreement to pay interest, however, may be reasonably inferred from the previous dealings of the parties, coupled with a printed notification of intention to charge interest on the vendor's statement of account.

In the case, Marschall Wells vs. Eaton & Gordon, the plaintiffs had printed in heavy type on their statements the words, "Interest at 8 per cent. charged on all overdue accounts," and the judge found as a fact that the defendants were in the habit of making payments from time to time on account of their indebtedness, and that, although they were aware that interest was being charged to them, they evidently did not wish to force the issue of their liability or non-

Tee Intersecting a Scalene Taper

Patterns drawn for Hardware and Metal by O. W. KOTHE, Principal St. Louis Technical Institute, St. Louis, Missouri

IN this problem we have a peculiar fitting, by developing the parabola lines in plan in relation to the way the lines from the tee of elevation cross the radial lines, it is possible to say, a third view known as a diagonal face view.

So we first draw the side elevation, making the bottom and the top bases to the desired sizes then extend the side lines to the apex X.

Next describe the plan showing the large circle for base and divide in equal spaces. From points 1-2-3-4, also 2′-3′ draw lines to the apex X′. Observe we draw to this point since the elevation is straight on the back and the apex X would be in this point in plan.

From points 1-2-3-4 of plan, erect lines to the base of elevation, and from here extend them to the apex X. Now notice elevation line X-I corresponds with X′-1, and that elevation X-2 corresponds with plan line X′-2. In the same way elevation lines X-3 and X-4 correspond with plan line X′-3 and X″-4.

Now by drawing the center line of tee of elevation and describing the section M equal to the diameter of A-B, or whatever measurements are called for, and dividing this section in equal spaces, we project them parallel with center line to elevation.

Observe where these branch lines cross the elevation radial lines we must develop parabola lines in plan, so from elevation as in points a-b-c-d-e-f-g, we drop lines into plan vertically, X′-1 in points a-b-c-d-e-f, etc.

Next from points h.i.j.k.l.m. of elevation drop points vertically to lines X′-2 and X″-2′ in plan as shown. In the same way drop lines from the points o-p-q-r-s-t-u from elevation onto lines X′-3 and X′-3′.

This is also repeated with the points v-w-x-y-z etc. which are dropped on the plan line X′-4.

Now through these intersections thus made on these plan lines draw the parabola lines as shown. After this draw the axis line for tee in plan and reproduce section M as N with all its points and square lines into plan, thereby crossing parabola lines of similar number.

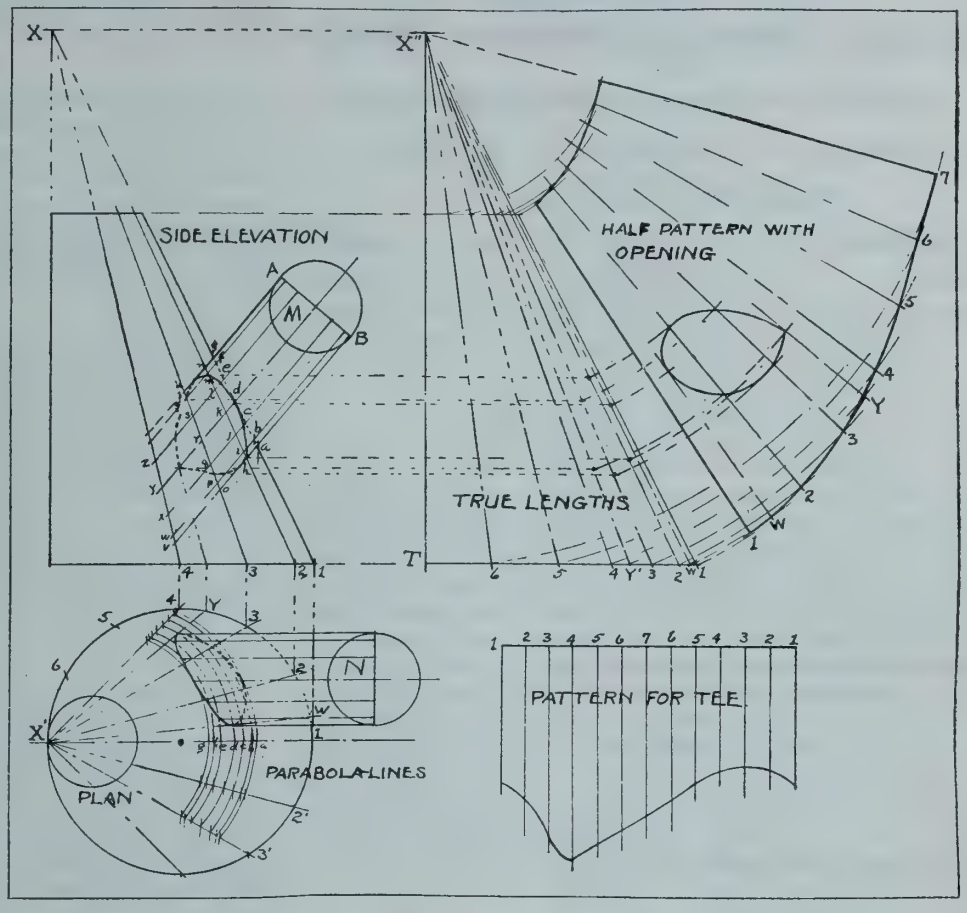
This permits drawing the miter line in plan and gives the points of penetration between the tee and the cone in plan.

By erecting lines from these points into elevation, branch lines, we thereby establish the intersections for that miter line as shown. From here on the pattern for tee can be developed much the same as all other tee patterns, by picking the lines from elevation or from A-B to those points in miter line and setting them off into stretchout as shown. This gives the miter line as the tee must fit on the cone.

But to lay out the body for cone we must develop the true lengths and for this we draw vertical line as X″-T-1. From plan we pick the plan lines as X′-1, X′-2, etc. to X″-6 and set them as T-1-2-3-4, etc.

Where the throat and heel of miter line in plan take place, we draw tangent lines from X′ to the extreme points as Y and W and these are also set in the true lengths. Then by using X″ as center we describe the arcs in their successive radius as shown.

By picking the girth spaces from plan as 1-2-3-4, etc., we start with arc 1 and walk from one arc to the other as 1-2-3-4, etc. When the base line is traced the points W and Y are set in and the radial lines are drawn to X″. After this the opening can be described in place as shown, as well as the upper base developed.



The Intersecting Scalene Taper

HOUSE CLEANING NEEDS

(Continued from page 29)

close "follow-up" to the display of spring cleaning necessities. From past experiences it has been found by this merchant that paint and varnish sales, for inside use, commence directly after the annual house-cleaning is started. In this window floor paints, flat wall paint, and varnish stains will be featured, also wax and other polishes, because too much display cannot be given these lines in the following weeks. They are now included in the other window trim, but can be termed paint products, and will fit in well in a paint display. In featuring paint at this season, and the immediate weeks following, it was the woman custom that would be catered to, outside painting, entailing trade from the opposite sex, being taken care of at a little later date.

GLASS PLANT TO BE EXTENDED

The Pilkington Brothers glass works at Thorold, Ont., have been closed down temporarily in order to allow the rebuilding of furnaces and making extensions to the plant.

Want More Protection

THE LINSEED crushers of the United States are in somewhat of a dilemma at present due to rapidly changing conditions in this industry. A short time ago an emergency tariff was placed by that country against importations of flax-seed, but it is noteworthy that this tariff has not affected importations of Canadian flax-seed to much extent. The present situation is that while the U.S. trade was supposed to be protected by this emergency tariff of thirty cents a bushel on flax-seed, the tariff on linseed oil was left at ten cents a gallon and recently there has been a big increase in the importations into that country of linseed oil from Europe. The industry which was expected to thrive under its emergency tariff legislation is therefore faced with the necessity of closing down several of its plants until further tariff protection is given. The outlook for Indian crop flax-seed is said to be good and will likely offer stiff competition for Argentine flax-seed in the world's markets this season.

Need Broader Vision

THE PENDING legislation in Quebec Province having for its object the elimination of trucks from rural roads which represent a load of more than 5,000 pounds seems rather restrictive and a somewhat narrow policy in these days when much of the future prosperity is expected to be the outcome of facilitated transportation and development of such channels of commerce as motor truck transport. The automobile is fast developing into a commercial necessity from a transportation standpoint, likewise the motor truck for the conveyance of merchandise. The latter is somewhat limited compared with trains and electric lines though in the time of the railway strike in the United States the motor truck was used in place of trains and stood the strain admirably. The trend is toward the wider use of motor trucks and automobiles and the necessity is for substantial roads which will withstand the traffic which the future will bring. Three ton trucks are common among business houses to-day, whether retail, wholesale or manufacturers. For hardware purposes nothing less than a three-ton truck is of much use for distance hauling. Therefore, if such legislation as is pending in Quebec, eliminating loads over 5,000 pounds on rural roads, is to be taken as a precedent, it is legislation which is far from being in keeping with the progress of the times. Money expended by our governments on roads is probably one of the best investments which can be made in the interests of succeeding generations, but sturdy, durable construction is needed which will be able to withstand reasonable traffic strain. It should be borne in mind that a road which will not stand a load of over two and one-half tons will not long stand the traffic of ordinary passenger automobiles many of which when loaded will weigh very close to that figure.

MOTOR TRUCK manufacturers after studying the question have agreed that the three-ton truck is admirably suited for certain requirements in the transportation of merchandise and this type of truck has become more or less standardized, particularly in connection with the hardware and similar trades. It would therefore be a severe handicap to business in many sections of the country were such restrictive legislation to be put into effect where higher standards of road construction are the real need.

* * * *

THE PAST week has seen further improvement in the iron and steel trade from the standpoints of business and operation. Prices also are stronger though the 1.50c basis on plates, structural shapes and bars for which more large U. S. producers are holding is not established thus far by important transactions. March tonnage is well in advance of February which was the best month in over a year. Production of U.S. producers is now working toward the 70 per cent. mark.

* * * *

PLANS ARE under way for the organization of local Clean Up, Paint Up Campaigns in Toronto, Winnipeg and other Canadian cities, this spring. Co-ordinating the efforts of merchants in various lines with that of property owners, city officials and others is a splendid way to put across such campaigns, and the hardware merchant stands to gain considerably thereby. Some who have planned such campaigns have been bothered on several occasions by bad weather during the week set aside for the campaign but the stand should be taken that such campaigns are to influence public opinion along certain lines and to start a movement which is much more comprehensive than anything confined to any one week.

* * * *

THE ANNUAL report of the U. S. Steel Corporation, leading iron and steel producer in the U. S., shows a decrease in earnings for 1921 of eighty-four million dollars while the output of all raw, semi-finished and finished products showed marked shrinkage. Production of iron ore mined decreased 59.2 per cent., manufacture of coke declined 39.4 per cent. and rolled and other finished steel products were reduced 44.8 per cent. Since the beginning of 1922, Judge Gary pointed out, new orders received have been equal to about one-half the total capacity of the plants of the company.

* * * *

CHAIN STORE stocks have been having a rapid advance on the stock exchanges recently, Woolworth stocks reaching, within the past few days, a record price. Both this firm and Kresge are said to be handling record business and increased cash or stock dividends are said to be in prospect. Woolworth business so far in March is said to be well ahead of last year. This situation indicates that while some retailers are sitting back complaining of the lack of business, those who are going after business aggressively are getting plenty of trade. Many retailers might well take a leaf from the notebook of such stores as those mentioned in connection with their methods of attracting customers and effectively displaying their merchandise.

* * * *

THOSE IN touch with the coal situation in Canada have little fear of the coal strike which is now scheduled to take effect on April 1, and the reasons advanced would seem to be adequate providing the strike is not too prolonged. Many industries have foreseen the strike and have piled up huge reserves of soft coal, and it is the opinion that a number of independent coal operators will continue to operate in the U. S. mines. The shutting down of the coal mines in Western Canada will have little effect on eastern industries, this output being largely taken up by the railways who have now passed the months of the heaviest coal consumption and who have considerable reserves on hand. Certain fuel companies are of the opinion that when the matter is finally cleared up there will have been little hardship from curtailment of soft coal supplies for industries, railways, etc., and that hard coal prices will then be lower.

News of Western Canada

For comment on Winnipeg hardware market tendencies see "WEEKLY HARDWARE MARKET REPORTS." For current prices see Winnipeg section of "CURRENT HARDWARE QUOTATIONS" in this issue.

Unseasonable Weather Affecting Coast Trade

Settlements Continuing to be Made on Last Year's Okanagan Fruit Trade Helps Credit Conditions—Building and House-furnishings Exhibition

VANCOUVER, B. C.—Interest in local hardware trade this week is centered around the Building and House Furnishing Exhibition which is being held under the auspices of the General Contractors' and Master Builders' Association which is affiliated with the Manufacturers' Association of B. C. 3,000 people visited the show the first session. This display which is said to be the most elaborate and comprehensive of any held on the coast, continued until March 25 when the final drawing for a $5,000 bungalow took place.

While the building trade is taking a leading part in the exhibition, wholesale hardware distributing houses are also showing their wares in a very attractive way—particularly those goods going into the proper fitting up of the home. For instance there are fine displays of builders' hardware which give the prospective home builder an opportunity of gaining ideas which otherwise would have taken him many hours of investigating.

The McClary Manufacturing Co. shows a line of stoves, ranges and furnaces, also electrical ranges, under the supervision of the B. C. manager, Jas. Galloway. The Vancouver Stove and Heating Co., is demonstrating its line of pipeless furnaces which are more or less a new thing on the coast.

Among the other exhibitors are the Gurney Foundry Co., Vancouver Gas Co., Westinghouse Co., Taylor, Forbes & Co. Ltd., J. A. Flett & Co., William Ralph, Ltd., Crane Ltd., and Clare Bros. & Co. Ltd. in addition to several large plumbing firms.

Wholesalers appear to be a little more optimistic as to trade conditions this week although the continued backward weather (it is fully three weeks behind last year), is unquestionably holding back trade. During the latter part of February collections were coming in fairly well and this condition is unchanged although some of the houses still report much difficulty in inducing the retail trade to settle. More settlements are being made on last year's fruit crop in the Okanagan with the result that part of this money is finding its way to the coast. Trade is said to be gradually improving although not nearly as fast as some of the leaders would like. The weather is given the blame.

Prices during the last fortnight have been inclined to weaken. Nails have been eased off to the extent of 30 cents a keg which brings the base cost to the retailer $5.10. Other lines, including tools are off from five to fifteen per cent.

Winnipeg Organizes Clean-Up Campaign

Hardware and Paint Interests Represented at Gathering to Organize Local Campaign—Merchants' Co-operation Asked

WINNIPEG.—A meeting to organize for the "Clean up and Piant-up" campaign was held in the Board of Trade building under the auspices of the Board of Trade. There was a good gathering, including representatives from all important organizations in the city, architects, builders, colleges and merchants. Mayor Edward Parnell and W. F. Tallman, street commissioner, were among the number present. C. H. S. Bamford, secretary J. H. Ashdown Hardware Co., acted as chairman of the meeting and W. E. Milner, secretary. Mayor Parnell impressed the necessity of hearty co-operating in a general clean-up of the city, with the object of its beautification and improvement. J. L. Paul explained a suggested plan for the campaign and mentioned some of the objects. It was decided to go ahead and a proposal was made that the activities be divided under various committees, finance, publicity, survey, women's affairs, health and sanitation and a municipal committee.

The work of the survey committee would be carried on largely by Boy Scouts and children and to create an interest among the rising generation, the committee will offer prizes for the best reports furnished. The municipal committee will have special charge of the street service and a further committee will be formed to secure support of real estate men and merchants. The campaign committee will also take up the question of city planning, sanitation in milk and dairy products, extermination of weeds and will also ask the city to provide receptacles for waste and rubbish.

Retail merchants will be asked to co-operate with window displays and in the supplying of all materials necessary for generally cleaning up the city. An interim committee was appointed to go fully into the question, formulate plans for the campaign and report to a further meeting to be held probably next week. The committee consists of W. F. Tallman, J. L. Paul, Mrs. Roxborough, of the Horticultural society, Alex MacIntosh, of the Boy Scouts, and Mr. Waller, representing the community clubs. Col. W. J. Simpson was appointed secretary. Mayor Parnell is honorary chairman of the campaign.

WESTERN CANADA NOTES

Prince Albert, Sask.—McCall Bros., wholesale oils, Toronto, have opened a branch here.

Senior officials of the Canadian Oil Companies, Limited, were in Winnipeg from Toronto attending a week's conference of western managers. Among the officials who came from headquarters were F. H. Littlefield, vice-president; H. F. Hoecker, secretary, and A. C. Morris manager of the lubricating department.

Seth Marshall of Marshall Wells and Co., Duluth, is here this week in connection with the purchase of the stock of Wood, Vallance & Leggat, Ltd. He has great faith in the future of Vancouver and it is said will extend the operations of his firm on the coast as business develops.

I. Taylor, of Taylor & Drury, Ltd., White Horse, Y. T., hardware dealers and general outfitters, is in Vancouver on his way home from a trip to the Old Country. He has been spending a few days here making the rounds of the hardware firms, buying for the year. He predicts a big boom in the Mayo district this year.

L. McGillivray, a manufacturer of oil gauges, of London, Ontario, on a business trip to the coast, says that he notes a much more optimistic feeling through the west.

Joseph Rodway, for many years proprietor of a sheet metal firm in Grandview, Vancouver, died this week at the age of 68. He had been a resident of Vancouver for thirty years.

Events in the Trade

TRANSFERRED TO ANOTHER STORE

Ottawa.—Fred Bonenfant, for 23 years on the staff of Cuzner Hardware Co., (Queen St. store,) and 8 years as manager, has been transferred to the Sussex St. store of this company in the same capacity.

PERSONAL

W. W. Sanderson, general sales manager of the Carborundum Company, Niagara Falls, N. Y., announce the appointment of Harry Fowler as district sales manager of the Cincinnati territory of The Carborundum Company to succeed Charles R. Cox.

JOINS THE BENEDICTS

Kingston, Ont.—Congratulations are being showered on Douglas Marshall Chown, of the firm of Edwin Chown & Company, hardware merchants, on the occasion of his marriage to Mary Christine Macphail, of this city.

OBITUARY

The death is announced of Colonel William C. Skinner at Hartford, Conn., who for many years was president of the Colt's Patent Fire Arms Mfg., Co., and twice chairman of the board of directors of that company. Col. Skinner suffered a nervous breakdown some months ago and went on a three weeks' trip to Havana, Panama and other points and had returned about a month prior to his death.

DEATH OF FOUNDER OF FIRST WIRE NAIL PLANT IN CANADA

Fred E. Marvin, St. John, N.B., whose death was briefly referred to in last week's issue of Hardware and Metal, was one of the pioneers in the wire nail business in America and helped to establish the first wire nail factory in Canada, which was opened in St. John, 34 years ago.

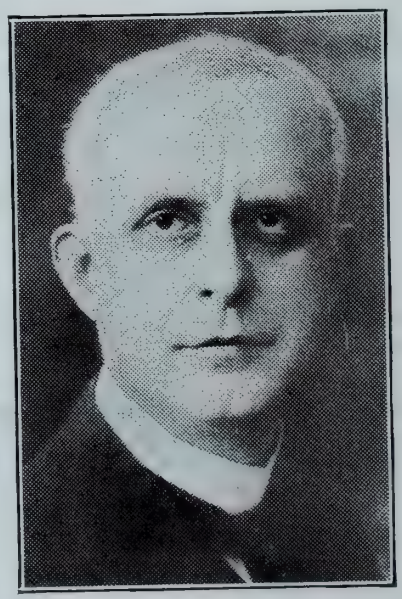
Mr. Marvin was born at Keysville, New York, in 1849. When a young man he moved to Chicago and entered the employ of the Northwestern Nail Co., learning the business from the ground up. In the year 1883 he went to St. John and with the late James Pendor started the first wire nail plant in the Dominion.

In the year 1895, he and Eben Perkins formed the Maritime Nail Co., and had been a director of that company from its formation. For seventeen years he was general manager of this concern. In 1912 he formed the Canada Nail & Wire Co., and established his plant on the West Side. Of this company he was president and general manager ever since its inception.

M. D. DESCHAMPS RECEIVES NEW APPOINTMENT

M. D. Deschamps has been appointed assistant sales-manager of Lewis Bros., Ltd., Montreal, in which capacity he will have supervision over the trade in the province of Quebec.

Mr. Deschamps' connection with this firm extends over a number of years, he being in charge of the heavy goods department seventeen years ago. He severed his connection at this time, however, to enter business for himself, and conducted a retail store on Mount Royal Ave. Five years ago he rejoined the firm as a travelling salesman, covering the Beauce district in the province, and it is from this position that he now receives his promotion. Mr. Deschamps is a past president of the Montreal Retail Hardware Dealers.



M. D. DESCHAMPS

Past president of the Montreal Retail Hardware Dealers Association, who has rejoined Lewis Bros., Ltd., Montreal, as assistant sales manager

THIEVES BREAK INTO STORE

London, Ont.—Thieves broke into the hardware store of William Gurd & Co., and stole several revolvers, some ammunition, and half a dozen razors, etc. The robbers gained entry to the store by removing the iron bars from a rear window.

FRANK E. ANSELL JOINS McDERMID BROS. LTD.

Frank Ansell who for the past 20 years has been connected with The Metallic Roofing Co. Ltd., Toronto, has resigned to accept a new position with McDermid Bros. Ltd., jobbers of roofers and tinsmiths supplies.

Mr. Ansell will give particular attention to the sheet metal end of the business.

The addition of Mr. Ansell who is taking a financial interest in McDermid Bros., marks another step forward in the development of this firm.

ALGOMA STEEL PLANT ON 60 PER CENT. PRODUCTION

W. G. Franz, president of the Algoma Steel Corporation, states that the company's plant is operating at about 60 per cent. of capacity, and while no important business is immediately in sight, Mr. Franz is hopeful of a gradual improvement throughout the year. If the railways experience any better business, he looks for a large volume of orders for railway equipment. There would be no rush of business in 1922, he declared, and not before the fall, at least, would there be any conspicuous development.

ONTARIO CORPORATIONS

Aluminum Specialty Co., Ltd., head office, Toronto, capital $100,000 to manufacture and deal as wholesalers and retailers in aluminum, metal and manufactured products.

Bison Chemical Co., of Canada Ltd., head office Bridgeburg, capital $10,000 to manufacture cleaning compounds, polish, soaps, etc.

Duffy Hardware Co., Ltd., head office Toronto, capital $100,000 to carry on wholesale and retail hardware, plumbing and furnace business.

Jem Rubber Co., Ltd., head office Toronto, capital $500,000 to manufacture and deal in all classes of manufactured rubber or gutta percha goods.

DETROIT HARDWARE FIRM LIKELY OPENING RETAIL STORE IN TORONTO

A new building of comparatively large dimensions is being constructed on the south side of Danforth avenue near Broadview Avenue, to be occupied about the first of May by a "first-class hardware store carrying sporting goods, builders' hardware, cutlery, etc.," according to the announcement appearing on the temporary construction around the building. Retail hardware merchants in the vicinity have been much interested in this development as the store will be one of the largest of its kind in the district and so far no public announcement has been made as to the firm which is to occupy it. Hardware and Metal understands that Couzens & Co., hardware merchants of Detroit, Mich., will occupy this building and carry on a retail hardware business. For some time rumors have been going the rounds that an "American" firm was interested in the new store.

HARDWARE MAN SAYS WEST IS MORE OPTIMISTIC

G. N. O'Byrne, managing director, Merchants Hardware Specialities, Calgary, was a recent visitor at Toronto office of Hardware and Metal. Mr. O'Byrne has spent the last three or four weeks calling on various manufacturers in Eastern Canada. Among the new agencies recently taken on by this company in Western Canada is that of the Western Cartridge Company of Alton, Ill.

These officials of H. S. Howland, Sons and Company, Toronto, are as follows: Centre, Peleg Howland, President; upper left, D. H. Foster, Warehouse Manager; lower left, C. E. Screaton, Sales Manager; upper right, T. B. Williamson, in charge of the purchasing department; lower right, W. H. Lamont, Secretary and Financial Manager.

IN ADVANCING *to the Board of Directors four of the officials who have been with the company for a number of years, H. S. Howland, Sons and Company have given direct incentive to the example of loyalty and service. The firm of which Peleg Howland is the head is prominent among Toronto wholesale hardware institutions. Mr. Howland is also President of the Imperial Bank of Canada. The four new directors referred to above are as follows: W. H. Lamont, T. B. Williamson, D. H. Foster and C. E. Screaton.*

W. H. Lamont entered the service of the company some nineteen years ago in a financial capacity, and is now secretary and financial manager. He has directed the financial affairs of the firm for a number of years.

T. B. Williamson is in charge of the purchasing department, a position in which he has become widely known throughout the trade. Mr. Williamson is a past president of the Canadian Wholesale Hardware Association. His entry into the firm of H. S. Howland, Sons and Company dates back some twenty-five years, when he became Toronto travelling sales representative. He succeeded to the purchasing department in 1912.

D. H. Foster, who is warehouse manager, also has a long service record of twenty-four years. He originally commenced in the warehouse, but graduated to the sales department. After a period of some ten years travelling experience, Mr. Foster was appointed to his present official position.

Sales Manager C. E. Screaton came to the firm almost ten years ago, and has continuously directed the interests of the sales department since that date.

Letters to the Editor

The Editor welcomes letters on any subject of interest to the hardware trade.

MacLean Publishing Co., Ltd.,
Toronto, Ont.

I have received the Jan. 14th issue of Hardware and Metal, for which I wish to thank you. In this issue you have a very good information on the Province of Quebec, which is very instructive. I would suggest that reports on the other Provinces of our Canada, appear in your issues. (merely a suggestion).

A. A. Leteller, Kingan Hardware Co.,
Peterboro.

WESTERN MERCHANT SAYS SALES TAX A BURDEN

Re Tax Legislation. We have the same opinion re the collection of the "Sales Tax" as we had on the "Luxury Tax" and that is that it should be collected from the manufacturer or source of supply. This tax would then be collected at lesser cost, and distributed more equitably.

We find the present method makes it difficult to absorb and as a result, a decided burden to us.

With regard to merchandise which carries a set retail price, these resale prices should be revised to take care of tax.

Wishing "Hardware and Metal" every success in its fight for the interest of the retailer.

Falconers, Ltd., Winnipeg.

WHY "MADE IN JAPAN?"

Editor, Hardware and Metal,
Toronto.

I was greatly interested in an article in a recent issue of Hardware and Metal regarding the U.F.O. Mr. McGregor, of Oakville, in his letter referred to the inconsistency of the farmers in urging that we keep Canadian factories busy, but at the same time a branch of one of their organizations has bought binder twine from Ireland. From my observations inconsistency is not confined entirely to the farmers

I have been attending the hardware convention of the Ontario Retail Hardware Association for many years. At the big banquet which has been put on at these affairs, it has been customary for some of the manufacturers to place souvenirs of various kinds on the banquet table for the visiting hardware men. As a rule these are souvenirs turned out in the plants of the various manufacturers. At the banquet held in Hamilton last month there were several of these souvenirs. One, an ash tray produced at the plant of an Eastern Ontario manufacturer. Another was a menu on a steel hinge nicely finished and supplied by a Hamilton manufacturer. The third was a novelty in the form of minature fowl including ducks, roosters, chickens, etc., handsomely painted and decorated and mounted on a small bellows which when pressed together made a squeaky noise and attracted attention. This novelty, which at first created considerable amusement was supplied with the compliments of a Western Ontario manufacturer which devotes a great deal of literature, etc. to boosting "Made-in-Canada" goods. The novelties created considerable amusement and humorous comment until a number of those present in examining the souvenirs looked at the bottom side of it and noticed the following in large letters, **"Made in Japan."**

What is the answer?

Retail Hardware Merchant.

Hardware Letter Box

Information on trade topics will be gladly supplied to subscribers through this department.

COTTON BAGS

James Cowan & Company, London, Ont.—

With reference to your recent inquiry as to the manufacturers of cotton bags. We regret that the name of the Woods Manufacturing Company, of Winnipeg, Man., was omitted, in error, from the list of firms supplied you on that occasion.

WIRE FRAMES FOR ELECTRIC LAMP SHADES

The Iroquois Falls Merchandising Co., of Iroquois Falls, Ont.—Please advise us where we can purchase wire frames for making electric lamp shades.

Answer.—We would refer you to Messrs. Edward Craven Wire Goods, 35 Church Street, Toronto, Ontario.

PORTABLE CHEMICAL FIRE ENGINES

Frank Dafoe, box 210, Madoc, Ont.—Will you please advise where we may procure a portable chemical fire engine or extinguisher?

Answer.—We are placing your enquiry before the American La France Fire Engine Company, of Toronto.

ELECTRIC INCUBATORS

Messrs. C. B. Brown & Company, Aylmer, Ontario—Kindly give us the name of a Canadian manufacturer of Electric Incubators.

Answer—The Model Incubator Company, 196 River Street, Toronto.

SAW FRAMES

Messrs. Spadoni Bros., Box 89, White River, Ont.—Please let us know where we can obtain Saw Frames.

Answer—In connection with manufacturers of Saw Frames, we would refer you to the following firms: Gibson Manufacturing Co., Guelph, Ont., Goold, Shapley and Muir Co., Brantford, Ont.

PRAIRIE STATE INCUBATOR

Wallace Anderson, Simcoe, Ont.—Could you tell me where the Prairie State Incubator is made, and the address of the firm?

Answer—Our information is that this is made by Prairie State Incubator Company, Homer City, Pa.

WHY NOT A COAL OIL CLUB IN YOUR TOWN?

Many merchants have often asked what advantages have accrued from a coal oil club as conducted by a hardware merchant, and enquired for details concerning the formation of such an organization.

In next week's issue of Hardware and Metal, Francis McIntyre, hardware merchant at Whitby, Ont., will tell how he has successfully formed a Coal Oil Club, how it is conducted, how he is protected from loss, what effect it has in stimulating trade in coal oil and how its advantage can be broadened out to include other hardware items.

You will be interested in this article in the April 1 issue.

"LEADER" COOKING STOVE

R. Chestnut & Sons, Limited, Fredericton, N. B.—Kindly advise us the manufacturers of the "Leader" Cooking Stove.

Answer—Our information is that this is made by the Thos. Davidson Manufacturing Company, Montreal. Their "Leader" Cooking Stove is listed under the trade name of "Premier Leader."

MAPLE LEAF MFG. CO.

G. M. Fischer, Preston, Ont.—Kindly let me know if the Maple Leaf Mfg. Co., of Toronto, is still doing business.

Answer—The location of the Maple Leaf Mfg. Co. is listed as Lachine, Que. They also have a branch office at Montreal.

SNOW SHOE MANUFACTURERS

Brace, McKay & Co., Ltd., Summerside, P.E.I.—We understand that there are several manufacturers of Snow Shoes in Canada and we would appreciate it if you would supply us with their names.

Answer—We are pleased to quote you the following firms: Maurice Bastien, Loretteville, Que.; Chestnut Canoe Co., Fredericton, N.B.; Holt Renfrew Co., Quebec; J. B. Laliberte, Quebec; Isidore Pouliot, Quebec; Henry Ross, Indian Lorette, Quebec; Woods Mfg. Co., Ltd., Ottawa.

GAS LIGHT FIXTURES

R. E. King, Maitland, Hants County, N.S. —Could you give me the address of firms making Gas Light Fixtures?

Answer—We are pleased to quote you herewith the following list: Barton Netting Co., Windsor, Ont.; Bennett & Wright Co., Toronto; Consumers Gas Co., Toronto; Farquhar Bros., Halifax, N.S.; Galt Electric & Gas Fixture Co., Galt, Ont.; The Garth Company, Montreal, Que.; W. J. McGuire, Toronto; The Robt. Mitchell Co., Montreal, Que.; The Jas. Morrison Brass Mfg. Co., Toronto; Wentworth Brass Co., Hamilton, Ont.

Trade Enquiries

Names and addresses of enquiries can be obtained only by those interested in such lines upon application to Department of Trade and Commerce, Ottawa, Canada. Please quote reference number when requiring addresses.

TRADE ENQUIRIES

3598. **Glass bottles and jars.**—A Glasgow firm of importers of glass bottles and jars will be pleased to receive samples and prices of such goods produced in Canada.

3600. **Iron and steel products.**—A first-class firm of iron and steel manufacturers and export and import merchants in Glasgow, who have been drawing from the continent considerable supplies of angles, bars, billets, wire rods, wire nails, etc., and wire fencing and barbed wire, and who think there is a possibility in the near future of Canadian material being in a position to compete in price with continental, for this reason would like to get in touch with actual iron and steel makers (both finished and semi-finished product), with a view to handling their products. They wish to act as agents for the import into Britain, but for material destined for foreign countries they handle on a merchant basis.

3601. **Iron and steel.**—A Glasgow firm of importers of iron and steel products will be glad to have quotations for pig iron and steel billets when Canadian manufacturers are in a position to compete in this market.

3603. **Motor car accessories.**—A merchant in Sanfernando, Trinidad, desires to get in touch with Canadian suppliers of motor car accessories.

3604. **Leather.**—A merchant in Sanfernando, Trinidad, wishes to be supplied with Canadian leather.

Quebec Is Restricting Use of Motor Trucks on the Public Highways

No Motor Trucks May go Outside Cities or Towns When the Capacity is More Than 5,000 lbs.— Montreal Wholesalers, Retailers and Manufacturers Make Objection

MONTREAL. — Although strong objections were raised from different directions, a bill amending the Motor Vehicle Act has passed the Quebec legislature. The questions of speed limits and increase in tax on pleasure cars were included in the bill, but the clause restricting the weights of loads of motor trucks caused most interest, as this affects an important branch of commerce to-day when many firms use this form of transportation in a radius of at least 50 miles of the larger centres.

As the bill was passed, it is provided that no motor truck may go outside of cities and towns when the capacity of the load is more than 5,000 pounds, or two and one-half tons. The next provision is to the effect that the total weight of a commercial vehicle and of its load shall not exceed 24,000 pounds, and the load shall be distributed in such a manner that the pressure on a single axle shall not exceed 16,000 pounds.

The objection to this was raised through the fact that merchants in the cities have been building up business and delivering by truck, hence the difficulty. The Government took the stand that it was better that the rural communities should pay express or freight rates, even if higher, than to pay a great deal more to repair roads.

It was contended that this restriction of weight was a serious attack on commerce, that merchants who owned three ton and three and a half ton trucks would not be able to use them in an important part of their business, which was that of delivering goods to the country customers within short distance of the cities and towns. It was pointed out that while merchants would not be able to use their larger trucks, if the prohibition was not made this year it would have to come next year or the year after, when more trucks still would have to be prohibited. It had to stop some time, and the sooner the better for the protection of the rural roads.

A largely-attended meeting of the motor-truck owners of Montreal took place for the purpose of voicing their opposition to these recent amendments to the Quebec Motor Vehicle Act, under which all motor-trucks of three tons and over are banned from the roads outside of the cities. It was stated that many owners are faced with the prospect of having a large number of their motor-trucks scrapped or otherwise made useless by the change in the law, which was referred to as "ridiculous and unheard-of legislation."

It was unanimously resolved that the following telegram be sent to the members of the Provincial Government and of the Legislature, as well as to the leader of the Opposition:"At a meeting of representative truck and commercial car owners, a resolution was unanimously passed demanding that the railroading through of the proposed amendments of the motor vehicle bill be deferred until the truck and commercial car owners have been given an opportunity to place their case before you, owing to the serious effect that the proposed change is having upon the bonafide owners."

R. Cluxton, manager the Canada Paint Company, said that the cabinet ministers should meet a deputation of bonafide truck owners in order to come to an understanding.

SHEFFIELD'S GIFT TO PRINCESS MARY

Sheffield's present to Princess Mary was in the shape of an inlaid mahogany cabinet containing cutlery and plate of finest quality, representative of the various manufacturers in that city. In describing the gift a Sheffield daily paper states:

"The finest ivory and the best shear steel blades have been used in the cutlery and forks; the spoons are of sterling silver and of the French fidd'e pattern. All the silver will be engraved with the coronet, with "M" under it. Every piece is a fine example of Sheffield craft and workmanship."

"There are 371 pieces in the cabinet—a complete set for 18 persons—which in the trade is known as the "Princess Cabinet." The wood is inlaid mahogany and is lined with the finest Royal blue silk velvet, against which the cutlery and plate lose none of their brilliancy. In the cabinet are five drawers, which together with the "well" and "top" make the equivalent of seven compartments."

NEW CEMENT COMPANY

Montreal.—A new cement company is being organized in this city, it is learned, and final arrangements are under way for the establishment of a plant on the borders of Montreal East and Pointe aux Trembles. The capacity of this plant will be about 2,000 barrels a day.

Twenty Years Ago

Following items are reproduced from Hardware and Metal of March 22, 1902:

"The new brush factory for T. S. Simms & Co., St. John, N.B., is expected to be completed by September 1 next. It will be situated on Union Street and have a frontage of 115 feet."

"One of Canada's business men who can always be depended upon to look first of all after the interests of the country is Mr. James Ross, who is to be the next president of the Dominion Iron and Steel Company and who is now vice-president and able managing director."

"S. D. Eplett, who has been carrying on a hardware business at Coldwater, Ont., has sold out and removed to New Liskeard City, New Ontario."

"The new factory of Henderson & Potts, proprietors of the Nova Scotia Paint Works, which was opened up in Montreal at the first of the year, has been very busy since its commencement. The new place is at 56 Wellington street and is one of the most complete factories in the Dominion."

"Besides furnishing the trade with full standard quality of white lead, strictly pure and other grades at association figures, McArthur, Corneille & Co., Montreal, are supplying their "Crown Diamond" brand at proportionate prices."

"The Ottawa Paint Works of Ottawa is a firm that has been in operation a little over a year and a half. J. M. Young, the head of the firm, has been connected with the paint business for twelve years. With E. A. Ripley and C. Hickman he formed this company."

"The newly incorporated St. John Foundry Co. Ltd., St. John, N.B., have completed their new premises on Brussels Street and are installing the machinery."

"The Hollywood Paint Co. Ltd., of Hamilton, is the latest addition to the list of paint manufacturers in Canada. The manager is Norman S. Jones."

"The Hamilton Whip Co., Hamilton, have just completed a large addition to their extensive factory building."

"The first annual dinner of the Montreal Metal and Hardware Association in connection with the Board of Trade was held at the Montreal Club. James W. Pyke presided with Wm. McMaster and George Caverhill in the vice chairs and there were also present Messrs. Randolph Hersey, A. E. Hanna, H. M. Blaiklock, J. C. McCormick, J. B. Learmont, T. H. Newman, T. P. Bacon, Wm. Starke, J. R. Kinghorn, J. T. McCall, F. Bacon, G. J. Crowdy, J. S. Cook, T. C. Davidson, A. H. Campbell, W. S. Leslie, T. L. Paton, R. Starke and Mr. Peters of Winnipeg. Those contributing songs were Messrs. Blaiklock, Caverhill and Paton. One of the chief features was the speech by Wm. Starke in proposing the health of Mr. Newman who is leaving on a holiday to Europe. Mr. Starke is sometimes styled the 'Nail Keg King.' Randolph Hersey responded to the toast of the manufacturers. The announcement that W. W. Near of the Pillow & Hersey Mfg. Co., was soon expected home fully restored to health was received with pleasure."

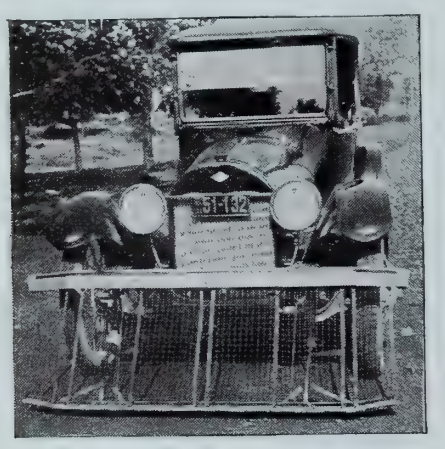
New Hardware Goods

OFFERED TO CANADIAN HARDWAREMEN

" LIFESAVER" AUTO FENDER

The "Lifesaver" Automobile Fender, is really a bumper equipped with a life saving net, which can be instantly lowered from the steering wheel, thus preventing any object from being run over by the car. The device is instantly controlled by another pull of the lever, and the net is again raised out of sight.

The manufacturers claim that when the net is raised, the Fender has the appearance of a fairly ordinary bumper. The method of operation is by compressed air from the air pump of cars so equipped; and for Fords and other light cars without air pumps, from another simple device which can be readily installed on almost any car. The net



when lowered, has a ground clearance of two inches, which is sufficient to allow an uninterrupted driving on city streets. It extends 18 inches in front of the wheels. The principle of construction is that upon striking an object, the net has sufficient elasticity to form a pocket in which the object would rest. Thus, a pedestrian struck by this fender would not be thrown to one side, but would be held in the folds of the net until the car is stopped. The "Lifesaver Fender" is the invention of E. Shierk of Hamilton, Ont.

"PEERLESS" FENCING

The Banwell Hoxie Wire Fence Co., of Hamilton and Winnipeg, have registered their trademark "Peerless" for gates and fence accessories. The registered trademark is similar to that which has been used in their advertising for their farm poultry and lawn fences, for some time. It shows the characteristic lock in a circle together with the words,"Peerless, the all around fence."

FORD REPAIR TOOL

A new tool which is calculated to be of interest to Ford sales and service stations and to general repair shops which have occasion to work on Ford cars is the special GTD "Hex" Die.

As indicated, this hexagon re-threading die is manufactured by the Greenfield Tap and Die Corporation, Galt, Ontario. Its size is 2⅛ in. diameter, 24 threads per inch, and it is made for the purpose of rechasing the threads on Ford hubs. Repair men familiar with the trouble and delay caused by battered threads on hubs, are expected to find this die a ready acquisition.

WALLACE BAND SAW

The J.B. Wallace & Company, Chicago, Ill., have announced the production of a new 16 in. band saw. This is described by the makers as a portable band saw which can be operated on the electric lighting circuit. Many special features are claimed for this band saw by the manufacturers, including the ball-bearing equipment, the enclosed motor, adjustment screws and safety guards. It is calculated that this product will appeal especially to the woodworking plants and carpenters' shops. Descriptive matter covering this machine will be forwarded by the manufacturers upon request.

NEW FRAIM PADLOCKS

The E. T. Fraim Lock Company, Lancaster, Pa., announce the addition of two new padlocks, numbered 846 and 445 respectively.

These locks are described by the makers as fair examples of the improvements being made in this line of padlocks, their program including the revamping of the entire line, with the gradual addition of several medium and high grade locks and discarding many obsolete numbers.

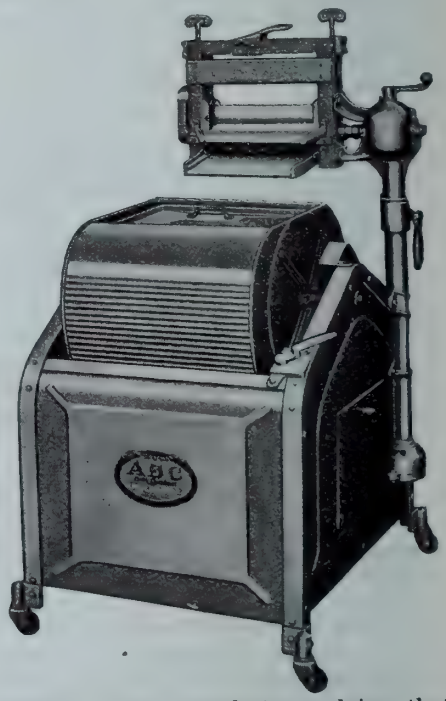
The No. 848 lock measures two inches across, has a cast brass case and shackle with all interior parts of brass or bronze. The shackle is secured at heel and toe, both controlled by a protecting device, thereby making the lock more immune from being "rapped" open.

The No. 445 lock has a cast iron black case, two inches wide. four pin tumbler mechanism, with a drop forged cast bronze shackle.

A. B. C. OSCILLATOR

Altofer Bros. Company of Peoria, Ill., have announced the introduction of an oscillating-type cabinet washer, which is more moderately priced than the other models of washing machines previously marketed by this company.

The A. B. C. Oscillator is described as a full-size, six-sheet capacity, equipped with copper tub and combining the many other special features of the A. B. C.



Machines. The manufacturer claims that the Oscillator compares very well in details of construction with other types of washers, and constitutes a standard of values for this class of product.

PEARL OVEN GLASS

The H. G. Fry Glass Co., Rochester, Pa., are now placing on the Canadian market their new transparent pearl oven glass ware. It is claimed by the manufacturers that these dishes are not only efficient for every oven use, but in addition, actually add to the appearance of a table setting, blending with the linen and silver owing to the pearl transparency. Dishes will also withstand extremes of heat and cold. A special assortment consisting of one 14 inch self basting roasting pan, hot water pitcher and tea pot with six cups and saucers, is being offered to the trade by the Canadian selling agents, Richardson & Bureau, Montreal.

Weekly Hardware Market Reports

STATEMENTS FROM BUYING CENTRES

Markets at a Glance

INGOT metals, wire solder, compression cocks, shoefinders' tacks, galvanized sheets, supply the more noticeable price changes on the current hardware markets. A revised discount is noted on compression cocks, and a similar downward price change appears on some lines of nickel-plated bath and basin supplies, such as pipe and traps. Wire solder is now priced on a more uniform level with other solder grades. Another new list has been issued covering shoefinders' tacks, with reduced prices on heel and shoe nails, Hungarian nails, channel nails and shoe tacks.

Easier prices have also developed on the majority of ingot metals, this weakness being attributed to the fact that current requirements continue to be far smaller than the visible supply. Copper, tin, lead, spelter, antimony and aluminum are all affected, each metal recently registering lower quotations on both the domestic and primary markets. The current consuming demand is of a very moderate nature, while stocks on hand retard any stimulant for future commitments. Eastern markets record a further reduction on galvanized sheets, and certain makes of mop sticks also appear with lower prices.

The paint markets again attract attention, with a slight reduction in turpentine quotations, an easing of linseed oil on Eastern markets, combined with another slight revision in Paris green prices. Shellac quotations have been withdrawn from the market in some quarters, due to the firm tone recently noted, combined with the current shortage attributed to unsettled conditions in primary centres.

Prices on bar iron and steel are described as relatively lower than on other finished steel products, and recent market developments have led to the observation that quotations in the steel industry may develop signs of stiffening in the near future. The buying movement in sheets is registering gradual expansion, a factor which reflects confidence in prevailing levels, as well as the future prospects for general improvement. The scrap materials continue very quiet at former levels. Wholesalers report that seasonal lines are now on a normally active plane, with bookings practically all under way. The advent of seasonal weather is keenly hoped for, in view of its stimulating effect upon trade in this direction.

Montreal Markets

MONTREAL, March 23.—A new shoefinders' tack list has been issued which supersedes the one issued in February last, and reduces prices on heel and shoe nails, Hungarian nails, channel nails and shoe tacks. Quotations on iron and brass shoe rivets are unchanged. Another recession in prices on both English and American galvanized sheets is recorded, this being the second revision in Queen's Head sheets in as many weeks. Both the No. 2 and No. 10 mop sticks have new lower prices. Lead products are now on a slightly steadier basis, and galvanized products, including such lines as eavetrough, conductor pipe and corrugated sheets, are reported as slightly firmer. The scrap market is still very quiet with quotations remaining at former low levels. Ingot metals have unchanged quotations. Seasonable lines in jobbing circles are becoming more active from week to week, with booked orders for usual Spring and early Summer goods practically all shipped. With favorable weather in the following weeks, wholesalers anticipate trade will steadily improve, the quiet period now being recognized as past.

NEW LIST ISSUED ON SHOEFINDERS TACKS

Montreal

A new shoefinders' list is now issued to the trade, dated March 20th. Reductions of varying extent are announced on heel and shoe nails, Hungarian nails, channel nails, and shoe tacks. Shoe rivets, both iron and brass are unchanged in price. A section of the new list showing the revised quotations is included elsewhere in this issue:

ONLY LIMITED MOVEMENT OF WROUGHT PIPE

Montreal

Trading in wrought iron and steel pipe is described as still quiet, with sales almost entirely for sorting orders. With the present month now well past, however, a steady improvement is looked for. The selling basis is still unchanged, list No. 54 still being the selling basis.

EASIER PRICES APPEAR ON GALVANIZED SHEETS

Montreal

Price revisions are again reported on the local sheet market, lower prices now appearing on galvanized sheets both American and English standard. The range on American sheets now is owing to firms who were quoting somewhat higher than others now reducing their prices. The reduction on these lines is approximately 50 cents per 100 lbs. on all gauges. On English sheets, the Queen's Head brand is again lowered 25 cents per 100 lbs. throughout, while the Fleur-de-Lis brand also shows a price decline of 25 cents per 100 lbs. on all gauges. While it is generally believed that prevailing quotations on practically all lines of sheets are now well down to bottom, this has been stated for some time past, and still easier prices have crept into the market from time to time. Reductions however, in past months have been of minor proportions and due to local distributors.

The required factor for steady future in these products would seem to be a more active demand. Undoubtedly

price levels are within reasonable reach of pre-war prices when present day productive costs, and transportation costs, are considered, and an increased buying movement would allow dealers their share of business without a price concession. There is a gradual improvement in sales, and a continuance of this is looked for from now until the summer months. Following are the prevailing prices with the present revision:

BLACK SHEETS

10 gauge	4 00	4 50
12 gauge	4 10	4 60
14 gauge	4 40	4 70
16 gauge	4 50	4 80
18-20 gauge	4 55	5 05
22-24 gauge	4 60	5 20
26 gauge	4 65	5 25
28 gauge	4 75	5 35

Sheets 3 in. wide, 20 cents per 100 lbs. extra.

GALVANIZED SHEETS

U. S. Standard.

10¾ oz.	6 65	7 10
28 gauge	6 25	6 70
26 gauge	5 95	6 35
22-24 gauge	5 80	6 10
20 gauge	5 65	5 95
18 gauge	5 65	5 85
16 gauge	5 50	5 80
14 gauge	5 35	5 75
12 gauge	5 20	5 75
10 gauge	5 10	5 75

English Standard—	Queen's Head	Fleur-de-lis
28 gauge	7 00	6 75
26 gauge	6 75	6 50
24 gauge	6 15	6 10
22 gauge	5 80	5 65
18-20 gauge	5 10	5 50

NOTE.—These prices are full bundles, an extra charge of 25c. to 35c. per 100 lbs. is made for broken lots. Extra for sheets 4 ft. wide, 50 cents per 100 pounds. Extra for sheets 3 ft. wide, 28 ga. and 10¾ oz. 25 cents per 100 lbs.

BRIGHT TIN PLATES

20 x 28 x 100 lb. basis	$16 00

18 x 24 x 52s	7 75 box

LOWER PRICES QUOTED ON MOP STICKS

Montreal.

A reduction of considerable proportions is made on mop sticks, and No. 2 is now quoted at $2.00, No. 3 at $2.30 per dozen.

TRADE IN CORRUGATED NOW STEADILY IMPROVES

Montreal

Conditions in the corrugated sheet market remain practically unchanged, with quotations holding at former levels. Current business in these sheets improves from week to week, and the volume of sales is quite satisfactory for the present season, especially in the lighter gauges. While there has been a rather unsettled market in the heavier gauges, and lower prices have appeared in some quarters on these, there is said to be no present indication of a general revision. Contrary to this, the flat sheet market shows signs of a slight stiffening of prices at primary centres, and in the opinion of local dealers this will have a tendency to at least uphold a steady market for the future on corrugated. Prevailing prices and discounts are the following:

CORRUGATED SHEETS	Per 100 sq. ft.
No. 28 gauge	6 50
No. 26 gauge	7 00
No. 24 gauge	9 00
No. 22 gauge	11 00
No. 20 gauge	12 50
No. 18 gauge	16 00

Less 10 per cent.

Lighter than 24 gauge and wider than 27 ins, 75c a square extra.

ONLY FAIR ACTIVITY IN BOILER TUBES

Montreal

Quotations on the various sizes of boiler tubes remain unchanged with business described as fair. The absence of larger construction work, the class requiring tubes for boilers, is still felt, but repair work still demands a movement of smaller orders. Unchanged quotations are the following:

BOILER TUBES—	Seamless	Lapweld
1 inch	24 70	.....
1¼ inch	24 50	.....
1½ inch	24 00	.....
1¾ inch	26 00	26 00
2 inch	24 50	20 50
2¼ inch	27 75	23 50
2½ inch	32 50	24 50
3 inch	40 00	30 50
3½ inch	52 50	34 75
4 inch	65 00	44 00

LEAD PRODUCTS STILL AWAIT DEVELOPMENTS

Montreal

Lead products are apparently awaiting further developments in metals in promary markets. Following the recent easier levels recorded on solders the market is now somewhat steadier with no actual price changes this week. The lower quotations on solders were purely a reflection of the easier trend of metals a few weeks ago ,when quotations on most lines, including tin, copper, and spelter showed a reduction. These have now an improved market tendency, and according to manufactures of the finished lead products, a continuance of a firm market tendency, would soon reflect in the opposite direction. Following are unchanged quotations:

LEAD AND ZINC PRODUCTS

Lead pipe, per 100 lbs.	12 50
Lead waste, per 100 lbs.	13 50

Note—Lead pipe is subject to a discount of 10 per cent.

Lead traps and bends	10% off
Lead wool, lb.	0 13½
Lead sheets, 2½ lbs.	0 10½
Lead sheets, 3 to 3½ lbs., sq. ft., lb.	$ 10¼
Do., 4 to 8 lbs., sq. ft.	0 09½

Cut sheets ¼c. lb. extra, and cut sheets to size, ¾c. lb. extra.

Solder, guaranteed, lb.	0 25½
Do., strictly, lb.	0 23½
Do., commercial, lb.	0 20½
Do., wiping, lb.	0 21½
Do., wire, lb.	0 34
Zinc sheets, casks	0 11
Do., broken lots	0 11½

SALES OF WARES ON GENERAL INCREASE

Montreal.

While the present season is bringing more activity in seasonable lines, there is also an increase in the volume of business recorded in aluminum ware, enamelware, galvanized ware and tinware. Such staple commodities as these have been seasonably quiet during the past months and it is felt that the present more active turn lends encouragement for future trade in all other lines. Dealer stocks have been liquidated in kitchen utensils, as in all other wares, and for this reason a continued improvement is anticipated in the following months. Many lines of galvanized and tinware will now be in demand with the commencement of spring cleaning, and aluminum ware and enamelware usually show more activity from now on. Quotations remain unchanged on the various lines since the general revision at the close of last year.

IMPROVEMENT IN IRON AND STEEL IS GRADUAL

Montreal.

Although the steel industry in general is reported as having made a favorable partial recovery during the past weeks at southern primary centres, locally the improvement is more or less gradual. During the past month or six weeks it is quite true that a slightly better buying movement has been in evidence, but the absence of any real construction work has had a deciding effect on the movement in comparison with former years. However, there is no discouragement offered by present conditions, and one large local distributor stated that while the improvement up-to-date has been very gradual, it is, in his opinion, of a healthful nature. Sales have undoubtedly been for actual requirements only, and with a continued need for practically all lines of iron and steel in the country, there is every reason to believe that the improvement felt in the early months this year is more than a temporary condition. Quotations on the various lines of bar iron and steel remain unchanged locally as follows:

Common bar iron, 100 lbs.	2 65
Refined iron	4 15
Irish finish machinery steel	2 70
Mild steel	2 65
Single reeled machinery steel	4 75
Band steel	2 65
Spring steel	4 25
Sleighshoe steel	2 65
Tire steel	2 85
Toe caulk steel	3 55
Harrow tooth steel, per lb.	2 80
Mining tool steel, per lb.	0 21½
Black Diamond tool and cast steel, per lb.	0 21½

NOTE—Refined iron is approximately $1.50 per 100 pounds over base, but fluctuates owing to unsettled market.

Band steel in scroll bundles, 50c per 100 lbs. extra.

QUIET CONDITIONS REMAIN IN RANGE BOILERS

Montreal

Range boilers fail to show any great improvement on the local market either in the volume of current business, or price stabilization. Orders continue for very small quantities only, and there is still the variation in prices. Some houses are quoting the new list prices and discounts while others are maintaining the older net quotations. With the month of April now well at hand, however, a better buying movement is looked for, as the weather will soon allow more extensive building operations, the movement of boilers depending to quite a large extent on building activities. List prices and discounts are unchanged.

AUTO ACCESSORIES NOW FIND READY SALE

Montreal

With the season advancing, jobbing houses report auto accessories as becoming more and more active. They are now classed among the good selling lines, and many dealer orders have an assortment included. There is no change in prices recorded in any line, the market in general apparently being on a fairly steady basis for the commencement of the active spring and summer season.

LITTLE OR NO CHANGE IN PIPE FITTINGS

Montreal

There is little or no change in pipe fittings, prices remaining at former discounts and volume of business described as only fair. With a fairly active building program ahead, especially of the smaller dwelling-house class, a more active period is anticipated for fittings in the near future. Following are present discounts:

PIPE FITTINGS—

Cast iron fittings	30%
Bushings, cast	32%
Do., malleable	32%
Flanges	40%
Plugs	30%
Flange unions	30%
Malleable unions	47%
Dart Unions, black	33%
Do., galvanized	13%
Nipples, 1/8 to 4 in., close and short	50%
Do., long	60%
Do., 4½ to 8 in., close and short	40%
Do., long	50%
Couplings, 4 in. and under	30%
Do., 4 in., and longer	10%

POUND GOODS—	Black.	Galv.
Class A	0 54	0 67
Class B	0 20	0 28
Class C	0 13	0 20

TRADE IMPROVEMENT RECORDED IN CEMENT

Montreal

Current business in cement is reported as showing a gradual improvement from week to week. The recent milder weather has stimulated sales to quite an extent, constructive work being allowed to commence in different quarters. Quotations remain unchanged since the revision earlier in the year, and local prices are the following:

CEMENT—

Car load lots, per bag, f.o.b. cars	$0 92
Per bag, delivered	1 00
Less car lots, per bag, f.o.b., yard	1 00
Per bag, delivered	1 10

Less 5 per cent.
Rebate of 20 cents for empty bags.

BRISKER DEMAND FOR TROUGH AND PIPE

Montreal

Interest in eavestrough and conductor pipe is now described as quite brisk, with the volume of business gradually increasing from week to week. The recent milder weather proved to be the required stimulus for an increasing buying movement, as during the past two weeks the improvement has been more noticeable. This lends encouragement to dealers in these lines, and they are convinced that a good season is ahead. Dealer stocks are undoubtedly low and there has not been the same amount of booked orders this year as in past seasons. For this reason, they claim, sales should continue active practically the whole of the summer season and well into the fall months. Quotations remain unchanged with little or no change in the tone of the market.

EAVESTROUGH—

O. G. round and half-round, per 100 ft.

8 inch	10 inch	12 inch	15 inch	18 inch
$16 90	$18 70	$22 20	$29 80	$37 80

O. G. Square bead, per 100 ft.

WASTE MATERIAL MARKETS REMAIN QUIET

Montreal

Although there is now a noticeable improvement in the market for the various lines of iron and steel products, and a better feeling in virgin metals generally, little improvement can be recorded in the market for waste materials. Consumers still show little interest, and buying is purely from hand-to-mouth, at quotations which offer dealers little encouragement. A few more inquiries coming to hand would appear to be the commencement of a better buying movement, but actual sales are few and far between, according to local dealers. Quotations, which in most lines are considered exceptionally low, are unchanged as follows:

Automobile tires		0 50
Rubber shoes		0 03
Yellow brass		0 05
Red brass		0 08¼
Light brass		0 03
Scrap zinc		0 03
Lead, heavy		0 04
Lead, tea		0 02
Light copper		0 08
Heavy copper		0 10
Wrought iron, R. Rd., No. 1 per gr. ton		10 0
Malleable scrap (ton)		8 00
Pipe scrap (ton)		6 50
Heavy melting steel	6 50	7 00
No. 2 busheling,		3 00
Boiler plate		6 50
No. 1 machinery cast		20 00

VERY LITTLE CHANGE IN INGOT METALS

Montreal.

The ingot metal markets continue dull, with changes in prices only nominal, and business conspicuous by its absence. From present indications there is no signs of early activity, although the season is advancing when a better buying movement is usually evident.

TIN.—This metal is unchanged in London, and the daily fluctuations there amount to only a few shillings. Considering the limited demand it may be considered as fairly satisfactory if prices do not ease off more. Local market remains dull at 34 cents.

COPPER.—There is little change in this metal, but if anything the tone is slightly easier both in London and New York. The latter is purely a trading market at present, with little buying by actual consumers. Locally, prices are unchanged at 16¾ cents for electro, 16½ cents for casting.

SPELTER.—The slightly firmer tone to this metal has largely evaporated and it seems to have relapsed into the prevailing dullness. This may be only a temporary movement. Quotation is unchanged at 7 cents.

LEAD.—The American market is a shade firmer, but London is practically unchanged and there seems little likelihood of any marked variation in the near future. Present quotation remains at 6¾ cents.

ANTIMONY.—Reports from China are somewhat firmer and slightly higher prices are being asked for import. It would, however, take some time for this to affect the local market to any extent. Chinese is still quoted at 6¾ cents, high grade English at 7¾ cents.

ALUMINUM.—Aluminum is unchanged on the local market, remaining the quietest metal with quotations unchanged at 24 cents.

ALABASTINE QUOTATIONS ON BARREL QUANTITIES

Toronto.

The prices announced by the Alabastine Co., of Paris, Ont., on alabastine, are for white and colors respectively, in barrels of 300 lbs. Quotations of $7.00 for white, and $7.50 for colors, do not cover the five-lb. packages.

Toronto Markets

TORONTO, March 23.—Another revision in discounts is noted on compression cocks, and similar downward price changes appear on some lines of nickel-plated bath and basin supplies, such as supply pipe and traps. Wire solder is now quoted at thirty cents, thus registering a drop of two cents per lb. from previous levels. This change again places local solder grades on a uniform basis. Quotations on ingot metals have continued to sag, and copper, tin, lead, spelter, and antimony are all lower this week. The current demand is described as very moderate with the visible supply far in excess of requirements. Another revised list on shoefinders' tacks has been issued, including varying reductions. Prices on bar iron and steel are described as comparatively lower than the majority of other finished steel products, and recent developments in primary steel centres have led to the observation that quotations in the steel industry may develop signs of stiffening in the near future. The buying movement recently noted in sheets, is still gradually expanding, with the domestic markets steady at the recent revised levels.

LOOK FOR STEADIER PRICES ON SOLDERS

Toronto

Lead and zinc products are slightly steadier in price, with primary metals setting the usual precedent. Some minor fluctuations are looked for from time to time, but no further feature changes are anticipated unless some unexpected developments materialize in virgin metals chiefly used in the production of these products. Wire solder is now priced around thirty cents, but other grades are holding at the recently revised levels. The general expression indicates that current markets are comparatively low, and a more stabilized trend is looked for in certain quarters.

LEAD AND ZINC GOODS—

Lead pipe, list, per lb.		0 12¼
Lead waste pipe, list, per lb.		0 13¼

Zinc sheets, per lb.	0 09	0 10

REVISED DISCOUNT ON COMPRESSION COCKS

Toronto.

A downward revision of approximately five per cent. has been made in quotations on some lines of plumbers nickel-plated bath and basin supplies. Supply pipe and nickel-plated traps record a similar reduction. The discount on compression bath cocks has also been changed from 35 to 38 per cent. off list. Other lines of compression goods show little variation, current business being of a fairly moderate nature, with quotations generally being maintained at the recent revisions. Following are prevailing discounts on these various products:

COMPRESSION GOODS—

Compression work, standard	45%
Fuller work, standard	30%
Bath cocks, compression	38%
do., Fuller	25%
Flat way stop and waste cocks, standard	54%
Brass steam cocks, standard	48%
Globe, angle and check valves, standard	25%
J. M. T.	20-10%
J. M. T. C.	25-10%

Jenkins Globe	19|10%
Radiator valves, standard	58%
do., removable disc	58%
Emco. check valves, standard	25%
Emco, J. D. rad. valves, screwed	33%
Emco, swing check, ⅜ in. and ½ in.	40%
Do., Do., Do., other sizes	33%
Webber gate valves	33%

BAR PRODUCT PRICES MAY SOON STIFFEN

Toronto

It is stated that prices on bar iron and steel have now reached relatively lower prices than any of the other semi-finished steel products. The consensus of opinion points towards the possibility of a stiffening in quotations in the near future. An effort in this respect was recently noted on southern primary centres, but beyond securing sufficient orders to enable the mills to run for some sixty days at the present rate of operation, price levels generally remain unchanged. The market locally is described as very competitive, but this condition has been more or less evident for several months. Some speculation is evident as to just what effect a coal miners' strike upon extensive lines would have on the steel industry in general and how it would affect prices on bar products in particular. In the meantime the following quotations represent the average levels on the local market:

IRON AND STEEL—

Mild steel bars base	2 75
Mild steel bands, 3-16 in. base	3 25
Bar iron, base	2 75
Angle iron, base	2 85
Horseshoe iron	3 60
Tire steel	3 35
Spring steel	5 50
Sleigh shoe steel	2 85
Hoop steel	3 75
Norway iron	12 50
Toe caulk iron	4 00
Crucible cast sheet steel	30 00
Mining drill steel	18 50
Cast tool steel, high grade	30 00
Cast tool steel, medium	18 00

REVISED LIST ON SHOEFINDERS' TACKS

Toronto.

Another revision has been made in the shoefinders' tack list, the new list being dated March 20. Varying reductions are noted on Hungarian nails, heel and shoe nails, channel nails and shoe tacks. Other shoe rivets remain unchanged in prices. A section of the revised list, giving the lower quotations is included elsewhere in this issue.

BUYING MOVEMENT IN SHEETS IS EXPANDING

Toronto

Sheet demand in general is now expanding according to the expectations recorded earlier in the year, and there are now reported some indications of a buying movement. Two developments of particular interest noted on the primary sheet markets are the appearance of some contracting for future de-

SHOE FINDERS' TACK LIST

Heel or Shoe Nails

14 Ge. and heavier 4/8 to 16½/8. In bulk, $12.25 per 100 lbs.; in 1 lb. papers $13.00 per 100 lbs.

Packing extras (add to list)—All goods packed in ½ lb. papers, $2.00 per 100 lbs. All goods packed in less than ½ lb. papers, $4 per 100 lbs. All goods packed in less than ¼ lb. papers, $5.00 per 100 lbs.

livery, by consumers principally of the manufacturing class, and an increased purchasing movement by jobbers for stock purposes. Both reflect growing confidence in the prevailing price levels and also in the outlook regarding future prospects in the industry. Reports from American mills indicate that deliveries have recently fallen back, in spite of heavier production. Locally, quotations continue at the recent easier levels, with a strong competitive market in evidence. Now that a suspension of coal mining in certain districts in the States is regarded as practically inevitable in some quarters, a certain amount of speculation has developed regarding the probable effect of such a strike on the sheet industry in general and as regards domestic supplies and quotations in particular.

BLUE ANNEALED—		
10 gauge, base	3 50	4 25

TRADE IN RADIATORS OF MODERATE NATURE

Toronto

Trade in radiators and boilers is of a quiet nature at present, a condition which is ascribed to the fact that new buildings have not reached the stage where radiation is yet required. While general building is apparent in many centres, this early activity is centred around many erections which were commenced last Fall. Heating requirements in this direction have been generally taken care of during the past two months. However, with the anticipated stimulation in construction work, both manufacturers and distributors of radiation look for improvement in the future demand.

VERY LITTLE CHANGE IN SCRAP MATERIALS

Toronto

There has been no appreciable change recorded in the waste material markets. Prices have remained fairly steady, but buying has continued on a hand-to-mouth basis. Copper scrap is still dull, although a few more sales have taken place. Owing to the light operations of various steel companies, the scrap iron market is also quiet. Dealers are therefore only purchasing in small quantities. There is very little business of any kind in scrap rubber at present. The following are the usual averages of dealers nominal buying prices for fairly large quantities:

SCRAP MATERIALS

Gross Tons— Scrap Iron		
Heavy melting steel (Hamilton)	$11 50	$12 00
Borings and turnings	2 00	3 00
Rerolling rails	10 50	11 50
Scrap pipe	6 00	7 00
No. 1 railroad wrought	10 25	11 25
Steel turnings (Hamilton)	6 50	7 50
Agricultural malleable	10 00	11 00
Railroad malleable	11 00	12 00
Net tons—		
No. 1 cast	15 75	16 75

Auto tires	0 50	1 00
Solid tires	0 75	1 25

PROGRESS IN BUILDING CIRCLES STIMULATES DEMAND FOR PIPE

Toronto

The movement of soil pipe and fittings is described as a little quieter than looked for during the month of March, but taken altogether, weather conditions have not been conducive to exceptional briskness in this regard. Manufacturers describe the outlook as being decidedly better, especially in view of the pronounced activity in construction circles already outlined, a majority of which consists of homes and similar smaller erections, which is expected to stimulate the demand for these products. Current requirements await the progress in excavation work, but are already showing a fairly satisfactory volume at the following unchanged discount levels:

SOIL PIPE—	
2 inch	40%
3 inch	40%
4-inch	40 and 5%
5 and 6 inch	40%
8 inch.	net
FITTINGS—	
2 to 6 inch fittings	50 and 5%
8 inch fittings	net

VIRGIN COPPER SHOWS SIGNS OF RECOVERY

Toronto

Brass and copper products remain at the recently revised price levels, with primary market conditions practically stationary. Further developments in quotations depend upon the future trend in virgin metals. These now show some signs of recovery from the recent depression, but quotations on the semi-finished products continue at the lower levels following:

BRASS	
Sheets, base, per lb.	0 21
Tubing, base, per lb.	0 23
Rods, base, per lb.	0 19
COPPER	
Rods, base, per lb.	0 27
Soft sheets, plain, 16 oz. and heavier, lb.	0 28
Do., plain tinned 16 oz. and heavier, per lb.	0 35
Do., polished and tinned 16 oz. and heavier, lb.	0 40
Tubing	0 27

DEMAND FAIRLY GOOD FOR RANGE BOILERS

Toronto

The situation in the range boiler market is practically unchanged, with the current demand stated as fairly good. When compared with last year's records, distributors state that the present volume of trade is something to be thankful for, although it is nothing exceptional. Prices are unchanged, with the recent list quotations and discounts being generally adopted. The tendency in the raw material markets is difficult to gauge, with these conditions evident, it is stated that a careful buying policy is required to restore the trade to a stabilized basis. Following is the current list:

RANGE BOILERS—	
5-gallon	$ 13 50
12 to 15 gallon	14 00
18-gallon	15 00
25-gallon	16 50
30-gallon	17 50
35-gallon	20 50
40-gallon	22 75
52-gallon	38 00
66-gallon	60 75
82 gallon	74 00
100-gallon	103 00
120-gallon	117 00
144-gallon	164 00
168-gallon	187 00
192-gallon	210 00

Discounts, Standard weight, 50 per cent. Extra heavy, 40 per cent.

EASIER PRICES APPEAR ON METAL MARKETS

Toronto.

Easier prices have now developed on the majority of ingot metals, this weakness being chiefly attributed to the fact that the current demand remains much smaller than the visible supply. Copper, tin, lead, spelter, antimony and aluminum are all affected, each metal recording lower quotations on both the domestic and primary markets. The current consuming demand is very moderate, while stocks on hand retard any stimulant for future commitments.

COPPER.—Trade in copper is described as moderately quiet. Domestic consumers have apparently fully covered their requirements for the current month, and there is another lull in home trade. Primary copper markets report that the export business is just fair. The better side of the situation appears to be in the improved demand for finished copper and brass products. A few inquiries have been noted, which are looked upon as testing the tone of the market. Prices locally are lower at 16½ cents.

TIN.—The tin market remains dull, with local prices easier. The demand

is again a little quieter, but recent reports from other centres indicate that many consumers have availed themselves of the prevailing favorable opportunities for contracting for delivery of tin over a period of several weeks. The fluctuations in Sterling exchange continue to interest this market. The local quotation is now around 34 cents.

LEAD.—The current demand for lead is good, but the uniformity looked for in the primary markets is slow in developing. This slight variation in quotations is attributed to producers marking up prices on futures. The general condition of the lead markets is described as well-balanced, with the local figure now averaging $6.50.

SPELTER.—The demand for spelter is rather light at present, but the general tone of this market remains fairly firm. Buyers are apparently not very active, but it is generally considered that consumption is proceeding on a scale at least equal to the ratio recorded during the previous few months. A note of optimism regarding the future outlook is observed in some quarters, the situation being described as nearing the end of the recent period of dullness. Local quotations have receded to the level of $6.50.

ANTIMONY.—This market is said to be a little firmer on account of some recent buying for stock, but the current demand for immediate needs continues small. Stocks in general are heavy. The local market level hovers between 6 and 7 cents.

ALUMINUM.—Prices on aluminum remain unchanged, and there is little to report in this market. The local situation is described as dull, with prices in the neighborhood of 26½ cents.

London Markets

LONDON, March 23.—Hardware merchants in this district report business as seasonably good. Early Spring lines are moving nicely, and it is expected that the advent of warm weather will stimulate a good volume of trade. Price changes have been fewer in numbers during recent weeks, indicating the stabilization of prevailing market levels. Reports show collections as good, and the consensus of opinion indicates that the hardware business in London and surrounding districts is in a fairly healthy condition.

REDUCE LINSEED OIL FIVE CENTS PER GALLON

London, Ont.

A reduction of five cents per gallon in the quotations on linseed oil, provides the outstanding change in the local paint markets this week. This change, reflects to some degree, the easier tone in flax seed markets recently noted.

LINSEED OIL—	Raw.	Boiled.
1 to 2 bbls., per gal.	1 10	1 13
3 to 5 bbls., per gal.	1 09	1 12
6 to 9 bbls., per gal.	1 07	1 10

Less barrels, add 15 cents gal.

MORE UNIFORM PRICE NOTED ON TURPENTINE

London, Ont.

Turpentine prices remain unchanged this week, with the markets having been fairly steady at the prevailing levels. Minor fluctuations have marked the primary southern centres, where consuming requirements continue of a moderate character. Following are current prices.

TURPENTINE—	Imp. Gal.
1 bl. lots	1 27
2 to 4 bbl lots	1 26
5 gal. lots	1 42

IMPROVED SALES FOR WHITE LEAD IN OIL

London, Ont.

The volume of sales recorded in white lead in oil continues, to improve with other spring lines. Prices remain unchanged at the following levels:

WHITE LEAD IN OIL—

	Tons.	Less Tons.
Pure, Per 100 lbs.	13 30	13 65
Elephant, per 100 lbs.	13 80	14 15

ANOTHER REDUCTION IN PARIS GREEN QUOTATIONS

London, Ont.

A further recession of eight cents per lb. has been announced in prices on Paris green for the current season. This reduction, added to the change recently recorded totals a considerable decline in quotations on the various quantities from the levels of the previous year. Following are new prices:

PARIS GREEN—

½-lb. papers, 37c. lb. 1 lb. papers, 35c. lb. 25 lb. Drums, 33c. lb. 50 lb. Drums 31c. lb. 100 lb. Drums, 31c. lb. 250 lb. kegs, 28½c. lb. 600 lb. Barrels, 28c. lb.

SEASONAL ACTIVITY IN WASHING MACHINES

London

The usual Spring sale of washing machines and wringers is reported off to a fair start. The season for this movement is at hand, and indications generally point towards a fair amount of activity. Prices remain unchanged at the levels of list less 30 per cent.

MODERATE MOVEMENT OF POULTRY NETTING

London

There has been a fair seasonal sale recorded for poultry netting. Quotations in this product are remaining unchanged at list less 12½ per cent., for the one and two inch mesh.

GOOD ADVANCE SALE FOR BASEBALL GOODS

London, Ont.

An excellent sale for baseball requisites of practically all kinds is now reported in wholesale circles. Merchants are generally engaged in preparing their stocks in anticipation of a brisk season in these sporting goods. Following are current prices on some lines of the Reach make:

BASEBALL GOODS—

Baseballs

No. 0, $18.00 doz. 1L, $16.20 doz. OJ, 16.20, 3C $13.20, 4A, $8.00. 7, $6.00, 5, $6.00, 9X $4.00, 8, $2.75, 9 $2.75, 11B, $1.32.

Catcher's Mitts

12A $12.00, 6A $10.00, 32 $9.00, 41 $8.00, 30 $6.75, 31 $5.35, BP $4.35, 200 $3.30, 150 $2.70, FP $2.20, 75X $1.40, 65X $1.10, 67X .75.

First Basemen's Mitts

3BG $6.70 each, D $6.00 each, 4s $5.70, 4AB $5.35, 4A $4.65, 4B $4.00, 5R $3.30, 4R $3.00, R 2.65, 2R 2.40, 3R 1.75, FB $1.10, 7B .75.

Catchers' Masks

SL $5.35 each, 20S, $4.00, 30S $3.35, 40S $2.65, %X $1.75, CM $1.35.

SEASONAL SALE OF SPADES AND SHOVELS

London

A good Spring sale is now reported for spades, shovels and scoops. Merchants are completing their stocks of these products in preparation for seasonable demands. The quotations remain unchanged at list less 55 per cent.

PREPARE FOR TRADE IN HARVEST TOOLS

London

A better movement is now recorded each week in garden and harvest tools. Merchants are engaged ready for seasonal trade in these products There has been no change in price the current quotation being list less 60 per cent.

UNCHANGED PRICES ON DRY CELL BATTERIES

London

A fair proportion of Spring sales for dry cell batteries is now recorded. Prices on the Columbia line continue at the following levels:

BATTERIES

Dry Cell (2½" x 6")	cts. each
Less than 12	50c
12 or Less than 50	45c
50 or Less than barrel	43c
Barrel of 125	39c

F.o.b. factory.

LAWN MOWER ORDERS NOW BEING FILLED

London

Booked orders for lawn mowers are now being shipped. These are in moderate demand, with expectations of a brisk season. Quotations remain at list less twenty per cent., on the Taylor-Forbes line. Following are some 1922 list prices:

LAWN MOWERS

Daisy, 12" $8.65 ea. 14", $9.00 ea. 16" $9.20 ea.
Star, 12", $9.70 ea. 14", $10.40, 16", 11.10 ea.
Woodyatt, 12" $11.25 ea., 14" $12.00 ea, 16", $12.75 ea., 18" $13.50 ea., 20" $14.25 ea.
Empress 12" $14.70 ea., 14" $15.50 ea., 16", $16.20 ea., 20" $16.90 ea.

SPRING CALL FOR WIRE CARPET BEATERS

London, Ont.

Carpet beaters of the wire product variety are now recording a seasonable movement. The demand has become

evident with the general call for spring lines. Quotations are at the following levels: straight handle, double wire, $1.75 dozen: offset handle, double wire, $1.90 per dozen.

SORTING ORDERS EVIDENT FOR WINDOW GLASS

London, Ont.

A fair seasonable sale continues for window glass, with present orders, however, mostly limited to sorting requirements. There have been no further changes in price since the issuing of the recent revised list. Quotations therefore remain as follows:

WINDOW GLASS—
Single Diamond, net list
Double Diamond, net list.
Cut Lights. 75 per cent. off light list.

INTEREST NOW RECORDED IN FISHING TACKLE

London

A fairly good demand for fishing tackle is reported in some quarters, with merchants sorting up their stocks of this line. Quotations show very little variation from the levels prevalant during last year.

BRISK SALE OF HORSE CLIPPERS AND PLATES

London

An excellent sale is reported as continuing for the Stewart line of horse clippers and plates. Quotations on these products remain at the recently revised levels, of list less 25 per cent.

BETTER DEMAND RECORDED FOR COASTER WAGONS

London

A good sale is now reported for auto coaster wagons. There has been no further change in prices on these products, quotations remaining at the following list and discount:

COASTER WAGONS—
No. 00 $60.00 doz. (List), 01 $91.00, 1 $104.00, 2 $116.00, 3 $128.00, 4 $146.00. Less, 35 per cent.

STEADY IMPROVEMENT IN DEMAND FOR NAILS

London, Ont.

The current demand for nails, is showing steady improvement week by week, and this condition is of course, primarily attributed to the commencement of building activity in general. Following are current unchanged prices:

NAILS

Wire, base	3 65 per keg
Cut, do.,	4 35 per keg.

HEDGE AND GARDEN SHEARS NOW POPULAR

London, Ont.

Hedge and garden shears are now selling well, along with other spring goods. Quotations on these products remain at the recently revised levels. Following are prices on the English make:

SHEARS—

No. 100x8″ plain	Each	$1.55
No. 101x8″ Notched		1 80
100x9″ Plain		1 90
101x9″ Notched		2 15
107 Ladies'		1 70
105 Long Handle		4 00
106 Long Handle		3 25

PRICE DECLINE NOTED ON CORRUGATED SHEETS

Winnipeg.

Local quotations on corrugated sheets have now been reduced, and the new levels are placed in the hope of stabilizing the market in anticipation of future spring trade in these products. Following are current revisions:

CORRUGATED—
Galvanized—28 Ga., $6.42 per 100 lbs. 26 Ga., $7.06 per 100 lbs.
Painted—28 Ga. $5.35 per 100 lbs. 26 Ga., $6.00 per 100 lbs.

QUOTATIONS ON SHEETS NOW ON LOWER LEVEL

Winnipeg.

New lower quotations have been received on black and galvanized sheets. Following are the new lower prices:

SHEETS—
Black—10 Ga., $5.35 per 100 lbs. 12 Ga., $5.40 per 100 lbs. 14 Ga., $5.45 per 100 lbs. 16 Ga., $5.50 per 100 lbs. 18-20 $5.90 per 100 lbs. 22-24 $6.00 per 100 lbs. 26 $6.10 per 100 lbs. 28 $6.40 per 100 lbs.

Galvanized—16 Ga., $6.45 per 100 lbs. 18-20 $6.60 22-24 $6.75. 26 $6.90. 28 $7.20. 10¾ oz. $7.90.

REVISED PRICES ON PIPE AND TROUGH

Winnipeg.

Lower prices are quoted this week on eavestrough and conductor pipe. Following are the new reduced prices:

EAVESTROUGH—
8 in $5.06 per 100 ft. 10 in., $5.63 per 100 ft. 12 in., $6.75 per 100 ft. 15 in. $9.38 per 100 ft.
CONDUCTOR PIPE—
2 in, $6.19 per 100 ft. 3 in., $7.13 per 100 ft. 4 in., $9.00 per 100 ft. 5 in., $12.75 per 100 ft.

Winnipeg Markets

WINNIPEG, March 23.—Important price developments on the current hardware markets include easier quotations on black and galvanized sheets, and similar downward revisions on eavestrough, conductor pipe, corrugated sheets, wire nails, fence staples, grindstone fixtures and certain makes of wrenches.

The volume of Spring trade is reported gradually better each week, but the general opinion indicates that there yet remains plenty of room for improvement. The advent of an early Spring season would undoubtedly stimulate business in this direction.

LOWER QUOTATIONS ON GRINDSTONE FIXTURES

Winnipeg.

The prices on grindstone fixtures have been reduced. Following are the new lower prices:

15 in., per doz.	$8.25
17 in., per doz.	8.80

ALLIGATOR WRENCHES REVISED IN PRICE

Winnipeg

New lower prices are quoted this week on alligator wrenches and current quotations are as follows:

ALLIGATOR WRENCHES—
No. 1 $1.75 per dozen; No. 2 $5.25 per dozen; No. 3 $10.80 per dozen; No. 4 $18.60 per dozen.

LOWER PRICE LEVELS ON FENCE STAPLES

Winnipeg

Bright fence staples have new lower quotations. The prices now in effect are $4.25 f.o.b. Fort William, and $4 85 per 100 lb. keg, f.o.b., Winnipeg.

WIRE NAILS ALSO SHOW REDUCED QUOTATIONS

Winnipeg.

This week's market reports include a reduction on wire nails. The base price now in effect f.o.b. Fort William, is $4.00; and f.o.b. Winnipeg is $4.60 per keg.

MAINTAIN HIGH PRICE LEVELS ON TURPENTINE

Winnipeg.

The high prices announced on turpentine a few weeks ago still remain in effect. The present quotation is $1.55 per gallon in barrel lots.

STEADY PRICE PREVAILS ON LINSEED OIL

Winnipeg.

Quotations on linseed oil are still holding at the advanced prices made a month ago. The prevailing quotation is $1.20 per gal. for raw and $1.23 for boiled in barrel lots.

EXPECT BRISK TRADE IN BUILDERS' HARDWARE

Winnipeg.

The general impression as regards the subject of builders' hardware is reflected in the expression that "this will will be one of the biggest spring lines in the trade." When pressed for a reason contributing to this effect, this wholesaler referred to the extensive building programs that have been planned in many districts—both city and country—which sooner or later will result in a much improved demand for builders' hardware. The fact that many houses which were commenced last fall, are now being finished in the early months of the current year, is expected to be one of the factors contributing towards seasonal activity.

IMPROVED OUTLOOK NOTED IN ROPE MARKETS

Winnipeg

With the approach of spring, the volume of sales in rope and cordage is reported to be improving. Business in the primary hemp markets is also recorded as fairly good. Large consumers have displayed keener interest due to the firmer reports from the manilla markets. Local distributors report improved conditions generally, and prices are being fairly well maintained. Mexican sisal has not fluctuated to the same extent as was previously apparent. Many inquiries are evident, but are not all developing into actual purchasers.

Hamilton Markets

HAMILTON, Ont.—The month of March is usually a fair period of activity for the steel industry, and the current month is described as no exception to this general rule. It is noticeable, however, that for the time being, orders placed are chiefly for individual lots, but the aggregate is fairly heavy. New inquiries are also individually on a small scale. The general opinion, however, is that signs of recovery in the steel industry have been more than substantiated through recent developments, especially as regards volume of operation and both current and future requirements. The increased optimism, which was prevalent during the earlier months of the year, has been supported by a gradual expansion in general steel business. Trade resumption upon a broader basis is expected to materialize in the ensuing weeks, with a consequent firmer tone generally resulting in both foreign and domestic markets.

Sheet Demand Improving

Taking the sheet market in particular, it is noted that sheet prices are approximately half of the levels which prevailed in 1920. Stocks are still relatively small, but with an improved inquiry now generally noticeable, orders are also more frequent. The recent reduction in galvanized, black and annealed sheets, is not looked upon as a sign of weakness in the markets but rather as a further incentive to future commitments upon a broader scale of operation. In the primary centres, it is noticed that the sheet demand is improving week by week, and this condition is expected to spread to practically all phases of the industry within the near future.

A local manufacturer of household ware stated that a big increase has been recorded during the past few weeks in their sales department. This is attributed to the average merchant replenishing stocks in anticipation of Spring trade, and the improved market conditions generally. It was pointed out that kitchen utensils can be sold in practically the same volume throughout the year, if similar aggressive methods are utilized by the dealer. Another factor was found in the attractiveness of displays in this class of products, which frequently led to bringing prospective customers inside the store, where their interest can again be stimulated in various other commodities, thus enlarging the possible client's range of both vision and prospective sales.

Improvement in Trade

Another manufacturer of hardware specialties reports that a slight improvement in trade generally has been recently noticeable, although their plants are not yet operating at full capacity. Orders are coming in freely, however, but are described as very small. This condition is usual in practically all markets and commodities this season. The volume of current trade is said to be better in February than during January, and present indications point towards a further increase in March. An improvement is also reported by this manufacturer in the export business. Orders have recently been received from a wide range of other countries, including China, British West Indies, South Africa, New Zealand, England, and Australia. An effort is being made in this direction to recover the ground lost in export business during the war. Manufacturers and distributors of hardware products, however, state that they expect it will take considerable time to accomplish this aim. They further state that keen competition is being experienced with German goods now on the export markets, and point out that it is a very difficult thing for Canadian manufacturers with high wage levels and costly overhead expenses to compete on an adequate basis with German producers at their prevailing cheap ratio of production.

Pittsburg Markets

PITTSBURG, March 23. — Little change has occurred in the iron and steel situation in the past week. The rate of steel production, measured in steel ingots, is about 29,000,000 tons a year as it has been for the last three or four weeks. As almost all buying of steel for many months past has been for prompt shipment, the rate of production may be taken as an index to the rate of buying, which has not changed materially for several weeks. All things considered, the rate of production is rather high for existing conditions, hence there is no ground for expecting any increase in the volume of business in the near future, or until there are decided changes for the better in underlying conditions. The advent of spring might be expected to bring heavier demand, but the high rate of production recently suggests that this influence has been discontinued. Spring affects consumption rather than production and it takes time to finish steel and put it in shape for actual consumption, so that it may be assumed the recent heavy demand has been discounting the advent of spring.

Production of Steel.—Making allowance for slight decrease in exports, the production of steel for domestic consumption has lately been running at the same rate as in 1912 and 1913, the two best years before the war, while the rate is several million tons a year above the production in the best year prior to 1912. While the demand for steel looks large by comparison with pre-war records, it looks small by comparison with the capacity, or with production in the late years of the war and in 1920. Capacity is about 52,500,000 tons, and on this basis, the production at 29,000,000 tons, is 55 per cent. of capacity. While steel producing capacity has greatly increased since the war started, it does not follow that capacity of manufacturing consumers has increased in the same ratio. In other words, it is quite possible that consumers of steel may be quite busy without the steel mills being correspondingly busy.

The Coal Strike.—No developments have occurred reducing the prospect of there being a general suspension at the union bituminous coal mines April 1, when the present two-year scale with the United Mine Workers expires. The labor organization demands a national scale settlement as in the past, while the operators in some districts, including the Pittsburg district, have refused to meet in the former manner. The old practice was for the operators in the four states, Illinois, Indiana, Ohio and Pennsylvania, to meet and arrange a scale, scales for other districts in the country being then arranged in conformity, making certain allowances. The four states were called "the central competitive field," but this combination has now been broken up. The operators are willing to meet their employees, district by district, but the men have not consented to that.

Last week the Pittsburg Coal Producers' Association sent a formal invitation to District No. 5, the local organization of the United Mine Workers, proposing a wage agreement conference March 20, but the president of the district refused the invitation. Several weeks ago the operators published the scale they are willing to pay beginning April 1, involving reductions of about 30 per cent. from the present high scale, and with elimination of the check-off. As matters now stand the prospect is plain that there will be a suspension, which may decrease in extent from week to week by men breaking away from the union strike order, beginning perhaps at mines on the fringes of union districts, where there are non-union districts nearby.

The coal market in general began softening about a fortnight ago and last week it turned quite soft, as to both union and non-union coal. Pittsburg district coal sold down to $1.80 for steam mine-run, when about $2.10 had been the minimum for many months, until very recently. Sellers at much under $2.00, while originally union, are supposed to have special arrangements with their men, as $2.10 is regarded as approximately representing cost with the union scale.

The trade attributes the softening in the coal market to consumers having practically completed their stocking, well in advance of the date for the suspension, the presumption being that consumers feared a last minute rush for coal, with higher prices, and wished to get through early. The steel mills exhibit no concern in connection with the prospective suspension

Shows Paint Prospect How $5 Spent Saves $100

Line of Argument Advanced by a Paint Salesman to Encourage Prospects to a Proper Realization of the Value of Paint and Varnish—Many Persons Spend Money Freely on Much Less Important Things Than Paint

THE FOLLOWING is a suggested line of sales talk for the paint salesman who deals with the prospect who doesn't appreciate the preservative value of paint. It is a line of argument wihch can be followed to good advantage in developing early spring business:

"If you, Mr. Prospect, were confronted with the possibility of spending $5 and saving $100, what would you think of the proposition? If I know anything of human nature, I can see you falling over yourself to take advantage of this excellent offer.

"You will naturally ask, 'How can I spend $5 and save $100?' Let me explain. You, I presume, are working earnestly and steadily towards the advancement of your own financial position. We are all doing it, some with more success than others, but nevertheless, it is the desire implanted in the breast of each one of us to advance—to make good, and to place ourselves in a position of financial security so that the approach of old age will not leave us dependent on other people for our support. It is justly so that this desire should be present and it is an eminently praiseworthy one.

"You are, no doubt, careful to see that no extravagance is permitted in your affairs, and that carefulness and economy are continually practised in your daily life. You insure your property against fire—against burglaries, and you insure your life so that those dependent upon you shall not be left stranded should the unforeseen happen, but, is that all there is to do? Do you insure your property against as deadly a foe as ever attacked the welfare of any human being? I refer to the insidious and ever present attacks of the elements on property, which is not protected by paint or varnish.

"Strange to say there are thousands of individuals in this great Dominion, who carry out conscientiously the above mentioned virtues, but, who, yet actually will not 'spend $5 to save $100.' Has it ever occurred to you just what actual loss you are sustaining each day you are leaving your property unpainted? (A loss annually to property, of no less than five times the sum lost to the Dominion of Canada yearly by fire.) You say 'Oh! I cannot afford to paint just now, I appreciate that a freshly painted house or building looks very nice and attractive, but really the cost of living,' etc., etc. Mr. Prospect, if that represents your idea as regards paint and varnish, you are on the wrong track entirely. It is true that paint and varnish have a wonderful beautifying effect, but this is only secondary to the actual value of painting, which is preservation. Nothing has been found so far to even begin to equal the wonderful values, as a preserver, that are contained in a coat of good paint or varnish.

Loss On a $4,000 House

"Now, let us come to the interesting part of 'spending $5 and saving $100.' Yes! and this can be proven to be an actual and literal fact. What is the value of an ordinary house occupied by the average family? It is quite true that this figure would vary considerably in different parts of Canada, according to the size of the house, the location, and the financial standing of the family concerned. Let us however, take as a basis for our calculations, the sum of $4,000 as representing the value of a house. The deterioration on such a house varies enormously, according to whether it is properly painted (and thus protected,) or whether the painting has been neglected, thus leaving a clear and open road for the immediate and steady attacks of the elements.

"An unpainted house, no matter how good the lumber originally was, will be practically a ruin in ten years. Its sale value will certainly have depreciated over 75 per cent., even if it is habitable at all after that period. Here then we have a clear loss of $3,000 in ten years, all of which could have been prevented and the property actually have increased in value had the house received proper painting attention.

"It is not too much to state that an expenditure on paint and varnish of $150, or averaging $5 per $100. would have preserved the house and have arrested this enormous loss. If you have property and are renting it, it will pay you many times over to keep your house in weather proof condition, by systematically painting every few years, thus giving you the benefit of prolonged revenue, less expense, while a well painted house is always a good "let." It is the dirty, dreary, dilapidated looking house, that is left untenanted month after month, a dead loss to the owner and a constant reproach to his business ability.

"We have given an example where by 'spending $5 the owner would have saved $100.' It is not by any means an exaggeration to state this, but if anything it errs on the side of conservatism. On property of increased value the saving would be even greater in proportion, owing to the covering and protecting power of a gallon of high grade paint.

"This is the idea the 'Save the Surface' campaign has been endeavoring to instil into the minds of the people of Canada, and it is truly one that is essentially sound, based, as it is, upon the desire to protect and preserve the property of Canadians.

"I want, in all sincerity, and earnestness to draw your attention as a property owner of the Dominion of Canada, that unless you periodically protect your property, by paint and varnish, you will, without the slightest question, be a heavy loser.

"Conservatism and economy are bywords of the present day, and justly so, but surely they cannot be applied to you if, whether through ignorance, or unwillingness, you refuse to 'spend $5 to save $100.' "

Says Lampblack Difficult to Ignite

Warning Issued by Fire Commissioners Concerning Danger of Spontaneous Combustion Due to Lampblack Coming in Contact With Moisture Said by Manufacturers to be Unjustified by the Facts

WARNINGS of the danger of ignition of lampblack are frequently issued and passed along throughout the hardware trade. The statement reproduced on the page is from the house organ of a large insurance company and deals with the various dangers to which lampblack is subject.

In drawing this matter to the attention of a prominent manufacturer of lampblack, carbon black, etc., Hardware and Metal is informed that this statement and other such reports are false, as lampblack will not ignite by itself nor even in the presence of steam or moisture as indicated.

"Rapidly oxidizing oils will ignite any porous product under certain conditions of temperature. Oily paper, oily shavings, oily rags, etc., will of course, ignite, that is, the oil will ignite. Lampblack when ignited never flames, but glows," said the manufacturer.

"Prior to 50 years ago when some of the lampblack was manufactured from resin and other oils in such a crude way that the black was heavily impregnated with oily vapors, there might have been such a possibility, but to-day the oil is far too expensive to waste and further lampblack after it is made passes through (in our process) very long flues of fire brick under intense heat.

"If lampblack were to catch fire because of moisture, we should soon go out of business as not a little of it becomes damp in transit through leaky railroad cars, or being left in barrels and boxes in the open, on railway station depots and in the holds of vessels. All of the barrels are slack cooperage which would add to this risk if it really existed.

"We have often been asked the question if there is danger of lampblack taking fire by spontaneous combustion by coming in contact with water, but we have not experienced it in our 70 years of business, nor even heard of any authentic case. We know of two cases where lampblack came in contact with oil, one from a dripping bearing into a barrel and one from an oily scoop and in both instances a midsummer sun shining through a glass window sun caused a smouldering of the oil and black in the barrel. We burn some of our lampblack again in a calcination process and find difficulty in igniting it. This is done by means of alcohol and a torch. The center part of a barrel can become ignited in this way and unless stirred frequently to give it oxygen will not spread for many days. Insurance companies dating back from the earliest times have made the spontaneous combustion theory an excuse for very high rates."

Lampblack Will Ignite

Contributed by the Fire Commissioner's Department.

When making inspections of hardware stores, the following is the dialogue which usually takes place between the inspector from this Department and the owner or clerk of the store:

"Where do you keep your lampblack?"

"Oh, just here, on this shelf."

"Well, I would like you to keep it in a metal container."

"Why?"

"Because it is subject to spontaneous ignition."

"Well, I've been in the business and handled lampblack for twenty years, and it's the first time I've heard of it."

The following extracts from reports will, we think, answer the question:

"On making a close examination of the debris, the remains of two packets of lampblack, which had been kept in a cardboard box, was found on the second shelf from the floor at the point where is was concluded the fire had originated.

"The lampblack was in one-pound packages, and the method used in preparing same for marking shipping boxes was by mixing it, in a tin dish, with a little coal oil. The lampblack had not been used for several weeks previous to the fire.

"The shelf upon which the packages were found was about two feet from the floor and about three feet from door leading to the hall, and about six feet from a steam radiator, and we are of the opinion that the lampblack received its necessary quantity of moisture from the condensation of the steam caused by the opening and shutting of the door above referred to."

"On making an examination of the fire damaged structures (a hardware store), it was found that the fire had evidently originated in a wooden box which contained several one-pound packages of lampblack, which was placed on a shelf about three feet from the floor, the premises being steam heated and a radiator situated about four feet from the lampblack, a door, also about four feet away, leading direct to the outer air, and we are of the opinion that the lampblack received its necessary quota of moisture from the condensation of the steam from the radiator caused through the opening and shutting of the door above referred to."

"In the latter part of 1918, members of this Department were called to a large departmental store, and were shown a one-pound package of lampblack actually burning."

The above article appeared in a recent issue of the house organ of a large insurance firm. Intended as advice to its agents the article shows how prevalent is this misconception regarding lampblack.

Details of Canadian Brush Industry

Seventy-eight Brush and Broom Industries in Canada Made Products in 1920 Valued at $4,680,985.—Big Increase in Production of Hair or Bristle Brushes in 1920

A REPORT has just been compiled by the Dominion Bureau of Statistics on the brush and broom industry of Canada showing that whereas there were 57 broom plants and 18 brush firms operating in 1919, there were 55 broom and 18 brush plants in Canada in 1920. The total number of firms including ones engaged in both these branches of the industry were 78 in 1919 and 1920.

The number and selling value of brushes at the factory in 1920 were as follows: brooms, 289,021 doz. valued at $2,007,479. Whisks, 65,125 doz. valued at $144,077, brushes (hair or bristles) 367,570 doz. valued at $1,710,528; brushes (corn or fibre) 287,345 doz. value at $605,661, all other brushes valued at $57,927. The total value being $4,680,985 compared with a total value of production in 1919 of $4,284,915. The biggest difference in the two years was the big increase in production of hair or bristle brushes in 1920, which compared with a selling value of only $741,399 for the 1919 production.

Total capital invested in the brush and broom industry in Canada is $3,780,252 compared with $2,987,412 in 1919. Number of employees increased from 1,069,948 in 1919 to $1,212,541 in 1920.

Value of materials used in making brushes in 1920 was as follows:—lumber $50,464; fibres $139,378; bristles $604,772; horsehair $60,172; brush blocks $72,133; wire, brass, steel, etc. $16,648; brush backs $5,489; tin, $18,284. Total cost of materials for both brooms and brushes was $2,454,001.

BOECKH'S BRUSH NEWS

Good Finish Makes Selling Easy

The finish of a brush is highly important not only to the man who has to **sell** it, but to the man who has to **use** it. In manufacturing Boeckh's Brushes we have always kept that thought in mind, and as a direct consequence Boeckh's Brushes are everywhere famous for their excellent "finish."

Finish is most important to the dealer, because it makes his job of selling easier. The customer buys more readily. The appearance of the brush pleases, promises long wear, and satisfies him that he is making a good buy.

The dealer doesn't have to make such a heavy effort to sell his customer when he handles Boeckh's Brushes. The moment your customer lays his eyes on a Boeckh Brush the perfect finish will promise him equally perfect construction, excellent materials, long service and wear.

And the "finish" of Boeckh's brushes is a truly accurate indication of their unseen quality, serviceability and future performance under strenuous and continuous use.

Sell a man a Boeckh Brush and he'll be back again in time for more. He won't forget the immense satisfaction it gave him. He **can't** forget the splendid finish that persuaded him to buy.

Important Announcement

Our big spring "Paint-up and Clean-up" advertising campaign is just being launched in a long list of Canada's finest newspapers. This advertising is going to stir things up; get folks using Boeckh's Brushes all over their homes, painting, varnishing, enameling, kalsomining, sweeping, dusting, polishing, scrubbing—cleaning up, painting up, brightening up their homes.

Tie up with this campaign and you'll do a tidy business in Boeckh's Brushes in the next few months. Advertise Boeckh's Brushes, display them in your store and in your windows, and talk about Boeckh's Brushes. Then keep an eye on mounting profits and quick turnover.

Weekly Paint Markets

Montreal

MONTREAL, March 23.—A drop of 4 cents in the quotations on linseed oil offers the feature of the paint market this week. In sympathy with the seed market, which has been slightly easier during the week, the oil market responded with the above reduction. The weakening in the seed market followed a softening of Argentine quotations, but the fact that there is again a firmer tone in the situation in the past few days, would make it appear that the movement was only a temporary one. Those well informed point out that the underlying factors in the market are unchanged, and there is still the probability of a shortage in seed later on.

Turpentine is little changed this week, the market steadying somewhat after the recent softer tone. Quotations on the local market remain at the revision of last week, and importers seem satisfied that the market will remain fairly firm from now on. There is now a firmer tone to the market in the South and with increased consumption in the following weeks there seems little likelihood of any further recession in prices, at least until the new crop is marketed. The shellac market continues with a firm undertone, and an advance in quotations at primary centres on gum shellac is now noted. Quotations, however, on the local market remain unchanged for the week.

Activity is now everywhere pronounced in paint and varnish circles. Manufacturers describe the present movement of these lines as quite satisfactory, and increasing from week to week. Quotations on these products, also white lead in oil and putty, are steady to firm owing to prevailing costs of raw materials.

LINSEED OIL PRICES DROP FOUR CENTS

In sympathy with the flax seed market, which was slightly easier during the week, linseed oil quotations are reduced four cents per gallon, with a price of $1.04 for raw oil in one barrel lots most generally quoted. The weakening seed market came following a softening of Argentine prices, but is considered only temporary, in fact there is again a stiffening of prices noted in the past few days. It is pointed out that the underlying factors are unchanged, and there is still the probability of a shortage of seed later on. Reports from outside centres state that crushers are more than a little concerned over the prospects of obtaining sufficient seed to keep their mills running at a rate to take care of demands until the time of the next domestic crop.

There is a continued improvement in local demands, and oil sales have now reached a fairly active stage.

LINSEED OIL—	Raw.	Boiled.
1 to 2 barrel lots, per gal. ..	1 04	1 06
3 to 5 barrel lots, per gal.....	1 02	1 06

Less barrels, add 10 cents per gallon.

NO FURTHER CHANGE IN TURPENTINE PRICES

Montreal

There is little change in the turpentine situation this week. Quotations remain at the decline of last week, with a quotation a few cents in advance still given in some quarters. Demands have now become quite heavy, and importers are well satisfied with the earlier showing of this product. Jobbers report a gradual improvement in dealer sales, although it is yet early for the active spring buying period, this usually commencing next month.

Although the market sagged a little recently, there is already a firmer tendency, with indications of a fairly steady condition prevailing for future. It has been predicted for some time past that fluctuations would in all probability occur in the market, but that the undertone would continue firm, opinions being based in this direction because of conditions in the south, and taking into consideration the increasing consumption which is usual at this season. It is still pointed out that demand will control the situation to a large extent, and spring consumption, should now soon commence. Unchanged local quotations are the following:

TURPENTINE—	Imp. gal.
1 barrel lots	1 22
2 to 4 barrel lots, per gal.	1 20
Broken lots	1 32

PAINT BUSINESS PROCEEDS ALONG SATISFACTORY LINES

Montreal.

Spring buying in paint, varnishes and sundry lines has now commenced in earnest. Manufacturers report increased activity from week to week, and the volume of business is now said to be quite satisfactory for the earlier buying period. With the booking dates now extended on white lead in oil until June 30th, little change in quotations on any of the paint products is anticipated until after the active spring season at least. Lead and linseed oil, the two basic materials, offer little chances of a recession as the markets are fairly firm.

UNDERTONE OF SHELLAC MARKET STILL FIRM

Montreal.

Quotations on shellac remain at unchanged figures, with the same wide range appearing in prices given by different jobbers and distributors. In primary circles this product is reported as being very firm, chiefly owing to disturbances in India. Importers from this field are said to be experiencing their own troubles in obtaining further supplies, being further hindered in transporting from the interior to the seaport centres. While it may take some little time before this condition reflects on the local market, it is felt that a stiffening of prices is not unlikely when demand becomes more active in the following months. Following are most general quotations:

SHELLAC—	
Orange shellac, in barrels	4 60
Do., in one gal. jugs	4 90
White, in 5 gal. jugs	5 10
Do., in one gal. jugs	5 40

PARIS GREEN AGAIN QUOTED ONE CENT LOWER

Montreal

Paris green quotations, with the exception of keg and barrel prices, are again revised, showing a reduction of one cent per lb. This revision does not result from any underlying factor in the market, but is given in order that quotations will be on a uniform basis in all quarters. This brings this year's quotations 15 cents lower than the opening prices issued last year.

Toronto

TORONTO, March 23.—Several important developments are recorded in the current paint markets. These changes principally affect turpentine, shellac and Paris green. The quotations on the later product show a further slight revision on the smaller sizes, thus bringing quotations to a uniform market level. Turpentine on the local market has receded another two cents per gallon, this tendency being attributed to the mild demand, combined with a steadier tone to southern distributing centres. As a larger volume of business is generally looked for during the ensuing weeks, with the likelihood of receipts being larger on the primary markets, it is felt that the prevailing tone may be thereby sustained. Consumers continue to adhere to the policy of buying hand-to-mouth, and

FLOGLAZE Auto Finishes

(The can with the Brown and Red Label)

Are you ready for the Spring demand for Auto Finishes?

Many automobile owners do not intend purchasing new cars this year, owing to the economic situation. Therefore, the demand for high grade automobile finishes will be greater than ever this Spring.

FLOGLAZE AUTO FINISHES are specially adapted to the amateur finisher's use. Seven popular shades, easily applied, giving nice flowing qualities, and drying with a durable, glossy lustre not usually obtained by the average automobile finishes. Can also be used on motor trucks, bodies, hoods and fenders.

Let FLOGLAZE AUTO FINISHES help increase the profits of your paint department.

Our dealers' booklet "A Guide to Larger Profits" describes FLOGLAZE AUTO FINISHES fully. Write for this book.

TORONTO PAINT MARKETS

(Continued from page 50)

trade in the aggregate is approximately normal for this season of the year.

Some local distributors have announced the withdrawal of prices on shellac, this action being attributed to a variety of reasons. The firm undertone in these markets has been noted in recent issues of Hardware and Metal. This situation reflects such conditions as the disturbances in India and the consequent unsettled state of the Calcutta markets. Importers from Indian centres state that the turbulent nature of recent events in that country has hindered the transportation of shellac from the interior. Another factor accentuating the apparent shortage, was the reported loss by fire of a recent cargo en route to New York.

Activity in paint and varnish circles is now more pronounced from week to week with both manufacturers and distributors reporting increased interest by purchasers generally. Spring buying is now described as on a normal plane, and the prevailing movement is stated as satisfactory. Quotations on the various paint products remain unchanged, with allied lines such as white lead in oil, and putty, also recording increased demand with steady price levels.

LINSEED PRICES STEADY AT REVISED LEVEL

Toronto.

Linseed oil prices on the local markets remain at the level of $1.15 for raw and $1.18 for boiled in barrel lots, with no further developments recorded since these quotations became generally effective a few days ago. It is noticeable, however, that the seed market has been slightly easier during recent weeks, this movement following the weakness in the Argentine flax seed quotations. This tendency, however, is looked upon as temporary, and the general undertone is apparently again on the road to recovery. No great supply of seed is available, and it is pointed out that under these circumstances, linseed oil should register a steady to firm market. Demand is described as of a fairly active nature at present, with improvement in this direction anticipated as the season develops.

LINSEED OIL—

	Per Gallon Raw	Boiled
1 to 2 barrel lots	1 10	1 13
3 to 4 barrel lots	1 09	1 12
6 to 9 barrel lots	1 07	1 10

Less barrels, add 15 cents per gallon.

TURPENTINE PRICE SAGS ANOTHER TWO CENTS

Toronto

Both supplies and demand for turpentine are described as of a moderate nature, and quotations on the local markets have generally receded another two cents per gallon. Recent reports from southern distributing centres indicate that current offerings are now in excess of receipts and stocks are also heavier than shipments. A fairly steady tone however, prevails, especially in view of anticipated improvement in the volume of demand in the near future. Requirements are usually, heavier during April, but with fresh receipts also available at this time, no extensive changes are looked for in the markets generally. The revised local prices follow:

TURPENTINE—	Imp. gal.
1 barrel lots	1 25
2 to 4 barrel lots	1 24
5 gallon lots	1 40

Turpentine steel drums galvanized, 6c per gallon less than barrel price. Drums charged $15 each, returnable in 30 days, freight paid.

All quantities sold f.o.b. Toronto, Hamilton, London, Brantford, Collingwood, Guelph Windsor, or Montreal but freight may be equalized from any of these points.

Car load lots of 70 bbls. Price on application.

Less than 1 barrel lots—15 cents per gallon extra

MORE MINOR CHANGES IN PARIS GREEN COST

Toronto.

Following the revised quotations announced last week on Paris green, prices have since been established at a uniform level by another reduction of one cent on cartons, tins and drums. Altogether, the current prices are fifteen cents lower than the quotations for the previous season. Following is the revised list:

PARIS GREEN—

½-lb. paper cartons, per lb.	0 37
1-lb. paper cartons, per lb.	0 35
½-lb. tins, per lb.	0 39
1-lb. tins, per lb.	0 37
25-lb. tins, per lb.	0 33
50 and 100 lb. drums, per lb.	0 31
250-lb. kegs, per lb.	0 29½
600-lb. barrels, per lb.	0 29

F.o.b. Montreal, Toronto, Hamilton, London, Ottawa, Quebec, Moncton, St. John's and Halifax.

Yarmouth and P.E.I. points ¼c. per lb. extra.

SHELLAC PRICE WITHDRAWN ON LOCAL MARKETS

Toronto

The firm situation in shellac which has been noted in recent market reports, has now developed to the point where local distributors have withdrawn quotations on this product. This action is generally attributed to the scarcity of gum shellac, with its consequent reflection in shellac markets, both foreign and domestic. Quotations on shellac recently moved up to a more uniform level, which is generally noted at $5.10 for white, and $4.60 for orange in barrel lots. Some easier prices have been recorded in certain quarters, but this condition is generally attributed to the use of substitutes, and pure grades record a firm undertone, as noted above.

BRIGHTER TONE NOTED IN GLASS MARKETS

Toronto

Current window glass business is said to compare very favorably with the corresponding volume recorded this time last year. While some unsettlement with regard to prices is noted in certain quarters, yet distributors are generally optimistic regarding future conditions in the glass industry, and look for an improved seasonal demand, consequent upon the general reflection of improvement in basic business circles. While the recently revised list prices have evidently not yet been uniformly adopted in some quarters, the latest list is regarded as representing local quotations. Adherence to easier levels on certain domestic markets is ascribed to the importation of lower priced foreign window glass.

COLLECTION OF INTEREST

Continued from page 30

liability to pay interest until the final settlement of the account, when they evidently intended to raise the question of their liability to pay interest.

Implied Understanding

In the result the judge held that the court of dealings between the parties, coupled with the printed notification on the plaintiff's statement of account, sufficiently evidenced an implied understanding or agreement to pay interest, to bring the case within the general principle that an agreement to pay interest may be reasonably implied from the previous dealings of the parties, coupled with a printed notification of intention to charge interest on the vendor's statement of account.

In Hart vs. Greer, 33 W.L.R., p. 39, the plaintiff had printed on his account, "interest at 10 per cent. per annum chargeable after thirty days," and the evidence showed that on several occasions subsequent to the expiration of thirty days, the plaintiff called the defendant's attention to the printed notice on the statement, and notified him that interest was being charged.

The district court judge considered the case of Marshall vs. Eaton & Gordon, mentioned above, and decided that while, as stated by the judge in that case, the printed words taken alone do not constitute a written demand under the Act, they do limit the period of credit or render the account payable within the time therein specified, so as to bring the case within the first part of subsection 2, s. 29, of the King's Bench Act above referred to, and that where the attention of the debtor is called to the notice and he is notified that interest is being charged, it constitutes a demand in writing informing the debtor as is required by the said subsection.

To sum up, therefore, it would account to the effect that interest as appears from the cases above quoted that if a notification is printed on the notice a specified rate will be charged after a certain period the debtor will be liable to pay interest by virtue of that notification, if (1) he has been in the habit for a period of time of making payments from time to time on accounts bearing the notification and including interest, so that an agreement to pay interest could be inferred from the course of dealings between the parties; or (2) if, after the expiration of the credit period intimated on the account, a demand is made for payment from the debtor and interest is demanded pursuant to the notification printed on the account, although as a matter of evidence and in any event to make the position stronger, the demand for payment of the account and the interest should be made in writing.

Who Will Get Their Trade This Spring?

The farmers and fruit growers of your community—the men who raise the largest and best quality crops as a result of careful cultivation and **timely spraying with quality Insecticides?**

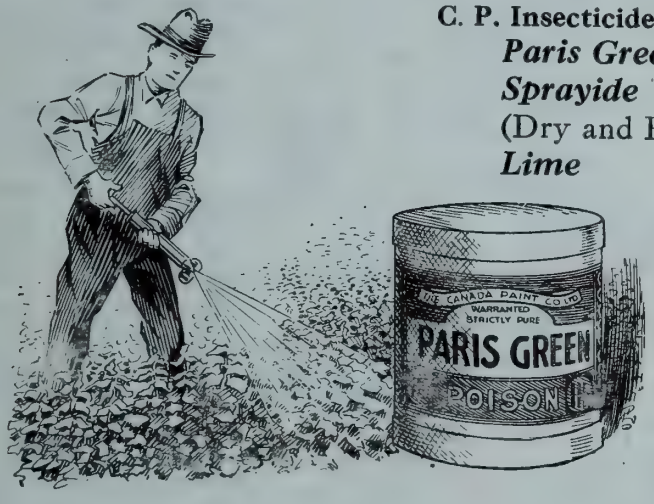
Why should **you** not get this trade?

Right now is the time to secure it. All you need is a stock of

Canada Paint INSECTICIDES

the surest and most economical preventatives of the destructive insect pests.

The quality of these Insecticides is an assurance of good results. They are easy to apply—retain their strength and purity indefinitely and remain in suspension longer than most other Insecticides.



C. P. Insecticides include:

Paris Green ***Dry Lime Sulphur***
Sprayide ***Arsenate of Lead***
(Dry and Paste) and ***Arsenate of Lime***

Stock them for big spring sales and good profits. Stock them for the added prestige that the merchandising of such high quality insecticides will inevitably bring you.

"Save the surface and you save all" Paint & Varnish

"Save the surface and you save all" Paint & Varnish

Satinette

ENAMEL

A DISTINCTIVE LEADER

For Your Paint and Varnish Department

SATINETTE ENAMEL is in demand by those who know real enamel value for all high-class finishing whether exterior or interior.

This already large demand will be materially increased by the extensive publicity campaign now being carried on among master painters and consumers. This campaign will bring forcibly to the attention of the buying public the superior quality of Satinette.

You will be called upon to furnish Satinette Enamel to your customers. No substitute will be acceptable.

The Satinette container as reproduced here if displayed on your shelves or counter will get sales-making attention immediately.

Satinette Enamel is supplied in Gloss, Semi Gloss or Flat White, also in Ivy or Grey shades.

Satinette is only one of the many easy-selling and profitable International Varnish Company's products. We manufacture a full and complete line of highest quality Varnishes, Stains, Paints and Enamels.

Order your supply of Satinette now. Write us for prices and full particulars on our complete line.

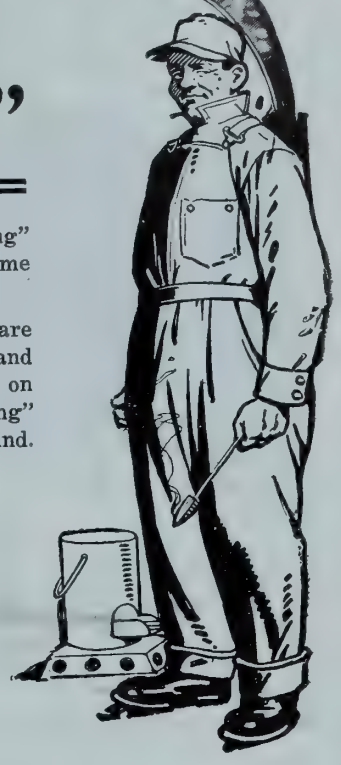
TINKER TOM'S TALKS

Talk No. 351

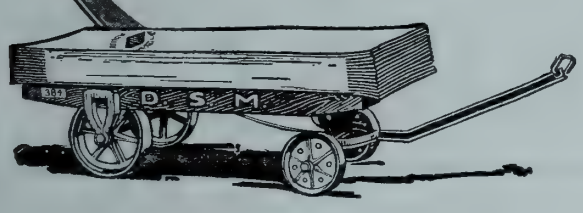
"A Baby's Breath"



That's a good description of the coating you get by the "cold galvanizing" process. Of course, sheets are not coated that way but nevertheless some sheets have a very "skimpy" coating.

If you are interested in knowing the proper weight of coating per square foot for your requirements, write and state the gauge and purpose, and we'll be pleased to tell you. Incidentally, that will be the coating on "Premier" Galvanized Steel Sheets as we specialize on "Just Right Coating" —not too heavy, certainly not the cheap, ineffective, underweight kind.

TINKER TOM.



MADE IN PREMIER CANADA

Best Decorators Use It
Best Stores Sell It

If your customer has not used Alabastine lately he will be surprised and delighted with the improved quality over what it was years ago.

We guarantee that Alabastine as now made will spread more easily and cover better than any other similar wall covering when mixed in the same way in either hot or cold water.

When mixed in cold water Alabastine shows a marked superiority over other goods mixed in the same way.

Mix in Hot or Cold Water

Alabastine

Beware of imitations, there is only one Alabastine.

This Guarantee Protects the User—And You

Factory Guarantee

Every battery bearing the North Star label is guaranteed to give full satisfaction to the consumer. Should a battery prove defective, simply satisfy the merchant from whom purchased. He is authorized to replace it.

Any North Star battery that fails to give full measure of satisfaction to the user is replaced by us without the least trouble. This is one reason why you will find the North Star a good battery to sell.

The Waterproof Battery

An Exclusive Feature of North Star Multiples, is the improved terminals. They insure perfect contact and prevent loose connections.

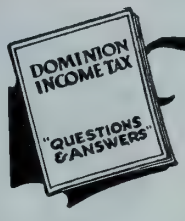
NORTH STAR DRY CELLS MULTIPLES

Do You Read the Advertisements

THE MAIN thing an advertiser wants to do is to tell you plainly just how and why his goods are worthy of your consideration. You can learn a great deal from that alone, because many things you see advertised are the things you buy and use in your regular daily life. By reading the advertisements you can learn the names and read descriptions of the things that are best and most satisfactory.



Your Income Tax

We have just issued a booklet—
"Dominion Income Tax—Questions and Answers"
which explains in a simple, concise way all Canadian Government Tax requirements.
The booklet is the work of a tax specialist. It simplifies—for any individual, incorporated company or estate—the preparation of the necessary income tax return.

We will be pleased to forward a copy on request.

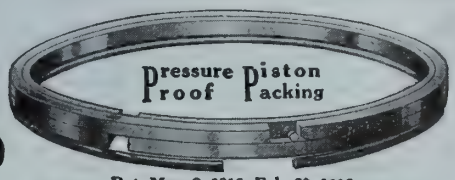
PRESSURE PROOF PISTON RINGS



Pat. Mar. 2, 1915. Feb. 29. 1916

Manufactured by Pressure Proof Rings Limited, Sherbrooke, Que.

WE ARE DISTRIBUTORS FOR THE PRAIRIE PROVINCES

Standard Equipment on the Franklin Car, which has the hottest motor on the market
Endorsed by the biggest and best Engineers in the Automotive Industry
Will positively Stop Oil and Compression Leaks

One Car Owner two years ago, on a car with Standard Equipment, used 15 gallons of Oil in the season's running. In 1921, after installing Pressure Proof Rings, he used only 3 gals. of Oil, in the same running period.

To Eliminate Spurting Oil USE PRESSURE PROOF
To be Sure of Good Compression USE PRESSURE PROOF
To have Satisfied Customers USE PRESSURE PROOF

Advertising that Builds Bigger Sales!

Bigger and better than ever — Barrett 1922 advertising will cover Canada — will reach every class of buyer. Tremendous sales are sure.

17,537,200 Advertisements. Think of it!

And they will reach consumers of every class, all over the Dominion:

7,462,200 advertisements in leading farm papers read by the progressive farmers all over the Dominion.

9,670,700 advertisements in Montreal daily newspapers covering Montreal City and adjacent territory.

404,300 advertisements in leading technical magazines reaching railroads, manufacturers, contractors and other large consumers.

As in the past, these advertisements will be crammed full of straight common-sense arguments — why Barrett Everlastic Specialties are best — why they never fail to satisfy — why they are more economical. That's the kind of advertising that sells the goods.

New customers will be made—old users will come back for more—your cash register will work overtime.

See that your stock of Barrett Products is complete. Have the goods to meet the demand. *If you haven't a copy of our latest Price List, write for it today.*

The well-known Barrett Products which will be featured in our big consumer advertising campaign, include:

Everjet Elastic Carbon Paint
Everlastic "Rubber" Roofing
Everlastic Multi-Shingles
Everlastic Liquid Roofing Cement
Plastic Elastigum Patching Cement
Liquid Elastigum
Creonoid (Fly Oil) Cow Spray and Lice Destroyer

THE BUYERS' GUIDE

If what you want is not here, write us, and we will tell you where to get it. Let us suggest that you consult also the advertisers' index, facing the inside back cover, after having secured advertisers' names from the directory. The information you may desire may be found in the advertising pages. This department is maintained for the benefit and convenience of our readers. The insertion of advertisers' headings is gladly undertaken, but does not become part of any advertising contract.

Why Hardware Mailing Lists Are Not Complete

WE ARE frequently asked why many of the so-called complete hardware mailing lists are incomplete and miss many hundreds of the best hardware stores in Canada. There is a reason.

If you take a complete list of the hardware firms rated in Dun's and Bradstreet's as hardware firms, you will be short upwards of 900 of the best hardware firms in Canada. This is due to the fact that upwards of 900 of the leading hardware stores in Canada, are the hardware sections of department or general stores. There is nothing in the commercial rating books to indicate which of the many thousands of department or general stores have hardware sections. For instance, in one Western Canada town there are four general stores and one exclusive hardware store. One of the general stores has a strictly modern hardware section. The only way in which you can find out which one of the four stores has this department, is to visit the town and call on all stores. The same condition exists in hundreds of other places in Canada. The cost of doing this for one mailing list or one publication would be absolutely prohibitive. The MacLean Publishing Company, however, have fifteen publications, and send crews of salaried circulation men into every city, town and hamlet in the Dominion from Coast to Coast. Representing fifteen publications these men call on practically every business man in a town or city. The MacLean Publishing Company have been working on this plan for upwards of 30 years. The result is that to-day HARDWARE AND METAL has as paid subscribers, in addition to exclusive hardware stores, upwards of 900 of these strictly modern, up-to-date hardware sections and very few of these names are on mailing lists, with the exception of the list used to mail out our paper.

Another important point is that on our mailing list several hundred copies go addressed personally to the men in charge of the buying. Circulars sent from the average mailing lists merely go to a firm name along with a large quantity of other circular matter and is somewhat of a hit or miss proposition. With HARDWARE AND METAL there are hundreds of cases where the name of the buyer also appears along with the company address.

Subscribers to HARDWARE AND METAL buy our paper because they need it in their business and because they study it each week for news

of the trade, new goods, market information and for additional information regarding goods which the merchants are carrying in stock. Several hundred merchants prepare their advertising in their local papers, from information which they take out of the advertisements in HARDWARE AND METAL. Window trimmers in hardware stores study HARDWARE AND METAL for ideas on seasonable goods which they can display in the show windows. The men behind the counter are among the closest readers of HARDWARE AND METAL because in it they find a vast amount of information regarding goods which they are called upon to sell each day. Dozens of leading jobbers' salesmen carry copies of the current issue of HARDWARE AND METAL along with their catalogs and go through these issues with their customers. One of the leading wholesale buyers, (name on request), stated that he "much preferred to buy lines advertised in HARDWARE AND METAL because he found that these lines were the quickest sellers and were the lines in which the travellers took the greatest interest."

It is therefore of the utmost importance that any advertising matter you wish to place before the trade, should reach as many of these hardware men as possible. It is an easy matter to claim that you cover the whole hardware trade but HARDWARE AND METAL knows from thirty-three years' experience that it takes many years of honest, intelligent effort to get a complete list of the hardware buyers in Canada. A large staff is also required to keep lists up to date, record business changes, new firms, etc. We offer you the most complete list through the advertising pages of HARDWARE AND METAL.

The hardware trade is undergoing rapid changes. With each succeeding year come new developments. It is our business to keep in close touch with the trade. We have a vast amount of information on almost every imaginable phase of the hardware trade. You may think your line is one that cannot be advertised. We may think differently. It will cost you nothing to secure our views. Drop us a line and our representative will call, or if you prefer it, we will, after making an investigation of the possibilities of advertising your lines, submit our proposition in writing.

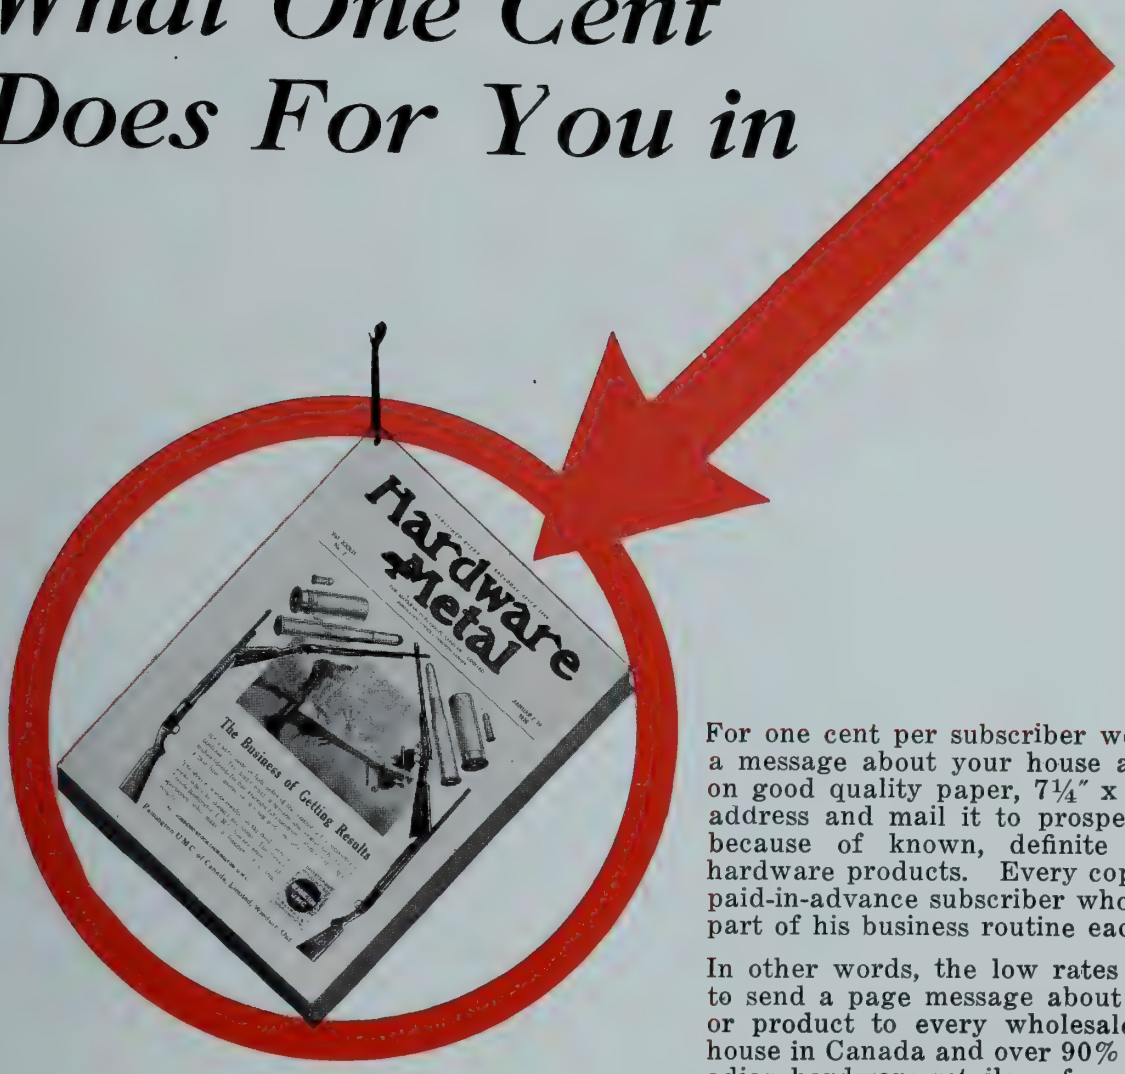
What One Cent Does For You in



For one cent per subscriber we will print a message about your house and product on good quality paper, 7¼″ x 10″ in size, address and mail it to prospects selected because of known, definite interest in hardware products. Every copy goes to a paid-in-advance subscriber who reads it as part of his business routine each week.

In other words, the low rates enable you to send a page message about your house or product to every wholesale hardware house in Canada and over 90% of the Canadian hardware retailers, from Atlantic to Pacific, at a weekly cost of about one cent each.

In view of present low stocks, the retailers' "pick-and-choose" style of buying, the keen competition predicted for 1922, and these low advertising rates, it will pay you to get in touch with us.

NEW DAYTON SCALES CONTEST

$1000 in cash prizes to merchants and clerks

Forty-One Prizes in Cash for the Best Answers to an Important Question

THE record of the Dayton Automatic Scale has been a story of improvement after improvement. We've seen the Dayton grow, and we've told the story chapter by chapter as added features brought new time and money-saving features to Canadian merchants.

Some of the most helpful opinions we have had on Dayton Service have come from merchants who use and know and live with the Dayton. Continually, our salesmen are hearing from satisfied Dayton users of new advantages attaching to the use of the Dayton, which had never come to our attention. We're always glad to hear and study the opinions of the merchants—in city, town or country. We regard these opinions highly. They're valuable to use — so valuable that we're willing and glad to **PAY FOR THEM.**

The present $1,000 Prize Contest will be in the nature of a Clearing House for the ideas of merchants and clerks. To make it worth your while to put down on paper a short statement of these ideas, we are offering to distribute $1,000 in prizes.

You know the Dayton. You've seen it in action day after day. Just apply your experience and observations to this question which we give you to answer.

Here is the Question

"If you were a Dayton Salesman, what reasons would you advance to sell a Dayton Scale?"

Here are the Prizes

2	Prizes for the best answers	$100 each
4	" " " next best answers	50 "
10	" " " " " "	25 "
10	" " " " " "	20 "
15	" " " " " "	10 "

This contest offers you a fine opportunity to try your hand on the writing of an advertisement, as we will be glad to have you reply in that form if you prefer it to a written article. The only restrictions we impose are that statements shall contain no inaccuracies or exaggerations, expressed or implied.

List of winners will be announced in trade papers at close of contest.

Here's the Question
Study it—we pay $1,000
for the best answers:

If you were a Dayton Salesman what reasons would you advance to sell a Dayton Scale?

RULES OF $1,000 DAYTON PRIZE CONTEST

1. Contest will be closed June 30, 1922. No letter postmarked after that date will be accepted.

2. Write your replies on one side of paper only.

3. Contest is open to all merchants and clerks in Canadian stores wherein scales are used.

4. Each reply MUST bear the sender's name and address, and name of firm of which he or she is proprietor or employee. Should you be a prize winner this information is to be verified by someone representing that company.

5. You may send in as many replies as you wish.

6. A committee whose impartiality will be guaranteed by this Company will judge the replies and make the awards, such awards to be considered as final.

7. No employee of International Business Machines Co., Limited, will be eligible for the contest.

8. Address your contest letter to Head Office (not to any branch) as follows:

INTERNATIONAL BUSINESS MACHINES CO., LIMITED

The Trade Mark on the Goods

FREE
Dealer Helps

Have you sent for any of our free dealer helps? There are 25 free newspaper cuts, four window or counter cards, a supply of good-sized cardboard price tags, and a giant enlargement of our big newspaper advertisement "Good News for Housewives."

In a short time you will hear more of our striking window trims, two for Diamond Ware—two for Pearl.

And then there's a mighty interesting free book on "Helping You to Make More Money." Ask our traveler about this.

Do the women of your town know where they can buy **SMP** Diamond Ware and Pearl Ware?

They know the **SMP** trade mark and respect and admire the goods, but do they know what stores handle it?

Our big campaign of national advertising is creating a widespread desire for Diamond Ware and Pearl Ware—the high quality enameled wares carrying the **SMP** shield trade mark.

As a result, women want Diamond Ware and Pearl Ware. If you are not known as an **SMP** man handling our goods are you not passing up a legitimate profit already earned for you by our advertising?

Identify yourself with our campaign. Advertise in your local paper, using **SMP** cuts; dress your windows frequently with Diamond or Pearl Ware; keep the **SMP** price tag on every utensil in the window or inside the shop; keep the **SMP** trade mark right up in front.

Follow these suggestions, carry a fair stock and we will guarantee the profits.

FREE
Cut Service

Note the cut of the kettle above. We have twenty-five cuts just as clear and distinct as this one—roasters, sauce pans, pudding pans, tea pots—every good seller in the line.

We had these cuts made for the use of enterprising SMP dealers. For men who would use them in their local advertising to speed things up. We have already shipped out almost 2,000 of these cuts. Have we heard from you?

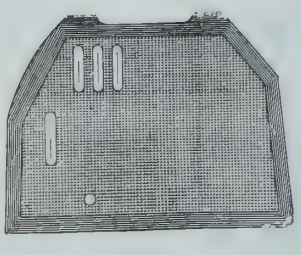
Every Motorist Needs Accessories

and Needs them Quick

He doesn't want to order by mail, and when he brisks into your store and wants a Sealtite Patch for a punctured tube, he doesn't want to hear you say, "We haven't any in stock but can get it for you in a few days." Have it in stock all the time—a full line of "Gutta Percha" Auto Accessories.

HEAT PROOF MATS FOR FORD CARS



This mat is one of the greatest comforts for summer motoring. The thin flaps that fit close around the gear pedals and brake pedals and brake lever keep out the engine heat that burns your feet and also keep out the dust that flies up from the Roadway, and the odors from the engine. This mat is patented and only made by the "Gutta Percha" Factory, so you know where to send your order.

Order Your Assortment from Head Office or from Nearest Branch

SEALTITE PATCHES FOR TUBES

Sealtite has advantages over any similar device. In the first place, it sticks tight and gradually the heat of the tire practically vulcanizes it into the rubber of the tube. It is a safe prediction that your customers will always repeat their order for Sealtite because they will find a tube never leaks again where a Sealtite patch has been properly put on.

From Halifax to Vancouver

In every city and town across the three thousand mile stretch of this Dominion, the name "Emco" is suggestive of quality brass goods.

The demand for hose couplings and spray nozzles will soon be on the increase. Be ready to meet this demand with the celebrated "Emco" line.

The "Emco" brass spray nozzle No. A-1981 adjusts readily from a misty to a coarse spray and then to a solid stream. Our hose coupling No. A-1982 is a companion fixture that is well machined with deep even threads. These fixtures sell together in large numbers.

A-1981

DUNLOP TIRES

Ensure

HIGH-MILEAGE—DOUBLE-LIFE

¶ Dunlop leadership in Tiredom is most manifest. Mileage records almost unbelievable are piling up all over Canada.

¶ The Special Mileage-Making Process, which is the basis of our Fabric Tires, has worked wonders.

¶ Perfect shape and balance, stronger side walls to resist curb and rut abuse, special wear-resisting anti-skid tread, etc., add the last touch to popularizing to the full a tire that has long stood in high favor.

¶ Dunlop "Cords" made good from their inception.

¶ These tires taught motorists to expect more resiliency, greater air space, larger amount of material, better carrying capacity—in short, bigger mileage; and that is the standard by which all Cord Tires are judged to-day.

AMES HOLDEN

AHM System

23,000 Miles Without a Blow-out

Ames Holden "Grey Sox" and "Red Sox" Tubes also cost less per mile.

THE best advertising for Ames Holden Auto-Shoes is the remarkable mileage they are giving. Here is a typical example of Auto-Shoe performance:

Mr. H. Parker, Carroll Street, Ingersoll, Ontario, who operates a taxi service, has recently discarded two Auto-Shoes which travelled 23,000 miles before they were worn enough to be replaced. While using these two Auto-Shoes seven other well-known makes of tires were worn out on the same car.

Needless to say Mr. Parker is convinced that Auto-Shoes "cost less per mile." He will never use any other tires in future.

Ask our nearest Sales Office to tell you about the unusual Ames Holden dealer policy.

This Fast-Selling Bridal Gift Set Costs You $8.50—Sells at $12.75

The big national advertising campaign on Viko Aluminum features this Bridal Gift Set in The Saturday Evening Post, May 20th, and in eight other national magazines totaling 10,000,000 circulation, during May and June—just at the right time to appeal to those who are giving presents to June brides.

You have an opportunity to reap the benefits from this big selling campaign. The set costs you only $8.50. You sell it for $12.75. A gross profit of $4.25 on each sale! You can make up other sets from your own stock to retail at prices of $5.00 and upwards.

In addition to reaching hundreds of prospective buyers in your community through the VIKO national advertising, we furnish free, to all dealers who buy these sets, a complete dealer newspaper advertisement to tie your store up with this powerful selling influence.

This set comes to you in a special attractive gift box packed in a corrugated carton. The sets will sell on sight, not only as wedding presents, but for kitchen showers, birthday gifts and to your regular trade.

This set is sold you at the regular price of the individual articles—without any charge for the special gift box packing. Every piece in this set is a staple article which can be put in open stock if desired.

This special campaign is an example of the national sales effort placed behind Viko dealers throughout the year. Each advertisement is aimed to put pressure on the worth while families in your community and to send them into your store to buy!

Send your orders to your jobber now! He will see that you are supplied promptly with the gift sets and with the advertising material. If you are not yet handling the Viko line of popular-priced aluminum utensils, and are anxious to increase your profits—

The dealer who stocks files that are accepted as the standard among file users avoids the necessity of active selling efforts.

Such files sell themselves.

File users ask for them, and accept them without question.

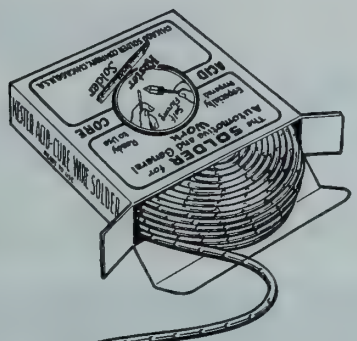
This is the experience of dealers who carry one of the following five brands, accepted as the standard of file quality for over fifty years:

Kearney & Foot
Great Western
American
Arcade
Globe

Made in Canada by

Nicholson File Company

Port Hope - Ontario



"I received your sample of Kester Acid Core Wire Solder and have tried it out and like it fine. Have bought a spool of it from my dealer and find that it saves a lot of trouble. All I have to do is to heat my soldering iron and the solder will do the rest.

"I am glad I found your advertisement and sure appreciate it very much."

—JOHN C. BUCK
Harrison, Neb.

APPLY the heat—and from the inside of the *hollow* Kester Acid Core Wire Solder, the acid will run on to the article you are soldering. After it—*always* after it—will come the solder, it's perfect flux formed. Remember, it's simply high grade flux and high grade solder—the same as you are using now, but far, far easier to apply. Fill out the coupon below and get a free sample to try for yourself.

In the illustration below the black spot indicates the flux that fills the inside of the hollow wire solder. Notice the crimps in the solder shown above. They keep the flux from running out except as you wish to use it, and keep the amounts of flux and solder always in proper proportion.

FOLDING FURNITURE

NOW—

Camp on the Camper's Trail

Make your store the headquarters in your city for the 1922 legion of amateur and professional tourists and campers. The lure of the open road, the woods, the mountains, and fish-reputed lakes and streams is even now beckoning irresistibly to thousands of winter-restless souls. The psychological moment is yours to capitalize, if you will.

Gold Medal Camp Furniture will enable you to take care of every folding camp furniture want to the best possible advantage of the customer as well as yourself. In this line of furniture you offer maximum comfort, knock-about durability, and easy portability—the one-two-three appeal that knocks sales resistance for a goal!

Gold Medal Folding Camp Furniture has been receiving the heartiest commendation of seasoned campers, explorers, military men, civil engineers, and war correspondents for more than thirty years. If you are not handling this line, now is the time to get in line! All inquiries from our national advertising are referred to our dealers.

Up-to-date Combination Stove

ALLIANCE

For Coal or Wood

Six-hole Top—14-inch Oven.

Sectional View.

Made in one size with or without the following extras: Reservoir, coal grates, high shelf, and high closet.

Twelve different styles. The only one of its kind on the market. We originated the Quebec Heater with a steel oven in 1908 and marketed it. We have many imitators and most stove founders are making it to-day.

The sectional view shows that the operating principle is exactly the same as that of the Quebec Heater, while the outside appearance is that of a range. Thus, it retains all the good qualities of the former but has, besides, all the conveniences of the latter, combining in one the utility and economy of both. The "Alliance," fully protected by patents, is an improvement, an advanced step, over the Quebec Heater with oven.

Write here to the original source of stove ideas for information and prices.

TRADE MARK Red Devil Tools

Popular Selling Nail Pullers Since 1872

GIANT NAIL PULLERS have been giving a good account of themselves since they were born—in 1872, the first pullers ever made. They were awarded the first prize at Sydney, Australia, Chicago, Ill., and Pan-American, Buffalo, New York, Expositions.

The many distinctive features and improvements in the "Giant," suggested by long experience, have made it the most popular selling tool to-day. Jaws open by gravity; weight is at end of short jaw. No springs, no pinching, no rolling—has three parts only—nothing to get out of order.

Every good dealer will find it to his advantage to sell the Giant Nail Puller.

Ask for circular and trade prices.

Tool Buyers Say The Starrett No. 146 is the Best Hack Saw Frame Sold at its Price

Show your customers the wide, rigid stock. That's a feature that makes a strong appeal to men who know hack saw frames. They know a frame like that won't cramp when the saw is tightened up, and won't tremble when it's used.

Show your trade the wide scope of this saw frame, too—how it takes 8, 9, 10, 11 and 12 inch saws—how it may be set to cut in any one of four directions, and tightened by simply turning the handle. Call attention to its fine finish—its polish and nickel plate. It's a hack saw frame that any mechanic would be pleased to own.

Starrett Hack Saw Frame No. 489 is another big value. Has extra rigid back made of heavy tubing. The frame telescopes into the tube engaging slots so spaced as to permit the frame to take saws 8 to 12 inches in length. May be set to cut in either of four directions. Fitted with "Easy Grip" hardwood handle and finely nickel plated.

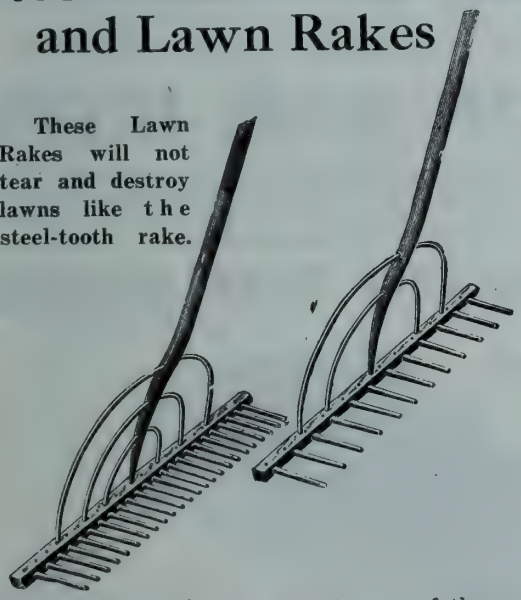
Steel Tube Bow Hay and Lawn Rakes

These Lawn Rakes will not tear and destroy lawns like the steel-tooth rake.



It is easy to convince your customers of the superiority of this rake.

The steel tube bow makes a much stronger and better looking rake and does not add anything to the weight.

Note the improved double bend in the handle, making a much better hanging rake.

We also make the wood and wire bow rake.

RUGG-BALL MFG. CO., LIMITED

AYER'S CLIFF, - - QUEBEC

TRIMO

THE WORD TRIMO

Pipe Wrench

Stands for good tools made by the Trimont Mfg. Co., which are the following:—

The Trimo Pipe Wrench
The Trimo Chain Pipe-Wrench
The Trimo Nut Wrench
The Trimo Pipe Cutter (Hand)

The four good points that make **Trimo Pipe Wrenches** superior are the **Spiral Spring** always in place—**Steel Frames** that will not break—**Nut Guards** that protect adjustment nut—and the **Inserted Jaw** in handle that can be replaced when worn.

Tax "Travellers" on Increased Income

Inland Revenue Dept. Decides "Travellers" Allowed Living Expenses When Away—Must Show Increased Income on Tax Returns of Dollar for Each Day's Travelling—Includes Employees of Manufacturing, Wholesale or Retail Firms Who Travel Sufficient to Warrant it

THERE is announced this week what appears to the various branches of the hardware trade to be one of the oddest of all the odd pieces of legislation which have been enacted in connection with the income and other taxes. In connection with 1921 returns now asked, it is prescribed that men who regularly travel, and whose expenses when traveling are paid by the firm for which they are employed, must add to their income for purposes of taxation, an amount representing one dollar for every day they are away and on which their living expenses are not paid by themselves. This obviously deals primarily with traveling salesmen but its influence is somewhat more extensive as has been found by investigation made by Hardware and Metal.

The idea of taxing a man on extra income when his living expenses are being met by the firm apart altogether from his salary, is an outcrop of income tax legislation in the United States where such "frills" have not been any too warmly received. The idea, according to Mr. Smith, head of the income tax department, is to place the traveler, whose living expenses are paid by his firm, on the same basis as the city traveler who pays his own living expenses and also on the same basis as the commission salesman who is allowed nothing or only a portion of his expenses by his firm. As a matter of fact the new ruling was brought about largely as a result of complaints made by salesmen working on commission that their brother salesmen working on salary and expense allowance, had a big advantage under the plan originally proposed by the inland revenue department under which only railway fare was to be allowed to be deducted from income on statements made by commission salesmen. It was not thought that salesmen allowed expenses by their firms were inclined to "pad" their bills and thus increase their income but that being allowed expense money was really an allowance "in lieu of living expenses."

Hardware and Metal suggested to officials of the income tax department that on this basis the family of a married salesman should be able to effect considerable saving in living expenses during his absence whereupon a number of them agreed that the absence of a man from home generally made very slight difference in the living expenses of his family.

"It is obviously a bit arbitrary," agreed one official, who appreciated that certain odd situations as outlined by Hardware and Metal might arise under this ruling.

Questioned concerning the extension of this regulation to others than those commonly known as "commercial travelers," Mr. Smith pointed out that executives and other employees who made regular trips on business for which expenses were paid by the firm should rightly add a dollar a day to their income including moneys paid him for expenses and then deduct the amount of his expenses on which exemption is allowed. He can then merely note the number of days he was traveling and let the department make the necessary addition to his income or he can add a dollar for each day he was away himself, and make a note that the amount shown includes this figure so it will not be added twice. He also indicates what class of "traveler" he belongs to, as explained later.

they were not salesmen. The same applied to representatives of certain retail firms who follow the practice of sending men out through the surrounding district at regular periods to stir up prospects for business or report on conditions, providing their expenses are paid by their firms.

"Of course it is not intended to be very minute in its application," said Mr. Smith, "and we would only expect a return where the total number of days reported for the year was large enough to warrant noting."

He hinted that two days a week or one hundred days a year might be taken as a fair minimum.

In making returns covering this point the individual enumerates the approximate number of days he has been out in the year, taking into account half days, etc. He notes his gross income including moneys paid him for expenses and then deducts the amount of his expenses on which exemption is allowed. He can then merely note the number of days he was traveling and let the department make the necessary addition to his income or he can add a dollar for each day he was away himself, and make a note that the amount shown includes this figure so it will not be added twice. He also indicates what class of "traveler" he belongs to, as explained later.

His company in filing a statement of his income for checking purposes notes the gross amount paid and a separate figure showing the total amount of expense money paid to the man. The income tax department divides the figure of expense money paid by certain averages, thereby checking approximately the number of days shown on the traveler's personal statement.

Increasing Travellers' Tax Burden.

Seek Reciprocal Trade With Australia

Schedule of Preferential Tariffs to Encourage Reciprocal Arrangement Covering Canadian and Australian Lines Looming Large at Ottawa—How it Would Affect Hardware Lines—Might Bring More Business to Canadian Manufacturers

From Special Correspondent of Hardware and Metal

OTTAWA, Ont.—As the question of reciprocity between Canada and Australia is looming large in the political arena at Ottawa, a discussion of its possible effect, direct and indirect, upon the hardware trade, is timely. The Canadian Manufacturers' Association has most earnestly urged upon the Government its confident belief that the national advantage of Canada would be greatly promoted by the negotiation of an arrangement with Australia by which the Commonwealth would extend to Canadian products the same preferential rates which she extends to the products of the United Kingdom, conditional upon Commonwealth products being admitted into Canada at the lowest British preferential tariff rates, which may be extended by this Dominion to the products of any other British Dominion.

The Customs appraisement laws of Australia now stimulate importations from the United States, instead of from Canada. The Australian law applies ad valorem duties on values which are based upon the "home" market value of the goods in the country for export. The application of the Australian duty on values based upon the home market price in the country of export, results, as a rule, in the Australian duties being greater on goods made in Canada than on the like goods made in the United States.

A Case in Point

Because of revenue on materials of a class or kind not obtainable in Canada, which must be imported by the Canadian automobile manufacturer, the "home" price on a Canadian made car. is higher than the United States "home" price on a similar car. But the Canadian manufacturer, under the Customs drawback regulations, can sell his car for export at prices which approximate to the United States price. Thus a United States automobile, on importation into Australia, pays a duty on the basis of the "home" selling price in the United States; and the same automobile made in Canada and shipped into Australia (although the export price based on drawback would compare favorably with the United States export price) would be valued for duty in Australia at the higher "home" selling price in Canada—resulting in the payment of greater sums in duty than would be payable on the like car made in the United States.

With the extension of the Australian British preferential tariff rates to Canada, which may be brought about shortly as a result of pending negotiations, the situation would be considerably changed to the benefit of the Canadian automobile manufacturer.

Hardware Lines We Can Sell Australia

Included in the list of goods we could sell Australia, which she now buys from the United States, are: agricultural implements, paper and paper products, automobiles and bicycles, machine tools, air compressors, pumps and drills, rubber goods, steel mill products, including cold drawn steel; fabricated structural steel, wrought iron and steel tubing, wire fencing, wood screws, carbide, sodium cyanide, paints and varnish, aluminum ware, enamelled ware, match cases, table cutlery, etc.

One thing that must be carefully borne in mind is that the foreign trade of Australia is valuable. In 1921 the United States exports to Australia amounted to $120,985,720, as compared with $43,351,855 in 1913. Canada might just as well have enjoyed a large share of this trade.

Curtail German Steel Manufacture

VANCOUVER, B. C.—J. B. Holdingham, a prominent metal dealer of Shanghai, who was here this week after visiting Great Britain and the Continent, said that Germany was about at the end of her tether as far as raw materials for the cheap manufacture of steels was concerned. The abnormal German scrap supply has just about been exhausted, he says, and as the production of steel from pig iron is extremely expensive in Germany, it is possible that the country will be out of the competitive line in steel products in the near future. Cheap raw material and labor costs have made it possible for Germany to put steel products into England cheaper than they could have been manufactured in that country, he stated.

The metal man went on to say that Continental Europe is now rather short of scrap steel and other metals and it is possible that Great Britain would soon come into the field with products manufactured from the scrap that country purchased on the continent at a very low price. He added that Great Britain had great hopes of marketing large quantities of steel in Pacific markets and British steamship lines are already figuring on carrying costs.

The view taken by the Canadian Manufacturers' Association in this regard is a most optimistic one. In a recent memorandum to the government on the subject they say:

"As regards Canada, under such a system, there would be immediate and extraordinary increases in industrial production. It would ensure the large expansion of Canadian exports on a permanent basis. Before deciding whether or not to establish branch factories in Canada, a number of United States industries are waiting for British countries to determine their policy on this subject. Were British preferential tariffs the rule, great numbers of United States industries would have to establish works in this country in order to hold their export trade with British countries. Other industries would locate here which now are unable to do so because our domestic market is too small to warrant the investment. Thus there would follow very heavy expenditures of capital in this country in the construction and equipment of new factories, and the enlargement of others already in operation. The wonderful advantages to Canada from the adoption of substantial preferences amongst British countries, corresponding to the preferences provided in the tariff of Canada, we submit, warrant the government in exerting its utmost power and influence to secure the adoption of preferential tariffs throughout the whole British Empire."

TO ELIMINATE BLAST FURNACE IN STEEL PRODUCTION

A Plant for the production of steel direct from iron ore has just been complted and partly shipped to France from a large steel making and engineering firm of Sheffield, England. This plant is built to specifications of a French metallurgist, M. Basset, who believes he has at last solved the problem of eliminating the blast furnace in a manner that permits of economical steel production by the direct process.

It is understood that the basic principle of the process is somewhat akin to the rotary kiln of a cement works. Into revolving cylinders some 200 feet long the ore is projected and as it traverses the length of the cylinders it will be fired with pulverized coal.

Engineers consider it ironical that Sheffield, the home of the centre of the steel trade of the world, should have been entrusted with the construction of a plant which aims at revolutionizing modern steel-making and which may eventually cause the scrapping of present day plants.

Hardware Merchant Has Coal Oil Club

Such an Organization Has Been Big Stimulator of Business in Coal Oil as Well as Other Hardware Lines in the McIntyre Hardware, Whitby, Ont.—Attracts Many Prospects to the Store—Five Gallon Cans Made in the Tinshop Are Used

Written for Hardware and Metal by F. J. McINTYRE, of McIntyre Hardware, Whitby, Ont.

The formation of a hardware coal oil club by the McIntyre Hardware, Whitby, Ont., has been very successful. Mr. McIntyre states that it has been one of the best strokes of advertising he has ever done for the store, in that it has aroused the people with the desire to know what it really is. Mr. McIntyre describes the club fully for Hardware and Metal readers as follows:

"WHAT IS a coal oil club and what are the benefits to be derived to the hardware store forming such a club?

"The McIntyre Hardware of Whitby, believe the formation of such a club will be a sales stimulator to any hardware business as it has proven to be to theirs. Not only from the point of increased sales of coal oil, but increased sales of other goods as well, for rarely is an order for coal oil received that it is not accompanied with orders for other goods. One of the club's other dominating features is that it also attracts people to the store which is the one end to which all businesses are striving, for the merchant to-day who has an inducement to bring people to his store and displays his goods attractively, backed by intelligent courteous salesmen is bound to create a name for that store as being a desirable place to shop in.

"The formation of McIntyre's Coal Oil Club commenced with the manufacture of fifty-five gallon coal oil cans. These cans were manufactured in our own workshop and were to be the basis by which McIntyre was to induce people to come to his store for coal oil.

"The local press was then used to introduce the club to the people of Whitby and vicinity. We pointed out to them that we would undertake to supply all members of the club with a five-gallon can free. The merits of the kind of a can to be used were pointed out to them. This can when filled could be placed on its side and by the use of the tap provided with each can it need not be disturbed until emptied. When a new supply of oil was required we agreed to deliver it in another similar can and return the empty one to fill for another club member. To become a member all one had to do was to come to our store and sign a club form which reads as follows:

McIntyre's Coal Oil Club

In consideration of J. McIntyre supplying me with the use of a five-gallon galvanized coal oil can, with side rest and tap, I hereby agree to purchase all coal oil from him as required by me from time to time.

It is understood that should I move from the Town of Whitby, or cease purchasing coal oil from him at any time I will either return said can or pay the purchase price namely $1.50. It is further agreed that I will not be asked to pay any higher than the prevailing price of coal oil in five gallon lots and that at any time should I not be satisfied with the quality of the coal oil supplied me or the treatment accorded me in any respect, that I may cancel this contract by returning can loaned me.

Signed .....

Address .....

Date .....

"It will be noted that we simply loan the cans and do not give them outright to the customer. The agreement is so worded that no customer would hesitate to sign it. One strong feature of the plan is that customers who buy coal oil in one and two gallon lots are easily persuaded to join the club and buy in five gallon lots thus increasing the volume of coal oil sales.

"Care must be taken to see that customers will not think there is some 'catch' to the club scheme. Some would

(Continued on page 44)

An important factor in the annual spring clean up as conducted by the housewife is the question of utensils. Many well worn kitchen utensils are discarded after they have served the purpose in connection with cleaning up, and now is therefore a time to devote considerable attention to utensils. Baxter Hardware Co., Windsor, Ont., devote numerous window displays to effective arrangements of utensils at this time of year and here is one of them.

TORONTO, SATURDAY, APRIL 1, 1922

ACCUMULATING tonnage on steel mill books brought about by a further expansion of buying is beginning to have a more marked effect upon prices, according to the Iron Trade Review. At least three independent mills are advancing sheets to $3 per ton effective April 1. There is some note of warning against a too rapid advance. A material rise, the first since July 1920, is shown by the composite average on fourteen products, the average this week is $33.36 compared with $32.80 last week. The Steel Corporation is operating slightly in excess of 71 per cent. of actual capacity with bookings around 65 per cent. and many independent plants are operating at from 75 to 80 per cent. of capacity. Bookings in some lines are best since summer of 1920.

Tax Collection Cost Heavy

THE MANIA for frills in connection with taxation seems to be keeping up judging by the information as outlined in detail elsewhere in this issue concerning the increasing of a travelling salesman's income by the amount of one dollar per day for every day which he is away from home and for which his firm is paying his expenses. Officials of the Inland Revenue Department hold that a salesman who has his expenses paid really has an advantage over the salesman who works on a commission basis paying his own expenses, or the city worker who pays his own expenses at home. It is held that the average salesman spends several dollars a day in expenses and that the dollar per day added to his income by the Inland Revenue Department is really a very conservative margin.

The principle of this tax is one which might be much extended in application. If the underlying idea is that a man who receives expense money is really receiving "moneys in lieu of living allowance" as it has been described, then officials of firms who do considerable travelling and have their expenses paid, but who do not come into the category of commercial travellers, should also be included. It might also be extended to salesmen of many retail hardware firms throughout the country who regularly send out men through the surrounding district to stir up prospective business.

Taking up these various points with officials of the department, Hardware and Metal was advised that if these men made regular trips which in a year would represent a fairly large number of days, then they should add this amount to their income for every day they were out.

The amount of revenue involved in this matter would seem to be rather small for the amount of accounting and checking which will be involved. This brings up the point as to whether or not there is too much expense involved in the collection of our taxes. True the new government has given signs of economy in connection with governmental expenses but there would seem to be need for some pruning of charges and curtailment of "frills" when it is noted that the collection of eighty-seven million dollars of business profits and war taxes for 1920 involved an expenditure of nearly two million dollars.

Steel is Strengthening

RECENT REPORTS of steel companies in both Canada and the United States indicate that while in most cases, these companies have held their own, yet conditions under which they were operating last year were not conducive to profitable business. On the other hand it is evident that many companies operated with a very much curtailed margin of profit. For several reasons the present year should be a better one for the steel companies. Costs have been shaken down with reductions in wages, increase in labor and mechanical efficiency and the gradual opening up of trade opportunities such as railroad, structural and ordinary industrial requirements. In the United States the decision of the U. S. Steel Corporation to co-operate with others in the industry is taken as an indication of the necessity for stabilizing prices and eliminating the serious price cutting which has marked this industry in the past year, and which, it is said, might, if continued, have finally resulted in seriously embarrassing several makers. As it is increasing production is anticipated during 1922 and if this can be increased to an 80 per cent. basis many steel makers will be on a fair way to recoup their lost earnings of last year. The last year and a half has seen very small purchases of steel from usually large consumers, but since the turn of the year orders show a much better volume, and with this improvement come indications that the strengthening of steel prices may develop into actual advances in price. Bars, shapes and plates which led the decline are the first to show signs of advancing. It has been estimated by one authority that steel prices would not increase much until after mill production had reached about 83 % of capacity, but it is thought that numerous small advances will be made from time to time to bring prices to a fair proportion to cost of production and substantial advances might follow after production has reached the 85 per cent. level.

The Coal Strike

THERE APPEARS to be little chance of averting the international coal strike involving 600,000 miners and operators, particularly in view of the improbability of intervention by the U. S. Government as indicated in latest advices. While some who pose as authorities on the coal situation in Canada were quick to discount the effect of such a strike on Canadian industry, it is evident on further consideration that a protracted strike of miners can hardly fail to bring a shortage of fuel in many parts of Canada. Nova Scotia fields are so far not affected by the strike; this will relieve the situation in New England and Quebec. The opening of the navigation season helps the situation for Montreal, but southern Ontario is much concerned and in this territory lie many industries.

Many Canadian industries have laid away considerable reserve supplies of coal and certain steel and other industries have independent sources of supply. In the last coal strike in 1919 Canada got liberal treatment from the U. S. Fuel Controller, but already there is some sentiment across the line that a repetition of the strike conditions should not bring about a repetition of such generous treatment for Canada as formerly was given. The United States is said to have a reserve supply of about 65,000,000 tons of soft coal, fully 80 per cent. of which is in the hands of railroad and public utilities. Non-union production is estimated to continue at a rate of about 4,000,000 tons a week and the reserve supply will therefore, if carefully watched, carry industries over sixty days' operations. The U. S. iron and steel industry is said to have sufficient coal to last sixty to ninety days. There are also fair stocks in Canada, notably at Fort William, and the railways are fairly well taken care of. The stocks held are mostly out of reach of central Ontario points, however, and unless fairly generous treatment is accorded by U. S. authorities industries in this section may be the first to suffer from the coal stringency.

Spring Goods Feature Hardware Ads.

Hardware Merchants' Local Advertisements in Various Centres Throughout Canada Reveal Much Attention Being Paid to Effectively Featuring Spring Merchandise—Planning a Spring Opening—Taking the Hard Work Out of Housecleaning Time

Layout of newspaper ads. by hardware merchants showing seasonable lines.

MANY LINES of hardware are seasonable at this time of the year and lend themselves well to effective treatment in the advertisements in order to stimulate their sale. Herewith are shown five fairly large advertisements as used by various hardware merchants in local newspapers to help the sale of spring lines. The ad. by Creeper & Griffin, Ltd., Owen Sound, emphasizes the fact that if a person is going to build they should "build right." It points out that "in building a home you are building for the future and the life of your home depends to a large extent upon what kind of hardware and other materials you put into it. The use of cheap materials will sooner or later be the cause of heavy repair bills so that the building will cost just as much or more than good materials would have cost." The ad. illustrates sash hardware, door hardware, door locks and handles, cabinet hardware, bath room fixtures, etc., with brief descriptions of each and prices quoted on various lines.

Congdon & Marshall, Dunnville, Ont., advertise paints, incubators, brooders, cutlery, wrenches, solder, ironing boards, etc. In connection with floor paints the ad. points out that it is a hard job to keep floors looking right, but that they can be made smooth and attractive at small expense with some of the...floor paint which will dry over night. A special note is constantly made of the promptness which is accorded telephone orders.

W. T. McArthur & Co., Vancouver, B. C., have a well illustrated ad. dealing with a number of spring lines including enamelware, tools, garden requirements and a special group of other articles priced for the occasion. Each line is well illustrated, described and priced.

A range of housecleaning necessities are also advertised by Anderson's Hardware, Melville, Man., which is headed "You can take most of the hard work out of housecleaning by having the right labor saving helps."

The Big Cash Hardware, Brantford, Ont., advertises a number of aluminum kitchen utensils including preserving kettles, boilers, sauce pans, tea kettles, and mentions the giving of a quart sauce pan free to any purchaser buying two of the articles advertised.

NICKEL-SILVER THAT DOES NOT TARNISH

Research work by the silver and electro-plate trade has resulted in the perfection of a new alloy of non-ferrous metals which works up well in the form of spoons, forks, cruets, table decorations, knife handles, and a variety of domestic articles that will not stain or tarnish. The main factor of this new alloy is that it contains a larger quantity of nickel silver than is usually contained in that used in the electro-plate trade. The proportion runs about 30 per cent. Other varieties of the new alloy contain spelter instead of tin. The larger proportion of nickel adds to the cost, but it is possible to market spoons and forks at prices less than half the price of stainless steel or iron, and in some cases the quotations are little more than a third. All the scrap of the new alloy is usable, which does not apply to stainless steel or iron.

News of Western Canada

Much Improvement in Western Business

Hardware Wholesaler Says Consumers Indicate Disposition to Resume Buying and Farmers' Buying Power for Hardware Has Been Greatly Increased—A Tone of Restored Confidence

WINNIPEG, Man.—Interviewed by Hardware and Metal, J. J. Corbett, general manager Miller-Morse Hardware Co., Ltd., made the following statement regarding hardware conditions in Western Canada:—

"To even a most casual observer, it is very evident that business in general is much improved. The improvement has been gradual, but has now reached sufficient volume to manifest itself all along the line. The consumer indicates a disposition to resume business; if not on a normal basis at least on some basis, and that's a very encouraging sign for the future.

"No one would be justified in the belief that the troubles of the business man were entirely over; yet, it seems safe and sound to believe that we are 'around the corner.' Many factors unlooked for three months ago have developed and have helped us greatly in negotiating a very 'dry' spot on the business road.

"Fundamentally we are an agricultural people, and it follows that the prices paid for farm produce have a very important bearing on business conditions. The recent advance in wheat prices has accomplished wonders; likewise, merchandise prices have been substantially reduced, with the result that the purchasing power of a bushel of farm produce is much greater than what it was a few months ago.

"Again spring has arrived and with it a revival in out-of-door activities which produce business. This demand is already apparent; orders have increased in both number and value, and while both consumer and merchant show care in all commitments, there is a real need which must be supplied. No one intends to accumulate stock, but everyone agrees to supply legitimate demands. Caution will be the foreword but underlying the situation is a wonderful tone of restored confidence; merchants talk it on every side; it's in the air, and prospects are in every way brighter than what we have had for the past eighteen months.

"Given normal conditions this crop season, there is no reason to doubt but that business generally speaking will continue to improve, and to those who have learned the lesson of confidence and hard-work the present outlook promises rich rewards."

B. C. Basic Industries Begin Activity

Reflection on Hardware Trade Noted From Increasing Activity in Lumbering, Canning, etc.—Building Well Ahead of Last Year in Some Districts

VANCOUVER.—Although weather conditions have been more favorable the past week, business in wholesale hardware lines is opening disappointingly slow throughout the British Columbia coast. Much was expected from the operations of the lumber mills, but though there were many enquiries at the first of the year, this basic industry is not opening as rapidly as has been anticipated and as a result, this lack of activity is naturally reflected in dependent lines. Some of the logging camps are, however, commencing to operate now that the snow has disappeared in the woods and it is felt that some improvement may shortly be noted.

Some demand has been felt this week from the cannery companies which have sent several crews into the north coast districts to prepare for the fishing season. Operators of boats are being outfitted and renewals to plant equipment is meaning a little business to the distributing houses. There is no change in business developing from the Okanagan or the northern interior.

In Vancouver and the surrounding residential districts, building is starting quite actively and permits are well ahead of the same period of last year with the result that there is a good demand for all lines of building hardware and plumbing lines.

Paint dealers are making preparations for an active season and already several "specials" have been advertised. China-Lac, for instance is being offered at from 30 cents per quarter pint tin to $1.50 a quart. A high-grade shingle stain at $1.29 per gallon and a highly recommended porch paint at $2.55 per half gallon are among the week's offerings.

Retailers are experiencing a fair trade this week in garden tools as it is the first time this season that one has been able to work the ground. Rakes are averaging around 75 cents, hoes the same and spades $1.50.

Price changes are very limited no adjustments of consequence being recorded. Further reductions in intercoastal freight rates will undoubtedly have an effect soon on some lines. In carloads cash registers are lowered from $2.50 to $2 per hundred; copper and insulated wire from $1.25 to $1; shells from 85 to 60 cents and dry battery cells from $1.70 to $1.50.

J. J. CORBETT
Recently appointed general manager of Miller-Morse Hardware Co. Ltd., Winnipeg, who deals optimistically with the business outlook in Western Canada.

WESTERN CANADA NOTES

H. Kline has commenced a hardware business at Strassbourg, Sask.

Fire did considerable damage to the E. J. Gaetz hardware store at Craik, Sask.

Scott & Lake, hardware merchants, Edmonton, Alta., have dissolved partnership, Donald B. Lake continuing.

The Hardware firm of Simpson and Gowen whose store was wiped out in the fire at Summerland. B. C., last week will suffer a loss of $14,000, it is said.

Next O.R.H.A. Convention in Toronto

Toronto Members of Executive Committee of Ontario Retail Hardware Ass'n Will Arrange Details for Next Convention and Exhibition in Toronto—Prizes Awarded for Purchasing Done at Last Exhibition—Pass Resolution re Sales Tax—Organization of Hardware Club in Kingston

A NUMBER OF important matters left over from the annual convention of the Ontario Retail Hardware Association in February last, and also matters concerning future plans were dealt with at a meeting of the Executive Committee of the association on Wednesday in Toronto.

After much discussion of accommodation it was unanimously decided, on the motion of F. B. Smith of Belleville and R. Hawkins, Smiths Falls, to hold the next convention in Toronto. President George May had been making some enquiries concerning hotel accommodation and also space in which to conduct the exhibition and was of the opinion that the convention could be held in Toronto in February 1923 with good results. The second week of the month was suggested as the most advantageous time to hold it. Consideration was given to space for the exhibition of hardware lines at the new civic arena at Exhibition grounds, but it was felt that this was too far away from the centre of the city and too much out of the way to attract prospective buyers. A committee was appointed consisting of the Toronto members of the Executive to go into the question of accommodation, and in this connection consideration is being given the Armories, large buildings in the vicinity of the hotel, or the suggestion of the management of the King Edward Hotel to utilize the various rooms and corridors on the first floor of the hotel for the purpose as has been done by some other large conventions. This latter plan might necessitate dropping certain exhibits where heavy goods are concerned, but investigation showed that the hotel has facilities for unpacking and storing crating material and that other conventions have shown exhibits of heavy lines on this floor.

Award Prizes

In making their plans the officers realized that they must look rather a distance into the future, for big results are expected along the lines of membership during this year, and next year's exhibition is also expected to be larger.

At the last convention, buyers' cards were supplied to members, on which were to be entered any purchases made from firms exhibiting. Discussing this matter the Executive Committee felt that there had been considerable buying at the exhibition which was not recorded on the cards. H. N. Joy, Toronto, suggested that probably not more than 25 per cent of the buying done was revealed on these cards. Another year a souvenir may be given for all cards turned in as an incentive to their use.

WHAT THE EXECUTIVE COMMITTEE OF THE O. R. H. A. DID AT ITS MEETING

1. Approved Toronto for 1923 annual convention and exhibition.

2. Left it with Toronto members of the committee to arrange all details of accommodation, etc.

3. Awarded prizes for two classes of contestants in connection with purchasing of hardware at last exhibition.

4. Passed a resolution concerning the application of the Sales Tax to retailers.

5. Outlined organization of a Hardware Club at Kingston, Ont.

In order to decide upon the prizes to be awarded and the firms to which they were to go, the list of firms making purchases and the amounts was checked over. This resulted in the decision to divide $100 between the two classes comprising those with the highest total purchase, and those with the greatest number of purchases. This sum was divided on the basis of $25 to the first $15 to the second and $10 to the third in each of the two groups. These prizes were awarded as follows:

Largest purchasers:

1. Dent Bros., Bothwell, Ont. ($3112.85.)

2. F. W. Barton, Pt. Arthur, Ont. ($2100.)

3. Wright Hardware, Hamilton, ($1347.29.)

Other firms in the order on the list were as follows: A. M. Oldham, Weston; Mills Hardware, Hamilton; St. Marys Hardware, St. Marys; J. N. McGregor, Oakville; G. A. Outram, Port Hope; W. Hanna and Company, Port Carling; J. C. Wanless, Chatham; S. B. McClung and Co., Trenton; Gerry's Hardware, Ft. William; D. Mistele, Rodney; J. W. Peacock, Toronto; Chas. McFarlane, Toronto. The foregoing were all for amounts over $100 of purchases.

In the contest including those firms who purchased from the largest number of exhibitors, the awards were as follows:

1st prize—Wright Hardware, Hamilton.

2nd prize—A. M. Oldham, Weston.

3rd prize—Mills Hardware, Hamilton.

Others in order were, F. W. Barton, Pt. Arthur and J. C. Wanless, Chatham.

Secretary MacPherson reports that several exhibitors reported a number of sales to him which had not appeared on any buying cards and he was convinced that buyers had not fully understood the card plan.

In connection with plans for the next convention, invitations were read by the secretary from London, which mentioned the opening of the Lloyd George Hotel in January next; also one from the Windsor Chamber of Commerce mentioning the opening of a new $1,700,000 hotel in June of next year; and an invitation was extended by the Royal Connaught Hotel, Hamilton, for a return of the convention.

In view of the fact that early legislation will be enacted by Parliament in connection with taxation, a resolution was passed by the committee instructing the secretary to make representations to Parliament objecting to any extension of the sales tax to retailers' dealings with customers. This latter point was decided upon as result of information as set forth in the March 25 issue of Hardware and Metal outlining the possibility of Parliament adopting some method of applying the sales tax to retailers.

Resolution re Sales Tax

Past President Nelson Mills, stated that manufacturers were apparently satisfied with the present Sales Tax, but that the wholesalers were dissatisfied with it. He thought as far as the retail trade was concerned it might as well be continued providing it met the needs of revenue.

F. B. Smith, Belleville, spoke of attending with Secretary Macpherson the organization meeting of the Hardware Club of Kingston. He pointed out that this organization had been arranged satisfactorily, only one new hardwareman in the city being not represented at the meeting, and it was his opinion that this club would do much to encourage harmonious relation between the hardware merchants in that city. The Kingston Hardware Club will meet once a month, and Secretary Macpherson agreed to arrange for a speaker to attend the first regular meeting at which a banquet will be held. Mr. Macpherson spoke highly of the type of merchants in the hardware trade in Kingston and was sure the organization would be a distinct help to them. He extended the assistance of the Ontario Association in any way possible and stated that he was securing a speaker on paints for the first meeting of the Kingston Club. The officers of the new organization were as follows: A. Lemmon, president; J. B. Bunt, secretary-treasurer.

Events in the Trade

BUSINESS CHANGES

Blyth, Ont.—L. J. Williams has been succeeded by Munroe Bros., hardware merchants.

Kitchener, Ont.—Oscar Grosy has taken over the plumbing, heating, and tinsmithing department of W. G. Weichel & Son, hardware merchants.

CANADIAN INCORPORATIONS

Canada Illinois Tools Ltd., head office Toronto, capital $40,000, to manufacture and deal in tools, steel and iron products.

OBITUARY

Peterboro, Ont.—After an illness of only five days from pneumonia the death occurred of Norman H. Barclay, president and managing director of Canadian Tent and Awning Company of this city.

Galt, Ont.—Wm. J. McMurtry, one of Galt's veteran retailers, is dead, after an illness extending over seven years. He came to Galt 37 years ago and had lived here ever since, conducting a hardware business on Main street all that time. He at one time operated five stores, two in Galt, two in St. Thomas and one in London.

PERSONAL

Egmont L. Frankel, general manager, Frankel Brothers, metal and waste dealers, Toronto, has been elected president of the Non-Ferrous Metal Division of the Waste Trade Dealers' Association of America.

BUYS REFRIGERATOR BUSINESS

The patents and good-will of the "Jack Frost" Electric Refrigerating business formerly carried on by the Toronto Laundry Machine Company, of which the late John O'Neil was president, have been purchased by the "Jack Frost" Ice Machine Company, Limited, Toronto, with an authorized capital of $1,000,000.

ORIGINATOR OF VIBRATING ELECTRIC BELL DIES IN BEAMSVILLE

Beamsville, Ont.—The death of Isaac T. Richardson, aged 75, occurred here as the result of a stroke. Mr. Richardson made a model of the first electric car in America. He also invented the Anderson vibrating electric bell and was connected with the Stearns Electric Protection Company in Toronto.

OPENS MONTREAL OFFICE

The Steel Trough and Machine Co., Ltd., Tweed, Ont., is opening an office in Montreal to take care of Quebec business under the management of R. L. Welch, at room 216, St. Nicholas Building, Montreal, Que.

MAY HOLD "DOLLAR" SALES CAMPAIGN

An effort to enlist the co-operation of the Toronto Paint, Oil & Varnish Club in launching a Dollar sales campaign throughout their district, will be made by the Danforth Business Men's Association. The retail merchants report good results accruing from past co-operative efforts of a special nature, which have been supported by individual displays, special window decorations and a number of other features.

AUSTRALIA EXTENDS DEFERRED DUTIES ON HARDWARE

Ottawa.—According to a cablegram received by the Commercial Intelligence Branch from D. H. Ross, Canadian Government Trade Commissioner in Australia, certain Australian deferred duties which were to become effective on March 31, 1922, have been extended to June 30 or to September 30. The principal articles affected are certain iron and steel products, including hoop, plates and sheets, and tubes or pipes; sewing machine heads, chain, cutlery, citric acid, chamois leather and metal cordage. The deferred duties are higher duties.

DOMINION ALLOY STEEL CO. INCORPORATED

The Dominion Alloy Steel Corporation has been incorporated under a Dominion charter, with an authorized capital of $15,000,000 to establish a plant at Sarnia, Ont., and undertake the production of alloy steel in Canada. Officials of the company include the following:—George A. Simpson, formerly of the Steel Co. of Canada, Hamilton, who will be one of the vice-presidents and will act as general manager; Harry R. Jones. Canton, president of the United Alloy Steel Corporation; C. Harold Wills, Marysville, Mich., formerly chief engineer of the Ford Motor Co., and now associated with the firm making the Wills-St. Clair Automobile; J. J. Mahon, Newark, Sir Wm. Mackenzie, Toronto; Bert H. McCreath, Toronto; Col. Wm. McBain, Toronto; W. W. Jones, Toronto and W. B. Boyd, Toronto and Lt. Col. K. R. Marshall, president Standard Fuel Co., Ltd.

PLANS REMOVAL

The Universal Wrench Co. of Windsor, Ont., plans to move its plant to Amherstburg, Ont.

WANT NEW FREIGHT CLASSIFICATION

Manufacturers of aluminum ware were in Montreal this week and appeared before the Board of Railway Commissioners with a view to securing new freight classification on goods of their manufacture.

GOOD BUSINESS IN QUEBEC

W. H. Wiggs, president, the Mechanics Supply Co. Ltd., Quebec City, was a recent visitor at the Tononto office of Hardware and Metal. Mr. Wiggs stated that there is a great deal of building going on in the country districts and that business has been very good indeed with his company. He spoke optimistically of the outlook for the future especially in the country districts of Quebec.

MERCHANTS PLAN "SPRING OPENING"

The Danforth District Merchants' Association, one of the numerous local retail business organizations in Toronto, announce that they are launching another group campaign commencing April 1. This will be termed, the "Spring Opening," and district merchants are co-ordinating generally with regard to special efforts in this direction, backed up with individual displays of seasonal merchandise.

PILKINGTON GLASS AS A GIFT FOR PRINCESS' NEW HOME

The plate glass for Princess Mary's new home is to be supplied, as a wedding gift, by Pilkington Bros., the chief glass making industry of Great Britain, whose headquarters for Canada are located in St. Catharines, Ont.

HAMILTON PLACES HARDWARE AND METAL CONTRACTS

Tenders for annual supplies, were approved by the board of control, with the exception of rubber hose and street and cylinder oil, both of which are to be purchased in the open market.

Grey iron castings will be purchased from the Hamilton Foundry company

at $2.93 per 100 lbs. Cast iron pipe, at $62 per ton, and special castings, at 5 cents per lb., will be supplied by Gartshore-Thomson Pipe and Foundry company. A Kitchener firm, the Forwell Foundry company, was awarded the tender for extension boxes, the price being $2.35 each for the large size and $2 each for the small size, f. o. b. Hamilton.

The Tallman Brass company will supply lead pipe at 9½ cents per lb., bronze and manganese hydrant castings at 23 cents per lb., and ordinary brass for the same purpose at 30 cents per lb. Tenders were also awarded this company for a contract on brass work amounting to $12,589.

Gasoline for all purposes will be purchased from the British-American Oil company at a price one cent below the prevailing market quotations.

Sewer pipe and junctions will be purchased from the Hamilton and Toronto Sewer Pipe Co. The contract for gate valves was awarded the Kerr Engine Co. and Drummond McCall Co.

FAVORS CANADIAN EXHIBITION TRAIN

The organization of a Canadian exhibition train to travel in France is strongly recommended by the Montreal Chambre de Commerce. Following the successful completion of the tour of the French train in Canada last year, and with the assurance now given by French authorities that every assistance will be given to such a project, a resolution was adopted at a meeting recommending the scheme. Other Chambers of Commerce and Boards of Trade were cordially invited to join in the support of such a project.

WESTERN ONTARIO NOTES

John A. Brownlee, of London, Ont., who has been seriously ill for some months, is at present in Florida.

H. A. Sanderson, of Waterford, Ont., has purchased an interest in the Waterford Cut Glass factory.

Bailey and Connor of Madoc, Ont., who recently purchased the tinsmithing business of J. E. Chambers, at Waterford, Ont., took over the premises this week.

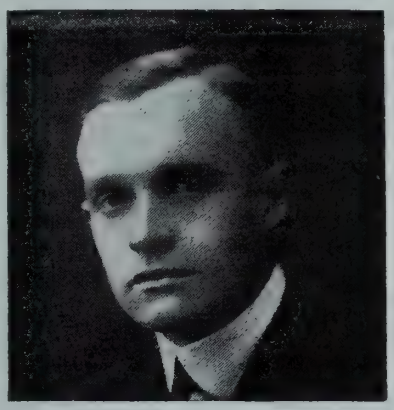
J. E. and Roy Munro of Auburn, Ont., who recently purchased the hardware business of L. J. Williams, at Blyth, have now taken over these premises.

Despite the fact that he was unable to attend the meeting owing to illness, Rotarian John A. Brownlee, of London, Ont., sent in a cheque for $500, at a big gathering of Rotarians at which a drive was made for $25,000 for the Sick Children's Memorial Hospital. W. R. Yendall of the Canadian Richards Wilcox Co., is president of the Rotary Club, which reached its objective. Col. W. M. Gartshore of the McClary Mfg. Co., gave $5,000.

ADCOCK & CO. ANNOUNCE NEW APPOINTMENTS

Adcock & Co., Montreal, have been appointed by North Bros. Mfg. Co., Philadelphia, to look after their interests in Canada on "Yankee" tools and freezers. Formerly this line was handled direct from the factory.

Another important announcement Mr. Adcock makes is the arrangement now completed with Jonathan Crookes & Son, Sheffield, to take care of entire sales in Canada on their general line of cutlery. The above appointments necessitate larger quarters, and after May 1st., this firm will be located in the Coristine Bldg., where double the present floor space has been acquired. The new location is also more desirable, as it offers more convenience to visiting buyers and local trade.



C. E. ADCOCK
Of Adcock and Co., Montreal, who have recently been appointed representatives of a number of new hardware lines and are taking over larger premises in that city.

WESTERN CANADA NOTES

Frank Parsons, formerly of Wood Vallance & Leggat, Ltd., and latterly with the Gregory Tire and Rubber Co. has retired from the rubber company and is entering the insurance business.

W. T. McArthur & Co., Granville St., hardware retailers, have opened a branch store at 1008 Robson street for the better convenience of residents of the west end of the city.

DEATH OF SIR JOHN C. EATON

As we go to press word is received of the death of Sir John Craig Eaton, President of T. Eaton Co. Ltd., of Toronto and Winnipeg, the largest departmental store in Canada and one of the largest in the world. After making satisfactory progress toward recovery he took a sudden relapse and succumbed to influenza.

R. P. McLennan of McLennan & McFeely was the principal speaker at the semi-monthly dinner of the Native Sons of British Columbia, in Vancouver. He dealt chiefly with the railway freight rates problem and outlined the efforts of the Board of Trade to wipe out discrimination. He intimated that there was little likelihood of fair treatment being accorded this province as there was little sympathy between East and West.

At the weekly meeting of the Electric Club this week, Mayor Tisdall of the sporting goods house of Tisdall's Ltd., gave an address on the relations of the city council to hydro-electric development. He said that he had been empowered by the council to seek the advice of a competent engineer on the advisability of the city staking water rights with a view to later developing electrical power. The success of public ownership, he said, depended upon the system under which it was worked.

INCORPORATIONS

W. E. Emerson and Sons Ltd., has been incorporated at St. John, N.B., with W. E. Emerson, Chas. A. Emerson and W. E. Emerson, jr., as directors, to take over and acquire the hardware, plumbing and tinsmithing business in St. John, now carried on by W. E. Emerson.

ICE HOLDS UP BUSINESS FOR KINGSTON MERCHANTS

Kingston, Ont.—Hardware merchants report business to be quite brisk this week, but it is a well-known fact that they are losing a great deal of business owing to the fact that the ice is still in the harbor. For two weeks the ice has not been considered safe for traffic and as a consequence the large volume of business usually counted on from the islands has been cut off. The sooner the ice is cleared the better for the merchants.

ADDRESSES DEALERS SELLING AUTO ACCESSORIES

Kingston, Ont.—W. F. Prendergast, editor of the Motor Trade Magazine, was here this week and addressed a meeting of dealers selling automobile accessories. He also showed an excellent film entitled "Ask Them to Buy." The film shows in detail how a little work on the part of the dealers in automobile accessories can influence the motorists to place this equipment on their automobiles. He told about a number of firms in the province which are paying all their overhead expenses on the profits which they make out of the sale of accessories.

ACTIVE PRODUCTION OF STEEL STOPS AT SYDNEY MILLS

Sydney, N. S.—The working staff at the Sydney Steel Mills was further reduced to 1,250 men, when No. 1 blast furnace was banked and 175 men laid off. This means that the active production of steel has stopped as this furnace has been the only one kept in operation since the completion of Government rail orders a few weeks ago. Rod, nail and wire departments are all working. Further decrease in the staff of the general offices, together with a wage reduction for the clerical staff is being considered for the near future.

Many Stock Foods Much Adulterated

OTTAWA.—The seed commissioner of the Dominion department of agriculture, George H. Clark, states that the adulteration of commercial stock foods is still prevalent, making it desirable that care and discrimination be exercised in purchasing them. While the bulk of the feeds on the market are as represented, there are still far too many, he says, that are fraudulent, or misleadingly named, or contain materials unsuitable for feeding purposes. The following four typical examples are given:

A feed recently offered for sale as barley meal at $4 a bag was found to contain no barley but to consist of ground corn, sorghum, bean meal and ground oat hulls. "Feed flour" at $4.50 per bag was found to consist of ground rice hulls, pulverized oat hulls, with some sorghum and corn. "Feed," the kind not specified, was found to consist of ground oat hulls, with a vital weed seed content of 1870 per ounce. "Ground Oil Cake" was found to consist of ground cocoa shells, a little linseed meal and barley flour.

Miscroscopical examination is necessary to determine composition of a stock feed, as the naked eye cannot distinguish the materials present, particularly when they are finely ground. The Feeding Stuffs Act, administered by the branch, is intended to stamp out fraudulent practices in this connection and to protect buyers. Samples of feed that show evidence of adulteration should be forwarded to the seed commissioner, Ottawa, together with all possible accurate information. The results, if need be, together with the information supplied, will be promptly issued for the special consideration and action of the inspector for the district where the article was made, manufactured or imported.

The capacity of the Ottawa feeding stuffs laboratory for the micro-analysis of feeding stuffs is about ten samples per day. The fee is one dollar for each sample examined, and entitles the sender to the analysis for his own information or for court action.

HARDWARE MERCHANT HAS COAL OIL CLUB

(Continued from page 37)

perhaps wonder why or how these cans could be supplied free, it must be explained to such people that they are simply loaned to club members as long as they continue to purchase coal oil from that store. In our own particular case the manufacturing cost of the cans was about seventy cents, which can be seen would be soon paid for with the purchase of a few lots of coal oil.

Mentioned in Advertising

"In order to keep our coal oil club continually before the people mention is made of it in all our advertising. A display board at a cost of about five dollars was made and attractively painted, which each day is placed on the sidewalk outside our store. This board may be used to keep all advertising before the people, being made and painted in such a way that cardboard signs may be tacked to it. These may be changed as often as desired. The sign consists of two display boards 24 by 36 inches, tapering from the bottom and joined at the top. On the top of the board is a wooden hand attractively painted with a finger pointing to our windows and worded "See Our Windows," under this on both boards is the wording, "McIntyre leads them all for value," and under this is a blank space to which cardboard signs may be nailed at any time any special is featured. The cards on the board at present read "Join our Coal Oil Club, Free Coal Oil Cans." Any merchant wishing to invest in some five gallon coal oil cans and forming a coal oil club, will have a valuable acquisition to his business."

TAX "TRAVELLERS" ON INCREASED INCOME

(Continued from page 35)

Travelers are divided into three classes for purposes of this ruling, as follows: (a) Those who travel with grips only; (b) Those who travel with trunks containing samples weighing up to 1,000 lbs.; (c) Those travelling with trunks containing samples weighing over 1,000 lbs.

The averages set by the department are, of course, not being proclaimed publicly but Hardware and Metal understands that the range from an allowance to those in (a) category of $45 expenses for a five day week away to $60 for this class for a seven day week, and varying in the other classes due to expense of moving trunks, etc.

In explaining the ruling, R. Breadner, commissioner of taxation, Ottawa, states "from such moneys received (by travelers) there is allowed deduction of all expenses except one dollar a day for each day's traveling. This amount represents personal and living expenses, which, although usually included in a traveler's expenses, are not directly attributed to his business. In making returns travelers should classify themselves according to the three classes shown and indicate the number of weeks they were out on business during the year and state how many of the weeks they were away seven days and how many five days.

In discussing this matter with Hardware and Metal a number of retail hardware merchants indicated that such "frills" were undesirable in taxation, particularly in view of the high costs of collecting present taxes and also in view of the fact that various tax collectors throughout the country are inclined to make their own rulings on such points, the object of which is obscure and which are so broad as to encourage abuse. It was the opinion that the revenue raised by many such tax regulations is small compared with the cost of checking and collection.

Twenty Years Ago

Following items are reproduced from Hardware and Metal of March 29 1902.

* * *

"John M. Taylor, general manager of the Dominion Radiator Co. and his brother, assistant manager have resigned their positions after April 1. They go into the foundry business with the A. R. Woodyatt Co. manufacturers of lawn mowers etc., Guelph, Ont., of which firm J. M. Taylor becomes president. Joseph Wright, president of the Dominion Radiator Co., will fill the office of general manager."

* * *

"A euchre match took place at the clubroom recently opened by the employees of the Thos. Davidson Mfg. Co., between teams representing that company and the Canada Paint Co. for a handsome cup. The lead men upset the tin men by a good score and carried home the cup. Captain of the Thos. Davidson team was H. J. Chalmer, and P. Lamarche captained the Canada Paint Co. team.

* * *

"Charles Doughty of Maxwell, Doughty and Johnston, plumbers, etc. Bay St., Toronto, has retired from that firm to take a position as foreman with W. J. McGuire & Co. F. Maxwell and H. Johnston will continue the business under the style of Maxwell & Johnston."

* * *

"An interesting hockey match took place in the Victoria Rink, Montreal, between the Canada Paint Co. and the Sherwood-Williams Co. teams. The game which was well contested resulted in a second victory for S.W.P. by three goals to one."

* * *

"After a long illness Mrs. Birkett wife of Thos. Birkett, M. P., of Thos. Birkett & Son Co., Ltd., Ottawa, died on Thursday March 13. Hardware and Metal extends its sympathy to the mourners."

The Winnipeg Metal Co., advise that the S. H. Whyte Manufacturing Co., has the sole selling rights for the entire Dominion for their line of garbage cans.

* * * *

Chas. Lowe of the J. H. Williams Co., St. Catharines, Ontario, was a visitor to Winnipeg.

* * * *

Some Winnipeg wholesalers report they have found it necessary to keep open on Saturday afternoons to fill orders received and they state that business conditions are improving.

* * * *

Wm. Schollhorn of the Wm. Schollhorn Company, Bridgeport, Conn., plier manufacturers, was in Winnipeg on his way back from the Pacific Coast. He is returning by way of Duluth.

Heard At The Capital

Following are excerpts from Hansard, the official report of debates in the House of Commons, Ottawa.

AMOUNT OF INCOME TAX AND EXPENSES OF COLLECTION

MR. MARTELL:

1. What amount was collected by the Government of Canada or any department thereof during the fiscal year 1920-21 as income taxes?

2. (a) What was the total amount paid by the Government or any department thereof as salaries of officials and employes; and (b) for all other expenses in connection with or in any wise appertaining to the collection of the said income taxes for the said fiscal period?

3. How many persons were employed throughout Canada in connection with the assessment and collection of said income taxes?

HON. MR. FIELDING:

1. Business Profits War Tax Act	$ 40,841,401.25
Income War Tax Act	46,381,806.64
Total revenue collected	$87,223,207.89
2. (a) Salaries, including salaries paid at Head Office, Department of Finance, Ottawa	1,272,183.58
(b) Expenses, including Head Office expenses	437,400.62
Total expenses	$1,709,584.20

3. 1580. The Business Profits War Tax Act and Income War Tax Act are administered by the same staff, therefore the cost of administration cannot be allocated.

DAYLIGHT SAVING

MR. CHURCH:

1. Is it the intention of the Government to introduce legislation for uniform daylight saving for the whole of Canada?

2. If not, will the Government through its post offices, customs houses and other federal agencies, adopt hours of daylight saving in municipalities which adopt daylight saving hours?

HON. MR. FIELDING:

It is not the intention of the Government to introduce legislation requiring uniform action in the matter of daylight saving, but the Government in regard to its official service will adapt itself to the determination of each local community.

Hardware Letter Box

Information on trade topics will be gladly supplied to subscribers through this department.

DOG HARNESS

Messrs. Spadoni Bros., Box 89, White River, Ont.—Please let us know where we can obtain Dog Harness.

Answer.—B. F. Ackerman, Son & Co., Peterborough, Ont.; James Jolley & Sons, Hamilton, Ont.

IDEAL OAK HEATER.

Messrs. W. Kreutzweiser & Son., Hardware Merchants, Hepworth, Ont.—Kindly advise who makes the "Ideal Oak Heater."

Answer—The Canadian Stoves, Ltd., Grimsby, Ont.

BUTTER PRINTERS

Messrs. Spadoni Bros., Box 89, White River, Ont.—Can you give us the names and addresses of firms making Butter Printers?

Answer—F. X. Bertrand, Ltd., St. Hyacinthe, Que; The Joshua Frown Co., Pembroke, Ont.; The De Laval Co., Peterboro, Ont; J. A. Gosselin & Co., Drummondville, Que.; T. McOuat & Son, Lachute Mills, Que.; C. Richardson & Co., St. Marys, Ont.; Wettlaufer Bros., Toronto.

BEAVER AUGER BITS

J. L. Demers, Thetford Mines, Que.—Kindly give us the name of the maker of Beaver Auger Bits.

Answer—The G. Gilmore Co., Montreal.

FOLDING CANVAS BOATS

C. P. Moore Limited, Sydney, N.S.—Please let us know the name of any firm manufacturing Folding Canvas Boats.

Answer—G. H. Masten, Inc., 222 E. 46th Street, New York City; The King Folding Canvas Boat Co., Kalamazoo, Mich., C. M. Lane Life Boat Company, No. 246 Huron Street, Brooklyn, N.Y.

CHECKING FLOOR HINGE

Fred J. McLeod, Esq., Ailsa Craig, Ont.—Can you inform me who manufactures a Checking Floor Hinge?

Answer.—Chicago Spring Butt Company, Chicago, Ill.

ICE PLOWS
BEDDING MANUFACTURERS

The Oyen Hardware Company, Limited, Oyen, Alta.—Kindly send us a list of Bedding Manufacturers in Canada.

Answer.—

The Alaska Western Bedding Company, Ltd., Calgary Alta.

Whitworth and Restall, Toronto, Ontario.

The Yale Bedding Co., Montreal, Que.

"NEW EMPRESS" RANGE

J. W. Montgomery, Hartland, N.B.—Could you please tell us who makes the "New Empress" Range?

Answer.—The D. Moore & Company, Ltd., Hamilton, Ontario.

GOING THE MILLINERY STORES ONE BETTER

The millinery stores are not the only ones which are going to have an "opening" this spring. Taking a leaf from the notebook of these stores, the hardware and other merchants of Danforth Avenue, Toronto, are planning on having a big demonstration to let everyone in the district know that they are ready for spring trade, and are ready to meet their requirements so as to save them shopping elsewhere than near at home.

The detailed story of this plan and how it has worked out, particularly in-so-far as it affects the hardware trade, will be dealt with fully in next week's issue of Hardware and Metal. This article may give you some helpful ideas which you can apply in your district either now or at some time in the future.

Catalogues and Booklets

Those interested in any of the catalogues described below can procure a copy of the same by writing direct to these firms. Mention that you noticed this in Hardware and Metal

FISHING TACKLE

Among the catalogs recently to hand, is a comprehensive book covering a full line of fishing tackle, as well as a great variety and many distinguished new features in angler's requisites, rods, reels, and the miscellaneous assembly of similar goods. This is catalog No. 28, issued by the Allcock, Laight & Westwood Company, of Toronto, Ont. In this booklet, the manufacturers and distributors of fishing goods have also given a number of useful suggestions, while a full descriptions and adequate illustrations are given of the various lines catalogued. It undoubtedly covers a complete and up-to-date assortment of fishermen's requirements, in almost any field and under practically any conditions.

AUTOMOBILE ACCESSORIES

An enlarged catalog covering automobile accessories, garage equipment and supplies, as well as bicycles, and bicycle accessories, has recently been distributed by Hyslop Brothers, Limited, of Toronto, Ont. Practically every item in the book of 272 pages, is illustrated and a full description of same is given. The catalog not only covers a complete assortment of all supplies and accessories needed in connection with both bicycles and automobiles, but also contains a description of many new items recently introduced in the accessory field. A comprehensive list of the dealers' net price lists is also included with Hyslop's 1922 catalog.

LUMBERING TOOLS

Catalog No. 8 has recently been distributed by the Thomas Pink, Limited, of Pembroke, Ont.; covering their various lines of lumbering tools, driving tools, chains, hammers and handles. Their book is clearly illustrated throughout, depicting such products as peavies, of various types, cast hooks in different weights and styles; pike poles, hand spikes, pickaroons, timber carriers and studs, car door lumber rollers, timber gully and trucks, car movers, skidding grips, twitching grips, logging dogs or log grabs. The latter portion of the book also illustrates loading blocks, snatch blocks, and a variety of other miscellaneous products used in connection with this industry. Lumbering tool handles, and heavy logging neckyokes, whiffletrees and cant hooks are also listed in this booklet.

GONG BELL PLATOYS

Catalog No. 203, featuring bell toys, bells and other specialty platoys, has recently been issued by the Gong Bell Mfg. Co., of East Hampton, Conn. In addition to their regular "Plaline" products, descriptions and illustrations of some new designs in platoys are included in this booklet. A copy of Catalog 203, will be forwarded upon request to the abovementioned firm.

"SIMMS" LATHER BRUSHES

Another beautifully illustrated catalog in select colors has recently been issued by the T. S. Simms & Co., of St. John, N.B. covering lather brushes. The engraving is one of the features of the book, and the illustrations covering the various sizes and types of lather brushes, are presented in actual size. Cement set brushes and other styles set in rubber, occupy a prominent portion of the catalog. The last page contains illustrations of counter display boxes. The early portion of the book contains a full page color plate of the Simms manufacturing plant.

New Hardware Goods

OFFERED TO CANADIAN HARDWAREMEN

TRIPLICATE TORCHLIGHT

An electric torch light which is equipped with three bulbs has been recently introduced on the markets by the Franco Electric Corp., of Brooklyn, N. Y. In addition to the three lamps, other features of this device include a special reflector for throwing a single concentrated beam of light, a lens ring with nickel finish, and a contact box which enables a continuous light from the three bulbs or an intermittent flash, as desired. Spring lamp sockets hold the reflector in position. Colored lamps may also be inserted.

ARMSTRONG HOLDER

The Armstrong Mfg. Co., Bridgeport, Conn., has recently placed on the market two sizes of holders which have been designed for use in making both right and left hand pipe nipples. The one holder known as No. 20 is suitable for nipples from ¼ to 1 inch in size, while the other holder known as their No. 30 is for nipples ranging in size from 1 to 2 inches.

ELECTRIC SOLDERING IRON

Landers, Frary & Clark, New Britain, Connecticut, are placing on the market a new electric soldering iron and glue pot. For the former it is claimed that owing to the heating unit being securely clamped to the copper, the iron is most efficient and longer life is assured to the element. This, together with the special non-corrosive material used, makes it very easy to replace the copper tip when worn. A hatchet tip for attaching to the side of the shank can be furnished, thus insuring practically the original contact when a new tip is required. It is supplied in a heavy nickel finish, and furnished with a six-foot heater cord and lamp socket attachment plug.

The bale is so constructed that the handle cannot fall on the side where the brush drippings are removed. It is claimed that the efficiency of the operator is greatly increased, and burnt or spoiled glue is practically unknown when made electrically.

The water-jacketed type is for using glue at intervals, the contents being always kept at the same even temperature and consistency. The outer vessel is of heavy cast iron, black japanned finish, while the inner vessel is of seamless aluminum with permanently attached wiping bar. Equipped with "Universal" Safety Plug Fuse. Both pots furnished with six-foot heater-cord and lamp socket plug.

ELECTRIC GLUE POTS

Electrically-heated glue pots, in two types, jacketless and water jacketed, are being placed on the market by Landers, Frary & Clark, of New Britain, Connecticut, U. S. A. The former type is for continuous use, and is made from one-piece cast aluminum with permanently attached wiping bar.

Electric Glue Pot

IMPROVED 30 x 3½ FABRIC TIRE

What is described by the makers as a banner tire for 1922, is the new improved 3 x 3½ fabric tire being introduced by the Dunlop Tire and Rubber Systems, Toronto. The feature of this new product pointed out by the manufacturers is the extra thick tread, and also the heavier side walls than are usually seen in tires of this size. The tread is nearly flat, which is a point in assisting the equal distribution of the load on all parts of the tire. It is further described as a superior product in this class of tire, being especially applicable to smaller automobiles.

Dunlop Fabric Tire

PLAPHONE AND PLACART

The Gong Bell Mfg. Co., of East Hampton, Conn., are featuring two recent additions to their "Plaline" products. These are the Plaphone and the Placart. The 1922 model of the Plaphone is described by the manufacturers as the bell toy original, being finished in enamelled colors, as well as rubberoid. The Placart is 26 inches in length, with a 3-inch drop tail board, and steel wheels fitted with solid turned steel hubs and re-inforced axle.

BURROWS METAL SCREENS

Another line of all-metal extension fly screens has been placed on the market by the Burrows Manufacturing Co., 611 King St., W., Toronto. In presenting these metal green-enameled extension screens, the makers claim that the screen cloth is locked in frames under heavy pressure, then electrically welded together. Nails, tacks, solder or rivets, are not used in the Burrows screens, which have been given the trade name of Double Life. One of the primary objects in production is to resist all weather conditions. To this end these metal screens are dipped in enamel, baked hard, then given a final coat of green.

HAMMER POLL AXE

Campbell & Fowler, Limited, St. John, N. B., manufacturers of axes and edge tools, announce the introduction of the Campbell XXX patent hammer poll axe.

This axe is placed on the market for general work where an axe and hammer or both are required. It is principally designed, however, for use in the woods where woodsmen require an axe for trimming and also a hammer or maul for driving the saw wedge to release the saw. It is claimed that in using this axe the man has only one tool to carry, whereas in the past he had to look after an axe and also a hammer or maul.

The makers' description is as follows: —this axe is made with a piece of 1¾ inch cast steel fitted and welded and tempered. It will not flatten out, and has great durability and cutting qualities. It has a thin keen edge, which will retain balances well on the handle and will chop easier than a light poll axe.

LADD BEATER NO. 00

United Royalties Corp., of Broadway, New York city, which firm is represented in Canada by the G. S. Whitaker & Co., of Colborne St., Toronto, Ont., are placing on the market the Ladd egg-beater No. 00.

Weekly Hardware Market Reports

STATEMENTS FROM BUYING CENTRES

Markets at a Glance

TIN plates, motor oils, wrought nipples, and the Joseph Rodgers line of pocket and pen knives, supply the outstanding price changes on the current hardware markets. Other reductions appear in quotations on such products as single loop bale ties, clinch or bifurcated and also tubular rivets, brick trowels, hose nozzles and couplings, bamboo fish poles and egg crates.

The revision in tin plates covers charcoal, coke tin and terne plates, registering a varynig reduction on the different cases. Lower quotations on nipples result in new discounts on all sizes and lengths, with couplings and wrought piping prices remaining unchanged. The recession in motor oils affects such lines as Polarine, all grades now being on a lower price level. Quotations are announced for next season on one line of ash sifters, showing no variation from prevailing prices.

It is noticeable that there has developed a firmer trend in the sheet markets, together with a slightly improved buying activity in bar iron and steel products. Recent reports covering the steel industry indicate that steel prices are stiffening, but while there have been no actual advances recorded, signs that this condition is liable to merge into future increases may easily develop. Trade in range boilers remains of a moderate nature, but there is recently a more active movement in eavestrough. Cautious buying continues the rule in corrugated, with a slight increase reported in inquiry for certain brass and copper products. Activity in electric ranges is noticeable, with oil stoves for the summer season also registering a satisfactory movement. The easy undertone is still evident in scrap materials, while irregularity remains the principal element in ingot metal centres. Spring lines are experiencing a moderate degree of activity, but the lack of seasonable weather has restricted the movement to some extent. Improvement is generally looked for during the coming month.

Montreal Markets

MONTREAL, March 30.—Another revision in the local sheet markets attracts attention in the hardware markets this week. Tin plate in full boxes is reduced 50 cents, while boxes of 56 sheets show a reduction of 25 cents. Terne plate has a price recession of $1.00 per box. Through a revision in discounts, all sizes of nipples have new lower prices. The discount on close and short is increased ten points, and long nipples five points. Compression cocks are now lower in price, also nickel plated pipe and traps. Other lines of compression goods are unchanged, although a further revision in certain lines would not be surprising in the near future. Tubular and split rivets are reduced, and each are now quoted at $1.30 per carton.

Iron and steel products in general continue to improve, the market for bars, and sheets now assuming a firmer tone. Ingot metals are more or less featureless, although lead is now reported in better demand, with the tone of the market improved. Scrap metals are still dull, with quotations nominally unchanged. Business in hardware circles is continuing along satisfactory lines. Spring trade now well at hand, and seasonable lines moving in an encouraging way.

SPRING ATMOSPHERE IN ROPE CIRCLES

Montreal

Rope markets are now displaying usual spring activity, the improvement being more pronounced in recent weeks. Apart from a better buying movement among the dealer trade, increased business is reported from sections where fishing is carried on, and in navigation centres. This branch was unusually quiet practically the whole of last year, and a revival at the present time is very encouraging to manufacturers. Quotations on the different brands and qualities are unchanged, with the undertone of the market generally fairly firm. Sisal and hemp have maintained their strength since the revision in prices a few months ago, and manila is still in a strong position. It will be remembered that the last change in quotations covered only sisal and lathyarns, pure manila remaining at former levels, although firm in tone at that time.

WROUGHT NIPPLES HAVE REVISED DISCOUNTS

Montreal

Lower prices are now quoted on all sizes and lengths of nipples, owing to a revision in discounts. Close and short nipples, all sizes, show a change of ten points in their discounts, while long nipples, in all diameters, are revised to the extent of five points. It will be remembered that nipples were not reduced at time of issuing last wrought pipe list, and present revision is made without a change in pipe. Couplings also, which are usually included on pipe list, remain unchanged. The sale of fittings is still described as fair, mostly confined to small sorting orders. Following are present quotations:

PIPE FITTINGS—	
Cast iron fittings	30%
Bushings, cast	32%
Do., malleable	32%
Flanges	40%
Plugs	30%
Flange unions	30%

House Cleaning Calls

for Quantity Sales of

O-Cedar Polish

Always saleable articles, always in steady demand, O-Cedar Products attain the zenith of their sales in April and May.

So important is O-Cedar Polish as an aid to Spring house-cleaning, that the up-to-date housewife would be as likely to attempt her annual clean-up without soap as she would be to start house-cleaning without a supply of O-Cedar.

This is the season your customers should be asked to buy O-Cedar Polish by the tin. Most women use enough of it at house-cleaning time to justify purchasing it in the larger package. A bottle is not enough to last the average home through the house-cleaning period, and you can point out how much more economical it is to

"Purchase by the Tin"

Get the benefit of this big demand that comes in the Spring—display O'Cedar, together with O-Cedar signs and cards. Remind the women you have O-Cedar products—and this line—so splendidly advertised at this season and so fully appreciated by your customers—will practically sell itself.

Retail Prices: O-Cedar Polish in Bottles, **30c** and **60c.** In Tins, **$1.50, $2.50, $3.50.**

O-Cedar Polish Mop, large size, triangular shape, **$2.00.**—O-Cedar Dusting Mop, large size, triangular shape, **$2.00.**

O-Cedar Polish Mop, small size, triangular shape, **$1.25.**

CHANNELL LIMITED - TORONTO

DISCOUNTS ON COMPRESSION COCKS ARE REVISED

Montreal

Through increasing the discount on compression bath cocks three points, a reduction of approximately 5 per cent. is recorded. Other lines showing a slight revision are nickel-plated supply pipe and traps. The remaining lines are unchanged for the present, but a further reduction on certain supplies would not be surprising in the near future. The nature of this revision and the specified lines it would affect could not be ascertained at present, but a move is said to be on foot to make other changes. There is now a fair amount of business reported, which will in all probability be increased in the near future with the approach of a more active building program. Following are present discounts:

COMPRESSSION GOODS—

Compression work, standard	45%
Fuller work, standard	30%
Quick opening compression bibbs	43%
Bath cocks, compression	38%
Bath cocks, quick opening	41%
Basin cocks, compression	34%
Basin cocks, quick opening	46%
Flatway stop and waste cocks, standard	54%
Roundway stop and waste cocks, standard	46%
Brass steam cocks, standard	43%
Radiator valves, standard	58%
Do., removable discs	58%
Globe, angle and check valves, standard	25%
Gate or straightway	25%
Emco globe valves	33%
Emco check valves	33%
Jenkins globe, angle, check and swing check	19%
Jenkins gate or straightway	25%
Jenkins iron body, globe and angle	15%
Jenkins iron body, gate	33%
N.P. "P" and "S" traps	40%

BUYING MOVEMENT IN IRON AND STEEL IMPROVES

Montreal.

Current demand for iron and steel continues to improve, and while the progress may be slower than was hoped for earlier in the year, the trend is described as being healthy. The absence of any great movement in larger building construction is felt, but even here, it is stated as not too late for an improvement at a little later date. Mill operations are still increasing, and there is every indication of a general betterment at primary sources. Quotations locally are unchanged, but generally considered firm. In Southern centres some of the larger independents have announced an increase of from $2.00 to $3.00 per ton on plates, bars, structurals, and while this move has not been followed by home industries up to the present, an advance in the near future would not be surprising. Unchanged quotations are the following:

Common bar iron, 100 lbs.	2 65
Refined iron	4 15
Irish finish machinery steel	2 70
Mild steel	2 65
Single reeled machinery steel	4 75
Band steel	2 65
Spring steel	4 25
Sleighshoe steel	2 65
Tire steel	2 85
Toe caulk steel	3 55
Harrow tooth steel, per lb.	2 80
Mining tool steel, per lb.	0 21½
Black Diamond tool and cast steel, per lb.	0 21½

NOTE—Refined iron is approximately $1.50 per 100 pounds over base, but fluctuates owing to unsettled market.

Band steel in scroll bundles, 50c per 100 lbs. extra.

TIN AND TERNE PLATE PRICES ARE REDUCED

Montreal.

Local sheet markets are again featured with price recessions, tin plate and terne plate now being reduced. Tin plate in full boxes shows a reduction of 50 cents per box, 56 sheet boxes 25 cents. Terne plate is $1.00 per box lower, and is now quoted at $15.00.

Although the local market in recent weeks has recorded easier levels on practically all lines of sheets, there is a much healthier condition at sources of supply, and mills are firmly convinced that the next revision will be in the nature of an advance. The recent changes locally are the result, for the most part, of distributors attempting to reach the lowest possible levels for the more active trade in spring months. It is now generally recognized that such has been reached, and this branch of the trade are also convinced that higher prices are altogether probable in the not far distant future. Business is more active from week to week, particularly in galvanized sheets, and this is really what is required for a more stable situation. Following are revised quotations:

BLACK SHEETS

10 gauge	4 00	4 50
12 gauge	4 10	4 60
14 gauge	4 40	4 70
16 gauge	4 50	4 80
18-20 gauge	4 55	5 05
22-24 gauge	4 60	5 20
26 gauge	4 65	5 25
28 gauge	4 75	5 35

Sheets 3 in. wide, 20 cents per 100 lbs. extra.

GALVANIZED SHEETS

U. S. Standard.

18 x 24 x 52s	7 75 box

EASIER PRICES ON SPLIT AND TUBULAR RIVETS

Montreal

A reduction has been made in both the tubular and bifurcated rivets. No. 9 split is now quoted at $1.30 per carton, No. 1 tubular selling at same price.

ONLY MODERATE DEMAND FOR RANGE BOILERS

Montreal

The range boiler situation locally shows little change, sales continuing of a moderate nature, and quotations more or less unsettled. List prices and discounts are quoted by most firms, but others are still maintaining former net prices. Current business is expected to improve in the near future, the opening of the present month usually bringing the commencement of a more active period in lines pertaining to the building industry. The tone of the boiler market is also little changed, and although present quotations are recognized as low, with galvanized sheets showing first signs of improvement and a possibility of increased prices, there is said to be no immediate signs of a revsion in the finished products. List prices and discounts are the following:

RANGE BOILERS—

Size	List Price
5 gallon	$13 50
12 gallon	14 00
18 gallon	15 00
25 gallon	16 50
30 gallon	17 50
35 gallon	20 50
40 gallon	22 75
52 gallon	38 00
66 gallon	60 75
82 gallon	74 00
100 gallon	103 00
120 gallon	117 00
144 gallon	164 00
168 gallon	187 00
192 gallon	210 00

Discounts:—Standard weights, 50 per cent. Extra heavy, 40 per cent.

LITTLE CHANGE IN BRASS AND COPPER PRODUCTS

Montreal

There is little or no change in the market for brass and copper products, and quotations remain at recently revised levels. The virgin metal in recent weeks has become more settled, and while failing to show much activity is apparently at the end of the downward movement for the present at least. Unchanged prices are the following:

	Base.
BRASS—	
Sheets, base	0 24
Rods, base ½ to 1 in., round	0 22
Tubing, seamless, base	0 30
F. o. b. Montreal.	
COPPER—	
Rods, ½ to 2 in.	0 29
Soft sheets, plain, 16 oz., and heavier	0 32
Plain tinned, 16 oz. and heavier	0 36
Polished, and tinned, 16 oz. and heavier, lb.	0 41
Tubing, lb.	0 32

Above prices are full sheets and bars. Cut sheets and bars are 5c. per lb. higher.

IMPROVED TRADE LOOKED FOR IN SOIL PIPE

Montreal

With the gradual approach of a more active building program, dealers in soil pipe and fittings anticipate a better buying movement to commence in the not far distant future. Up to the present, sales of these lines have been seasonably quiet, but not unusually so for the earlier months in the year. Quotations remain at former discounts, and while there is said to be a possibility of a slight revision in an upward direction with the opening of a better buying movement, there is no indication of a change in either direction at the present

time. It is generally recognized that prevailing levels are well down to bottom, and were quoted owing to competition from outside fields, but it is felt that a stronger factor than a business revival will be necessary to increase quotations. Following are unchanged prices:

SOIL PIPE—

2 and 3 inch	47½%
4 inch	50%
5 and 6 inch	47½%
Fittings—	
2 to 6 inch	50-10%

WASTE MATERIAL MARKETS STILL QUIET

Montreal

The waste material markets are unchanged, prices now remaining fairly steady, with buying continuing of a hand-to-mouth nature. Scrap iron, according to dealers, should soon commence to show an improvement, as the steel industry, on a whole, is improving and is now on a better basis than it has been during past months. While it may take some time for this to reflect in scrap markets, encouragement is lent by the move evident in this direction. There is very little business in non-ferrous metals, these having been very quiet for some months past. Following are average dealers' quotations:

Automobile tires		0 50
Rubber shoes		0 03
Yellow brass		0 05
Red brass		0 08¼
Light brass		0 03
Scrap zinc		0 03
Lead, heavy		0 04
Lead, tea		0 02
Light copper		0 08
Heavy copper		0 10
Wrought iron, R. Rd., No. 1 per gr. ton		10 0
Malleable scrap (ton)		8 00
Pipe scrap (ton)		6 50
Heavy melting steel	6 50	7 00
No. 2 busheling,		3 00
Boiler plate		6 50
No. 1 machinery cast		20 00

STEADIER LEAD PRODUCT PRICES LOOKED FOR

Montreal

The downward revision in solder quotations three weeks ago marks the last price development in lead products. The market generally is now fairly steady owing to metals on primary markets continuing with quotations practically unchanged. Trade in these products shows a slight improvement in recent weeks, but with the winter months now over, a further improvement is looked for, especially in such lines as lead pipe, traps and bends, and other plumbers' supplies. These lines being in demand for building activities. Following are unchanged quotations:

LEAD AND ZINC PRODUCTS

Lead pipe, per 100 lbs.	12 50
Lead waste, per 100 lbs.	13 50
Note—Lead pipe is subject to a discount of 10 per cent.	
Lead traps and bends	10% off
Lead wool, lb.	0 13½
Lead sheets, 2½ lbs.	0 10½
Lead sheets, 3 to 3½ lbs., sq. ft., lb.	$ 10¼
Do., 4 to 8 lbs., sq. ft.	0 09½
Cut sheets ¼c. lb. extra, and cut sheets to size, ¾c. lb. extra.	
Solder, guaranteed, lb.	0 25½
Do., strictly, lb.	0 23½
Do., commercial, lb.	0 20½
Do., wiping, lb.	0 21½
Do., wire, lb.	0 34
Zinc sheets, casks	0 11
Do., broken lots	0 11½

BETTER TRADE OPENS FOR BOILER TUBES

Montreal

A somewhat better buying movement is now reported in boiler tubes and it is felt that an increased volume of trade will continue in view of the quiet period in past months. Prices are remaining steady and better sales will undoubtedly assist towards maintaining present levels, although these quotations are considered rather high in comparison with allied products in the iron and steel industry.

BOILER TUBES—	Seamless	Lapweld
1 inch	24 70	.....
1¼ inch	24 50	.....
1½ inch	24 00	.....
1¾ inch	26 00	26 00
2 inch	24 50	20 50
2¼ inch	27 75	23 50
2½ inch	32 50	24 50
3 inch	40 00	30 50
3½ inch	52 50	34 75
4 inch	65 00	44 00

INGOT METALS CONTINUE TO MARK TIME

Montreal

Changes in the ingot metal markets are very slight, and there are no special features to report. In most cases prices are more or less marking time around the bottom, but when the upward trend will commence is difficult to state. Buyers are still working on a hand-to-mouth basis, and will doubtless do so until there are clearer indications of an advance.

TIN.—This metal continues to range around £143 mark in London, and has now been close to this figure for some time. Consumption will no doubt improve from now on and the position of this metal should improve thereby. The local market remains quiet at 34 cents.

COPPER.—Fluctuations in London are slight and caused chiefly by the movement in exchange. New York is quiet, and it is possible to buy electro at about 12⅞ delivery for prompt shipment. There is little demand for ingot copper locally, and quotations remain at 16¾ cts. for electro, 16½ for casting.

SPELTER.—East St. Louis is slightly lower at $4.62½ for spot, but it would not be surprising if a fair amount of buying would cause an advance. London is steady and there is no sign of weakness. Locally spelter is unchanged at 7 cents.

LEAD.—Lead is fairly firm in all markets, and demand is good. Prospects for this metal seem somewhat better. Locally the quotation is unchanged at 6¾ cents.

ANTIMONY.—Domestic demand for this metal remains at a low ebb, and the market is practically unchanged. Stocks are still quite heavy, and with this condition prevailing, there seems little chance of an early improvement. Chinese is quoted at 6¾ cts., high grade English at 7¾ cts.

ALUMINUM.—Aluminum continues dull on the market, and the situation of this metal is unchanged with quotation remaining at 24 cents.

Toronto Markets

TORONTO, March 30.—Charcoal tin, coke tin and terne plates, together with wrought nipples, motor oils, and single loop bale ties, supply the principal price revisions on the current hardware markets. Tin plate quotations record varying reductions on the different cases. Through revised discounts, lower price levels are evident on nipples, but no similar change is reflected in couplings or piping. All grades of Polarine register a decline, with other refined oils and gasoline prices remaining unchanged. Lower quotations are also noted on clinch, or bifurcated rivets and also tubular rivets. Other price declines appear on brick trowels, egg crates, and hoze nozzles and couplings. Quotations for next season announced on the Samuels line of ash sifters show no variation from prevailing levels.

A firmer trend has developed in the sheet markets, with slightly improved buying activity in bar iron and steel products. There is moderate trade in range boilers, but a more active movement in eavestrough is noted. Cautious buying of corrugated sheets prevails, with better inquiry for certain brass and copper products reported. There is generally an active demand for electric ranges, with oil stoves for the summer season also registering fair activity. The easy undertone is still evident in scrap materials, while irregularity remains the principal element in ingot metals.

LOWER PRICES ON CLINCH AND TUBULAR RIVETS

Toronto.

Easier price levels are now quoted on both clinch, or bifurcated, and tubular rivets. The new quotations on these products are as follows:

RIVETS—

Clinch No. 6 $2.75 per carton. Clinch No. 9B $1.25 per carton. Tubular, No. 600 $1.30 per carton.

SINGLE LOOP BALE TIES NOW REDUCED

Toronto.

Reduced prices are announced this week on single loop bale ties. The revised quotations on these products are as follows:

BALE TIES—

Ga. No. 12, $4.50 per cwt. Ga. No. 13 $4.60 per cwt. Ga. No. 13-½ $4.65 per cwt. Ga. No. 14 $4.70 per cwt. Ga. No. 15 $5.00 per cwt. Ga. No. 16, $5.20 per cwt.

RAW MATERIAL TREND STIFFENS TIRE PRICES

Toronto

Predictions that tire prices will be increased within the next few months are being freely made by certain tire manufacturers. This condition is attributed to rising raw material costs, an element which has developed since the last revision placed tire quotations on the prevailing low basis. The repeated reductions in tire prices during past months, reflected the easier trend of rubber and cotton, both of which materials enter into the production of auto tires. With a firmer tendency now evident in these markets, it is claimed that tire quotations have not only stiffened, but may show signs of advances in the near future.

REVISED DISCOUNTS ON WROUGHT NIPPLES

Toronto.

Lower quotations on wrought iron nipples, through revising the discounts, feature the current pipe fittings market. These products were not changed when the last revision was made in pipe, and the present change is not reflected in quotations on piping. Nipples, close and short, four inches and under, are now given a discount of 60 per cent. Varying reductions are noted on the other similar products. Couplings remain unchanged in price.

Sorting orders continue to form the greater portion of present trade in pipe fittings, with dealers apparently still willing to care for immediate requirements only. Quotations on the various lines, including the revised discounts on nipples, are as follows:

PIPE FITTINGS—

Cast iron fittings	30%
Plugs, cast iron	30%
Do., solid	30%
Do., countersink	30%
Bushings, small	32%
Bushings, cast	32%
Unions, ¼ in. to 2 in.	47%
Unions, ⅛ in., 2½ to 4 in.	47%
Flanged unions	30%
Flanged fittings	30%
Dart Unions, blk., ⅛ to 2 in.	33½%
Do., ⅛ in., 2½ in. and larger	23%
Do., galv., add to black	30%
Nipples, blk., and galvd. ⅛ to 4 in., close and short	60%
Do., 4½ in. and larger	50%
Do, long, ⅛ in. to 4 in.	65%
Do., 4½ inch and larger	55%
Do., running thread	40%
Couplings, 4 in. and under	30%
Do., 4½ in. and larger	10%

MALLEABLE FITTINGS—

	Black	Galvanized
Class A	0 54	0 67
Class B	0 20	0 28
Class C	0 13	0 20

EGG CRATES NOW ON EASIER PRICE LEVELS

Toronto

An additional revision has been announced in quotations on the Humpty-Dumpty line of egg crates. These are now priced at $6.00 per dozen.

ASH SIFTER QUOTATION FOR NEXT SEASON

Toronto

Quotations on the Samuels ash sifter for next season are announced as remaining unchanged at the $6.00 level.

MOTOR OILS REGISTER REDUCTION IN PRICE

Toronto

A reduction of between fifteen and twenty-five cents has been recorded in the list prices covering motor lubricating oils, such as Polarine. An additional grade of Polarine has been included in the current list; special heavy. This takes the place of kerosene tractor oil.

Other oils, including gasoline, remain at unchanged price levels. The latter product is now experiencing a better demand with the advent of the open season, and gasoline is described as firmer on the oil markets.

Following are the revised quotations on Polarine, with discounts unchanged:

MOTOR OILS—

Polarine, per gallon, list	$1.00
do., medium, list	1.00
do., heavy, list	1.00
do., special heavy, list	1.00
do., extra-heavy, list	1.25

Less 25 per cent.

VARYING REDUCTION IN TIN PLATE PRICES

Toronto

In support of the tendency to shade prices on tin plate for attractive orders, which was recently noted in Hardware and Metal, a revision has now been announced in prices on these products. These changes affect coke tin plates, charcoal tin, and terne plates. The average decline is between fifty cents and one dollar per case. Following are the revised quotations on the domestic markets:

PLATES, CANADA—	
Dull 60 sheets	5 30
Ordinary, 52 sheets	5 25
PLATES, COKE TIN—	
IC, 20 x 28, 112 sheets	12 50
IX, 20 x 28, 112 sheets	16 00
IX, 20 x 28, 56 sheets	8 50
PLATES, CHARCOAL TIN—	
IX, 20 x 28, 56 sheets	10 00
IXX, 20 x 28, 56 sheets	12 00
PLATES, TERNE—	
IC, 14 x 20, 112 sheets	11 50

MODERATE TRADE NOW IN RANGE BOILERS

Toronto.

The current situation in range boilers is described as fairly good compared with the demand experienced at this time last season. While the total volume is still of moderate proportions, manufacturers and distributors both look for improvement in these markets, as soon as seasonable weather is evident. Stocks on hand are described as comparatively light in most cases, and purchases on the part of dealers and consumers continue to be for immediate requirements only. Following is the nominal list and discounts:

RANGE BOILERS—

5-gallon	$ 13 50
12 to 15 gallon	14 00
18-gallon	15 00
25-gallon	16 50
30-gallon	17 50
35-gallon	20 50
40-gallon	22 75
52-gallon	38 00
66-gallon	60 75
82 gallon	74 00
100-gallon	103 00
120-gallon	117 00
144-gallon	164 00
168-gallon	187 00
192-gallon	210 00

Discounts, Standard weight, 50 per cent. Extra heavy, 40 per cent.

FIRMER PRICE TREND IN SHEET MARKETS

Toronto.

The expansion in the sheet markets is described as keeping up fairly well, and producers and distributors report the future as considerably brighter. It is noted that one southern producer of sheets and plates, has given notice of an advance in price of $3.00 per ton on galvanized. Whether this tendency will be generally adopted, and reflected in the domestic markets, depends upon the uniformity of such quotations. Sheet producers describe this as one of the straws which show the direction of the wind, or future market tendency. Should the present demand be sustained, developments in this direction are stated to be not unlikely. On the other hand, some proportion of recent business is ascribed to purchasers anticipating future requirements owing to the pending coal strike. Local sheet quotations remain at the recently revised levels, which follow:

BLUE ANNEALED—		
10 gauge, base	3 50	4 25
12 gauge	3 55	4 30
14 gauge	3 60	4 35
16 gauge	3 65	4 40
BLACK—		
18—20 gauge	4 05	4 80
22—24 gauge	4 10	4 85
26 gauge	4 15	4 90
28 gauge	4 25	5 00

Charge of from 25c per 100 lbs. is made for less than case lots. An extra 10c per 100 lbs. is also charged on sheets 26 in. wide.

GALVANIZED—

	Queen's Head	Fleur-de-lis
28 gauge	7 75	7 25
26 gauge	7 50	7 00
24 gauge	7 10	6 60
22 gauge	6 65	6 15
18 and 20 gauge	6 50	6 00
	Premier and	**Apollo**
10¾ oz.	5 75	6 50
U. S. 28 base	5 35	6 10
U. S., 26 gauge	5 05	5 80
22 and 24	4 90	5 65
18 and 20	4 75	5 50
16	4 60	5 35
12 and 14	4 45	5 20

An extra 40c. per 100 lbs. is charged for Keystone and Premier brands copper-bearing sheets.

An extra is now charged on galvanized sheets, 10 3-4 oz. and 28 ga., when shipped out in sheets 3 feet wide. The extra charged over prices shown above is 20c. per 100 pounds.

REPORT SOME BUYING OF BARS FOR STOCK

Toronto

In the bar product markets, the fact that wholesalers are reported to be interested in stock requirements, has resulted in substantiating the recent expressions of optimism which have been prevalent. Current business is described as fair, with warehouses showing signs of a more normal activity. The fact that some southern producers have announced a more uniform level on bars and shapes, gives rise to the opinion that quotations in primary markets will likely firm up in the near future. Just what effect the coal strike will have on producers and steel industries in general, depends upon the duration of the dispute. It is noticeable, however, that coal consumers are pretty well protected as regards stock on hand, and that there is no general alarm being displayed. On the other hand, just what proportion of the recent increased

demand for steel is attributed to manufacturing consumers and others anticipating future requirements owing to the shadow of the impending strike, would create some discussion in southern circles. The mills report that the improvement in demand has been fairly rapid, and speculation is noted as to whether the present degree of operation will be maintained throughout the ensuing months. Unchanged local quotations on bar products follow:

IRON AND STEEL—	
Mild steel bars base	2 75
Mild steel bands, 3-16 in. base	3 25
Bar iron, base	2 75
Angle iron, base	2 75
Horseshoe iron	3 60
Tire steel	3 35
Spring steel	5 50
Sleigh shoe steel	2 85
Hoop steel	3 75
Norway iron	12 50
Toe caulk iron	4 00
Crucible cast sheet steel	30 00
Mining drill steel	18 50
Cast tool steel, high grade	30 00
Cast tool steel, medium	18 00

MORE ACTIVE MOVEMENT OF EAVESTROUGH

Toronto.

There is now a noticeable improvement in the movement of eavestrough and conductor pipe, shipments being commenced to the dealer trade. Although current business is still light, distributors are well satisfied, claiming the opening of the season is fairly early. With stocks undoubtedly low in all sections, there is a continued improvement looked for. Quotations are unchanged,

TROUGH (Eave)—	
O. G. Square Bead and half round. Size in girth: Per 100 ft.	
8 in.	15 90
10 in.	17 70
12 in.	21 20
15 in.	28 80
18 in.	36 50

Less 70 and 10 per cent.

PIPE (Conductor)	
Plain, round or corrugated. Per 100 ft. in 10 ft. lengths.	
2 in., in 10 ft. lengths, list	18 40
3 in. in 10 ft. lengths, list	22 30
4 in. in 10 ft. lengths, list	29 60
5 in. in 10 ft. lengths, list	40 00
6 in. in 10 ft. lengths, list	49 00

Less 70 and 10 per cent.

ELBOWS (Conductor)	
2 inch, list	5 25
3 inch. list	6 00
4 inch. list	10 50
5 inch, list	24 00
6 inch, list	29 00

Less 60 per cent.

CAUTIOUS BUYING OF CORRUGATED SHEETS

Toronto

The outlook in the corrugated sheet market as regards an improved volume of trade in the near future, is described as optimistic. With more seasonable weather prevailing, conditions are favorable to brisk activity in building circles, especially where corrugated and similar materials are required. With an improved demand developing in the near future, it is expected in some quarters that the nominal prices on the heavier gauges recently noted as subject to price shading according to specifications, will become more stabilized. On the other hand, some lowering in flat sheet quotations has given rise to the impression that a similar change may be looked for in corrugated. However, for the present, the following list prevails:

CORRUGATED SHEETS—	Per 100 Sq. Ft.
No. 28 gauge	6 50
No. 26 gauge	7 00
No. 24 gauge	9 00
No., 26 U. S., gauge	8 00
No. 22 gauge	11 00
No. 20 gauge	12 50
No. 18 gauge	16 50

Less 10 per cent.
Lighter than 24 gauge and wider than 27 ins., 75 cents per sq. extra.

EASY UNDERTONE STILL EVIDENT IN SCRAP

Toronto

Consuming demand for waste material has been slow on the local market. Mills refuse to purchase on more than a hand-to-mouth basis. Prices are generally unchanged, but in some divisions there is an undercurrent of easiness.

In the ferrous scrap market, the prices remain approximately the same. Standard car wheels show some little firmness this week, advancing $1.00 per ton—$14.50 to $15.00. Other cast scrap is moving at firm prices, but demand is rather slow.

The following are the usual averages of dealers' buying prices for large quantities:

SCRAP MATERIALS		
Gross Tons— Scrap Iron		
Heavy melting steel (Hamilton)	$11 50	$12 00
Borings and turnings	2 00	3 00
Rerolling rails	10 50	11 50
Scrap pipe	6 00	7 00
No. 1 railroad wrought	10 25	11 25
Steel turnings (Hamilton)	6 50	7 50
Agricultural malleable	10 00	11 00
Railroad malleable	11 00	12 00
Net tons—		
No. 1 cast	15 75	16 75
Stove plate	11 50	12 00
Grate bars	10 50	11 00
Standard car wheels	13 50	14 00
Scrap Metals.		
Heavy copper and wire	10 50	11 00
Light copper	8 00	9 00
No. 1 composition	9 00	10 00
No. 1 comp. turnings	6 00	7 00
Light brass	3 00	3 50
Heavy yellow brass	5 50	6 00
Heavy lead	4 50	4 75
Tea lead	2 00	2 50
Scrap zinc	4 00	4 25
Scrap Rubber		
Boots and shoes	2 25	2 75
Lumbermen's rubber boots	1 50	2 00
Auto tires	0 50	1 00
Solid tires	0 75	1 25

ACTIVE DEMAND NOTED FOR ELECTRIC STOVES

Toronto

Current business in stoves and ranges is described as fair by manufacturers of these products. The chief degree of activity is evident in electric ranges, for which it is stated there is a fairly brisk demand. On the other hand, the coal and wood stoves are now entering the dull season. Oil stove manufacturers and distributors report recent improvement, and generally look for a good trade to develop throughout the ensuing months.

PRICE DECLINE NOTED ON BRICK TROWELS

Toronto.

Among the reductions announced this week are easier quotations on the Rose brick trowels. New prices are as follows:

TROWELS—
Sizes, 10-½ $25.20 per doz. Sizes 11 $25.80 per doz. Sizes 11-½ $26.40 per doz.

BRIGHT FUTURE IN RADIATOR MARKETS

Toronto

Compared with this season in 1921, current business in radiators is described as good. While the volume of trade is yet moderate, the future looks exceptionally bright, according to the opinion expressed to Hardware and Metal by manufacturers and distributors of these products. This brighter outlook is based upon the fact that building activity is in sight this year, whereas construction work was more or less of a restricted nature during the previous season. Quotations on both radiators and boilers remain unchanged at the discount levels quoted in January.

IRREGULARITY STILL EVIDENT IN METALS

Toronto.

Irregularity in the ingot markets is perhaps the chief current feature, with domestic conditions generally dull and lifeless. In primary circles, the stocks on hand continue noticeably in excess of the visible demand, with the result that most metals are quiet and irregular. Price fluctuations of a minor nature are evident in certain quarters, but the local quotations generally remain at the recently revised levels.

COPPER.—This metal is again showing signs of a see-sawing movement on the primary markets, this being principally due to dealers shading prices in order to attract consumers. Reports indicate that the export sales of copper continue light. The local market is described as dull, with prices at 16½ cents.

TIN.—This market is irregular, with the general tone dull, and prices at the easier level of 34 cents, noted last week. Consuming demand continues light, and dealers seemed disinclined to operate. The London markets still fluctuate to some extent, but are considerably lower than at the commencement of the present year.

LEAD.—The local lead market is described as lifeless, due to the lack of consuming demand. On the primary centres, there has been some temporary activity, and demand is reported as fair considering prevailing conditions. The domestic quotation remains unchanged at $6.50.

SPELTER.—This metal continues quiet, in both domestic and primary circles, but some improvement in the demand from the sheet mills is looked for in certain quarters. This improvement, however, has not yet developed. Local prices remain at $6.50.

ANTIMONY.—It is stated that antimony is very dull on the local markets, with prices still at the recent lower levels of 6 and 7 cents. On southern centres, however, a slightly firmer tone is reported in some quarters due to some show of interest awakened by the low quotations.

ALUMINUM.—A poor demand is evident for aluminum, and the outlook for this metal is not any brighter than during recent weeks. The quotations locally continue around 27 cents.

London Markets

LONDON, March 30.—Price reductions this week affect the following lines: turpentine, shoe tacks, Hungarian, hob and channel nails, and Rodgers pocket cutlery.

Hardware trade is reported as being very fair during the past week although the sale of many Spring lines was slowed up on account of colder weather.

The volume of business continues to increase and with favorable weather April is expected to be a good business month.

TURPENTINE PRICE SAGS ANOTHER TWO CENTS

London

Both supplies and demand for turpentine are described as of a moderate nature, and quotations on the local markets have generally receded another two cents per gallon. This change brings the current price to the following levels:

TURPENTINE—	Imp. Gal.
1 bl. lots	1 25
2 to 4 bbl. lots	1 24
5 gal. lots	1 40

LINSEED PRICES STEADY AT REVISED LEVEL

London

Linseed oil prices on the local markets remain at the level of $1.10 for raw and $1.13 for boiled in barrel lots, with no further developments recorded since these quotations became generally effective a few days ago. It is noticeable, however, that the seed market has been slightly easier during recent weeks, this movement following the weakness in the Argentine flax seed quotations. This tendency, however, is looked upon as temporary.

LINSEED OIL—	Raw.	Boiled.
1 to 2 bbls., per gal.	1 10	1 13
3 to 5 bbls., per gal.	1 09	1 12
6 to 9 bbls., per gal.	1 07	1 10

Less barrels, add 15 cents gal.

RODGERS POCKET KNIVES SHOW PRICE REDUCTION

London

New prices on the Joseph Rodgers line of pen and pocket knives, representing a reduction of approximately 7½ per cent., are announced this week. The revised net prices on some of the popular lines are as follows:

	per doz.
Pen knives No. 17749I	12 25
Do., 17749B	12 25
Do., 17751P	25 30
Pocket knives No. 32352	5 70
Do., No. 32341x3"	7 15
Do., No. 32341x3¼"	7 60
Do., No. 32341x3½"	8 45
Do., No. 32341x3¾"	9 70
Do., No. 32345x2¾	9 30
Do., No. 32345x3	10 15
Do., No. 32345x3¼	11 40
Do., No. 32345x3½	12 65
Do. No. 32345x3¾	13 95

SEASONAL SALE FOR WHITE LEAD IN OIL

London, Ont.

Dealers report that a good seasonal sale is now evident for white lead in oil, with prospects for a fair degree of activity in this product throughout the ensuing months. Prices are steady and unchanged at the following levels:

WHITE LEAD IN OIL—	Tons.	Less Tons.
Pure, Per 100 lbs.	13 30	13 65
Elephant, per 100 lbs.	13 80	14 15

BRISK MOVEMENT OF ALABASTINE REPORTED

London, Ont.

Local merchants report that with the interior finishing of many houses which were commenced last Fall, there has developed a brisk demand for alabastine.

Prices on this product remain as follows:

5 lb. packages $9.60 per 100 lbs.
2-½ lb. packets, $10.10 per 100 lbs.

PUTTY PRICES STEADY WITH FAIR DEMAND

London, Ont.

With prices remaining unchanged on putty, the current demand for this product continues fair. With the advent of Spring weather, a better movement is looked for. Prices remain as follows:

PUTTY—	Per 100 lbs.
Standard, 100 lb. drums	6 30
Do., 25 lb. drums	6 55
Pure, 100 lb. drums	7 80
Do., 25 lb. drums	8 05

SUBSTANTIAL DECLINE ON BAMBOO FISH POLES

London

New prices for the 1922 season are announced on bamboo fish poles. This change represents a reduction of around 25 per cent. from the previous levels. Following are the revised quotations:

FISH POLES—(Bamboo)—
12 ft., $1.30 doz. 14 ft. $1.85 doz. 16 ft. $2.40 doz. 18 ft. $3.50 doz. 20 ft. $4.20 doz.

REVISION IN LIST ON SHOEFINDERS' TACKS

London

A new shoefinders' list is now issued to the trade. Reductions of varying extent are announced on heel and shoe nails, and shoe tacks. Shoe rivets, both iron and brass are unchanged in price.

STEADY CALL RECORDED FOR WINDOW GLASS

London, Ont.

Prices on window glass continue unchanged at the recently revised list. There is a fair seasonal sale at present recorded, with steady improvement in this direction during recent weeks. Following are unchanged quotations:

WINDOW GLASS—
Single Diamond, net list
Double Diamond, net list.
Cut Lights. 75 per cent. off light list.

IMPROVED NAIL DEMAND

London

A good sale for nails is now generally reported, this situation being a reflection of the seasonal building activity. Prices on both wire and cut nails remain unchanged, both on domestic and primary markets. Following are prevailing quotations:

NAILS	
Wire, base	3 65 per keg
Cut, do.,	4 35 per keg.

GRADUAL INCREASE IN ROPE MOVEMENT

London, Ont.

Rope sales continue to record a slight increase each week, and distributors report that these products are gradually reaching a normal degree of activity for this season of the year. Prices are unchanged at the following levels:

ROPE—	lb. base
Pure Manilla	23c
Beaver Manila	20c
New Zealand Hemp	20c.
Sisal	18c.

IMPROVEMENT IN CALL FOR BUILDERS HARDWARE

London

The current demand for builders hardware is registering a gradual improvement each week. Prices remain at the revised levels recorded during the earlier weeks of the year, with brisk activity in building circles expected to be reflected in the future demand for these products.

Winnipeg Markets

WINNIPEG, March 30.—An important feature in this week's market is the reduction on bar iron and steel. Linseed oil is also quoted five cents per gallon lower. Other lines showing lower prices are: genuine Crescent wrenches, crucible steel, wire rope, horse shoes, step ladders and Paris Green. The seasonable demand for Spring goods is beginning, and with favorable weather conditions, a good amount of business is expected in many lines as generally stocks are considered low.

WIRE ROPE PRICES REGISTER REVISION

Winnipeg.

New lower prices are recorded this week on wire ropes. Following are the revised quotations:

WIRE ROPE (Crucible Steel)—
⅜ in., $8.85 per 100 lbs., 7-16 in., $10.00 per 100 lbs. ½ in., $11.00 per 100 lbs. ⅝ in., $14.00 per 100 lbs. ¾ in., $19.00 per 100 lbs. ⅞ in., $24.00 per 100 lbs. 1 in., $32.00 per 100 lbs.

PARIS GREEN PRICES FOR COMING SEASON

Winnipeg

Prices have been revised for the coming season in Paris green and are substantially lower. Following are the revised prices:

PARIS GREEN—
1 lb. packages: case lots, 36½c. per lb. Less 37½c per lb.
½-lb. packages. case lots 38½c. per lb. Less 39½c. per lb.

HORSE SHOE QUOTATIONS ON LOWER LEVEL

Winnipeg.

Easier prices are recorded on horse shoes. Following are the new lower quotations:

HORSESHOES—
Iron—0-1 $8.90 per 100 lbs. 2 and larger $8.65 per 100 lbs.
Snow—0-1 $9.15; 2 and larger $8.90.

REVISED PRICES ON STEP AND EXTENSION LADDERS

Winnipeg.

Prices on step ladders and extension ladders have been revised slightly. A few sizes are lower and some slightly higher. Following are the revised prices.

STEP LADDERS—
Common—3 ft., $1.05 each; 4 ft. $1.40 each; 5ft. $1.70 each; 6 ft. $2.05 each; 7 ft. $2.45 each; 8 ft. $2.75 each; 10 ft. $3.90 each.
EXTENSION LADDERS—
20 ft. $5.80; 24 ft. $6.95; 28 ft. $8.10; 32 $9.25; 36 ft. $11.35; 40 ft. $12.7.0.

ANTICIPATE IMPROVED DEMAND FOR SOIL PIPE

Winnipeg.

With the approach of the Spring and Summer seasons, a more active period in soil pipe trade is generally anticipated. The current demand for soil pipe and fittings is naturally restricted owing to weather conditions, but improvement in this respect is usual at this time of the year. Quotations on these products are unchanged, the following discounts prevailing:

SOIL PIPE—2 and 3 in. 20 per cent. off. 4 in. 30 per cent off. 5 and 6 inches 25 per cent. off. 8 inches, 10 per cent. adv.

FITTINGS—2 and 3 in. 40 per cent. off. 4, 5 and 6 inches, 45 per cent off.

DECLINE RECORDED ON BAR IRON PRODUCTS

Winnipeg.

Quotations on bar iron and steel have now been reduced, this change affecting practically all bar products. Following are the easier base price levels:

BAR IRON—	Per 100 lbs.
Rounds and Squares 3-16, ¼ and 5-16 base	4 15
Rounds and Squares ⅜ to 2 and Flats up to and including 1 x 4 base	4 00
Rounds and squares over 2 up to and including 2¾ and Flats over 1 x 4 up to 6 wide. base	4 75
Rounds over 2¾ to 6 base	5 25
Band steel, base	4 50
Sleigh Shoe Steel, base	5 25
STEEL—	
Soft or mild rounds and squares 3-16, ¼ and 5-16 base	4 15
Rounds and squares ⅜ to 2 and Flats up to and including 1 x 4, base	4 15
Rounds and squares over 2 up to and including 3 and Flats over 1 x 4 up to 6 wide, base	4 75
Rounds over 3 to 6, base	5 25

EASIER PRICE LEVEL ON LINSEED OIL

Winnipeg.

This week has brought about a reduction in the price of linseed oil. Raw linseed is now quoted at $1.15 per gal. and boiled at $1.18 per gal. in barrel lots.

LOWER QUOTATIONS APPEAR ON CRESCENT WRENCHES

Winnipeg.

Prices have been lowered on genuine Crescent wrenches. Following are the revised quotations on these products:

CRESCENT WRENCHES:—
4 in., $8.75 per doz.; 6 in., $8.75 per doz.; 8 in, $10.75 per doz.; 10 in, $13.50 per doz.; 12 in., $20.00 per doz.; 15 in., $30.00 per doz.; 18 in $43.75 per doz.

Hamilton Markets

HAMILTON, March 30.—General reports covering business conditions continue to indicate gradual improvement. The looked for stimulant, however, provided by anticipations of an early spring, has been somewhat dampened by the dull weather of the past few days. In some quarters it was stated that this has had a tendency to slightly check the movement of seasonal lines, but the average reports show that a steady volume of small orders is being received, and that lack of forward buying in quantity is the chief complaint of both dstributors. However, this condition is expected to remain for some time, until market conditions are more thoroughly stabilized, and also until prices remain unchanged for at least through the current seasons.

The scheduled strike of miners is attracting some interest in steel circles, in view of the extent to which recent forward buying in the steel industry can be attributed to the shadow of the impending coal dispute settling over industries which may be more or less indirectly affected thereby. Some observers of the markets insist that manufacturing consumers have been anticipating their requirements to some degree, and this tendency would account for the increase in operations and demand recently noticeable in steel production circles. On the other hand, the continued softening in the coal market would indicate that large consumers have on hand all the stocks they desire.

The current demand for steel products is described as variegated. Sheets have been in fair demand, and tin plates record a fair amount of activity. On the whole, some steel prices show a slight stiffening tendency, but how far this movement will be permanent as regards bars and shapes, is difficult to ascertain. In some quarters, quotations on sheets are apparently scheduled for eventual firmness rather than any decline. The recent declaration of the regular dividend on the Steel of Canada common stock, coupled with the announcement of President Hobson that "conditions are gradually improving," had a good effect upon sentiment in general.

Paint Trade on Sound Basis

Optimism is the fundamental keynote of the paint industry, and all phases of this trade are looking forward to a very fair season. While the current market was described as "spotty" in some quarters, the general impression is well up to expectations. Some manufacturers report a good measure of trade, not only from old customers, but also from new connections. Other distributors state that the spring demand has been disappointing in volume, but repeat orders are expected to materialize in the near future and thus help to swell the total volume. The paint industry, therefore, appears to be on a sound foundation for future expansion, with a keen competitive element supplying sufficient incentive to keep the various selling organizations particularly active.

In discussing the outlook with one local manufacturer, the opinion was again reflected that this will be a season of "show me." "For that reason, all manufacturers and distributors of hardware products are paying special attention to the selling end of their organizations, in a more marked degree than ever before." It was pointed out that, "where additional efforts were made to secure results, such achievements in a business way would be forthcoming, but where concerns were satisfied to rely upon old-time standardized methods, prestige, good-will, and similar factors alone, final reports may not show the results which should, no doubt, be generally expected. In our own case, a strenuous advertising campaign is being backed up with high quality service, plus courtesy and dealer co-operation."

Pittsburg Markets

PITTSBURG, March 30.—Enough time has not elapsed since the last softening in price of any steel product to make it clear that the long decline in prices has ended. Prices may decline any number of times in the future history of the steel industry, but this one decline is over. Steel prices are now stiffening, rather than advancing, but the stiffening is likely to merge into actual advances of greater or less importance. Bars, shapes and plates, which led the decline, and went farther relative to cost of production than any other steel commodity, show the greatest stiffening. In the past fortnight or so 1.40c has been the minimum of the market, whereas for awhile this price was shaded in numerous cases by $1 to $2 a ton, perhaps a trifle more in some cases. In the past week the less desirable orders, including carloads, have been going largely at 1.45 and 1.50c. Predictions are freely made that in a short time, perhaps a week or two, the minimum of the market will be 1.50c. The mills are very anxious to get the price up at least to the price of production, though at the same time they are anxious to book all the tonnage they can.

In wire nails the price situation is much improved from the mill standpoint. A month ago, shortly after the market had declined to $2.40, shading of this price developed and it appears that almost all large buyers were able

A System of Following up Paint Sales

Enquiry Made About Paint Customers' Future Needs—One Man's Duty to Look After This Work and Assisting Customers —Constantly Impress on Customers Value of "Save the Surface" by Use of Adequate Coat of Paint—Keep Stock in Cupboards With Cards on Panels

"BUY your paint now at spring prices," is the slogan recently adopted by W. G. Edge, Limited, retail hardware, Ottawa, Ont. The spring drive is on, and the salesmen are right "on their toes" in an effort to establish a record in paint sales.

The slogan, which seems to be most admirably suited to the occasion, is being prominently set forth in the firm's newpaper advertising, as well as in its windows and on its counters. It has also been backed up by an exceptionally fine window display, the sum total of which is producing the desired results. "We know it has been effective because it has resulted in a considerable demand for automobile enamels and ready mixed paints," remarked H. des Rivieres, manager of the hardware department, to Hardware and Metal.

Service and Efficiency

Since becoming established in its fine new home, this firm has been giving a lot of attention to its paint department, with a view to both increased efficiency and sales. Service and efficiency are two outstanding words in the every day life of the concern, because the management realize they are essential to increased sales. As a rule, once a month the salesmen gather in the store in the evening, after the day's work is over, and discuss sales methods. This provides an excellent opportunity for the manager to drive home his "selling" pointers.

"Always meet your customer, and meet him with a smile, a good-natured honest-to-goodness smile," is one of Mr. des Rivieres' favorite expressions when handing out advice to his staff. When applying this to the paint department, he emphasizes the value of showing the customer the best quality goods first. "We do this because we have often noticed that a lazy clerk will take down the goods handiest to reach," said Mr. des Rivieres. "We always keep two grades of paint, a cheap grade and a high quality grade, and we always make it a point of keeping the best quality goods near the front door of the store and the cheap stuff at the back in cupboards, hidden away as far as possible from both salesman and customer. It is never produced unless the customer commences to complain about the price of the better quality goods."

System enters very largely into this firm's handling methods. Instead of having the bulk of the stock displayed, as is done in many hardware stores, it is kept in cupboards, upon the panels of which are tacked cards bearing the colors of the paints which are thus hidden, so that all that is necessary is for the clerk to open the cupboard door or panel and secure a can of the desired article, without having to scan row upon row of cans. One good feature about this method is that the labels are usually clean.

These panels are also utilized for displaying paint brushes. Every brush is given a number indicating where its kind is to be found, thus again saving unnecessary delay. Tickets are also tacked under the brush giving the manufacturers' number and the sale price.

Save the Surface

Asked to what extent the firm was endeavoring to link up the "Save the Surface" campaign with its selling methods, Mr. des Rivieres stated that the firm was constantly impressing upon its customers the value of using plenty of paint. "Frequently we put a 'Save the Surface' sign in the window," he said. "However, I would like to take this opportunity to suggest to the manufacturers that they prepare a series of neat small designs, which could be displayed in windows and on counters without interfering with the general display. We for one would be very glad to make use of such signs. I think also that the manufacturers should send their demonstrators out oftener than they do. We have always made it a point of encouraging this class of advertising and will always be found willing to co-operate with the manufacturer in this respect. The oftener the better, as far as we are concerned, because we find it pays."

Mr. des Rivieres also displayed a keenness for lithograph pictures—the kind that are true to life. "There is nothing that gets the prospective purchaser thinking quicker than a picture of a well arranged room, with a highly polished floor, or a picture of a house with a new coat of paint. A desire is almost immediately created to secure the same condition in his or her home. More of such pictures should be displayed in our windows and on our counters."

Cards on Delivery Trucks

Another method of advertising, used by this firm, is cards displayed on the sides of their delivery trucks. These cards are, as a rule, used to announce Saturday special sales, and are found to produce satisfactory results.

Just at present this firm is concentrating on the small sales. There is very little building being done, so every possible effort is being put forth to induce the householder to buy.

"What system do you use for following up sales?" asked Hardware and Metal.

"When a person comes in to buy a gallon or more of paint, we try to find out what their future needs will be, and then keep in touch with them. We employ one man whose entire time is devoted to just such work. He goes from job to job looking after the requirements of our customers. We also hand each customer one of our booklets bearing our name, address and telephone number. If anything is asked for that we have not got on hand, we always, without fail, endeavor to get it for the customer, with the least possible delay."

SERVICE

CONFIDENCE

FAIR DEALING

THE "THOUGHT BEHIND"

A gentleman who was preparing to enter the hardware business called on us the other day. In the course of conversation he said: "Until I made the acquaintance of Lowe Brothers I had always thought that it mattered not whose paint I sold. I argued from the viewpoint that a salesman could sell any brand of paint."

"Why do you say 'Until I made Lowe Brothers' acquaintance?' " we asked. "Well," he replied, "since studying your policy and methods I have come to learn that there is a distinct difference between *selling paint* and *selling results.* Close inquiry into the experience of High Standard dealers and a broad comparison have forced me to realize that the 'thought behind' the institution is what a merchant should buy—not so many cans of paint and so much advertising. As long as your ideals and practices remain unchanged I am your firm and fast friend."

Such are the fruits of a modest but sound business policy. In the interests of the consumer and the retailer it decrees that we shall sell—not Paint, not Advertising, which are but the means to an end, but the end itself—*"Best Results."*

If we can serve you and your customers on this basis we are yours to command.

Much care is taken with the arrangement of window displays of paints and other seasonable lines in the spring by W. G. Edge, Ltd., Ottawa. Here is an attractive showing of paints, varnishes, brushes, mops, floor polishers, wax, brooms, furniture polish, wall finishes, etc., which secured the attention of many passers-by and brought them into the store to buy some of these articles which are needed around every home at this time of the year.

Paint Trade Notes

Under the heading, "WE NEVER TOUCH THE CURSED STUFF," the Saskatoon Star draws attention to a local hardware store advt:—"Try Our Varnish and Be Sure of a Bright and Lasting Finish."

M. Wineroope has been chosen special representative of the export department, Brandram-Henderson, Limited, and will shortly leave for Cuba, Haiti, Santa Domingo and Porto Rico on a visit extending over a period of from two to three months. Mr. Wineroope has for the past eight years covered the Eastern Ontario territory for the above firm.

* * * *

In his annual report, George Henderson, president Brandram, Henderson Ltd Montreal, stated:—

"The shrinkage in demand, particularly in export territories and in the industrial field at home, which characterized the last five months of 1920, was ever present during the year 1921, and had it not been for a distinctly brisk demand from retail distributors all over the country, the result of the year's trading would have been far from satisfactory."

Announcement was made that the company had acquired the capital stock of the Pacific White Lead Company of Vancouver, and that the acquisition of a plant on the Pacific coast should prove of great value in the successful prosecution of the company's sales policy in British Columbia.

The Brush Department

Canada's Foreign Trade in Brushes

Exports of Canadian Brushes Show Increase, Particularly to the United Kingdom and British Possessions While Exports to United States Show Decline

THE extent of Canada's foreign trade in connection with brushes is set forth in figures covering trade in the years 1919 and 1920 which have just been issued by the Bureau of Statistics, Ottawa.

These show that imports of animal bristles in 1919 amounted to 166,642 lbs. valued at $284,647 while in 1920 they were 324,536 lbs. valued at $699,183. Vegetables bristles were imported to the extent of 9,097 lbs. in 1919, valued at $6,459 and in 1920 were 4,319 lbs. valued at $2,503. Imports of horse hair, cleaned but not dyed were as follows, in 1919, 90,204 lbs. valued at $69,868, in 1920—175,881 lbs. valued at $155,583. Imports of other hair, cleaned or uncleaned but not dyed amounted to $37,086 in 1919 and 856,747 lbs. in 1920, valued at $107,495.

Manufactured materials imported were as follows: brooms and whisks valued at $14,154 in 1919 and $15,235 in 1920; paint and varnish brushes $32,119 in 1919 and $48,816 in 1920. Toilet brushes $319,385 in 1919 and $655,041 in 1920, all other brushes $284,009 in 1919 and $369,125 in 1920. Total imports of raw materials were $1,174,555 in 1919 and $1,612,757 in 1920. Imports of manufactured products were $779,666 in 1919 and $1,201,677 in 1920.

Canada's exports in those two years were as follows:—hair $324,591 in 1919 and $297,408 in 1920, brooms and whisks $61,811 in 1919 and $89,600 in 1920, brushes of all kinds $81,570 in 1919 and $233,909 in 1920.

From the detailed figures it is evident that the volume of exports has increased in 1920 over 1919, particularly in brushes of all kinds. This increase was particularly noted in the case of the United Kingdom, and British Possessions while exports to the United States decreased

Boeckh's Brush News

—— *Do it Now* ——

"NEVER put off till to-morrow what you can do to-day" is an excellent motto. A better motto is "Do It Now—not even putting it off till after lunch."

Begin right now to get yourself known as the "Boeckh Brush Man" for your locality. Don't tell just a few people—"sotto voce"—tell everybody—tell it right out loud—and do it now.

A very effective way of doing this is to arrange an attractive Boeckh Brush display in your window. Show brushes suitable for all kinds of work. Along with each brush, place a neat little card stating the kind of work for which that brush is particularly adapted. Such a window will prove a wonderful salesman for you. It will remind passersby not only of brushes they need, but also of the kalsomine, the paint, the enamel, the broom, the dustpan, and dozens of other articles that brushes just naturally make people think about. Don't put off arranging this display till to-morrow—do it now.

When the time comes to give another product a turn in the window, don't transfer your brushes to the warehouse, or that empty space under the counter. Keep them in sight. Make an attractive display in a conspicuous place in your store—in a case or on the counter. At regular intervals change your display—altering its position in the store. This keeps your stock looking new and well cared for.

Hundreds of people in your locality—customers who enter your store—need brushes, and will purchase Boeckh Brushes if you but display them. People who come in to buy a package of tacks, or a pound of nails, see those brushes, remember that long postponed job of painting the kitchen chairs—and decide to take home a Boeckh Brush and a can of paint. Then, too, there are those people who come in to buy "just a cheap brush to paint the kitchen woodwork"—and who, in nine cases out of ten, on seeing good brushes displayed, decide they "may as well buy a good one."

Don't put off getting your Boeckh Brushes on display, and replenishing your stock—do it now—and reap really worth-while profits from your Brush Department.

Weekly Paint Markets

Montreal

MONTREAL, March 30.—Price recessions in both linseed oil and turpentine feature the paint markets this week. Linseed oil is reduced 2 cents per gallon bringing the present price to $1.02 for raw in one barrel lots. This easier tendency is due to the trend of the flax-seed market during the week, although in the past few days this market has stiffened somewhat and is now said to be displaying a firm tone. The movement of the oil market can best be described as see-sawing, but those well informed still maintain that the outlook is firm owing to the probable shortage of seed at a later date. Much the same can be said of the turpentine market, which was somewhat easier in the earlier part of the week. This also has stiffened considerably and according to reports from Southern circles, the market promises well for future. The new crop is due towards the latter end of this month and this may have a tendency towards easing the situation to an extent, although demand, on the other hand, is expected to maintain a fairly strong situation throughout.

Current quotations on window glass are still unchanged, although the undertone of the market is very firm. The situation at producing centres is little improved, and importers are more than a little concerned over the question of future supplies. It is stated that if an improvement is not in sight in the near future, holders of supplies may soon be in a position to name their own prices. Window glass is now on a more settled basis locally, with the new higher list uniformly adopted. Paint and varnish manufacturers report the active season well at hand, and paint brushes are also selling well.

LINSEED OIL PRICES DROP TWO CENTS

Montreal

Quotations on linseed oil locally dropped two cents per gallon in sympathy with the easier trend of the seed market at the close of last week. This week, however, up to the present, brings a slightly firmer tone, and the former slump is fully recovered. The see-saw movement has its drawbacks for those interested, because as soon as the market records an easier tendency buyers become interested which results in considerable business. Immediately activity becomes apparent, the required factor for firming the situation comes into play, and the market advances. It is quite evident that buyers are still holding off, but with the season fast advancing, it is felt that they will have to enter the market in the near future, which should have a strengthening effect on oil prices for the commencement of the busy season.

Outside oil markets recorded the slump last week also, the cause of which was said to be more ample importations of English oil, and demand falling off to an extent. A better tone is noted in the past few days however, and a fairly firm outlook is forecast for the weeks following. Following are revised local prices:

LINSEED OIL—	Raw.	Boiled.
1 to 2 barrel lots, per gal.....	1 02	1 04
3 to 5 barrel lots, per gal. ...	1 00	1 02
Less barrels, add 10 cents per gallon.		

SLIGHT RECESSION IN TURPENTINE QUOTATIONS

Montreal.

A recession of one cent per gallon, and an increasing demand are the features of the turpentine market this week. The slight easing in quotations results from the softer tone in this product recently, although in the past week or ten days the market has been termed as somewhat firmer. This price decline therefore does not describe the present tone of the market, and it is noted that certain distributors have not announced the reduction. In Southern circles turpentine is still said to be in a strong position, increasing demand and limited receipts tending to uphold the market. The new crop, however, will soon be due, and as this usually brings an easier tone, the present season may be no exception.

As stated above, demand is increasing locally, and turpentine is now stated to be the most active of allied paint products. With the month of April now at hand, it is felt that sales will continue to be on the increase, with a promising season ahead. Quotations locally at the revision are as follows:

TURPENTINE —	Imp. gal.
1 barrel lots	1 21
2 to 4 barrel lots, per gal.	1 20
Broken lots	1 31

SOMEWHAT STEADIER TONE IN WINDOW GLASS

Montreal.

With the new higher quotations as a selling basis, the local window glass market is now described as somewhat steadier than it has been in recent months. There is a fair seasonable demand for glass at present, and it is felt that more extensive building operations in the near future will maintain a fair volume of business for the following weeks. Whether this increased trade will bring about an unsettled feeling again is problematic, but the opinion is expressed in some quarters that a heavier buying movement, with more attractive inquiries, may have a tendency to produce another period of price-shading. The undertone of the market is little changed, and the opening of navigation will, in all probability, be the next factor to consider in the situation.

SHELLAC VERY FIRM: PRICES STILL UNCHANGED

Montreal

Although the undertone of the shellac market is very firm, local quotations are still unchanged at following figures, with prices somewhat lower quoted from one source. The strength of the market really results from the inability to procure further supplies of gum shellac. Owing to continued disturbances in India, and transportation difficulties, importers are now more than a little concerned over future requirements. In primary markets, therefore, advances have been recorded, with indications that prices will go still higher. If shipments are further delayed, and stocks on this side become almost depleted, holders will be able to name their own price. Whether the situation will become this acute is hard to determine at the present time, but there seems little relief in sight for the next month or two. Following are unchanged local quotations:

SHELLAC—	
Orange shellac, in barrels	4 60
Do., in one gal. jugs	4 90
White, in 5 gal. jugs	5 10
Do., in one gal. jugs	5 40

PAINT BRUSHES NOW IN GOOD DEMAND

Montreal

Current trade in brushes is now described as active, in keeping with the present season, and the approach of the busy painting time. Owng to the absence of more extensive bookings, in comparison with former years, present orders are larger and more numerous than is usual for this month, this trade always being placed at an earlier date formerly. Quotations on the various lines are unchanged, with little chances of a revision anticipated until after the busy period in the following weeks.

Toronto

TORONTO, March 30.—The shortage of shellac, due to the difficulties attendant in securing fresh supplies of gum, provides the principal

TORONTO PAINT MARKETS

(Continued from page 60)

element in this week's paint market reports. While some distributors continue to withhold local quotations on shellac, it is noticeable that prices at primary centres have registered a rapid upward movement. Recent reports indicate that stocks at Calcutta are nearing the stage of depletion, and difficulty is being experienced in securing fresh shipments from the interior where the recent Indian disturbances have somewhat interfered with transportation arrangements, and also the gathering of this product. In this connection, the opinion has been expressed that the prevailing firm situation may continue for several weeks before relief in the direction of fresh shipments will be evident.

Due to the trend of the flax seed markets, which have been a little weaker, linseed oil quotations have developed a range this week. This situation is due to some easier prices being noted while on the other hand, the levels prevailing last week are being maintained. The movements represent a see-saw element in seed prices, which have been recording alternate recessions and recovery. The ultimate outlook is described as fairly firm, as large consumers have not generally made extensive commitments, while the possibility of seed shortage is stated as a factor still to be reckoned with. An improvement in flax price levels is looked for when western farmers in general commence to require seed.

There has been a slight easing in quotations on turpentine in certain quarters, but during the past few days, the primary markets have recorded a better tone. The shortness of receipts has sustained prices in the south, while the demand for turpentine is described as of a very moderate nature. Savannah reports show that the recent cold nights have tended to check the flow, and thus may somewhat delay the new crop. Buyers of turpentine feel disinclined to purchase in a freer manner until new receipts commence in increasing volume. Meanwhile, stocks have been diminishing, and the old crop in the woods is described as pretty well gathered in.

VARIATION NOTED IN LINSEED OIL PRICES

Toronto.

Following the weakness in the flax seed markets, some slight recessions have been recorded in certain quarters in linseed oil prices. Current quotations on the domestic markets, therefore, again show a range, some variation in local prices having developed, due to the maintenance of previous levels.

The oil market recorded a downward tendency in sympathy with the weakening flaxseed quotations, and also as the result of keen competition evident between crushers for current trade. There has recently been a larger volume of inquiry reported on the local market for linseed, but extensive commitments are scarce, probably due to the reacting seed situation. Argentine developments are attributed to a slackening in the current demand from European sources, and this condition is looked upon as temporary in some quarters as a recovery in this direction would naturally develop a firmer undertone.

Local quotations of $1.04 for raw have been recorded, while in other cases the price of $1.10 is still evident. It is noted that eastern markets again record a further recession, and the following prices, therefore, represent the average levels for linseed oil appearing locally:

LINSEED OIL—

	Per Gallon	
	Raw	Boiled
1 to 2 barrel lots	1 07	1 10
3 to 4 barrel lots	1 06	1 09
6 to 9 barrel lots	1 04	1 07

Less barrels, add 15 cents per gallon.

MINOR FLUCTUATIONS NOTED ON TURPENTINE

Toronto

Some minor fluctuations continue to be evident in the primary turpentine markets, but these changes have not resulted in any reflection on local quotations. The current domestic levels remain at the revision noted in last week's report, with no additional changes having been announced.

Recent reports from the south tend to show that the Spring demand will find the primary markets not too well supplied with turpentine, although the new crop will be available within the next few weeks. The initial movement of this, usually becomes a factor in the current situation, but no marked developments are anticipated in this direction this season. Export trade from the south is described as dull, with consumers on both foreign and domestic markets tending to postpone purchases on a large scale until the new crop develops.

The supply available at Savannah is described as unusually small, but whether stocks are depreciated to that extent, or whether producers are holding tanked turpentine against an improved demand, is not evident at present. Seesaw developments in quotations at primary sources are recently noted, a condition which is expected to continue in some quarters during the ensuing weeks. Following are the average local price levels:

TURPENTINE— Imp. gal.

Turpentine steel drums galvanized, 5c per gallon less than barrel price. Drums charged $15 each, returnable in 30 days, freight paid.

All quantities sold f.o.b. Toronto, Hamilton, London, Brantford, Collingwood, Guelph Windsor, or Montreal but freight may be equalized from any of these points.

Car load lots of 70 bbls. Price on application.

1 barrel lots	1 25
5 gallon lots	1 40
2 to 4 barrel lots	1 24

Less than 1 barrel lots—15 cents per gallon extra

SHORTAGE OF SHELLAC IN PRIMARY CENTRES

Toronto.

The shortage of shellac, noted in last week's report, still continues at primary centres, and prices remain withdrawn in some quarters on the local market. Other quotations are stated as nominal, with sharp advances reported on shellac gum in several centres. Cable advices report short crops in India, with stocks at Calcutta nearly exhausted, owing to the internal disturbances recently noticeable interfering with the transportation of supplies from the interior. On account of the political situation, a natural hesitancy is evident regarding shipments for future delivery. It was pointed out that if the markets were in a normal condition, orders would probably take on a better complexion in the near future, but under the existing circumstances, the trend of futures is decidedly uncertain.

PITTSBURG MARKETS

Continued from page 55

to get concessions down to $2.30 or even $2.25. In the past three weeks there has been no shading at all in evidence, the market being firm at $2.40.

Sheets Improve.—On the surface at least the sheet market looks stronger. That is, the Wheelin Steel Products Co., announced on March 22, that on April 1, its prices would be advanced $3 a ton, and the trade has been looking for other producers to make somewhat similar announcements. However, it is not certain that such episodes really prove the sheet situation to be stronger, for in some quarters it is said that the mills in general are booking little business at current prices and announcements of advances to be made in future may have as their chief object the driving in of business at current prices.

In tubular goods there is shading still, but there is no evidence that the shading is greater than a month ago, and it may be somewhat less. In tin plate there is a very steady market, large lots going at $4.60 and small lots at $4.75.

From the points mentioned, and other considerations, it is plain that the decline has ended and steel prices are in general presenting a stiffening tendency.

The Future of Demand.—There is much more divergence of opinion as to the future of the steel market than there has been at any time for a long while. The lines of division are clear cut. The difference is not as to the actual facts so much as to the interpretation of the facts. Some assert that steel demand will continue to increase, because it has been increasing since the first of the year and spring has now arrived. Others assert that the increase in demand lately has not been in keeping with the general industrial and financial situation and claim part of the buying has been for replenishment of stocks, hence does not need to be done over again. Some observers with long experience contend that it is plain the country is not actually consuming steel at the rate at which deliveries from mills are being taken.

April will undoubtedly tell which party is right. If there has been much stocking, part of it at least has been prompted by fear that after April 1, on account of the union walkout at the bituminous coal mines, the production and shipment of steel might be interfered with.

Link up your business with

"RAMSAY'S Perfecto Cold Water Wall Finish" for interior use.

Made in white and eleven beautiful shades, is Non-Poisonous and spreads easily. Besides being an economical finish to use, "PERFECTO" is a very sanitary wall covering.

"RAMSAY'S Ideal Cold Water Finish"

for exterior work cannot be equalled—it is a Fire Retardant and is manufactured in white and six delightful shades, from which any number of tints can be produced.

Write for color folders and full particulars.

THE CANADA METAL CO., LTD.

TORONTO MONTREAL WINNIPEG VANCOUVER

Even Better Than Pre-War

During the war, the best steels and materials were reserved for war purposes, and the best mechanics put on war orders.

Now, the best steels and materials are again obtainable, including English Seamless Tubing for C. C. M. Frames.

The best mechanics are on the job again with their skill improved as a result of the accuracy demanded in their delicate time fuse work.

Consequently, the quality of C. C. M. Bicycles is even better to-day than in the days before the war.

Better quality—new reduced prices! That's a winning combination to stir up bicycle sales this summer.

Have you our new catalogue and prices?

Bring the Automobile Owners To Your Store With

SHERWIN-WILLIAMS AUTO FINISHES

—A group of Sherwin-Williams "Cover The Earth" Products, made specially for the refinishing of automobiles.

No man likes to drive a shabby car. And not every man is disposed to incur the expense involved in having his auto refinished by a professional. Sherwin-Williams' Auto Finishes simplify the problem, because by their means any car owner can himself make an old car look like new at a trifling expenditure of time and money.

The line is complete and includes

Auto Enamel	Tire and Mat Paint	Lining Dye
Auto Polish	Rim Paint	Leather Seat Dressing
Auto Metal-Brite	Mohair Top Dressing	Gasket Shellac
Flat Black Lamp Enamel	Rubber Top Dressing	Engine Enamel
	Flaxoap	

—each one made up to the world-famous "Cover The Earth" quality standard.

The S.W. Agency will connect you with the demand for these and the other S.W. Paint Products. May we send you full particulars?

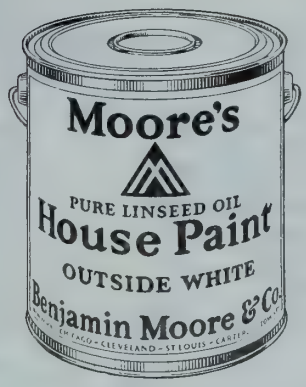
A CUSTOMER WHO BECAME A "BOOSTER"



Satisfied customers are among the greatest assets of a retailer or a manufacturer. That Moore's House Paints create satisfied customers is borne out by a letter received by Latham's Hardware, Ltd., Moose Jaw, Sask., as follows:

446 Ross St. W.,
Moose Jaw, Sask.

Messrs. Latham's Hardware, Ltd.,
Moose Jaw, Sask.

Dear Sirs:—

As many people have admired the color effect on the house which I recently painted, I feel that it is only right that I give the credit to the paint, (Moore's). I am not a painter by trade but I experienced no trouble in applying the paint and the result was one that gave me complete satisfaction.

I have no hesitation in recommending Moore's paints.

Yours sincerely,
J. McInnis.

Moore's line of finishes is bringing repeat business to retail hardware men in all parts of Canada. If you have not investigated the possibilities of Moore's line we would like to place our proposition before you. If we can get together we will both benefit.

"Quality forever Moore"

TINKER TOMS TALKS.

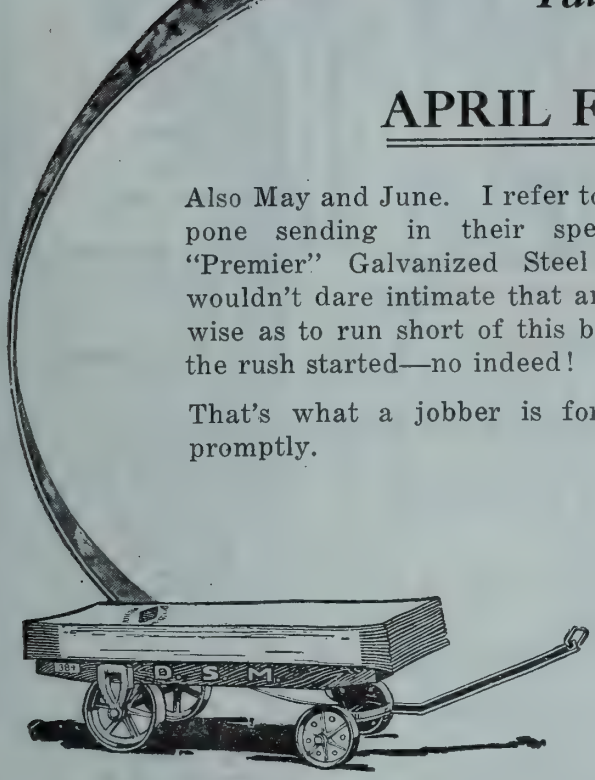
Talk No. 352

APRIL FOOL!

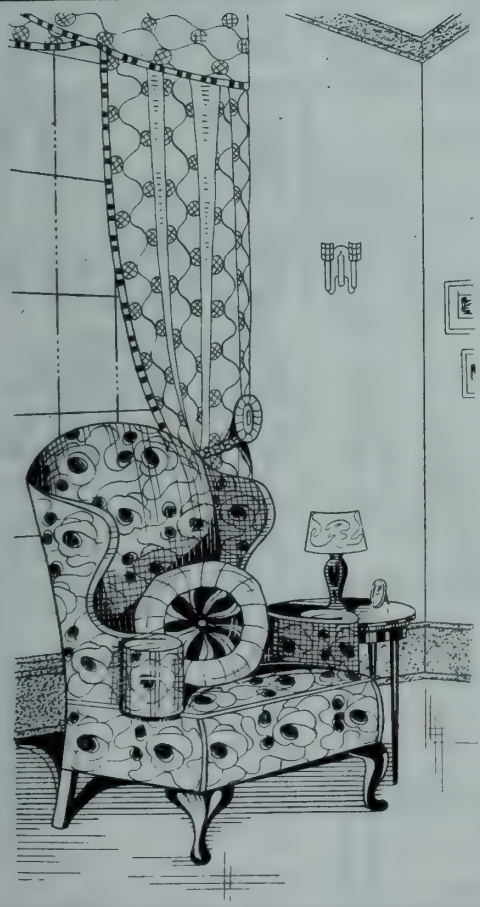
Also May and June. I refer to the sheet users who postpone sending in their specifications promptly for "Premier" Galvanized Steel Sheets. Of course we wouldn't dare intimate that any jobber would be so unwise as to run short of this basic commodity just when the rush started—no indeed!

That's what a jobber is for—to handle your orders promptly.

TINKER TOM.



MADE IN PREMIER CANADA



Simply Mix With Water

There is no trouble—no difficult blending with Alabastine. Just mix the powder with hot or cold water and apply with a flat brush. One coat is sufficient to give a rich, soft tint. It dries quickly, leaves no brush marks and will not rub off.

Mix In Hot or Cold Water

Alabastine

Avoid imitations. There is only one Alabastine.

Each year Alabastine is used more and more. This year, 1922, is bigger than ever, partly because of our big advertising campaign and partly because of the new Opaline Effects that our salesman will tell you about.

Ask the Alabastine Salesman about color cards, window trims and other sales helps so you can get your share of 1922 business.

PILKINGTON
BROTHERS ~ LIMITED

GLASS

FOR

Every Constructional Purpose

No matter what your purpose, there is Pilkington glass to meet the requirements in the best known way—polished or bevelled plate glass—mirrors—window glass—polished wire glass—ribbed or roughcast—ribbed rolled — prismatic—chipped, muffled, enamelled, fluted—EVERYTHING! And it is made up to the thorough, modern British standard by highly skilled Canadian workmen.

Tires - Paints - Oils
That Will Sell to Farmers

The names and trade-marks illustrated on this page represent goods widely advertised to farmers through the oldest and largest farm paper in the West. The readers of The Nor'-West Farmer—78,000 farm families—know these goods and will purchase them with every assurance of satisfaction and value.

These lines will sell easier, produce larger profit through quick turn-over and be more acceptable to farmer buyers. They will get the lion's share of business this spring. Tire and spark plugs must be purchased, oils are a necessity, and the use of paint is a great economy. Link up your store with this advertising by stocking these lines and increase your sales.

We will undertake to supply cuts for local advertising but suggest that the most satisfactory way to secure these is from the manufacturer or distributor direct.

The Trade Mark behind the "Hardware House of Quality"

The Largest Wholesale Hardware Dealers in Canada

ARE YOU READY FOR THE SPRING PAINT TRADE?

Before you know it the snow will be gone and your customers will be asking for DIAMOND "A" and KYANIZE

Here are Two Lines that REPEAT:

DIAMOND "A" PAINT is an absolutely Pure House Paint, and is sold subject to chemical analysis.

KYANIZE makes Floors and Furniture like new. It is the most durable Finish made.

Enter these 2 Important Contests

"Save the surface and you save all"—*Paint & Varnish*

Window Display Competition

CONDITIONS.—This competition is open to any dealer or dealer's clerk. The "Save the Surface" window trim and slogan must be a part of the display. Preference will be given to those windows which illustrate to the greatest advantage the idea of protection and preservation as embodied in the "Save the Surface" idea.

1st Prize $50
2nd Prize $40
3rd Prize $25

Send photographs of window trims with your name on back

Newspaper Competition

CONDITIONS.—Open to any dealer or dealer's clerk. For the best Paint and Varnish advertisement appearing in your local newspaper. The "Save the Surface" slogan must form a prominent part of the advertisement. Awards will be based on the uses of the Save the Surface arguments in the most unique and novel way to attract the attention of the local trade.

1st Prize $50
2nd Prize $40
3rd Prize $25

Send copy of newspaper in which your advertisement appears

The Save the Surface Committee will act as judges of both contests.
Merchants or clerks may contend for one or both of these contests.
Photographs and newspapers must be in the Committee's hands on or before July 1st, 1922.

"The Kind Your Grandfather Used"

BADEN

The Standard by Which Linseed Oils Are Compared

There is always a standard in everything. It is instinctive for man to set up something to measure by. Men measure their "commodities" and "ideals."

Baden is a simple word that measures both.

Back in 1864 the founder of this company conceived an ambitious plan. He believed that if he manufactured a perfect linseed oil, success was assured. He was right. Time has proved that the world can and does reward such merit. To-day, after 58 years of test and trial under all sorts of conditions, **Baden** is the standard by which all others are compared.

When you order linseed oil—just say **Baden** Oil. The jobber then knows you demand the best, guaranteed, linseed oil on the market.

The Dominion Linseed Oil Company

Limited

Baden Toronto Montreal Winnipeg

THE BUYERS' GUIDE

If what you want is not here, write us, and we will tell you where to get it. Let us suggest that you consult also the advertisers' index, facing the inside back cover, after having secured advertisers' names from the directory. The information you may desire may be found in the advertising pages. This department is maintained for the benefit and convenience of our readers. The insertion of advertisers' headings is gladly undertaken, but does not become part of any advertising contract.

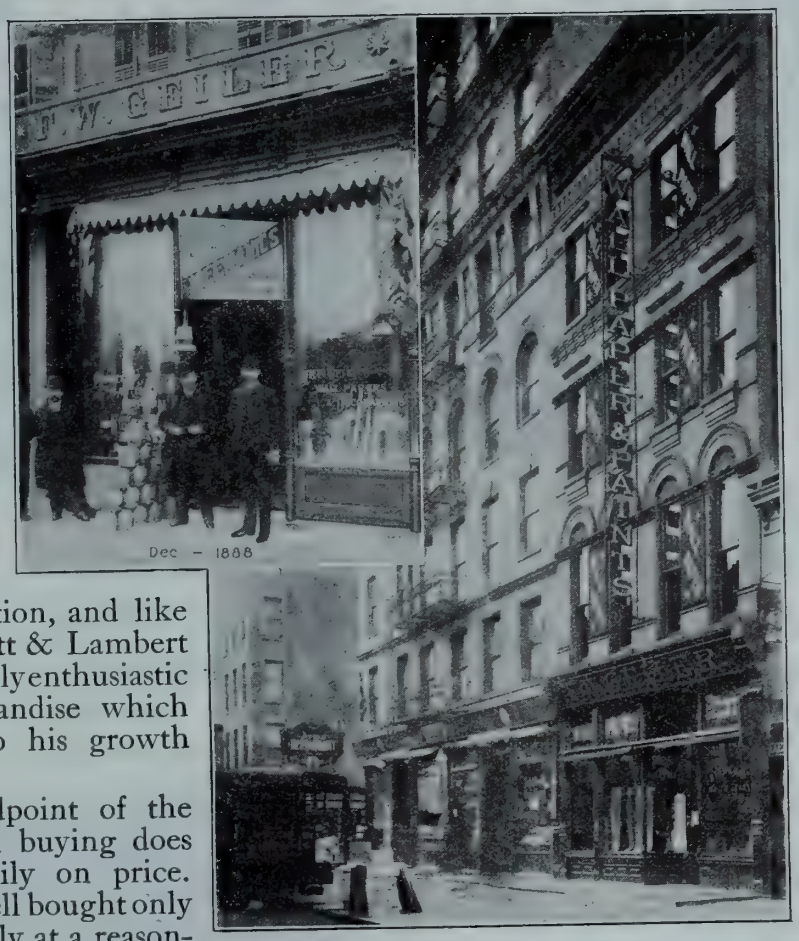
Chose Pratt & Lambert Products for "Leaders" 36 Years Ago!

THIRTY-SIX years ago, in 1886, two years before the small photo was taken, Fred W. Geiler, head of F. W. Geiler, Inc., 2340 8th Ave., New York, chose Pratt & Lambert Varnish Products as "leaders" upon which to build a substantial reputation for high-grade finishes. His success has proven the wisdom of that early selection, and like many another Pratt & Lambert dealer, he is naturally enthusiastic about the merchandise which has contributed to his growth and profits.



For 36 years on one block between 125th-126th Sts., New York

From the standpoint of the retailer, successful buying does not hinge primarily on price. Merchandise is well bought only when it sells readily at a reasonable profit.

Write *today* for particulars of the Pratt & Lambert Dealer Proposition and get some of the business which high-grade national advertising is creating for dealers.

Pratt & Lambert-Inc., 24 Courtwright Street, Bridgeburg, Ontario

A typical farm building showing effect secured after covering with Everlastic "Rubber" Roofing

Are You Ready for Spring Business?

All indications point to a record year in the sale of Barrett Roofings and Roof Repair Materials; for people are going to spend their money carefully. If they can patch the old roofs to last another season, they're going to do it. And if they have to buy new roofs they're going to demand roofing of proved dependability.

Seventy-five years' experience has given The Barrett Company, Limited, a thorough knowledge of roofing requirements. All over the Dominion, the name "Barrett" stands for honest goods at honest prices.

Better be ready — place your order now for these popular Barrett products!

Everlastic "Rubber" Roofing

The recognized standard among "rubber" roofings. Famous for its durability. Made of high grade, waterproofing materials, it defies wind, weather and time and insures dry, comfortable buildings under all weather conditions. Everlastic "Rubber" Roofing is the most popular roll roofing sold in Canada. It is tough, pliable, elastic, moderate-priced and very economical. It is so easy to lay; no skilled labor required. Comes in three weights in rolls containing 108 sq. ft. Nails and cement included in each roll.

Everlastic Multi-Shingles

Made of high grade felt thoroughly waterproofed and mineral surfaced in beautiful natural colors, either red or green. Come in strips of four shingles, and so can be laid quicker and at far less cost for labor than ordinary shingles. Produce a roof of artistic beauty worthy of the finest buildings, and one that resists fire and never needs painting.

Everlastic Liquid Roofing Cement

In a class by itself among roof repair materials. A big seller everywhere—a sure repeater.

Unequalled for resurfacing old and worn-out prepared and "rubber" roofings. Comes ready for use, is easy to apply, and forms a smooth, tough, durable surface which stubbornly resists moisture, acids, alkalies and fumes. Adds years of service to a worn-out roof at small expense.

SIMPLICITY SOUVENIR COMBINATION

GAS, COAL AND WOOD RANGE

The Stove that is a Popular seller all the year round.

Now is the time when many people will be thinking about the purchase of a combination coal, wood and gas-burning stove—are you prepared to supply their demands? The Simplicity Souvenir Combination is a popular stove with most housewives because of its beautiful finish, practicability and economy. Three fuels may be burned separately, or at the same time. Gas in summer to keep the kitchen cool and pleasant to work in, and coal or wood on chilly Spring and Fall days. The Simplicity is an all cast range, and will not rust out like steel ranges—large roomy oven, and to convert for use of different fuels just pull or push the lever—that's all—order a sample range to-day. We have a good stock on hand, and can make prompt shipments.

An Offering of High-Quality Wrenches

With every stock order of "G" and "H" purchased display boards "G" and "H" are given.

On them are shown Socket and Double End Wrenches in various styles.

They are in a class by themselves—distinctive in design, rust-proof and rubber-glass finished.

Let us quote you prices.

Manufactured by

The Gray Ball Bearing Co.
Limited
686 St. Clarens Ave., Toronto

The H. L. PERRY CO., Ltd.
WINNIPEG - CALGARY

STORAGE
DISTRIBUTING AND FORWARDING

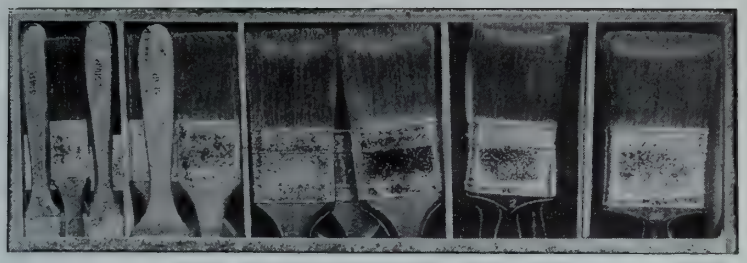
Combined with a
COMMISSION DEPARTMENT
and a competent Sales Staff.

STRATFORD Ironing Boards
and other Wood Products

Selected Basswood tops and hardwood legs. Strong and durable, giving years of hard service. They make satisfied housewives who show their satisfaction in purchases of other lines you carry.

We also manufacture Ladders, Meat, Bake, and Bread Boards, Clothes Bars, etc. Send for complete Catalogue "D" of wood manufactured products.

The Stratford Manufacturing Co., Limited
Stratford, Ontario



How They Do Sell!

Four Dozen Assorted Varnish Brushes in a Compartment Display Box

Show this attractive display box, holding four dozen household Varnish Brushes in assorted sizes, on your paint counter and watch it make sales. It's a smart-looking box your customers can't help looking at and be reminded they need a brush for a job at home, and this illustrates only one of our practical ideas to help you increase your brush sales.

Get started as the BRUSH HEADQUARTERS with the CANADA BRUSH LINE, and incidentally begin building up trade for dependable brushes thru the new customers that are always on the lookout for brushes that give satisfaction.

Canada Brushes are not only good quality for your customers, but a tangible force that is always working for you.

Why Hardware Mailing Lists Are Not Complete

WE ARE frequently asked why many of the so-called complete hardware mailing lists are incomplete and miss many hundreds of the best hardware stores in Canada. There is a reason.

If you take a complete list of the hardware firms rated in Dun's and Bradstreet's as hardware firms, you will be short upwards of 900 of the best hardware firms in Canada. This is due to the fact that upwards of 900 of the leading hardware stores in Canada, are the hardware sections of department or general stores. There is nothing in the commercial rating books to indicate which of the many thousands of department or general stores have hardware sections. For instance, in one Western Canada town there are four general stores and one exclusive hardware store. One of the general stores has a strictly modern hardware section. The only way in which you can find out which one of the four stores has this department, is to visit the town and call on all stores. The same condition exists in hundreds of other places in Canada. The cost of doing this for one mailing list or one publication would be absolutely prohibitive. The MacLean Publishing Company, however, have fifteen publications, and send crews of salaried circulation men into every city, town and hamlet in the Dominion from Coast to Coast. Representing fifteen publications these men call on practically every business man in a town or city. The MacLean Publishing Company have been working on this plan for upwards of 30 years. The result is that to-day HARDWARE AND METAL has as paid subscribers, in addition to exclusive hardware stores, upwards of 900 of these strictly modern, up-to-date hardware sections and very few of these names are on mailing lists, with the exception of the list used to mail out our paper.

Another important point is that on our mailing list several hundred copies go addressed personally to the men in charge of the buying. Circulars sent from the average mailing lists merely go to a firm name along with a large quantity of other circular matter and is somewhat of a hit or miss proposition. With HARDWARE AND METAL there are hundreds of cases where the name of the buyer also appears along with the company address.

Subscribers to HARDWARE AND METAL buy our paper because they need it in their business and because they study it each week for news

of the trade, new goods, market information and for additional information regarding goods which the merchants are carrying in stock. Several hundred merchants prepare their advertising in their local papers, from information which they take out of the advertisements in HARDWARE AND METAL. Window trimmers in hardware stores study HARDWARE AND METAL for ideas on seasonable goods which they can display in the show windows. The men behind the counter are among the closest readers of HARDWARE AND METAL because in it they find a vast amount of information regarding goods which they are called upon to sell each day. Dozens of leading jobbers' salesmen carry copies of the current issue of HARDWARE AND METAL along with their catalogs and go through these issues with their customers. One of the leading wholesale buyers, (name on request), stated that he "much preferred to buy lines advertised in HARDWARE AND METAL because he found that these lines were the quickest sellers and were the lines in which the travellers took the greatest interest."

It is therefore of the utmost importance that any advertising matter you wish to place before the trade, should reach as many of these hardware men as possible. It is an easy matter to claim that you cover the whole hardware trade but HARDWARE AND METAL knows from thirty-three years' experience that it takes many years of honest, intelligent effort to get a complete list of the hardware buyers in Canada. A large staff is also required to keep lists up to date, record business changes, new firms, etc. We offer you the most complete list through the advertising pages of HARDWARE AND METAL.

The hardware trade is undergoing rapid changes. With each succeeding year come new developments. It is our business to keep in close touch with the trade. We have a vast amount of information on almost every imaginable phase of the hardware trade. You may think your line is one that cannot be advertised. We may think differently. It will cost you nothing to secure our views. Drop us a line and our representative will call, or if you prefer it, we will, after making an investigation of the possibilities of advertising your lines, submit our proposition in writing.

HARDWARE & METAL

Office of Publication

143-153 University Avenue : Toronto, Canada

Hardware and Metal Circulation Dominates in Western Canada Because:—

Hardware and Metal is the *only* hardware paper giving a weekly market service from Winnipeg.

Hardware and Metal is the *only* hardware paper giving a weekly news section for Western Canada.

Hardware and Metal is the *only* hardware publication giving the trade in Western Canada a weekly market service from Montreal, Toronto, Hamilton, London and Pittsburgh —and Westerners are even more interested than any others in the activities in the primary markets of the East.

Hardware and Metal is the *only* publication in Canada giving the Western hardware trade a weekly service covering the activities of the hardware trade in a National way.

Hardware and Metal is the *only* hardware publication giving the Western Canada trade a weekly market service on paints, oils, varnishes, etc.

Hardware and Metal is the *only* hardware publication giving the trade any Western Canada weekly information regarding, "What Other Merchants Are Doing," Legislation, New Hardware Goods, Illustrated Articles on Display, Advertising, Etc.

Hardware and Metal during the twelve months of the year, supplies the Western Canada hardware trade with more market information, more new goods information, publishes more illustrations of window displays, store interiors, and retailers' advertisements than all the other Canadian hardware trade publications combined.

Incidentally, Hardware and Metal is the *only* hardware trade publication in Canada that will supply you with an Audit Bureau of Circulations statement, thus proving what it really has in the way of circulation in Western Canada.

MORAL—*If you are interested in Western Canada trade, advertise in the paper that is read by the Westerners and has gained its present dominating position in the West, as well as in other parts of Canada through 34 years of honest effort to give the trade each week the best in hardware trade newspaper service.*

There are many reasons why Hardware and Metal covers Western Canada as thoroughly

HARDWARE AND METAL

"Canada's National Hardware Weekly"

143 University Avenue, Toronto, Canada

Montreal Branch, Southam Building **Winnipeg Branch, Confederation Life Building**

Published every Saturday since 1888. The only weekly hardware paper in Canada and the only hardware paper in Canada that gives you a circulation statement audited by the Audit Bureau of Circulations.

ORDERS

IS the machinery you have been using for the past 3 or 4 years to get orders—is it getting rusty?

Are you satisfied you have the harmony in your organization that you should have?

Do you feel that your salesmen are fighting every inch of the way for business and as happy in their work as you would like to see them?

Is there the proper co-operative fighting spirit?

The Fault May be Yours?

Your salesmen, and wholesalers who help sell your goods, have a right to expect co-operation. They have a right to expect that the house they are selling for really believes that good business is to be secured. They have a right to question if the whole responsibility of selling should be placed on them. Advertising is the strongest co-operation you can give them to show that you believe in your business. Powerful copy consistently running in your dealers' specialized business paper, will stimulate dealers' interest in your goods; will encourage the salesman in his work; will help to make him a fighter, —and to sell more goods. And you know when you can get the influence of the progressive dealer behind your goods you have the biggest merchandising force in the country working for you.

Let HARDWARE AND METAL help you get the fighting spirit in your sales organization and help you line up 4,000 progressive merchants behind your goods.

THE PROGRESSIVE MANUFACTURING CO.

Torrington, Conn., U. S. A.

FORSTNER BITS

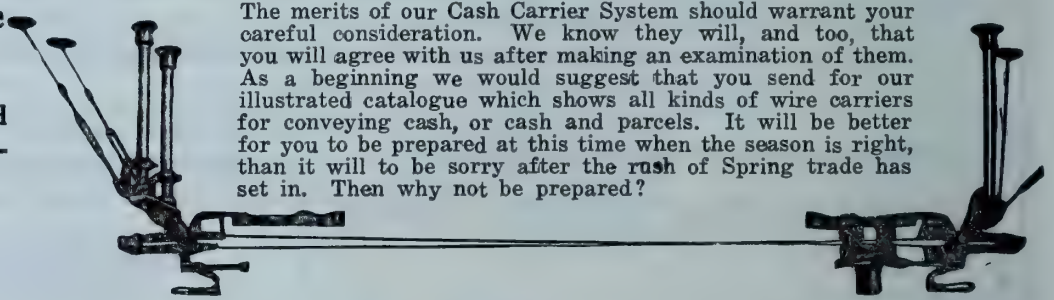
bore their way right through tough, hard, knotty, cross-grained wood and leave a smooth hole and clean surface. That's performance. THEY DIFFER FROM ALL OTHER BITS, BEING GUIDED BY THE RIM INSTEAD OF THE CENTRE. That's scientific construction. They bore any arc of a circle and can be guided in any direction. That's adaptability.
Made for Brace-made Machines. Packed singly; packed in sets. That's convenience. And they sell to Wood Workers, Carpenters, Cabinet Makers and others. That's why you should sell them. Order through your jobber to-day.

Why Not Have a Double Check on all Sales?

All kinds of Wire Cash and Parcel Carriers and Pneumatic Tubes.

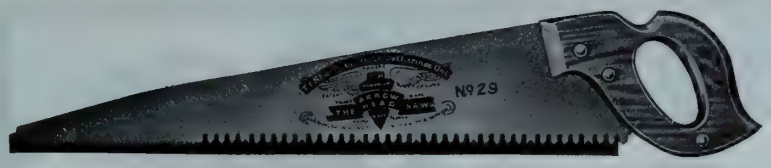
Gipe-Hazard Store Service Co., Limited

113 SUMACH ST., TORONTO, ONT.



The merits of our Cash Carrier System should warrant your careful consideration. We know they will, and too, that you will agree with us after making an examination of them. As a beginning we would suggest that you send for our illustrated catalogue which shows all kinds of wire carriers for conveying cash, or cash and parcels. It will be better for you to be prepared at this time when the season is right, than it will to be sorry after the rush of Spring trade has set in. Then why not be prepared?

Subscription price of HARDWARE and METAL is $4.00 per year or less than eight cents per issue.



No. 29 Arrow Head

We have a complete line of Pruning Saws. Here are two of them. Is your stock in shape for spring business? Our line will complete it. Our new catalogue is yours for the asking.

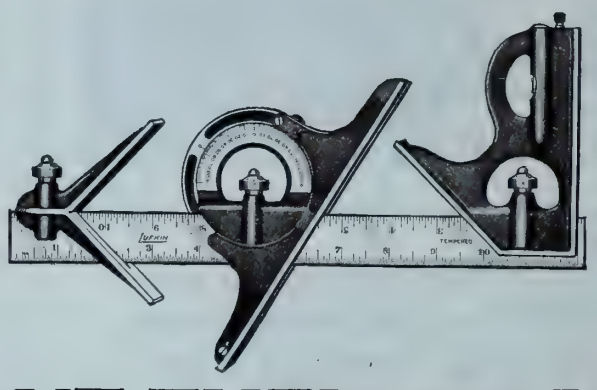
LUFKIN

COMBINATION SQUARES



LUFKIN

BEVEL PROTRACTORS
COMBINATION SETS

JUST PUT THEM ON DISPLAY

At a glance every mechanic's eye will be caught by their nicety of design and finish, and their distinctive color.

On closer inspection he will see among other improvements that both legs of center head are exactly same length and ends formed, insuring accuracy on any circumference, large or small. That the double protractor is readily convertible into single protractor, serving perfectly for every sort of work.

SEND FOR CATALOGUE

LUFKIN

MECHANICS' TOOLS

COMBINATION SQUARES, STEEL SCALES, HOOK SCALES, DEPTH GAGES, THICKNESS GAGES, CENTER GAGES, STEEL REFERENCE TABLES, FOLDING STEEL RULES, THE "UNIVERSAL" TRY AND MITRE SQUARES FOR WOODWORKERS (with and without level).

THE LUFKIN RULE CO. OF CANADA, LTD.
WINDSOR ONT.

BISSELL'S SWEEPERS

are essentially SWEEPERS, not CLEANERS, and are an every day necessity. Bissell's have "Cyco" Ball Bearings, 46 years of reputation and a universal consumer acceptance. They sell AT A PROFIT. And so do Bissell Toy Sweepers.

The unusual, dignified and strong color scheme of this display, centered with a pastel reproduction of an "irresistible" woman's head by Gene Pressler, quite warrants the name we have given it. The background panels are in pleasing grays, ranging from very dark to light, set off with very soft tintings at the top and bottom and full color in the oval and on the sweeper. It is an eight color lithographic job on heavy cardboard—forty inches wide by thirty inches high.

The Spring Offer

features a window display that is very different and distinctive in design. It will draw eyes to your window. Offered with factory shipments of a dozen or more sweepers ordered either direct or through your jobber.

You Cannot Get Away From Figures

There never was a more true statement than the one "Figures Talk". They tell the story. They indicate the preference of the majority.

Draw your own conclusions from these figures. In 1921 our Canadian premiums written amounted to $128,000.00. In the first **Three Months** of 1922 our Canadian Premiums written amounted to over **$80,000.00.** This enormous increase means that we have had the confidence of the hardware trade.

The vital question is—are you with the crowd that is buying its fire insurance protection at one half the Board Companies rates.

Our surplus of $2,000,000.00 provides **SAFETY**

Our selected risks, low expense and low loss ratios provide **50% SAVING**

Our organization provides **SERVICE**

What Columbias Do

—ring doorbells
—buzz buzzers
—provide ignition for Fords when starting.
—fire blasts.
—run toys.
—make telephones talk up.
—furnish ignition for gas engines.

Long life, high ignition power, low cost, all make Columbias the favorite Dry Cell in thousands of homes, on farms, and for industrial uses.

Your customers will appreciate the longer service which only Columbias give. This long life reduces the cost of ignition. The simplicity of Columbias enables any person to make the simple connections which bring the full power of Columbias into action.

Columbias are the only dry batteries consistently advertised on a nation-wide scale.

Order Columbias by name from your Jobber.

Good Points to Use When Selling Puritan Oil Stoves

We are now advertising Puritan Oil Stoves in a national way in Magazines that go into homes in every province of the Dominion. These advertisements are appearing in March, April, May, June and July—the best months for oil stove advertising. Get your name up as a Puritan man. It's a great stove and has a wealth of selling arguments that makes selling easy. Here they are. Read them over.

PURITAN OIL STOVES

Talk These Selling Points

1. Reversible oil container.
2. Solid brass burner.
3. Perfect wick control.
4. Feed pipe is tinned inside and out.
5. Can set wick at different points, such as low, medium and high.
6. Permanent oil level (that is, oil in the burner is always the one height corresponding with the height of the oil in the lower oil container.)
7. Does not affect stove to be out of level. One end can be three inches higher than the other. With a wickless stove the oil will overflow out of the shallow burners, if stove is not absolutely level.
8. You can light and burn the stove without changing the height of the wick.
9. The Puritan Oil Stove is the only short burner stove on the market that will not creep.
10. Burners are comparatively cool while in use therefore increasing the life.
11. Children cannot do any harm by turning the wick.
12. Easy to clean under burners—any food which happens to boil over does not go on the floor on account of the base part under the burner being rounded out.

When you think of profit, think of Puritan. It's a mighty good line. Talk to our traveller or write us direct.

To Stimulate Sales Offer "Canada"

Flexible Steel Door Hangers

Offer opportunities for your customers to procure Reliable Flexible Steel Door Hangers. Be the magnet of your district for drawing the best custom, by displaying and offering the "Canada."

It runs smoothly and easily on anti-friction steel roller bearings. It uses the same track as our famous "National" Hangers.

The Braced Rail, shown in the illustration here, is ¼ x 3-16 inches and is furnished in lengths of 4, 6, 8 and 10 feet; 8 lengths to the bundle.

The sales for garage requirements and other hardware necessities is expected to be as brisk as ever this year. Therefore receive and hold this profitable custom by offering Canada Steel Goods Company products.

The "Canada" comes neatly and conveniently packed, one pair in a box complete with bolts. Be sure to include "Canada" in your order.

Send for a Catalog, which gives detailed information.

People Need *DECORATIVE BURLAPS*

Can You Meet Their Needs?

Just as people need paint, wallpaper, varnish, etc., just to the same extent—sometimes more so—do they need Decorative Wall Burlaps. And for the following reasons:

They Make Homes Comfortable.
They Make Walls Attractive.
They are Convenient to Handle; Easy to Apply.
They are of Moderate Cost.
There is a Size to meet Every Need.

The Best Place to Carry Decorative Wall Burlaps is in the Paint Department.

Buy half a dozen rolls—it won't take much capital—and display them with your regular paint specialties. Get in touch with your local painter and tell him how it will pay him to push this line himself, for each customer will want him to decorate with Burlap when special room color schemes are decided upon.

Rolls 30 and 60 Yds. Long
Widths 30, 36, 45, 54, 60, 72, 90 inches
Shades Oil-Coated Drab, Green, White.

WAYAGAMACK PURE KRAFT

Has No Rival.

Because of its strength a light-weight sheet gives as much service as inferior grades of wrapping paper twice the weight.

Therefore it is the most economical paper for wrapping purposes.

Whether used in the form of bags, envelopes, notion bags and paper containers of all descriptions or simply as a wrapping paper, it will give more satisfaction than any other paper used for the same purpose.

Its appearance is so attractive that it acts as a standing advertisement for the merchant who uses it.

Wayagamack Pure Kraft.

which means

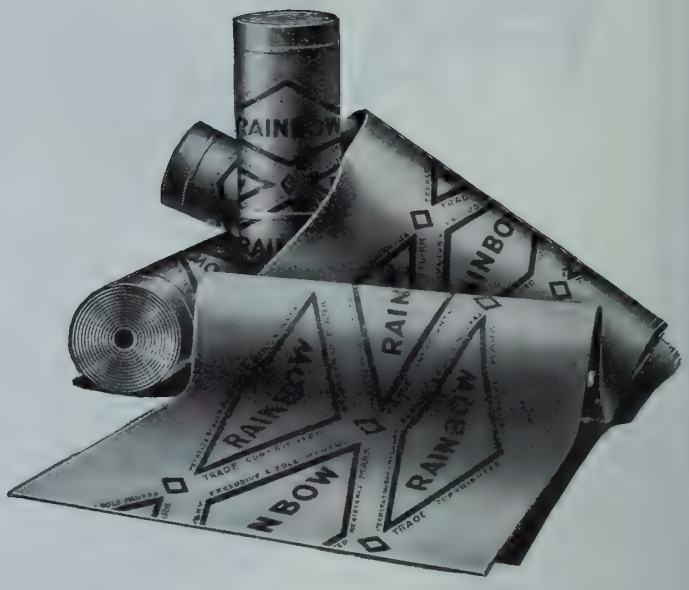
RAINBOW
TRADE MARK

on

This Packing--



Steam engineers who value properly packed flanges, that won't squeeze or blow out, specify

Rainbow

the original

Red Sheet Packing

To them, PACKING means RAINBOW. For over thirty years, its use has been a custom that has rapidly become a habit.

Hardware dealers gain the confidence of practical men by supplying RAINBOW on all orders for Packing. And, there's satisfaction selling goods that stay sold. Substitution never gives you this assurance. There's only one genuine Rainbow Red Sheet Packing—identified by the diamond shaped trade mark stamped on every yard of it.

RAINBOW is a profitable, easy-selling staple, convenient to stock and handle.

Write our nearest service branch for Rainbow Packing catalogue.

Now's The Time To Talk Fence

PRETTY soon now the farmer will be turning his animals into the pasture fields. And he is wondering just about now whether the old fences will stand up!

While his mind is on the subject why not talk Frost fence to him! Don't wait for him to broach the subject. Go after him! Sell him!

It's no trouble at all to show him that he saves money in the end if he chooses Frost Fence—cheapest to put up, cheapest to maintain.

Nothing makes permanent friends for your store more surely than fence that makes the farmer feel good every time he looks at it. Frost Fence is the neatest, tidiest, tightest and most dependable fence money can buy, as you know--so why not ask the farmer how his fences are standing up—then sell him!

The famous Frost Hold-Tigh Lock keeps Frost Fence trim and tidy. The extra heavily galvanized wire stands up years after ordinary fences are down!

Selling On Sight

It is a well established fact in selling that a buyer will purchase a counter displayed article when he will not ask for that article if it is tucked away out of sight.

Out of sight, out of mind, holds true in the sale of thermometers.

Tycos and *Taylor* Thermometers are supplied in attractive counter cartons.

The counter display also links up with the consistent, persistent advertising.

Seeing *Tycos* in the window or on the counter is like meeting an old friend.

Our latest catalog does more than illustrate and describe *Tycos* and *Taylor* Thermometers. It tells you how to sell them most profitably.

Catalogs sent cheerfully.

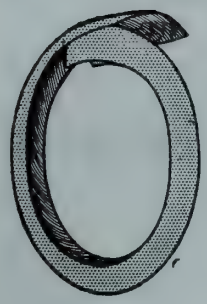
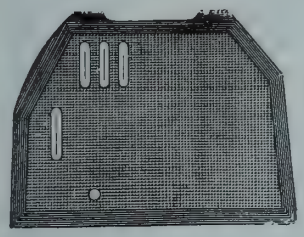
A Paying Quartette

For Accessory Departments

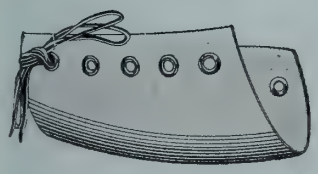


GUTTA PERCHA ACCESSORIES

Reliners. These handy reliners are needed in every tourist's kit; consequently, you'll find many sales for them. When an old casing is about to shoot a blow-out, "Gutta Percha" Reliners postpone the evil hour. These should never be used in a new casing.



Wind and Heat Proof Mats (for Fords). These patented mats prevent the entrance of heat from the engine or dust from below. They enjoy good all-the-year-'round sales.



Lace-on Boots. Point out to your customers the advantage of slipping on this reliable boot in emergencies. Many a driver discovers, when miles from home, a soft spot in the casing that makes further travel unsafe. At such times, he is very thankful to have a "Gutta Percha" Lace-on Boot at hand. The merchant shares in this good-will and profits in future sales.

Sealtite Patches for Tube repairs. Your customers won't motor without Sealtite Patches after you show them the advantages. Sealtite Patches repair punctures in a jiffy. They make sales, too, with gratifying speed.

A B C "ALCO" $110 RETAIL PRICE

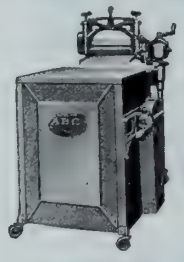
The Best Dolly-Type Washers are A B C's

You will always find a market for low-priced washers of fine quality, and you can get this business with A B C **Alco's. Four models:** No. 51, single tub, engine drive, $72; No. 52, double tub, engine drive, $100; No. 51-E, single tub, 1/4 h. p. motor (as above illustrated), $110; No. 52-E, double tub, 1/4 h. p. motor, $138. Liberal discounts.

Thirteenth year! 1 1/4 inch cypress tubs, quiet underneath drive, swinging power-driven wringers, heavy angle-iron frames, peg or disc-dollies. Good, sturdy, simple washers that stand up splendidly and satisfy your customers.

The A B C Line is Complete!

To prospects interested in a rocking-tub type of washer, you can sell the A B C **Oscillator** at $135. Has a heavy gauge copper tub, swinging electric wringer, handsome cabinet, quiet springless mechanism. Model 80-E.



The Oscillator

It is the first high quality washer of this type and size, bearing a famous maker's name, that has been sold at anywhere near so low a price as $135.

To the rest of your prospects, sell **A B C Super Electrics.** Five models: No. 60, semi-cabinet, galv. tub., engine drive, $127; No. 60-E, semi-cabinet, galv. tub. ¼ h.p. motor, $155; No. 61-E, semi-cabinet, copper tub, ¼ h.p. motor, $180; No. 65-E, full cabinet, galv. tub, metal wringer, ¼ h.p. motor, $170; No. 66-E, full cabinet, copper tub, metal wringer, ¼ h.p. motor, $200.

An opportunity to **concentrate** all your selling efforts in washers upon one famous make—to increase your profits—to reduce your overhead and sales costs—to simplify your correspondence, your ordering, your service and your bookkeeping—to combine your shipments and get maximum discounts—that is what you are offered in the **complete** A B C line.

For there is now an A B C—each one the best in its class—with which to sell **practically every type of prospect.** And every A B C bears the guarantee of the big pioneer firm of Altorfer Bros. Company—a company known nationally for its reliability and integrity. Today! Get full particulars concerning the A B C proposition, whether interested in the whole line or in any of its components. Liberal discounts! Real co-operation! Exclusive dealerships! Address any of the undersigned.

The Imperial Polarine Sales Rack holds a complete stock of Imperial Polarine Motor Oils in the well known Litho-sealed cans. It stands seven feet high, is 12 in. deep and five feet wide (only occupies about 5 square feet of floor space). Rack is double-faced for convenient display in aisle or window and oil can be taken out from either side.

This rack is constructed of good quality steel and painted in royal blue. It is lettered on both sides calling attention to the Imperial Chart of Recommendations which specifies the grade of Imperial Polarine Oil or Grease for every make of car and truck.

Rack is shipped to you assembled, ready to install in your store. It is built to last for years and give good service.

A Salesman who asks No Pay

The Imperial Polarine Sales Rack provides a central display for Imperial Polarine Motor Oils.

It automatically makes sales for you while customers are waiting to be served.

It saves time in making sales and filling orders by having stock always conveniently at hand.

It enables you to guarantee better satisfaction to your customers by selling them the proper grade of Imperial Polarine Motor Oils exactly as recommended on the Imperial Charts which are prominently displayed on each rack.

Picture This Rack Standing in Your Store.—Think of the many advantages of having such a clean, neat display of oil always confronting your customers. Ask the Imperial Oil Salesman or write to our nearest branch for details regarding our special offer on this rack.

A Spramotor in the Hand is Worth Two in the Factory

You wouldn't find a hardwareman so neglectful as to be without a spade or rake in stock —there's too much demand for them.

Yet—there is a garden and farm implement every bit as much in demand, that some hardwaremen don't keep in stock—or don't offer to send away for for their customers—that's the

Spramotor

It isn't a SPRAMOTOR unless we made it

Every grower of fruit and vegetables has a need each year for the Spramotor. The Spramotor way is the only effective way to spray—the farmer has had that told him by his farm papers for years, and he has the word of his fellow farmer to back it.

Every farmer and gardener sprays — more and more each year are spraying the right way—the Spramotor way—and it is up to you, Mr. Hardwareman, to see that you get in on the profit of the Spramotors sold in your district.

We have an attractive agency proposition for the livest men in many districts.

Write to-day.

"JARDINE"

Horseshoeing Foot Vise and Boltheader

Made in Canada

The Foot Vise has tempered, crucible steel anvil, bevelled at one end, square at the other, for square and bevelled calks. The back jaw is self-adjusting to the back of shoe. Jaw 6" wide.

For Bolt Heading

Pressure on the treadle operates a short, stiff arm (not shown in illustration) opposite the pivot of the swinging side of machine. This closes the dies of Bolt Header as firmly as a vise. When pressure is removed from treadle the bolt is free to be taken out to square the head while hot.

We make a full line of Blacksmith's Tools. Why not send for catalogue No. 18.

Good Tools ——— make Better Sales

YOUR customers will appreciate the good points of Williams' Superior Drop-forged Nail Hammers, for they mean efficient service.

Their heads are hard, dense and tough. The special split and pitch of the claws give a fast, powerful draw; nails can be drawn **point** first. The tapered eye and special wedges anchor the handle permanently. Its flared grip prevents all hand-slip. Their perfect balance assures increased striking power.

One good tool sells another and Williams' Hammers—made in Canada—will help to move other lines. All patterns and sizes. Catalog on request.

HERE'S THE MOST DURABLE SMOKE-STACK on the MARKET

It's welded copper steel with no lap seams for water, fumes or dirt to lodge in and rust it out. No lapped and riveted joints to give way under corrosion.

Each section is rolled so the two edges meet and then is welded or fused into one piece. The sections are similarly welded end to end, making a smooth, clean job from end to end inside and out.

Then the whole is given a thorough coating of a special oil to prevent corrosion. This oil film is water-proof, fume-proof, acid-proof, brine-proof and gas-proof. Toughens with age but always flexible.

This is the stack you want

STAR Hack Saws

Proven Values

It is the part of wisdom, right now, when every customer is looking closely into values, to stick to goods of proven value.

It is no time to take chances on goods of doubtful or unknown reputation, just because they offer a few cents more profit—IF, and it's a big "if" they sell.

That's why so many dealers find it good business to stick to Star Hack Saws, and stock as few other brands as possible.

Star Saws are now sold direct from the factory at Middletown, New York, where they have been manufactured for 38 years.

MAPLE SYRUP

time is here!

Housewives are now getting in their supplies of fresh maple syrup. They will want Syrup Pitchers for table use, and pitchers so constructed to prevent the syrup dripping.

The illustration hardly does justice to the VIKO Syrup Pitcher, it is so beautifully finished. It will make a welcome addition to the table, and the spring in the handle keeps the lid securely down, except when in actual use. The capacity is a pint.

This member of the VIKO family is a sure seller, and we have ample stocks on hand for immediate delivery.

Send your order in now.

ONE WAY OF BUYING THAT DOESN'T PAY

The time is past for buying fencing on a hand-to-mouth basis. Your customers are making up their minds to buy and they don't like to be kept waiting. If you haven't the stock on hand to supply their requirements they are very apt to buy across the street.

The recent demand for Peerless Fence has been heavy enough to reduce our stocks of several styles to a low point. This may possibly mean some delay in shipping.

For this reason don't put off ordering Peerless Fence until the last minute. Anticipate your customer's demands. It will give you a reputation for quick service that will build business.

Because Peerless Poultry Fence comes in all heights from 2 to 8 feet you can supply all requirements. Poultry raisers are making good profits and are buying supplies. You should be ready for their business.

May be the Turning Point in Steel

First Advances on Iron and Steel in Primary Centres for Fifteen Months—Canadian Wholesalers Show Disposition to Lay in Stocks—Strength This Week of Steel Shares on Stock Markets Said to be Significant—Shading of Prices Practically Eliminated

STEEL PRICES have reflected considerable strengthening during recent weeks and this condition has now reached the stage where some advances in the primary centres have developed. Whether this condition will be reflected in the domestic markets is dependable upon the extent to which the new levels are adopted, but one significant fact brought into prominence in this connection is the relief from continual recessions from the nominal market levels. As a matter of fact, price shading has now almost disappeared from the domestic centres on bar steel products, and also sheets, this being attributed to the improvement generally noted in practically all phases of the industry.

One indication of strength in the domestic steel markets is the fact that wholesalers are preparing to renew stocks of bar products, a condition which steel companies state has not existed for a period of months. Producers are apparently not over anxious to sell extensively at prevailing levels, preferring to await the future primary market price trends, in order to be in a position to take advantage of any higher levels which may develop.

The strength of the steel shares on the stock markets during this week has also been pointed out by one authority as an indication of improving conditions among producers and usually an indication of strengthening demand with firmer prices.

Progress in both production and consumption looked for during the earlier months of the year, is now developing, and the current situation is described as one of the possible turning points for steel producers generally. All the barometers by which the industry as a whole is gauged now record signs of improvement, with a wider distribution of steel being looked upon as an indication of growing activity among the users of basic materials.

Firmer Market Levels

The stiffening in mill products has reached the stage where the nominal market level is more evenly maintained, concessions being less evident and only obtainable on particularly desirable orders. Bars and shapes reflect this upward tendency, but domestic quotations remain unchanged, pending developments at other primary sources. On the other hand, the price trend in sheets has resulted in heavy bookings, and it is stated in some quarters that the threat of higher quotations was made in order to produce business which would increase the production and keep the mills operating at a higher capacity. Thus, in many cases, buyers are well covered for the second quarter at recent levels.

The termination of old contracts enabled producers to adopt the present policy on fresh commitments. One domestic sheet producer expressed the opinion to Hardware and Metal that the advance in sheet prices was more or less warranted under these circumstances, but it was also pointed out that it may take some time before the revised levels become uniformly accepted. Once in existence, however, the increased demand for these products, which is usually well stimulated throughout the summer months, may result in their maintenance during that period.

Warn Against Rapid Rise

Reports recently received from Pittsburg mills would indicate that while many have not yet made public announcements of the fact, practically all are determined to follow the advances noted on the recent markets. Aside, however, from any movement towards higher prices, which are still considered as more or less in abeyance, the marked activity accrued by the adoption of these methods has reflected a firmer tone in many branches of the industry. Pig iron producers now reflect a more stable attitude and there is a general disposition to seek higher price levels. Also among wire products a firmer tendency is in evidence.

In other quarters rumors of advancing prices have resulted in a warning note being sounded against the danger of too rapid an increase, although the possibilities in this direction do not appear to be immediate. The chief consideration with both producers and consumers of steel is whether there will be sufficient buying to sustain any advanced price levels, in view of the large amount of business booked at the lower quotations. Jobbers are now supplied for three, and in some cases, four months, but generally speaking manufacturing consumers have only purchased that far ahead in special cases, such as where conditions such as applying to galvanized sheets exist.

Basic Price Tendencies

A review of the recent price trend shows that the prevailing rise on the primary markets is the initial change of this kind since July, 1920. Price developments during the past fifteen months have been in the nature of reductions, and the recent levels were lower on the average

(Continued on page 58)

Trend of Iron and Steel Base Prices on Domestic Markets

	August 1914	High Level	Jan. 1 1922	Present Price

Hardware Trade Observe Regulations

Annual Report of Explosives Division Shows 125 Cities and Towns Inspected During Year—Only Four Cases Have Been Subject to Court Proceedings—Deal With Composition of Imported Fireworks

OTTAWA.—The annual report of the Explosives Division of the federal Department of Mines, is just to hand. Discussing this report and the affairs of the division in general, with Hardware and Metal, Col. G. Ogilvie, in charge of the division, said he had every reason to feel satisfied with the manner in which hardware and sporting goods merchants throughout Canada were observing the regulations.

This commendation is well borne out in the following portion of the report dealing with the keeping of explosives in unlicensed premises:—

"In the course of the year, 125 cities and towns have been visited, and opportunities taken of inspecting certain representative stores, as well as of discussing with officials of various municipalities, questions relating to the conditions of storage.

"Systematic inspections have been made by Royal Canadian Mounted Police of over 1,500 premises containing explosives; two visits, on the average, having been paid to each.

"In this way, the requirements of the regulations have been brought directly to the attention of dealers in all parts of the country, with the possible exception of those in certain sections of the provinces of Quebec and Ontario.

Four Cases of Violation

"It is very satisfactory to note that almost invariably the instructions given on the first visit, in regard to the manner of storing explosives and of keeping records of receipts and issues, have been found, on the second inspection, to have been complied with, and only in four cases has it been found necessary to take proceedings aaginst persons for violation of the regulations governing the keeping of explosives in unlicensed premises—a testimony alike to the general appreciation of the value to the public safety of observing the precautionary measures called for, and to the manner in which these regulations are being explained and brought into effect by the members of the Royal Canadian Mounted Police."

Touching on the subject of fireworks the report says:—"The difficulty experienced in obtaining satisfactory declarations of the composition and description of fireworks made in China, referred to in the last report, has been largely overcome by the co-operation kindly given by officers of the Hong Kong government in explaining our requirements to the dealers there, and by the appreciation of these requirements by the Customs brokers in Canada, who have acted on behalf of the Chinese importers. It has thus been made possible to admit a large variety of Chinese fireworks, while ensuring the exclusion of those of a dangerous character which had formerly been freely retailed."

Causes of Prosecution

The causes for which prosecutions were instituted during the year should serve as a general warning to the trade and all interested in the keeping and distribution of explosives. They are as follows:—

Manufacturing an unauthorized explosive—1 case.

Exceeding the maximum quantity of explosive to be kept in certain factory buildings as prescribed in the license—2 cases.

Keeping unauthorized utensils in a magazine—1 case.

Keeping explosives otherwise than in the manner prescribed for such keeping in unlicensed premises—3 cases.

Failing to keep records of receipts and issues—3 cases.

RED ARROW TIRES TO ABSORB REGAL

Montreal—At a meeting of the shareholders of the Regal Tire & Rubber Company, the company's absorption by the Red Arrow Tires of Quebec, Limited, was duly approved. The meeting was presided over by D. O. E. Denault, president of the Regal Tire & Rubber Company.

J. J. Turner, president of the Red Arrow Tires, Limited, of Peterborough, Ontario, outlined the series of events which has led up to the present meeting. Remarks were also made by Messrs. C. H. Walters, general manager of the company, and by George A. Gillespie, vice-president.

Canada's Glass Imports Show Sharp Decrease

Were Little More Than Half Their Value in 1920, Although Slightly Above Total for 1919—Belgium Again Replaces United States Market

THE statement of Canada's plate and window glass importation during last year, as compared with 1919 and 1920, is unusually interesting, and is significant in two respects. To have fallen off to little more than one-half the value of the year previous is the outstanding feature, while the gain of the Belgian market over that of the United States attracts attention.

Whereas in 1919 the United States shipped approximately 90 per cent of Canada's imports of window glass and 57 per cent in 1920, in 1921 its share was less than 10 per cent of the year's much diminished total. To American manufacturers this means almost a complete loss of its standing in this trade during the two years previous, and brings Belgium well to the front. Import figures from the latter field show that its share of Canada's trade in common window glass has increased from 5 per cent in 1919 to 37 per cent in 1920 and 84 per cent in 1921. The same can also be said of plate glass.

Following is quantity statement of imports:

Canada's imports of plate and window glass, by quantities

Articles and countries of origin—	Square feet			Per cent. of Total		
	1919	1920	1921	1919	1920	1921

A "Spring Opening" for Easter Season

District Business Men's Association of Danforth Avenue, Toronto, Hold Special "Spring Opening" in Developing Trade up Until Easter Season—Many Lines of Household Hardware Effectively Advertised

LIKE the creative and gladsome spirit of spring which pervaders the atmosphere and with the fresh exuberance of the season injected into all phases of business activity, retail hardware merchants situated in the Danforth district of Toronto, entered whole-heartedly and successfully this week into what is fittingly described as the Annual "Spring Opening."

Commencing April 1, a period of ten days is being devoted to furthering the trade ambitions of the season through both collective and individual efforts coordinated in the Danforth District Business Men's Association, and directed by the responsive channels of the retail stores. "Boost your own district," is one of the slogans animating the organization to fresh records of accomplishment in launching and directing the present spring drive, and in making this appeal to local pride, the merchants have touched upon a psychological basis for common success.

Visits paid by Hardware and Metal representatives to the district revealed the stores and vicinity keenly alive with both the curious and interested. New merchandise contained a direct appeal to young and old, male and female, the hardware stores offering a full share in this respect. Many novel methods of attracting attention were utilized by the merchants, and special significance was given to seasonal goods in preparation for the anticipated Easter buying activity. A number of merchants arranged "specials," in seasonable needs, these efforts on the part of the hardwaremen being chiefly confined to household products, or the many lines required by those engaged in construction work.

The use of district slogans and advertising matter stimulated the direct interest of local residents, in addition to giving the suburb general publicity. "It costs less on Danforth," and "Toronto's great shopping centre," were phrases used by the merchants in suitable decorative effect.

Hardware merchants have been particularly active in the spring opening campaign, both individually and as a group. Tasteful window decorations, displays of seasonable goods, special sales activities, forceful methods of advertising, and untiring efforts, all culminated in a uniquely successful business drive in every sense of the word. Great interest in the movement was aroused throughout this particular city suburb, and all classes of merchants linked together in the association, report material benefit through the campaign.

One of a Series of Campaigns

In discussing these spring activities with J. C. McFadden, hardware merchant, who is also vice-president of the Assn., it was pointed out that the present drive is only one of a number of such campaigns conducted periodically by the retailers. Owing to the weather being variable and uncertain, no parade was planned in conjunction with the event of spring opening, but banners and advertising display cards, which were used to form the basis of Easter window decorations, were provided through the association funds. The bulk of the advertising, however, is carried on individually and thus the tastes and needs of the different merchants are satisfactorily catered to. A large number of the local retailers use space in their district paper, and many hardwaremen use this advertising. In advertising spring needs, the J. C. McFadden Hardware proclaims that "spring is here" in convincing manner, and back this up with a variety of suitable suggestions. "What about that car?," is another pertinent phrase used by Mr. McFadden, this being followed up with timely pointers regarding auto paints and enamels.

The window display of Pritchard's Hardware, was devoted to paints, brushes, and other spring goods needed in clean up work. A revolving stand in one portion of the window supported a comprehensive line of paint products, with a reflector throwing an alternating light on the other goods, as well as attracting the attention of the passers-by. In conjunction with spring clean-up lines, tools have been featured with a fair amount of success by Mr. Pritchard. The window display previous to the current week, comprised tools of many kinds, including saws, nail-hammers, screwdrivers, and other building products in close proximity. Goods of this nature find a ready sale at this season, according to Mr. Pritchard, and in grouping builders' hardware, nails, tar paper, roofings and similar goods, many suggested needs are readily evident to the customer. The movement of tools and kindred products has undoubtedly been greatly stimulated by the extensive amount of new building activities noticeable throughout the entire Danforth district.

Feature Household Goods

Household goods find particular prominence in the spring opening display of the Mathewson Hardware, Ltd. These are grouped in singular effect in the window, while above the display, a clothes-line gives the appearance of wash-day. The articles suspended thereon, however, are not the customary garments, but miniature imitations of same, with pertinent advertising slogans printed thereon.

"You are on our line phone—for household needs," reads one of these signs, while distributed across the line are such paragraphs as, "Our line of housecleaning supplies is complete," and "We only carry the best lines made: line up with those who buy at Mathewson's." The body of the display contains such articles as rope and wire clothes-lines, clothesline pulleys, scrub brushes, wringers, clothes baskets, cocoa mats, wash boards, brooms, pails, floor mops, galvanized wash tubs, brushes and step-ladders. A line of paint is found among these spring need suggestions.

Tools Have Brisk Movement

Mr. Mathewson stated to Hardware and Metal that tools and builders' supplies were among the products exper-

LOWER PRICES ON MANY HARDWARE LINES

The importance of closely following market reports and tendencies is again accentuated when a larger number of reductions have been recorded this week than during any similar period for some time. Lower quotations appear on nail and machinists hammers, lead traps and bends, lead and waste pipe, certain numbers of wrought steel butts, glass washboards, linseed oil, double-pointed tacks, plain and lipped carpenters adzes, welding compound, cut hay wire, post hole augers, hay rakes, bed and blind staples, and the Enterprise line of food choppers.

iencing brisk demand this spring. The large numbers of homes being erected in the vicinity, greatly help in this direction, while grouping products that have some bearing one with the other, or that can be classed in conjunction, has been a factor of material assistance. For advertising, Mr. Mathewson depends upon a regular weekly four-page folder of large size, which is the product of four retailers in different branches of trade. Usually, one full-page is utilized by each merchant, and over five thousand copies are distributed to the homes throughout the district. Mr. Mathewson claims exceptionally good results from this method of advertising, and a sample of spring values in hardware is included in a lay-out reproducing various seasonable ads, contained in this section.

"Do you know that you can paint your car yourself?" is one of the questions Mr. Mathewson asks of his prospective customers. Suitable space is also given to both interior and exterior paints, while special bargains are pointed out on other seasonal goods, such as poultry netting, roller skates, coaster wagons, garden tools, seeds, and stoves and ranges of the smaller type for summer use.

Washing Machines

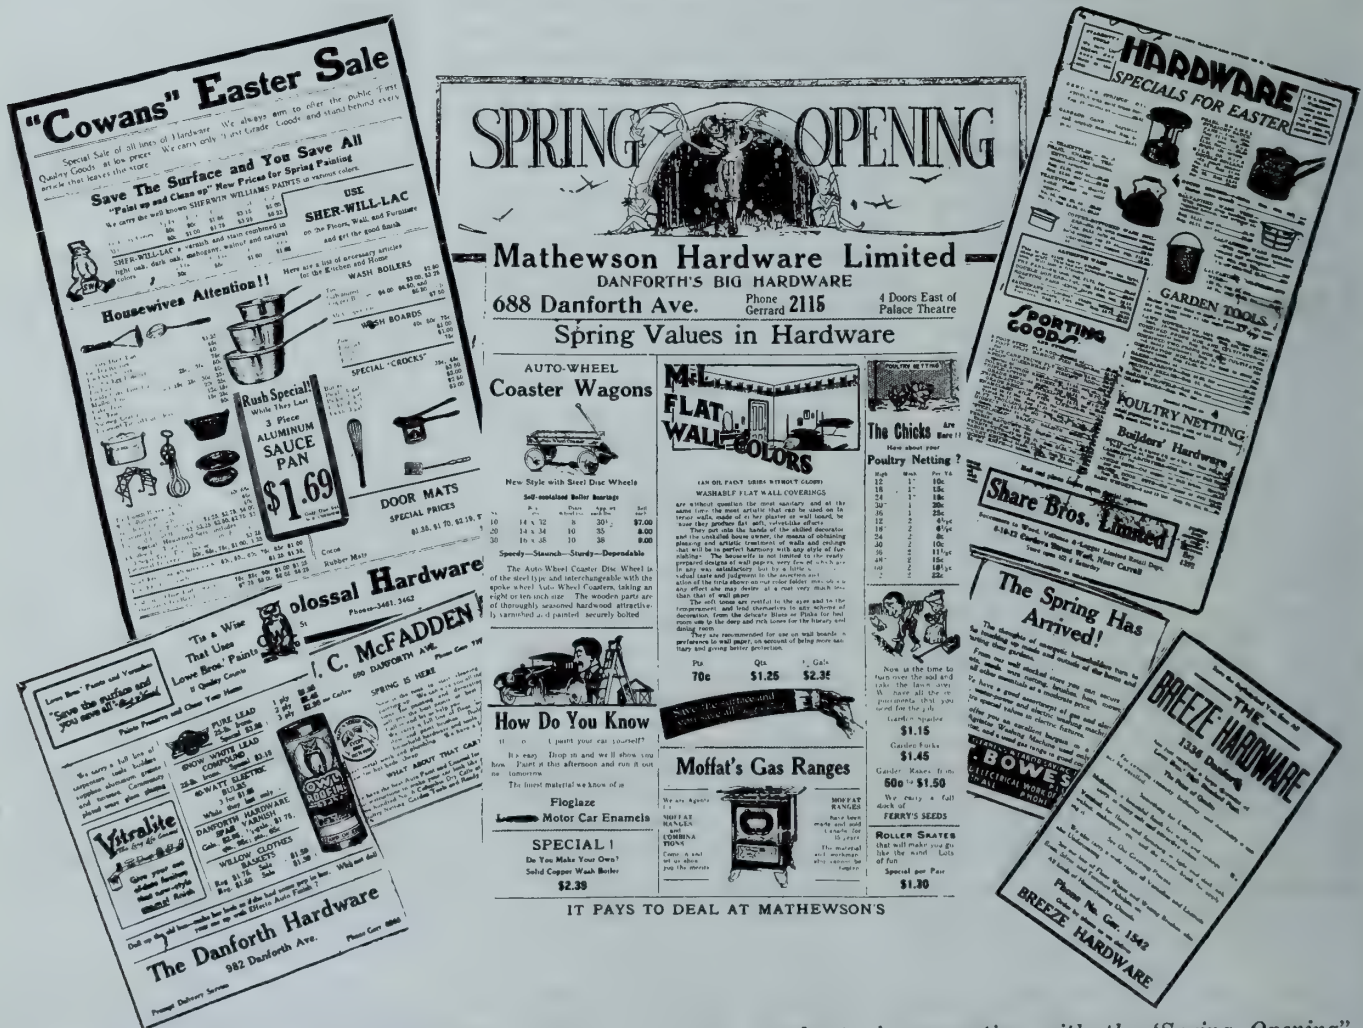
Particular emphasis was placed by several hardware merchants on washing machines, their window displays and advertising efforts being devoted to advancing the sale of these products in conjunction with numerous other household and spring needs. Another hardware store featured electrical goods in an extensive range. Electric bulbs to vacuum cleaners were prominent and freely met the customer's glance, both in the window and inside the store. Decorative table and portable reading lamps, flashlights, batteries, and in one case, hanging fixtures, combined in a specially attractive appeal to both the casual passer-by and the enthusiastic home-builder.

OFFICERS OF KINGSTON HARDWARE CLUB

Kingston, Ont.—Officers of the newly formed Kingston Hardware Club, as partially outlined in last week's issue of Hardware and Metal, are as follows:—president, A. Lemmon; vice-president, H. Taylor; secretary-treasurer, J. B. Bunt. Executive Committee, C. Simmons, Mr. Holmes of McKelvey & Birch and J. Toland of Marshall Hardware.

D. Graw, representing the Western Clock Co. of Peterboro, Ont., made the rounds of the wholesale houses on the coast this week.

Why not a Hardware "Spring Opening" at Easter?



Above are some descriptive ads used by Danforth hardware merchants in connection with the 'Spring Opening" campaign launched through their district association as outlined herewith. Other illustrations included above depict Easter specials by Share Bros. Ltd., of Vancouver, and also some Spring and Easter household suggestions by Cowans' Hardware, London, Ont.

Two of the hardware window displays used by Toronto merchants in connection with the Spring Opening campaign to develop trade at Easter are shown herewith. The upper one by Mathewson Hardware Co., Danforth Ave., shows a suggestive Spring scene with clothes on the line and a grouping of necessary lines for spring housecleaning. Pritchard's Hardware window shows a pyramid display of paints which was illuminated with changing colored lights at night, and combines brushes, wall finishes and other lines needed in the Spring.

Tariff Discrimination

IN VIEW OF THE important bearing which foreign trade has and will continue to have upon the course of industry in this country, it is interesting to note what steps are being taken by the government and by business men to develop the world's markets for Canadian hardware and other products. A fair volume of export business is required in order that Canadian industry may operate at or near its capacity. Domestic trade alone cannot bring this result for during the war the capacity of Canadian industry was greatly increased under the stimulus of a consistent and extensive export trade. Therefore the development of foreign markets is much to be desired providing satisfactory trade relations can be established.

Provision has been made in the estimates tabled in the House of Commons a few days ago for an exhibition train of Canadian products to tour France. The plans for a train and for an exhibition for six months in France will help to some extent to establish Canadian products in that important market, and some revision of tariff arrangements with France is much to be desired in view of the action of that country in recently exempting United States goods from increases applicable under the French general tariff while continuing to apply those increases against Canadian goods. The result of this is that on most Canadian goods France levies double to three times as much duty as on similar goods imported from the U. S. Among the Canadian products suffering under this discrimination are wrought iron, iron bars, steel bars, tubes, varnishes, machine tools, locks, many forms of hardware, valves, brass goods, shafts, screws, bolts, link belting, spark plugs, etc.

This and other tariff arrangements will undoubtedly come up for discussion during the present session of parliament, and the trade should urge the necessity of removing this tariff discrimination.

Radio- Telephony

THE WORLD is passing through an age of transition and all the wonders which nature and the genius of man can contrive have not yet been discovered. Proof of this is found in the satisfactory results which have recently crowned the efforts of inventors in connection with radio-telephony. For some years it has been possible to send a telegraphic code by wireless, but it is only a recent development that enables the transmission of the human voice, music, etc., by wireless, and this accomplishment bespeaks considerable change in future methods of communication and possibly of entertainment.

For some time amateur radio-telephone sets have been sold in Canada and the United States and it is estimated that to-day there are in use some 200,000 sets in the U. S. and about the same proportion to population in Canada. A number of electrical goods manufacturers provide sending apparatus at various points to transmit concerts, lectures, etc., for the benefit of these amateurs, and many pleasant evenings are spent by these operators and their families in listening to entertainment provided many miles distant. Some public concerts have recently been held in Toronto at which the wonders of radio-telephony have been demonstrated by providing, through an amplifier, various musical numbers being played several miles away and transmitted by wireless.

There is little doubt but that in the near future radio sets will be common equipment in the average household. Already several builders of apartment houses and private homes have indicated that their plans provide for the installation of such equipment. Sales of radio sets through stores in Canada have been many and are increasing, particularly for receiving sets, and there is no reason why the hardware store should not become the logical centre for the distribution of such equipment.

Inter-Dependence

A RECENT development of the process of readjustment emphasizes the interdependence of all branches of our social and business interests. This is of particular importance in indicating the true relation of the agricultural and industrial phases of our economic system. For a great many years the farmer did not trust the business man and this lack of confidence was also felt by some business men when farmers became an important influence in the political life of the country. Developments coincident with the period of readjustment have, however, shown more clearly the true relation of these factions than might otherwise have been the case and benefit should result.

The farmer has seen that co-operation with the business interests of the country is the only way in which to bring about a satisfactory solution of his difficulties, and the business man has seen the bad effects of neglecting to look after the interests of the agricultural sections. The Canadian farmer has recently been in dire circumstances due to the big decline in value of agricultural products and the closing of certain markets by the application of tariff protection. Recently this situation has improved and the farmer is to-day in better position to procure his requirements. As a class, the agriculturist has learned something of his interdependence with other interests. Prosperity will be aided largely in the future by a sympathetic understanding between both these groups, and in this the rural hardware merchant can play an important part, not only in helping to improve general conditions but in discouraging the tendency in agricultural districts toward the establishment of distributing agencies which are not conducive to the best business interests of the country as a whole.

The Building Situation

IN MOST sections of Canada house building is becoming very active and it should not be long before much of the shortage of accommodation which has existed for some years, is relieved. An official of the works department in Toronto stated to Hardware and Metal this week that an average of thirty-five water installations a day were being handled in the city at present, in connection with new residences only. The past few months have seen a considerable fall in prices of building materials, and while wages have not declined to a marked degree, agreements have now been consummated with practically all classes of workers and wages will at least be stable for some time. On this basis much deferred construction is being proceeded with as far as houses are concerned.

* * * *

A NOTABLE increase in the number of price reductions is recorded this week. More price developments have been announced than during any similar period since January, when changes in hardware quotations were exceptionally numerous. The various important lines having lower prices are enumerated in the market section.

News of Western Canada

For comment on Winnipeg hardware market tendencies see "WEEKLY HARDWARE MARKET REPORTS." For current prices see Winnipeg section of "CURRENT HARDWARE QUOTATIONS" in this issue.

Increased Hardware Movement in March

B. C. Wholesale Hardware Distributors Report Increasing Activity—Miners Calling for Equipment as Snow Disappears—Spring Lines Moving Well

VANCOUVER, B. C.—Although it has been a long time coming, wholesale hardware distributors in British Columbia generally report increased business for March, compared with January and February. The class of buying now in evidence indicates that retailers' stocks are fairly well cleaned up and that from now on, there should be a gradual improvement. Money continues to be tight and the trade finds it difficult to keep up collections on a normal basis. There is a very small proportion of retailers taking advantage of discounts offered by the jobbers, according to opinions expressed to Hardware and Metal.

With the gradual disappearance of the snow, prospectors and miners are commencing to make their way into the new silver and gold strikes at Williams Lake and the Mayo district of the Yukon and their departure has had a favorable effect upon demands for equipment. From all reports, the Williams Lake camp promises to be one of the big ones this season with the result that merchants in that particular section of the Cariboo have been sending in a fair volume of orders.

The McClary Mfg. Co. has made a specialty of a prospector's kit consisting of a frying pan, 2 plates, knives, forks and spoons, two pails and cups and a can opener. The kit was sent into the camp and proved so popular that a fair volume of business is coming in.

Wholesalers are well pleased with the results achieved at the Building and House Furnishing Exhibition which closed on the 25th of March with a record attendance. They say that business was done in electric ranges, furnaces, stoves, plumbing and other house furnishing lines that otherwise they would not have come in contact with.

Weather conditions here this week have been most seasonable and this has had the effect of accentuating trade in garden tools, paints, household cleaning articles, poultry netting and other outdoor goods, all of which are given prominent display in retailers' windows.

Poultry netting is wholesaling at $1.95 per 2 x 12 roll up to $7.50 for the 1 x 36 size. Shovels and spades are moving on a basis of $12 to $14.15, the latter figure being quoted for the Jones or Bulldog. Clothes line wire is ranging from 33 to 55 cents for the fifty and one hundred foot lengths. Carpet felt is on the market at $4.10 per roll of fifty pounds for the sixteen-ounce size. The drop recorded a week ago in wire nails to a basis of $5.10 has resulted in an increased demand from the building trade.

Building incidentally, is moving ahead and this has meant a heavier outward movement of lock sets and other building hardware. For the first three months of the calendar year building permits total $900,000 as compared with $750,000 for the similar period of last year. This does not include the municipality of Point Grey where even greater activity, comparatively, is proceeding.

There has been a sharp reduction of automobile tires, the top grade Dominion selling at $40.50 as compared with a figure of $67.85 two years ago. This is approximately one-third less than prewar prices.

As the copper market at primary markets is weak, it is anticipated that kettles and other goods with copper in their make-up will be affected.

JAMES H. ASHDOWN

President, J. H. Ashdown Hardware Co. Ltd., Winnipeg, who has just celebrated his 78th birthday.

J. H. ASHDOWN CELEBRATES 78th BIRTHDAY

Hardware and Metal joins with others in the hardware trade in Canada in extending congratulations and good wishes to James H. Ashdown, president of the J. H. Ashdown Hardware Co., Ltd., Winnipeg, who has just celebrated his 78th birthday. For many years Mr. Ashdown has been an outstanding figure in the business circles of Western Canada, and he is one of the pioneers in the hardware business of Canada. It was at the early age of 24 years that Mr. Ashdown settled in the Red River settlement, as Winnipeg was then known. It had a population of 100. Mr. Ashdown has played an important part in the rapid development of that country through his interests in the hardware trade, governmental bodies, banking, financial and insurance.

ASHDOWN STAFF HOLD CURLING BONSPIEL

Winnipeg.—The ninth annual curling bonspiel of the employees of the J. H. Ashdown Hardware Co., resulted in W. S. MacDonald's rink winning the Grand Challenge Trophy and J. Budd rink were runners up. J. E. Hunter won the Consolation event. Prizes were presented by C. H. S. Bamford, sales manager, these consisting of various articles of cut glass.

OBITUARY

The death is announced of William G. Mackenzie, of Vancouver, one of the best-known hardware men in Western Canada. For the past twenty years he was managing director of Wood-Vallance & Leggatt., the sale of which firm to Marshall-Wells Ltd., was recently announced in Hardware and Metal. His sudden demise was caused by heart trouble. He was sixty years of age.

WESTERN CANADA NOTES

H. W. Davidson and Co., Lafleche, Alta., has dissolved.

A. P. Swallow, is commencing a hardware business at Willow Brook, Alta.

T. B. Cheeham has commenced a hardware business in Saskatoon, Sask.

S. Krawitz, hardware merchant, Luseland, Alta., has been succeeded by Z. L. Harlow.

Bruce Campbell, hardware broker, Victor Vallance, manufacturers' agent, and H. W. Glassco, manufacturers' agent, all of Winnipeg, have moved from their former offices and are now located at 627-628 Union Bank Building.

Events in the Trade

BUSINESS CHANGES

Underwood, Ont.—Messrs. Fred Shede and Henry E. Brill, who for the past seven years have been conducting a hardware store at Underwood, have dissolved partnership, Mr. Brill taking over his partner's interest in the business.

Belleville, Ont.—Messrs. Tom Bailey and Russel Conner of Madoc left this week for Waterford, where they have taken over a hardware business in that town. Mr. Bailey has been in Belleville for some time, having been employed by The Smith Hardware Co.

G. Stokes of T. H. Hardware & Supplies, Ltd., advises Hardware and Metal that this firm has taken over the hardware business of T. Knapton at Thornhill, Ont., carrying on business with hardware, household supplies, paints, accessories, etc., and will appreciate catalogues and lists from manufacturers.

Clinton, Ont.—M. T. Corless has sold out his hardware business to Messrs. T. W. Hawkins and Hugh Miller, the latter lately of Brooklyn, N. Y., who will take over as soon as stocktaking is completed. The new firm will combine a general hardware and plumbing business. Mr. Hawkins has been in the plumbing business here for years. Mr. Miller is Mr. Hawkins' father-in-law.

NEW FIRMS

S. B. Rice has commenced a hardware business at 386 Church St., Mimico P. O., Ont.

CANDLES START FIRE IN HARDWARE STORE

Windsor.—Fire believed to have started from candles in the hardware store occupied by Fred Dubensky at 168 Drouillard Road, Ford, Ont., kept fire men busy for five hours before being extinguished.

Fred Dubinsky lost $5,000.

PERSONAL

Leslie Hall, vice-president of the Williams Tool Corporation, of Erie, Pa., and Brantford, Ont., has decided to make his headquarters in Erie, Pa., and will this summer remove to that city to reside. The move follows his promotion to the general managership of both plants of the company, one each of the border.

Announce Death of Sir John C. Eaton, Pres. T. Eaton Co.

THE DEATH OF Sir John Craig Eaton, president of the T. Eaton Co., Ltd., Toronto and Winnipeg, the largest departmental store in Canada and one of the largest on this continent, was briefly announced in last week's issue of Hardware and Metal. Sir John Eaton has frequently been referred to as the "greatest merchant" in the Dominion and his death will be felt keenly among various branches of the business life of this country. Under his direction the T. Eaton Co., has continued to grow on the basic principles established over half a century ago by his father, the late Timothy Eaton, who died only fifteen years ago.

SIR JOHN C. EATON

President of T. Eaton Co., Ltd., Toronto, and Winnipeg, whose death is announced.

Sir John Eaton was but forty-six years of age, and passed away while actively engaged in directing the business affairs of the firm of which he was the head. Death resulted from influenza and came somewhat unexpectedly after a period of several days recovery from an earlier attack of this malady. He leaves a widow and five children, the eldest a boy of nineteen years. Also surviving are his mother, Mrs. Timothy Eaton, and a brother, Major W. F. Eaton and two sisters.

A Liberal in politics, Sir John Eaton refrained from taking an active interest in party affairs though he was one of the eighteen prominent business men of Toronto who seceded from the Liberal ranks in opposition to the reciprocity pact of 1911. He was always a strong supporter of Canadian industry. Of necessity his store was a large importer of foreign goods, but wherever possible the Canadian product was given first attention. He was created a Knight Bachelor on June 3, 1915.

The T. Eaton Co., has always been in the forefront in introducing and following up business reforms, particularly in regard to the retail distribution of merchandise, and has been a leader in such movements as those for shorter hours for employees, half holidays, etc., and among business interests it is recognized that both Sir John Eaton and his father who founded the firm have always granted the utmost concessions to employees in the interests of a higher standard of living. Throughout all branches of the manufacturing and distributing enterprises of this company, these reforms have been carried.

The benefactions of Sir John Eaton have also been widespread and generous. He has made large grants to various charitable institutions and provided a helping hand frequently when required by various organizations and individuals. His assistance to employees particularly during the war was very greatly appreciated by his staff, and his assistance in forming special fighting units and in other ways was an important factor in war times.

At the time of his death Sir John was in addition to his position at the head of the T. Eaton enterprises, a director of the Dominon Bank, Canadian Pacific Railway, Honorary Director of the Canadian National Exhibition, etc. His untimely death will be keenly felt by both business and social interests with which he was in contact.

FIRE LOSS

Wallaceburg, Ont.—The largest warehouse owned by the Dominion Glass Company, and well filled with manufactured stock, was destroyed by fire.

J. Taylor Webb, of the firm of Bissett and Webb, Winnipeg, is on a business trip calling on the wholesale trade in Western Canada.

ONTARIO INCORPORATIONS

Hamilton Iceless Refrigerator Co. Ltd., capital $50,000, head office, Hamilton, to manufacture and deal in refrigerators and equipment.

T. H. Hardware & Supplies Ltd., capital $40,000, head office Thornhill, Ont., to carry on general hardware and plumbers' supply business.

Dexter Lock Co. Ltd., head office Hamilton, capital $100,000, to manufacture and deal in hardware.

DOMINION INCORPORATIONS

The Hardware and Cutlery Co., Ltd., head office Montreal, capital $25,000, to carry on wholesale and retail trade.

Manganese and Steel Foundry, Ltd., head office Sherbrooke, Que., to carry on business of manufacturing and dealing in iron and steel and other materials from the ore to the finished product.

The Gilchrist Co. of Canada, Ltd., head office Toronto, capital $50,000, to manufacture and deal in metal goods, glassware, wooden utensils, ice tools, silver-plated ware and similar utensils. This company takes over the assets of The Gilchrist Co., Inc., of Newark, N.J.

WHERE CONVENTIONS OF O. R. H. A. HAVE BEEN HELD

The decision to hold the 1923 annual convention of the Ontario Retail Hardware Association in Toronto, as outlined in last week's issue of Hardware and Metal, is interesting in view of the fact that since 1917 these conventions have been held each year in Hamilton, and the 1923 convention will mark the first departure from that rule for some years. The cities in which the various conventions of this association have been held since its organization in 1906 are as follows;—1906-1908 in Toronto; 1909, Hamilton; 1910, London; 1911, Peterboro; 1912, Guelph; 1913, Hamilton; 1914, Ottawa; 1915-1916, Toronto; 1917-1922, Hamilton; 1923, Toronto.

SARNIA GRANTS CONCESSIONS TO DOMINION ALLOY STEEL CO.

Sarnia, Ont.—Sarnia City Council held out the the glad hand of welcome to the Dominion Steel Alloy Corporation, whose representatives appeared before the Council to obtain concessions in return for the establishment here of a proposed $3,000,000 plant. B. H. McCreath of Toronto, George A. Simpson of Hamilton and A. I. McKinley, solicitor for the company, represented the company. A by-law granting the concessions asked was passed by the Council and will be voted on May 4.

The by-law provides for a fixed assessment of $3,000,000 on 400 acres of land, the actual site of the plant; the opening up of streets and the laying of sewers as rapidly as warranted by the development of the concern; annexation of the territory by the city. Water and sewers to be supplied.

Partnership Formed

G. L. Cohoon, manufacturers' agent, 11 St. Sacrament St., Montreal, announces that on April 15 G. W. Pugh, of the Dominion Paint Works, Walkerville, Ont., will join partnership with him, under the name of Cohoon & Pugh.

G. L. COHOON

Mr. Pugh is by no means a stranger to the hardware trade, having been connected with the Dominion Paint Works for some years past.

The new arrangement will allow a closer connection with the trade, and territories from coast to coast will be covered the new firm representing English and American manufacturers, among which are the following:—

G. H. PUGH

Thos. Ellin & Co., Ltd., Sheffield, England, Table and Pocket Cutlery; V Dugmore Lock Co., Ltd., Wolverhampton, England, Brass Cabinet Locks; The Sports Co., Manchester, England, Tennis Rackets, Footballs, Boxing Gloves, etc.; A. E. Rudge & Son, Redditch, England, Fishing Tackle; Wilder Pike Thermometer Co., Inc., Troy, N. Y., U. S. A.; The E. T. Fraim Lock Co., Lancaster, Pa., U. S. A., Padlocks, Night Latches, etc., (Eastern Canada only).

NEWS FROM KINGSTON

Kingston, April 7.—The Kingston harbor was opened on Thursday and local hardware merchants are now looking for a brisker business as for over three weeks people living on the islands have been unable to reach the city to do their shopping. A record business is looked for on Saturday.

The local hardwaremen have under consideration a proposition to bring a representative of a big paint house here in the course of the next two weeks to give a demonstration on the selling of paints.

A fact which goes to show that citizens should make inquiries of the local merchants before they write elsewhere has been revealed here. A few days ago a citizen wanted to get some quotations on a certain kind of paint manufactured in the United States. He wrote the firm and through a Toronto agency was given the information he desired, but he found out that the paint he was looking for was handled by a local dealer and more than this that the paint was being advertised in the local newspapers.

WESTERN CANADA NOTES

The Ming Wo Hardware Co. has opened up at 23 Pender street east, Vancouver, with a well assorted stock. The Wancow Hardware is already carrying on business within two doors.

G. K. Morrison is erecting two new stores in the 2700 block, Fourth Avenue west, Vancouver. He will occupy one of these himself as a plumber and will carry a full line of plumbing supplies.

Rowland's Hardware at 1130 Commercial Drive, Vancouver, was broken into this week by thieves who helped themselves to sporting goods and electrical supplies valued at a hundred dollars.

Much systematic thieving has been in evidence in Vancouver during the last fortnight or so. The Canadian Metals Co. plant at 1428 Granville street has suffered to the extent of $540, the prowlers helping themselves to tin sheets to this extent.

Brandram, Henderson, B. C., Ltd., whose plant is located on Industrial Island, Vancouver, has announced to the trade that from now on, it will sell direct to the retailer instead of through any other distributor. The company was formerly represented by Wood, Vallance & Leggat, Ltd., and with the purchase of the latter firm by Marshall Wells, Ltd., the paint firm decided to change its policy. This will affect the entire B. C. and Yukon territory.

Letters to the Editor

The Editor welcomes letters on any subject of interest to the hardware trade.

Editor, Hardware and Metal—

I am opening a retail hardware store in Toronto and require a salesman. I have received several replies to advertisements but retail salesmen seem so unreasonable. Some want as high as thirty-five dollars per week to start. Is there an average wage paid in Toronto? Do you think I should be held up by these fellows? Start the ball rolling back to $15 per week.

(Signed) A. KASER, Toronto.

Answer:—Salaries of retail hardware salesmen in Toronto vary from about $15 per week for juniors to $35 per week for high class experienced men with ability to direct other salesmen, dress windows, write showcards, etc. Men getting the latter salary are generally found only in the larger stores where their ability has plenty of scope. The average wage paid would probably be from $20 to $22 per week in Toronto at present.

George D. Davis, Esq.,
Manager Hardware and Metal,
Toronto.

I received the sheets showing the various charts printed in Hardware and Metal covering prices and I appreciate very much your sending them and mounting them the way you have.

We expect to place these in a large picture frame so our customers can examine them if they wish to.

Thanking you for your trouble, I remain,

JAMES McGREGOR,
Caledonia, Ont.

NEED LESSONS IN SALESMANSHIP

The following letter has been received from a hardware manufacturing firm which is a large purchaser of supplies and the name of which has been omitted by request.

Editor, Hardware and Metal,
Toronto, Ont.

Can I take up just a few minutes of your valuable time as I have often noticed in different trade papers little write-ups stating what buyers should not do to travelers—I do wish some person would write up an article on what travelers should not do to buyers. It is sometimes very annoying and exasperating to have to put up with some of them and the worst are those that represent the manufacturer.

I will give you an instance of a so called traveler who called on us this morning. The conversation started this way—

"Good morning, Mr. X." Not knowing who he was I could not call him by name and simply said "Good morning." For five minutes he talked about what he saw in one of the Toronto papers on the train this morning on the way up to our city. We have not time to read the papers except at noon when we are swallowing our lunch. Then he asked me if there was anything we required in his line—he did not tell us what line he represented—and to make a long story short, he went out by saying, "Goodbye, I suppose there is nothing you require in our line."

He has just gone out the door and I do not know what firm he represented.

I wish to goodness some of the manufacturers would give their salesmen at least one lesson on salesmanship before they take up the time of busy buyers.

Yours truly,
SUNSHINE.

Catalogues and Booklets

Those interested in any of the catalogues described below can procure a copy of the same by writing direct to these firms. Mention that you noticed this in Hardware and Metal

QUALITY TOOL CATALOG

The Quality Tool Works, Ltd., announce that they are now operating in their new and larger premises at 480 Rielle St., Montreal, where new machinery and equipment has been added. On this occasion they are issuing to the trade their new catalog, No. 22, which covers a large and comprehensive line of tools. It is fully illustrated, with an accompanying description of each article. Tools now manufactured include, awls, center punches, carpenters' bars, chisels, machinists' hammers, ice picks, nail sets, pliers, punches, reamers, screw drivers, tack claws, tool kits, and wrenches.

NEW WENTWORTH CATALOG

The Wentworth Mfg. Co., Hamilton, manufacturers of kitchen aluminum, now have their new catalog ready for distribution.

This booklet gives complete and detailed information of "Wellworth" aluminum, and also contains descriptions of the other metal specialties made by this company—copper and brass ware, bath room trimmings, hot water bottles, brass taps, nose nozzles and couplings, lawn sprinklers, fixture loops and hooks and gaskets.

With each catalog is furnished a net price list, to enable the buyer to dispense with the calculating of costs from lists and discounts.

Copies will be supplied upon request to the above firm.

OPPORTUNITIES FOR CANADIAN INDUSTRIAL EXPANSION

Direct methods of selling Canada to the British manufacturers are indicated in a booklet which is issued by the department of trade and commerce of the Dominion Government at Ottawa, entitled, "Canada as a field for British branch industries." This treatise give a complete collection of facts and figures relative to all phases of Canadian industry, so arranged that their meaning is evident at a glance. It portrays the opportunities awaiting foreign manufacturers and investors in the separate and collective fields of industrial development. It further points out that Canada possesses immense possibilities for industrial expansion, and makes particular note of the fact that American industrial interests have already been making salient uses of these opportunities. The future of Canada's trade relationship, and especially her export trade, have been given special attention, and the opinion is expressed that Canadian industry in general is now on the threshold of important developments.

WELLWORTH ALUMINUM SETS

The Wentworth Mfg. Co., Hamilton, are putting up assortments of aluminum in sets. These sets comprise useful pieces, serving as the nucleus of an aluminum shower, and are made up particularly from the standpoint of those wishing to make presentations to brides-elect. Three standard assortments, at different ranges of cost, are offered.

Folders with full particulars prepared for the inspection and information of the intending purchaser will be mailed by the manufacturer to merchants on request.

SHOULD YOU BUY YOUR ADVERTISING MATTER?

Some manufacturers are of the opinion that much alleged waste of advertising matter supplied by them to the retail hardware merchants could be stopped if a nominal charge was made for such matter. Some manufacturers' salesmen are also said to have recently reported that the retail hardware merchants were getting too much advertising matter and that many of them were inclined to substitute such matter for real selling energy.

Hardware and Metal has secured some interesting matter on this subject, which will be outlined in an early issue. Meanwhile the Editor will be pleased to have a letter from YOU outlining your views on this important topic, your name to be omitted in the discussion if desired.

Twenty Years Ago

Following articles are reproduced from Hardware and Metal of April 5, 1902:—

J. H. Ashdown is calling for tenders for an extensive addition to his wholesale warehouse on Bannatyne Street, East, Winnipeg. The present structure which was considered enormous when erected a few years ago is entirely too small for the growing trade of the firm.

Notice is given of the application of Thomas J. Drummond, Edgar M. McDougall and George Drummond, manufacturers, all of Montreal, for incorporation as a company to be known as The Canadian Foundry and Iron Co. Ltd.

The Maple Leaf Harvest Tool Ltd. is applying for incorporation. The names of the incorporators are C. J. Shurly, Jerome C. Dietrich and others, all of Galt, Ont. The place of business will be Tillsonburg, the capital stock $100,000.

The Business Men's League of Montreal elected the following officers for 1902: President, Henry Miles; Vice-President, C. Chaput; Treasurer, J. C. Holden; Ex. Committee, H. Miles, F. W. Evans, C. Chaput, George Drummond and J. C. Holden

Those interested in the production of arsenic in the Dominion formed a deputation and waited on Hon. Messrs. Fielding, Muloch and Fitzpatrick and asked for a bounty on the output of arsenic in Canada.

Taylor Webb, Toronto, representative of the Thomas Davidson Mfg. Co., Montreal, in Manitoba and the West, has just returned from a three months trip over his territory.

William A. Hillhouse, hardware merchant of Shelburne, Ont., has admitted as partner Jas. H. Nichol of Toronto.

S. Mullet and Co., hardware merchants, Seaforth, Ont., have sold out to Chesney & Smiley.

Weekly Hardware Market Reports

STATEMENTS FROM BUYING CENTRES

Markets at a Glance

THERE have been more price reductions recorded on the hardware markets this week than during any similar period since January. Declines are announced on lead pipe, lead traps and bends, nail and machinists' hammers, wrought steel butts, glass washboards, double-pointed tacks, certain brands of welding compound, linseed oil, bed and blind staples, cut hay wire, hay rakes, the Enterprise line of food choppers, post hole augers, and plain and lipped carpenters' adzes. Some minor revisions in scrap metal prices are also recorded on Eastern markets, while Western centres report easier quotations on some lines of lawn mowers, and similar changes on clothes line pulleys, and fry pans. Turpentine has developed a slightly firmer tone, due to a temporary shortage of this product, with steady prices prevailing on paint products generally. A report that revisions in wood screw discounts have increased quotations on American markets, may be reflected in domestic centres, if the change is uniformly adopted. Scrap materials are still moderately quiet, while the centre of interest in the ingot metal markets is the fact that copper has again weakened under the announcement that certain producers are about to resume operations. Construction activities on an increasing scale have created a brisk movement in builders' hardware, while recently improved weather conditions have stimulated the current sale of seasonal goods. Bookings of ready roofings also record improvement, while the progress in the steel industry is measured by the firmer price levels now generally in effect, combined with the practical elimination of price shading from the domestic markets, and the recent attempt to increase sheet quotations on southern primary centres.

Montreal Markets

MONTREAL, April 6.—Price developments in the hardware markets this week centre around cut hay wire, single loop bale ties, glass wash boards, double pointed tacks, bed and blind staples, welding compound and the scrap markets. Cut hay wire and bale ties are reduced from 30 to 50 cents per 100 lbs. on the different gauges, and glass wash boards are 50 cents per dozen lower. Double pointed tacks have new list prices, with discounts unchanged. Bed staples and blind staples are now quoted at less 35-12½ per cent., former discount being 30 off. To those interested, welding compound is reduced in both the Cherry Heat and Climax brands. In the waste material markets varying price revisions are recorded. Boiler plate and light brass quotations are increased while rubber shoes and wrought iron show a slight reduction.

There is a noticeable improvement in the ingot metal markets, the tone in most cases being slightly firmer and quotations on tin and spelter are a little higher on the local market. The sheet markets and bar iron also continue to improve, and distributors are of the opinion that a much healthier situation has now commenced with the possibilities of a fairly satisfactory season in the coming months.

BUILDERS' HARDWARE AND TOOLS FIND READY SALE

Montreal.

Lines which are proving active sellers throughout the trade at present are builders' hardware and carpenters' tools. Speaking with one large wholesaler, Hardware and Metal was informed that sales of these lines were now beyond expectations earlier in the year, and certainly well above the sale of last year. Building operations are undoubtedly the reason for this activity, and the fact that orders are being received from almost all sections is particularly encouraging.

WROUGHT BUTTS HAVE CHANGED DISCOUNT

Montreal

Through a revision in discounts, No. 840 wrought steel butts have new lower quotations. These are now quoted at less 17½ per cent., former discount being 10 per cent. Following are prices on some of the well known lines:

WROUGHT STEEL BUTTS—

Number	Less per cent.
840	17½
800	Net
838	10
808	Plus 10
804	17
802	Net
810	Plus 25
814	Plus 25

NO FURTHER CHANGE IN PIPE FITTINGS

Montreal

No further change is made in pipe fittings since the revision in wrought nipples last week. Trade in these lines is described as slightly improved although sorting orders continue to form the greater portion. Dealers are apparently still willing to take care of immediate requirements only, notwithstanding the more active period which is usually noted in the ensuing weeks. Following are unchanged discounts:

PIPE FITTINGS—

Cast iron fittings	30%
Bushings, cast	32%
Do., malleable	32%
Flanges	40%
Plugs	30%
Flange unions	30%
Malleable unions	47%
Dart Unions, black	33%
Do., galvanized	13%
Nipples, ⅛ to 4 in., close and short	60%
Do., long	65%
Do., 4½ to 8 in., close and short	50%
Do., long	55%
Couplings, 4 in. and under	30%
Do., 4 in., and longer	10%

POUND GOODS—	Black.	Galv.
Class A	0 54	0 67
Class B	0 20	0 28
Class C	0 13	0 20

DOUBLE POINTED TACKS HAVE NEW LIST PRICES

Montreal.

New list prices are announced on double pointed tacks, which lower the net quotations although discounts are unchanged. Following are present lists and discounts:

DOUBLE POINTED TACKS—

Blue and coppered—No. 9, $1.00, No. 10, $1.20, No. 11, $1.30, No. 12, $1.40, No. 14, $1.50.

Tinned—No. 9—$1.60, No. 10, $1.85, No. 11, $2.00, No. 12, $2.20, No. 14, $2.40.

Less 65—25%.

REVISIONS ARE RECORDED IN SCRAP METAL PRICES

Montreal

Quotations on certain lines of waste materials are now revised, both higher and lower quotations featuring the markets. Rubber shoes are quoted slightly less, and wrought iron is reduced from $10.00 to 9.00 per gross ton. The light brass price is increased to 3½ cts. per lb., and boiler plate is 50 cts. per ton more. There is little or no change in the tone of the market, these price changes being announced by local dealers, based on stocks on hand for the most part. Quietness still prevails, although there is a little brighter outlook owing to the improvement in the steel industry. The opening of better weather should also assist in this direction. Following are revised quotations, which are purely nominal, and for larger quantities.

Automobile tires	0 50
Rubber shoes	0 02¾
Yellow brass	0 05
Red brass	0 08¼
Light brass	0 03½
Scrap zinc	0 03
Lead, heavy	0 04
Lead, tea	0 02
Light copper	0 08
Heavy copper	0 10
Wrought iron, R. Bd., No. 1 per gr. ton	9 00
Malleable scrap (ton)	8 00
Pipe scrap (ton)	6 50
Heavy melting steel	6 50 7 00
No. 2 busheling	3 00
Boiler plate	7 00
No. 1 machinery cast	20 00

BAR IRON CONTINUES ON ROAD TO RECOVERY

Montreal.

The market for bar iron and steel continues to improve, and the situation on these products, which indicates the industry as a whole, is now making progress. Although the improvement to date has been gradual, it is of a healthier nature than has prevailed for some time, and dealers are optimistic of the future trend. Stocks are now being replenished, and although buying is still being carried on in a very careful manner, this movement alone lends encouragement. Quotations locally are still unchanged but somewhat firmer, and distributors are still firm in their ideas of a stiffening in prices. The coal strike, and the effect it will have on the industry in general, is not yet being taken seriously, stocks on hand said to be sufficient for some time to come. Mill reports of improvement are satisfactory, with every indication of further increased operations during the remaining spring months at least. Unchanged price levels are the following:

Common bar iron, 100 lbs.	2 65
Refined iron	4 15
Irish finish machinery steel	2 70
Mild steel	2 65
Single reeled machinery steel	4 75
Band steel	2 65
Spring steel	4 25
Sleighshoe steel	2 65
Tire steel	2 85
Toe caulk steel	3 55
Harrow tooth steel, per lb.	2 80
Mining tool steel, per lb.	0 21½
Black Diamond tool and cast steel, per lb.	0 21½

NOTE—Refined iron is approximately $1.50 per 100 pounds over base, but fluctuates owing to unsettled market.

Band steel in scroll bundles, 50c per 100 lbs. extra.

FURTHER IMPROVEMENT NOTED IN SHEETS

Montreal

The sheet markets are still on the road to recovery, and a further improvement in sales is recorded this week. Galvanized sheets in particular are showing favorable progress, the movement of these products no doubt being assisted by the recent spring weather. This improvement in the selling end is also assisting toward a more stable condition in the market, and distributors locally are of the opinion that prices have reached bottom. The trend of the market for for months past has been downward, particularly so in latter weeks when dealers were anxious to dispose of stocks in order to make way for fresh supplies for the spring trade.

Dealing with to-day's mill quotations, the recent advance in certain quarters of the southern markets was pointed out, and while this has not, up to the present, reflected locally, it clearly indicates the feeling in the market. Following are unchanged quotations for this week:

BLACK SHEETS

10 gauge	4 00	4 50
12 gauge	4 10	4 60
14 gauge	4 40	4 70
16 gauge	4 50	4 80
18-20 gauge	4 55	5 05
22-24 gauge	4 60	5 20
26 gauge	4 65	5 25
28 gauge	4 75	5 35

Sheets 3 in. wide, 20 cents per 100 lbs. extra.

NEW LOWER PRICES ON CUT HAY WIRE

Montreal.

A further reduction of from 30 to 50 cents per 100 lbs. is made in cut hay wire, and following are present quotations:

CUT HAY WIRE—

6 to 11 ft., per 100 lbs., No. 9, $4.10, No. 10, $4.25, No. 11, $4.40, No. 12, $4.50, No. 13, $4.65, No. 13½, $4.65, No. 14, $470, No. 15, $5.00, No. 16, $5.20.

STEADY IMPROVEMENT IN TROUGH AND PIPE SALES

Montreal

Eavestrough and conductor pipe are better selling lines from week to week, and dealers are well satisfied with the early opening of the season on these lines. With building operations reaching fair proportions in most sections, sales are expected to be well maintained throughout the spring and summer months. There is no change in quotations, and following are list prices and discounts:(

EAVESTROUGH—

O. G. round and half-round, per 100 ft.

8 inch	10 inch	12 inch	15 inch	18 inch
$16 90	$18 70	$22 20	$29 80	$37 80

O. G. Square bead, per 100 ft.

8 inch	10 inch	12 inch	15 inch	18 inch
$15 90	$17 70	$21 20	28 80	$36 80

CONDUCTOR PIPE:—round, plain and corrugated, per 100 ft.

2 inch	3 inch	4 inch	5 inch	6 inch
$18 40	$22 30	$29 60	$40 00	$49 00

Discount 70/10 per cent.

CONDUCTOR ELBOWS—

Plain or corrugated.	dozen
2 inch	$ 5 25
3 inch	6 00
4 inch	10 50
5 inch	24 00
6 inch	29 00

Discount 60 per cent.

MORE ACTIVE MOVEMENT OF READY ROOFING

Montreal

The month of April has brought a more active business in prepared roofings, and sales are now proceeding along satisfactory lines. The recent milder weather has proven to be the required stimulus for these lines, as previous to this the movement was described as slow, and bookings were not as plentiful as hoped for at the commencement of the year. With dealers awaiting actual demand, stocks are naturally low in all sections, and manufacturers feel that the present season will continue to improve well into the summer months. There is no further revision in quotations since the reduction early in the year, and the market is fairly strong because of prevailing costs of raw materials. There is said to be little chance of a revision in quotations until after the active period in the following months at least.

LOWER PRICES ON SINGLE LOOP BALE TIES

Montreal

A reduction is announced on single loop bale ties, this being the second revision in these goods since the beginning of the year. Following are revised prices:

BALE TIES—

No. 12—$4.50 per cwt., No. 13—$4.60, No. 13½—$4.65, No. 14—$4.70, No. 15—$5.00, and No. 16—$5.20 per cwt.

BED AND BLIND STAPLES ARE REDUCED IN PRICE

Montreal

Through increasing the discounts, both bed staples and blind staples are reduced in price. These are now quoted at less 35—12½ per cent., former discount being 30 off.

GLASS WASH BOARDS ARE REDUCED IN PRICE

Montreal.

A reduction of 50 cents per dozen has been made in the quotations on glass wash boards, and these are now quoted at $7.50 per doz. Other boards, zinc and enamelled, are unchanged.

LEAD AND ZINC PRODUCTS REMAIN UNCHANGED

Montreal.

There is little or no change in the market for lead and zinc products. Quotations remain unchanged since the recent revision in solder prices, and the undertone of the market is slightly better because of the improved state of metals in primary circles. Current quotations are at a basic level, comparative with allied lines, and even pre-war prices. This condition is in sympathy with ingot metals, which in most cases are also low in price. For this reason there is little further recession looked for, and a more active market in the months following is also expected to stiffen prices. Following are unchanged prices:

LEAD AND ZINC PRODUCTS

Lead pipe, per 100 lbs.	12 50
Lead waste, per 100 lbs.	13 50
Note—Lead pipe is subject to a discount of 10 per cent.	
Lead traps and bends	10% off
Lead wool, lb.	0 13½
Lead sheets, 2½ lbs.	0 10½
Lead sheets, 3 to 3½ lbs., sq. ft., lb.	$ 10¼
Do., 4 to 8 lbs., sq. ft.	0 09½
Cut sheets ¼c. lb. extra, and cut sheets to size, ¾c. lb. extra.	
Solder, guaranteed, lb.	0 25½
Do., strictly, lb.	0 23½
Do., commercial, lb.	0 20½
Do., wiping, lb.	0 21½
Do., wire, lb.	0 34
Zinc sheets, casks	0 11
Do., broken lots	0 11½

MODERATE TRADE IN BOILER TUBES

Montreal.

The expansion in the boiler tube market, noted a week or so ago, appears to have been of only temporary duration as the movement of these products is now said to be of moderate proportions. The lack of building of the larger class is responsible for the falling off in demand, although this may be only a temporary condition also, and sales may improve in the following weeks, but increased trade is not looked for in tubes to the same extent as in other iron and steel products. Quotations remain unchanged as follows:

BOILER TUBES—	Seamless	Lapweld
1 inch	24 70	.....
1¼ inch	24 50	.....
1½ inch	24 00	.....
1¾ inch	26 00	26 00
2 inch	24 50	20 50
2¼ inch	27 75	23 50
2½ inch	32 50	24 50
3 inch	40 00	30 50
3½ inch	52 50	34 75
4 inch	65 00	44 00

EASIER PRICES ON WELDING COMPOUND

Montreal

New lower prices are given on welding compound, and Cherry Heat in 5 lbs., is quoted at 11½ cts.; Climax in 5 lbs., 11½ cts.; Climax in 100 lbs., 10½ cts. per lb.

TIRE PRICES FIRM: PRICE CHANGES LATER

Montreal.

Dealing with the question of prevailing prices on auto tires, and the possibilities of higher quotations on these and other rubber goods, owing to the strength of the raw material markets, Hardware and Metal was informed by certain manufacturers of these lines that while the market is very firm, there is little likelihood of a revision at the present time. The rubber and raw cotton markets with their present levels, it is claimed, have undoubtedly stiffened prices, and a continuance of this strength would warrant higher tire prices in the near future. There was recently a move in this direction, but because of the present active season, it was thought better to stay any action until a later date, and in the meantime await further developments in the basic costs market.

INGOT METALS SHOW SIGNS OF RECOVERY

Montreal.

The tone of the ingot metal markets is somewhat improved this week, in certain lines at least, and there is a slightly better feeling existing. A gradual advance in demand is required, and it is hoped that this will soon be in evidence. Up to the present, this had not been sufficiently marked to cause any great buying, but the outlook is now certainly much brighter.

TIN.—Fluctuations in this metal are still very narrow, and during the month of March the price in New York covered a range of only about one half cent per lb., which shows the steadiness of the market. March statistics show a decrease in the visible supply. The market is steady but no particular advance can be looked for as yet. Locally the price is slightly firmer at 34½ cents.

COPPER.—The London market touched the lowest point, both on standard and electro, since the early days of the war. At the present time there is not much sign of any great improvement. New York market is slightly easier than last week, and buyers are more interested at the lower level. Sales have been made as low as 12⅝ delivered for shipment this quarter. Until the present accumulations of scrap copper are somewhat reduced, there is little prospect for improved demand for new metal locally, and the market is dull at 16¾ cts. for electro, 16½ cts. for casting.

SPELTER.—This metal has shown a firmer tone at East St. Louis, and there have been some fairly large purchases of ore. The spot price has advanced to about $4.75, which is the highest touched in several months. London is also firmer. Locally, demand is fairly good, with the market slightly higher at 7¼ cents.

LEAD.—Lead is quite strong in the U. S. A., and the average price has been advanced during the past week. Demand is good and some of the leading producers are entirely sold out for this month and part of May. The London market is also firmer, and altogether the situation is quite sound. Quotation is unchanged at 6¾ cents.

ANTIMONY.—This metal remains fairly firm in U. S. A. on better reports from China, but the little flurry on account of the proposed duty, has subsided. Locally the price is a little easier at 6½ for Chinese, 7½ for high grade English.

ALUMINUM.—Aluminum is a little firmer in tone, but there is no change in the local price of 24 cents.

Toronto Markets

TORONTO, April 6.—A more extensive number of price revisions appear on the current hardware markets, including reduced list prices on lead pipe and lead waste pipe, while lead traps and bends appear with a similar downward change through revised discounts. Manufacturers of nail and machinists hammers have announced a further decline of 12½ per cent. on these various products, while lower prices are also quoted on carpenters' plain and lipped adzes. Certain makes of glass washboards record easier price levels, and quotations on the Enterprise line of food choppers are again slightly revised. A new list has been issued on double-pointed tacks, with reduced prices, although the discount remain unchanged. Other reductions cover certain brands of welding compound, and hay rakes.

A reported change in wood screw discounts, thus increasing quotations on the American markets, may be shortly reflected on domestic centres, if the revision is generally adopted. Price shading has now practically disappeared from bar iron and steel, with the general improvement in the steel industry being reflected in firmer price levels on both the primary and domestic markets. Recent efforts by southern producers to put increased quotations on sheets into effect is considered in some quarters as a probable turning point in the steel trade.

PRICES ON GEM HOSE NOZZLES AND COUPLINGS

Toronto.

Prices on the Gem line of hose nozzles and couplings are revised. Hose nozzles are quoted at $7.70 per dozen; while hose couplings in sizes ½, ⅝ and ¾ inch, are priced at $1.60 per dozen.

MAY BE TURNING POINT IN SHEET MARKETS

Toronto.

While the recent increased price levels on galvanized sheets, announced by certain independent mills in the south, still remains the principal factor in the sheet industry, this condition is ascribed as the possible turning point for steel producers. It is pointed out in one quarter that such a situation is made possible by the termination of contracts for sheets, and the trend to advanced levels on fresh bookings. Whether this lead will be generally followed by American mills remains to be seen, but it reveals the fact that prices are at least stiffening at the prevailing levels. All the barometers by which the steel industry in general is gauged now reveal a generally improved condition, while the sheet business during the closing days of March, recorded a momentum for the opening of the second quarter to emulate. A more satisfactory tone is evident, as the progress looked for earlier in the year, is now developing. Following are current prices:

BLUE ANNEALED—		
10 gauge, base	3 50	4 25
12 gauge	3 55	4 30
14 gauge	3 60	4 35
16 gauge	3 65	4 40
BLACK—		
18—20 gauge	4 05	4 80
22—24 gauge	4 10	4 85
26 gauge	4 15	4 90
28 gauge	4 25	5 00

Charge of from 25c per 100 lbs. is made for less than case lots. An extra 10c per 100 lbs. is also charged on sheets 26 in. wide.

GALVANIZED—	Queen's Head	Fleur-de-lis
28 gauge	7 75	7 25
26 gauge	7 50	7 00
24 gauge	7 10	6 60
22 gauge	6 65	6 15
18 and 20 gauge	6 50	6 00

	Premier and Keystone	Apollo
10¾ oz.	5 75	6 50
U. S. 28 base	5 35	6 10
U. S., 26 gauge	5 05	5 80
22 and 24	4 90	5 65
18 and 20	4 75	5 50
16	4 60	5 35
12 and 14	4 45	5 20

An extra 40c. per 100 lbs. is charged for Keystone and Premier brands copper-bearing sheets.

An extra is now charged on galvanized sheets, 10 3-4 oz. and 28 ga., when shipped out in sheets 3 feet wide. The extra charged over prices shown above is 20c. per 100 pounds.

PLATES, CANADA—

GLASS WASHBOARDS ON EASIER PRICE LEVEL

Toronto.

A reduction of fifty cents per dozen has been announced in prices on the Diamond King, Canuck and Globe glass washboards. This change brings the quotation on these products to $7.50 per dozen. Price levels on other similar lines remain unchanged.

PRICE SHADING ALMOST GONE FROM BAR STEEL

Toronto

The firmer situation recently noted in bar and steel products generally, has now reached the stage where some price stiffening has developed into higher quotation levels at certain primary quarters. Whether this condition will be reflected in the domestic markets is uncertain, as yet, but one distributor stated to Hardware and Metal that providing these southern quotations became generally adopted by producers, the upward trend may then be noted on the local market in the near future.

Price shading is practically gone from the domestic centres, and every week records a slightly increased demand. This condition is of course, expected at this season, while building and general construction work is on the increase. Prices remain unchanged at the following levels:

IRON AND STEEL—	
Mild steel bars base	2 75
Mild steel bands, 3-16 in. base	3 25
Bar iron, base	2 75
Angle iron, base	2 85
Horseshoe iron	3 60
Tire steel	3 35
Spring steel	5 50
Sleigh shoe steel	2 85
Hoop steel	3 75
Norway iron	12 50
Toe caulk iron	4 00
Crucible cast sheet steel	30 00
Mining drill steel	18 50
Cast tool steel, high grade	30 00
Cast tool steel, medium	18 00

STEADIER PRICE NOTED ON COTTON WASTES

Toronto

The situation in cotton wastes remains unchanged, with the present demand described as fairly good. Prices are holding fairly steady at the recently revised levels, and while some fluctuations have been apparent in primary cotton circles, yet these movements are stated as not of sufficient extent to reflect in cotton waste prices. The following levels prevail on the local markets:

Cream, polishing	0 18
White, XXX	0 18
XX	0 16
X	0 15
XC	0 14
XXX, extra	0 16
XX, grand	0 15

No. 17	0 12
No. 1A	0 11
No. 1B	0 10
Fancy,	0 13½
Lion	0 12
Standard	0 10½
Popular	0 09
Keen	0 07½

Above lines subject to trade discount for quantity.

PRICES ON ENTERPRISE FOOD CHOPPERS REVISED

Toronto.

A revision in quotations on the Enterprise line of food choppers gives slight reductions on some sizes. The revised quotations are as follows: No. 5 $27.00 per doz.; No. 10 $43.00; No. 12 37.20 per doz.

MORE INQUIRY FOR BRASS AND COPPER PRODUCTS

Toronto

While no further change has been reported in copper and brass products, such as sheets, rods and tubing, yet the easier tone in primary metal markets, has recently been reflected by reductions in these markets. If quotations on ingot copper had continued to sag, some additional changes were looked for in prices on the semi-finished products. It is noticed, however, that these are now substantially lower, and with the copper market again steadier, the duration of future movements is difficult to determine. Manufacturers and distributors recently report a larger volume of inquiry, indicating potential business in the future. Following are therefore the unchanged average local quotations:

BRASS	
Sheets, base, per lb.	0 21
Tubing, base, per lb.	0 23
Rods, base, per lb.	0 19
COPPER	
Rods, base, per lb.	0 27
Soft sheets, plain, 16 oz. and heavier, lb.	0 28
Do., plain tinned 16 oz. and heavier, per lb.	0 35
Do., polished and tinned 16 oz. and heavier, lb.	0 40
Tubing	0 27

MANUFACTURERS ANNOUNCE ANOTHER DECLINE IN HAMMER PRICES

Toronto.

Another downward revision in prices on nail hammers and machinists hammers has been announced by the manufacturers of these products. The extent of the decline is 12½ per cent, and the same reduction is noted on other handled hammers, including carpenters', farriers', tinners', rivetters' and blacksmiths' tools. Following are the new quotations on hammers generally:

HAMMERS, NAIL	Doz.
No. 21	10 50
No. 1	13 50
Nos. 1½ and 61½	13 00
HAMMERS, MACHINISTS—	
No. 30, 1-lb.	8 00
No. 30, 1¼-lb.	8 75

REVISED LIST ISSUED ON DOUBLE-POINTED TACKS

Toronto.

Another new list covering double-pointed tacks has now been issued, with prices on a slightly lower basis. The discount remains unchanged, but following are the revised list prices on blue or coppered, and tinned tacks:

DOUBLE POINTED TACKS (in dozens).—

(75 tacks to each paper).

Blued or Coppered, No. 3, $1.00; No. 9,$1.00; No. 10, $1.20; No. 11, $1.30; No. 12, $1.40; No. 14, $1.50.

Tinned, No. 3, $1.60, No. 9, $1.60, No. 10, $1.85, No .11, $2.00, No. 12, $2.20, No. 14, $2.40.

Discounts—65-25 per cent.

EASIER PRICE LEVELS APPEAR ON HAY RAKES

Toronto.

Hay rakes now record a reduction in price, the revised level on iron bow bent being $6.30 per dozen, and on wood bow bent, the new price is $6.80 per dozen.

REDUCED PRICES ON LEAD PIPE AND TRAPS

Toronto

A downward revision has been announced in quotations on lead pipe, lead waste pipe and lead traps and bends. The list price on lead pipe is lowered one-half cent per lb., with a similar reduction on waste. The discount on traps and bends is revised to 17½ per cent., where formerly this was quoted at ten per cent. These changes place lead products on a general lower basis in anticipation for an improved demand during the ensuing Spring and Summer months. The price levels on solder and zinc sheets remain at the recent revisions. It is noted, however, that zinc sheets lave been quoted at a slight recession in southern primary marets, but quotations on the domestic centres remain unchanged, and are generally at the following levels:

LEAD AND ZINC GOODS—	
Lead pipe, list, per lb.	0 12
Lead waste pipe, list, per lb.	0 13
Do., over 8 in., list, per lb.	0 14
Lead pipe is subjected to a discount of	10%
Lead traps and bends	0 17½%
Lead sheets 4 to 6 lbs. sq. ft in rolls, lb.	0 09
Cut sheets 1½ to 3½ lb. extra and cut sheets to size 1c lb. extra.	
Solder, wire, per lb.	0 30
Do., strictly, lb.	0 22½
Do., commercial, lb.	0 21
Do., guaranteed, lb.	0 24
Do., wiping, lb.	0 21
Zinc sheets, per lb. 0 09	0 10

REPORT REVISION IN WOOD SCREW DISCOUNTS

Toronto.

It is rumored that some of the leading screw manufacturers in the States have recently introduced higher prices on wood screws through revising the discounts 2½ points all through the list. This would mean an advance of approximately 15 per cent. No announcement of a similar change has yet been made on the domestic markets, but should such an increase become general, it is expected that corresponding price revisions will be reflected in the near future.

LOWER QUOTATIONS ON WELDING COMPOUND

Toronto.

Quotations on welding compound have been reduced, these changes affecting certain makes. The new price levels are contained elsewhere in this issue.

GRADUAL IMPROVEMENT IN MOVEMENT OF SOIL PIPE AND FITTINGS

Toronto.

Some gradual improvement during recent weeks is reported by manufacturers and distributors in the current movement of soil pipe and fittings. Conditions generally are beginning to "open up," as one dealer described the situation, but it was further pointed out that there remains lots of room for betterment in this direction. There has been no change in quotations, the variation between the local market levels and certain eastern discounts still being evident. This is, however, a smaller margin than was at first recorded, and with the improvement developing in the near future, a more uniform domestic basis is anticipated. Following are prevailing discounts on these products:

SOIL PIPE—	
2 inch	40%
3 inch	40%
4-inch	40 and 5%
5 and 6 inch	40%
8 inch.	net
FITTINGS—	
2 to 6 inch fittings	50 and 5%
8 inch fittings	net

SCRAP MATERIALS ARE STILL REPORTED QUIET

Toronto

The demand for scrap materials is still described as poor, with cast iron grades being purchased in minor amounts. The scrap rubber business is extremely quiet, and prices have sagged still lower. It is noticed however, that foundries are now more active, and with the expectations that steel mills will shortly increase operations improvement in the near future is looked for. In respect to red and yellow metals, the declines recently apparent in virgin copper have affected the purchasing in this division of the market. While dealers are reported to be carrying fairly heavy stocks, quotations remain unchanged. Following are the usual averages of dealers' buying prices for large quantities:

SCRAP MATERIALS

Gross Tons— Scrap Iron		
Heavy melting steel (Hamilton)	$11 50	$12 00
Borings and turnings	2 00	3 00
Rerolling rails	10 50	11 50
Scrap pipe	6 00	7 00
No. 1 railroad wrought	10 25	11 25
Steel turnings (Hamilton)	6 50	7 50
Agricultural malleable	10 00	11 00
Railroad malleable	11 00	12 00
Net tons—		
No. 1 cast	15 75	16 75
Stove plate	11 50	12 00
Grate bars	10 50	11 00
Standard car wheels	14 50	15 00
Scrap Metals.		
Heavy copper and wire	10 50	11 00
Light copper	8 00	9 00
No. 1 composition	9 00	10 00
No. 1 comp. turnings	6 00	7 00
Light brass	3 00	3 50
Heavy yellow brass	5 50	6 00
Heavy lead	4 50	4 75
Tea lead	2 00	2 50
Scrap zinc	4 00	4 25
Scrap Rubber		
Boots and shoes	2 25	2 50
Lumbermen's rubber boots	1 50	1 75
Solid tires	0 75	0 60
Auto tires	0 50	0 60

CHANGE PRICES ON CARPENTERS' ADZES

Toronto.

Carpenters' adzes are now quoted on easier price levels, the No. 1 being $21.00 per dozen, while lipped carpenters' adzes are priced $30.00 per dozen.

REVISED PRICE LIST ON HARNESS SUPPLIES

Toronto.

A revised price list covering harness and harness parts has been issued by the Hugh Carson Co., of Ottawa. A number of reductions are included in the list, in line with the raw material and production markets. Stocks of these products are generally described as low, and a resumption of activity at the new levels is generally looked for in the near future by both manufacturers and distributors.

COPPER AGAIN WEAKENS ON PRODUCTION NOTICE

Toronto

The weakening of copper is the feature of the current ingot markets, this situation having developed upon the announcement of certain producers to resume operations. The current demand for metals in general continues quiet, and the present situation shows little variation. Some metals, such as antimony and lead, are slightly firmer, the improvement, however slight, being a welcome spot in a sea of general depression.

COPPER.—Another recession has occurred in the primary copper markets both as regards interest and prices. This condition has been accentuated by the announcement of copper producers deciding to resume operations, this having an unsettling effect. The demand continues light, and recent offerings are freer, with dullness and weakness the principal noticeable factors on both the primary and domestic markets. Local quotations remain at 16½ cents.

TIN.—Confidence in this market has not increased to any appreciable extent, but prices on the primary centres are described as steady. Stocks are still ample however, and increasing supplies have tended to keep business quiet. The price of 34 cents continues to be the average local quotation.

LEAD.—The situation in lead is described as firmer, and the general position of this metal is stated to be stronger. The current demand has been slightly above the ratio of stocks, and producers are therefore in an improved position. The domestic quotations remain at $6.50.

SPELTER.—The demand for spelter has been without snap, and prices on the primary centres now described as slightly easier. Purchasers are still taking their requirements in hand-to-mouth lots. Local prices at the $6.50 level.

ANTIMONY.—This market has strengthened slightly, with an upward trend being noted in some quarters. The domestic demand has shown little variation, however, quotations remaining at 6 and 7 cents.

ALUMINUM.—This metal is moving forward very gradually to increased activity in certain directions, but whether this improvement will expand and become general is hard to indicate. Local prices are unchanged at 27 cents.

London Markets

LONDON, April 6.—Price revisions on the current hardware markets are mainly confined to reductions on such products as glass washboards, post hole augers, and clinch or bifurcated, and tubular rivets. Other primary markets remain fairly steady, with collections now described as good.

General hardware business in this district continues fair, with seasonable improvement looked for with the advent of better weather. The past unsettlement has restricted to some extent the movement of Spring lines, but many merchants are making special efforts in displaying and introducing seasonal goods, and betterment is anticipated during the ensuing weeks.

LOWER QUOTATIONS ON GLASS WASHBOARDS

London, Ont.

Glass washboards have been reduced in price this week, the extent of the decline being 50 cents per dozen. This change brings the average prices down to $7.50 per dozen. Dealers report a fairly brisk sale for these products, and are grouping them among seasonable lines.

POST HOLE AUGERS HAVE EASIER PRICES

London, Ont.

Post hole augers are now lower in price this season. The revised quotations on these seasonal products being as follows:

POST HOLE AUGERS—

Sizes, 8" $25.20 doz.; 9" $26.80 doz.; 10" $31.20 doz.

LOWER PRICES ON CLINCH AND TUBULAR RIVETS

London, Ont.

Easier price levels are now quoted on both clinch, or bifurcated, and tubular rivets. The new quotations on these products are as follows:

RIVETS—

Clinch No. 6 $2.75 per carton. Clinch No. 9B $1.35 per carton. Tubular, No. 600 $1.30 per carton.

MINOR FLUCTUATIONS NOTED ON TURPENTINE

London, Ont.

Some minor fluctuations continue to be evident in the primary turpentine markets, but these changes have not resulted in any reflection on local quotations. The current domestic levels remain at the revision noted in last week's report, with no additional changes having been announced.

TURPENTINE—	Imp. Gal.
1 bbl. lots	1 25
2 to 4 bbl. lots	1 24
5 gal. lots	1 40

VARIATION NOTED IN LINSEED OIL PRICES

London, Ont.

Following the weakness in the flax seed markets, some slight recessions have been recorded in certain quarters in linseed oil prices. Current quotations on the domestic markets, however, remain unchanged at the following levels with a fairly good sale being recorded:

LINSEED OIL—	Raw.	Boiled.
1 to 2 bbls., per gal.	1 10	1 18
3 to 5 bbls., per gal.	1 09	1 12
6 to 9 bbls., per gal.	1 07	1 10

Less barrels, add 15 cents gal.

DEMAND FOR NETTING NOW WELL UNDER WAY

London, Ont.

The demand for poultry netting is now well under way, and many merchants are featuring this product in their spring displays. Quotations remain at the recently revised level for this season, with the 1 and 2 inch mesh being quoted at list less 12½ per cent.

STORM CAUSES BIG DEMAND FOR PRUNERS

London, Ont.

Recent storms in this district have resulted in a big demand for tree pruners. These are usually needed at this season, but distributors state that this year the sale is unusually brisk. Quotations follow:

TREE PRUNERS—

Waters, 6 ft., $13.75 doz.; 8 ft., $15.60 doz.; 10 ft., $16.60 doz.; 12 ft., $17.55 doz.
Rochdale, No. 35, $19.55 doz.
Rochdale ,No. 38, $25.20 doz.

FENCE WIRE SHOWING BETTER ACTIVITY

London, Ont.

Fence wire is now described as moving well, with the recent downward price revisions assisting towards this end. Quotations on these products are as follows:

FENCE WIRE—

No. 9, galvanized, $4.10 per 100 lbs.; No. 12, $4.25 per 100 lbs.; No. 9, coil spring, $4.15 per 100 lbs.; Barb catch weights, $4.50 per 100 lbs.; Barb, 80 Rod Spools—2 point x 5"—$3.65 per spool; 4 point x 6"—$3.90; 4 point x 4"—$4.25.

SPECIAL DEMAND FOR FLASHLIGHT GOODS

London, Ont.

There has been an exceptionally large sale throughout this district during the past few days for flashlight and batteries. This demand was accentuated through some interruption in the light service, and the recent storms. Quotations on the Eveready Daylo line remain at list less 33-1/3 per cent.

IMPROVED MOVEMENT IN FENCE STAPLES

London, Ont.

Since the recent price reductions, distributors state that fence staples are selling well. The revised quotations are as follows:

FENCE STAPLES—

Bright, kegs—$4.15 per 100 lbs.; Boxes, $5.15 per 100 lbs. Galvanized Kegs, $5.15 per 100 lbs.; Boxes, $6.15 per 100 lbs.

SUDDEN CALL FOR OIL LAMPS AND LANTERNS

London, Ont.

There has recently been a remarkably good sale for gasoline lamps, and oil lanterns of all kinds. This is ascribed to the inclement weather, combined with some interruptions in the lighting service. Following are average prices on the Coleman line:

Lanterns, $7.50 each; lamps, with white shades, $8.75 each.; lamps, with tinted shades, $9.75 each.

Winnipeg Markets

WINNIPEG, April 6.—Hardware commodities are still on the decline, several lines which show easier levels this week being recorded below: nail hammers, machinists', masons', striking hammers and blacksmith sledges are lower in price. Also lawn mowers, clothes line pulleys, fry pans, general purpose wrenches, wrought iron nipples and Canada plate show similar changes. Business is improving slowly with an optimistic feeling regarding the Spring trade.

REVISED DISCOUNTS ON WROUGHT NIPPLES

Winnipeg.

Through a change in discounts, prices are made lower on wrought iron nipples. Following are the revised discounts:

NIPPLES—

Close and short up to 4 in., 50 and 10 per cent. 4½ to larger, 40 and 10 per cent.
Long, 4" and smaller, 55 and 10 per cent. 4½ in. and larger, 45 and 10 per cent.

PRICES ON CANADA PLATES ALSO REDUCED

Winnipeg

Easier prices have been recorded this week on Canada plates. Following are the revisions on these products:

CANADA PLATES—

Blued—18 x 21, $6.75; 18 x 24—$6.75; 20 x 28—$6.75.

DECLINE ON GENERAL PURPOSE WRENCHES

Winnipeg.

Lower prices are quoted on general purpose wrenches. Following are the new prices:

WRENCHES—(General Purpose).

No. 75—$1.85. per doz.; No. 76—$2.35, No. 77, $2.97, No. 78, $3.90, No. 79, $5.10.

FRY PANS APPEAR ON LOWER PRICE BASIS

Winnipeg.

Among the current market developments are reductions in prices on fry pans. The new quotations on these products follow:

No. 8 polished is now priced at 90 cents each, and No. 9 at 95 cents each.

LOWER QUOTATIONS ON CLOTHES-LINE PULLEYS

Winnipeg.

Lower prices are quoted this week on clothes line pulleys. Following are the revised prices:

CLOTHES LINE PULLEYS—

No. 58 Jap'd., 5 in. wheel $3.85 per doz.; No. 158 Galv., 5 in. wheel, $4.10.

REDUCTIONS APPEAR ON SOME LAWN MOWERS

Winnipeg.

Prices have been reduced on three lines of lawn mowers. Following are the new lower quotations:

LAWN MOWERS—

	12 in.	14 in.	16 in.
Whippet, 3 blade.....	6 95	7 50	8 25
Red Wing .....4 blade	9 25	9 85	10 50
B. Bearing 4 blade.....	11 50	12 00	12 75
			each.

HAMMER QUOTATIONS ON EASIER LEVEL

Winnipeg.

Hammers of various kinds are now placed on a lower price level. Following are the revised quotations on these products:

HAMMERS—

Machinists—

Up to and including 1 lb. $10.20
Up to and including 1½ lb. 11.70
Up to and including 2 lb. 13.50
Up to and including 2½ lb..... 15.15

Mason's hammers No. 43, 5 lb. and over, $18.70. Striking Hammers, No. 38, 5 lb. and over, $13.00 Blacksmiths Sledges, No. 37 C.P., 5 lb. and over, $13.00.

ADZE EYE, (Plain).—

No. 0—1½ $17.00 per doz. No. 1—1¼, $16.00 per doz. No. 1½—1, $15.75 per doz. No. 2—13 oz. $15.60 per doz. No. 22—1¼-lb., $13.25 per doz. No. 21—1, $12.70 per doz.

Bell Face—No. 6—1¼ lb., $16.00. No. 61½, 1 lb., $15.75.; No. 62, 13 oz., $15.60.; No. 65, 1¼ lb., $13.25 per doz., No. 64—1 lb., $12.70 per lb.

LOWER PRICE NOTED ON MACHINE OIL

Winnipeg.

A decline of six cents per gallon is recorded this week on Century Castor machine oil, making the Winnipeg price 46 cents per gallon.

Hamilton Markets

HAMILTON, April 6.—Firmness and activity are now evident in nearly all lines of seasonal hardware, and there has developed a steadier undertone to the markets generally, which is accepted as indication that the trade has settled down to a normal stride. The resumption of improved business at prevailing levels, has increased the confidence of both merchants and wholesalers in the outlook not only for spring, but throughout the summer months.

Another encouraging sign of better business in prospect, recently pointed out to Hardware and Metal, is the fact that the proportion of factory operations is picking up very well. It is stated that the prospects for the future in this direction are certainly more encouraging, and during the last month, orders are described as the best noticed for a similar period in over a year. The retail business also seems to be sensitive to the warmer weather, and the movement of spring goods has shown quite a little activity during the past few days. Many of the merchants in this section are preparing for a brisk season in baseball requisites, builders' hardware, sporting supplies generally, and numerous household lines.

Stiffening in Steel Prices

The periodical spells of chilly weather have handicapped contractors, farmers and private gardeners in their usual digging operations at this time of the year. These conditions have been reflected in the local hardware market by slightly retarding the movement of garden tools and similar products. This condition however, is looked upon as temporary, and with the advent of seasonal weather, a quick return to briskness in this line is generally anticipated.

Increased activity and improved outlook in the steel industry, which have been noted in recent market reports, have resulted in some price advances being announced in primary mill centres on various steel products. The chief of these revisions is galvanized sheets, the amount being $3.00 per ton, with a similar increase on black sheets. Other steel prices record considerable stiffening, and shading is now practically eliminated.

It is stated in domestic quarters that the upward tendency will probably be reflected in the near future, if the new higher levels become generally adopted. One sheet producer remarked that mills have been delivering under old contracts and at the expiration of same efforts to establish the increased prices are evident.

The collection situation is described as fairly satisfactory. Local retailers report a fairly brisk trade, although the month of March experienced a little slowness in certain lines due to the adverse weather. With improvement manifest in these conditions, an active season is generally anticipated.

Builders Hardware in Demand

Merchant customers of the wholesale hardware houses have not been in the markets in large quantities, but they are, however, constantly buying. There has been a fair improvement reported in the current demand for builders hardware. Present indications in the building industry point towards very brisk activity throughout the next few months, and with an extensive construction program under way, manufacturers and distributors of builders hardware are anticipating better trade in this direction. Many local merchants report very good business for this time of the year, and retailers are practically unanimous in expressing the opinion that much suburban building would be commenced just as soon as buyers become convinced that prices are steady. Some merchants feel that certain people have not yet built on account of the impression that high prices still prevail, and such prospects are waiting for them to come down.

Merchants, in general, however, are making firm efforts to eradicate these false impressions, and it is generally believed that just as soon as the average "man on the street" realizes that present price leve's represent fair replacement values, activity will become pronounced in building circles.

Pittsburg Markets

PITTSBURG, April 6.—Production of steel has undergone a noticeable increase in the past week or two, after having been practically stationary for two or three weeks. The rate of steel ingot production at present may be estimated at 31,000,000 to 32,000,000 tons a year, against 29,000,000 tons at the end of February, say 17,000,000 tons at the end of December, and 23,000,000 tons in October and November

Except for the inconsequential exception that a few pipe mills are stocking pipe to a limited extent, all the production of steel is based on actual shipping orders, so that production is a correct and prompt reflection of the orders received by mills. The only question as to the entire soundness of the steel situation is in connection with the possibility that buyers have lately been stocking to such an extent that in future they will not require as heavy shipments as they are receiving at the present time.

Iron and Steel Production. — That there has been some stocking is beyond doubt. Many of the orders have shown that buyers were rounding out stocks, while there is independent confirmation of the point in that anyone can observe that steel is not being actually consumed at the rate at which it is being produced and shipped. The present rate of production is in excess of the average rate in 1912 and 1913, the two best tonnage years before the war, with about 30,000,000 tons of ingots made in each year, yet it is plain that there is not the same degree of general industrial activity now as in those years. There is more dwelling house construction and more production of automobiles, but there is not nearly as much production of factories, bridges and skyscrapers, and not nearly as much railroad steel is being taken.

The stocking of buyers would be attributed to their having allowed stocks to go down to an unreasonably low level in view of increased Spring activity.

Gets Painters Help to Develop Prospects

Women Buying Increasing Amount of Paint—Hardware Merchant Doubles Orders for Paint and Varnish This Spring—Many Properties Yet Unprotected—Developing Spring Trade in Insecticides

BASING a buying policy on a careful survey of the outlook for building in the district, Purdom Hardware Company, London, Ont., is placing the largest orders for paints and varnishes this season that has ever been given. The firm has been one of the leading paint distributors of the city for many years and goes after business aggressively and consistently by attractive store and window displays and by effective advertising and its decision is therefore interesting.

"I am safe in saying that our orders for paints and varnish this spring will be twice as large as they ever were," said Mr. Purdom to Hardware and Metal. "Our paint business has been growing steadily for many years and it is now an all year round trade with us. The business right through the winter has been perhaps the best we have ever had and I am looking for a record spring and summer trade. I am backing my judgment by placing the largest orders we have ever placed and I have already added twice to those orders, increasing them substantially. To my mind there is absolutely no question about it, 1922 will be the greatest paint and varnish year we have ever had, and I believe the same thing will hold true in practically every part of the Dominion. The Save the Surface Committee has gone after the matter aggressively. They have expended large sums in national advertising and in helping educate the public and there is no question about the results. We have had no let-up in our paint business for many months. Women are bigger buyers than ever before. We have sold record quantities of paints for inside work and for renovating furniture. Property owners are realizing the value of paint as never before and both city men and farmers are protecting buildings, implements and other property.

"In spite of all that has been done there is a large field yet. It is really amazing the number of houses, stores and other buildings that are to be found needing paint protection. We frequently get good business by sending a painter to some property owner and pointing out to him the real need of painting his home or other buildings. Very often it is a case of pure neglect, the man being busy or putting the work off. At other times it is a question of not realizing the protective value of paint. We depend mainly for results however on our store and window displays backed by attractive advertising and also on the service we can give in our paint department. People appreciate this. Very few of them really know the differences in paints, or the best ways of preparing the job or the proper methods of applying the paints and varnishes, or even the best brushes to use to get the best results. This is an important matter. It means either a satisfied or a dissatisfied customer. It usually means also the loss of a customer or the holding not only of his or her good will and future business but of a number of their friends who they will send to the store if satisfied. Service always pays and pays well. People appreciate thoroughly being told about the best ways of painting and varnishing and there is no better advertisement than a satisfied customer. It is easy to keep them satisfied and coming back for more by always considering their interests and telling them just what you would do if the work to be done were your own."

Increasing Sale of Insecticides.

From a recent survey of conditions in various parts of Canada it is evident that from year to year the sale of insecticides through the hardware store increases. The small cost of spraying materials, as compared with increased yield and better crops, is realized more and more by the farmer or fruit grower. Manufacturers of these materials state that sales through hardware stores have shown a decided increase in the past few years, which goes to show that the hardware trade has profited by more consumption on the part of producers. The reason for this is undoubtedly because the hardware merchant is in closer touch with farm custom in his community than other branches of the retail trade. The farmer purchases a good part of his general requirements from the hardware store, and in this case spraying machinery and other equipment is distinctly a hardware line.

Individual stores that have gained through the more extensive use of insecticides may be credited themselves to a large extent for this increased business. Farm papers and other periodicals have done much in the way of convincing the grower, as well as other educational propaganda issued by those interested in the promotion of this branch of the farming industry, but the average hardware store has not been remiss in its duties of supplying needs. It has done its share in the promotion work and has gained by so doing. Featuring insecticides when the season approaches through window and store displays, distributing literature, supplied by manufacturers, to rural customers, and a general campaign to further sales, have brought results.

Paris Green.

It is only in recent years that insecticides, other than Paris green, have been sold in any quantity in Canada. Not that dry arsenate of lead, dry arsenate of lime and other combination sprays have supplanted the old reliable destroyer, because Paris green is still in general and increasing use. Its use on potato and other plants is still extensive, and its sale is also to the town

Warning Concerning Paint and Oil Measures

Chief Inspector of W. & M. Warns Hardware and Metal Readers Against Danger of Confusing Canadian and U. S. Measures

WITH the active season for the sale of paint, oil, varnish, etc., at hand care must be taken by merchants to guard against the danger of making purchases on the basis of the United States wine gallon and thinking that they are buying on the basis of the Imperial gallon. Some interesting details in this connection have been secured by Hardware and Metal from E. O. Way, Director of Weights and Measures, Ottawa, as follows:—

"The standard measures of Canada are the Imperial gallon of 277,274 cub. ins., quarts and pints, corresponding.

"The American standard measure is the old winchester or wine gallon of 231 cub. ins. and therefore practically 20 per cent. smaller.

"The exact relation is:

$$\frac{231}{277} = \frac{46 \times 5}{40 \times 6} = 5 : 6.$$

"Paint and cognate products are put up in pints and quarts and also in pound tins, I believe. In examining price lists, merchants are likely to 'fall' for the cheaper American quotations, forgetting that the quantities offered are less than the Imperial quotations of Canadian houses.

"Merchants should also know that they cannot sell such products if marked 'U. S. Standard Pint' etc.—because this constitutes sales by an illegal denomination. Such markings must be obliterated from the tin and the article sold as a 'tin,' or if reference to measure is made, it must be quoted at 5-6 pint, quart or gallon as the case may be.

"Wholesalers and merchants therefore should procure supplies from Canadian houses or call for Imperial measure if contracting with an American house."

Paint Trade Notes

Pratt & Lambert, Inc., varnish makers, are to be represented in Spain, Holland, Denmark, Sweden, Norway and Finland by Mr. Kurt Munzinger who sailed April 1 on S. S. La Lorraine for Havre, France, en route to Barcelona, Spain. In addition to having represented various houses in the above countries, Mr. Munzinger has travelled on business through European Russia as well as in Belgium, Italy, Switzerland, Germany, Austria and France.

The Hamilton plant of the Canadian Libby-Owen Sheet Glass Co., commenced operations early this year. It is now reported to be producing at full capacity, and orders on hand warrant such operations being maintained for some considable time.

GET PAINTERS' HELP TO DEVELOP PROSPECT

Continued from page 52

and city gardens, both large and small. Apart from this it has been found very effective against the grasshopper plague in the Western provinces.

A window trim is recalled that brought very favourable results in the sale of Paris Green. The merchant used a cardboard pyramid in the centre of his window, and sprinkled the poison lightly over this to give the appearance of solid Paris green. Just above this was hung a large poster with a potato bug drawn on it. At the corner of the sign a patch of green paint showed what the bug was after. Sprinkling cans only, furnished the rest of the display. It was a very simple window trim, but brought the desired results.

Other Insecticides.

As stated above, the past few years have brought the more extensive use of arsenate of lead and arsenate of lime. The former is perhaps the next best seller to Paris green in the hardware store, used both mixed with water, and dry, it is also effective on garden plants. Arsenate of lime, or dry lime sulphur is more extensively used for tree spraying, and this with other combination sprays has found a more ready sale because of the increased spraying in all sections.

OIL AND GASOLINE LAMPS ARE POPULAR

London, Ont.—The recent storms experienced throughout this district, combined with some interruptions in the electric lighting services, resulted in an extremely brisk demand for oil and gasoline lighting appliances. Supplies of these products have now been practically exhausted, and many merchants report that they would have been able to dispose of much larger quantities.

ONTARIO ASSESSMENT ACT AMENDMENT, 1922

In the 1920 session of the Ontario Legislature, an amendment of the Ontario Assessment Act was passed having the effect of taxing dividends derived from shares in the stock of corporations carrying on a mercantile or manufacturing business, which corporations were already assessed under the "Business Tax." The intention when the Business Tax was introduced in 1904, undoubtedly, was that it should cover everything and a specific exemption was continued until 1920. The amendment striking out the exemption was strenuously but unsuccessfully opposed by the Legal Department of the C. M. A.

An amending Bill striking out the 1920 amendment and restoring what was undoubtedly the original intention, has now been prepared by the C. M. A., and has been introduced in the Provincial Legislature. The Bill also contains four other amendments which are strongly advocated by the Legislation Committee, viz.:

1. Restoring the provision in the Assessment Act that dividends derived from shares in the stock of mercantile or manufacturing corporations shall be exempt from municipal assessment.

2. Defining "Retail" for the purposes of "Business Assessment."

3. Providing:—

(a) That Carrying charges incurred by shareholders to the extent of interest paid on borrowed money on the stock or shares, which provided the dividends shall be allowed as a deduction from the amount of the dividends received.

(b) That subscriptions to charitable and educational objects shall be allowed as deductions from income to the extent of 15% of such income per annum.

4. Providing that annual returns by Companies may be made to the various municipalities in Ontario at one date.

H. P. Hill, K. C., M. P. P. for Ottawa, has agreed to sponsor the amending Bill.

HAMILTON FIRMS REPORT INCREASED BUSINESS

The Dominion Sheet Metal Corporation, Ltd., Hamilton, resumed full operation Monday, turning out seventy-five tons of galvanized steel sheets per day. For the past eight weeks the plant has only been operating from fifty to sixty per cent. of capacity.

Increased business from the principal Canadian points is said to warrant increased production. An encouraging feature is the amount of export business that is being handled, this coming from European countries as well as from Great Britain.

The Collins Never-Fail Products, Ltd., Hamilton, also reports active business in poultry and spraying supplies, the new plant now working six full days a week.

INCORPORATION

Coughlins, Ltd., head office Toronto, capital $40,000, to manufacture and deal in polishes, wax, cleaning preparations, shellac, varnish, oils, etc.

Here's An Opportunity For Good Spring Business

Nowadays nearly every farmer and fruit grower is fully alive to the importance of timely and efficient spring spraying. With full crops of prime quality as their objective, they recognize the insect pest as the one great menace to success and effective spraying as the only certain means of combatting that menace.

Right here is your opportunity to secure very remunerative spring business. A good stock of

C. P. INSECTICIDES

will be just the thing to swing the local demand your way and to increase your trade and your prestige among the farming and fruit growing community.

As the quality of the spray is highly important, it behooves the dealer to stock and recommend Canada Paint Insecticides, which are easy to apply and control the insect pest effectively without injury to foliage or fruit.

Every C.P. Insecticide dealer will find his selling efforts strengthened by a convincing consumer advertising campaign. Full particulars and prices will be mailed on request.

Weekly Paint Markets

Montreal

MONTREAL, April 6.—A further drop of two cents per gallon on linseed oil furnishes the price development of the paint markets this week. Contrary to expectations of some well informed, the flax market continues of a slightly easier tone, not withstanding the fact that reports still indicate a shortage of seed is not unlikely. Local oil demands continue to improve, although on outside markets the demand is described as decidedly "off" during the past week or so. This condition, coupled with the fact that large supplies of European oil are now entering the American market, is said to be the cause of the present movement, the undertone of the market being fundamentally strong. Turpentine prices are unchanged this week and the tone of the market is slightly improved. With consuming demand now practically at hand, stocks, both locally, and in Southern circles, are none too heavy. Fresh receipts continue of a light nature, and for this reason a fairly steady situation is looked for until the new crop at least. This, it is stated, will in all probability make its appearance towards the latter end of the month.

Quotations in general on shellac are unchanged, although a few firms, who were quoting somewhat lower than others, have revised their prices upwards, so that there is not the wide range in prices on the local market. The undertone of this market is still very strong, and importers view the situation, insofar as further supplies of gum shellac are concerned, with no little concern. Unless early relief can be found for the situation in India, a shortage of this product may develop when the demand becomes most active.

Paint and varnish manufacturers now ascribe the movement of their products as very active, and quite satisfactory for the present season. Earlier indications point to a good painting season, and already in many sections much of this is now commenced. With dealers' stocks comparatively light, it is felt that repeat orders will be necessary before the season advances very far, which will mean an active season for paint manufacturers throughout.

FURTHER DROP IN LINSEED OIL QUOTATIONS

Montreal

With a further recession in flax seed prices, quotations on linseed oil record another drop of two cents per gallon. This price decline brings raw oil to the even dollar mark in one barrel lots. The recent easier trend in this product comes as more or less of a surprise to some well informed, who predicted a few weeks ago that linseed oil would experience a steady to firm market throughout the coming season. Opinions were based at time on the recognized shortage of flax seed, the Argentine crop failing to produce requirements sufficient for the gradual increasing demand. In spite of this however, the market has failed to maintain a firm position, and in the past three weeks an easier tendency has crept in.

While demand is reported as steadily improving, this is given as one of the causes of the present movement. Buyers are still very conservative in their purchases, maintaining the hand-to-mouth method, and although the busy season is practically at hand, there is a lack of interest for future supplies.

On the American markets demand for both seed and oil is described as "off" during the past week, in spite of a fundamentally strong situation. Crushers are showing an utter lack of interest notwithstanding constant reports of a shortage, being forced into this attitude through buyers now showing an interest in the importation of foreign oil. Therefore, while there is every cause for a firm tone in the market, European competition is now playing no small part in the situation.

Locally, crushers are apparently little concerned over the possible appearance of European oil on the market, and claim that this competition can be met from the present standing of the flax market. Revised quotations are the following:

LINSEED OIL—	Raw.	Boiled.
1 to 2 barrel lots, per gal ...	1 00	1 02
3 to 5 barrel lots, per gal....	1 98	1 00

Less barrels, add 10 cents per gallon.

TURPENTINE MARKET IS SOMEWHAT STEADIER

Montreal.

Current quotations on turpentine remain unchanged for the week, with the undertone of the market said to be on a steadier basis than in the few weeks previous. The recent easier tone seems to be well over for the present at least, and with increased demand in the following weeks the market should continue in a steady state. Receipts in Southern markets are still light with stocks at a very low ebb for this season of the year, and this factor also will undoubtedly tend to steady the market from now until the new crop. Some speculation now exists as to the time of the appearance of the new crop, but with weather conditions favorable it is expected toward the latter end of the month. This usually has an unsettling effect on the market, and an easier trend following would not be surprising for a time, but owing to an expected active season, local importers are of the opinion that demand will counteract any tendency caused by crop conditions. Locally, demand is steadily increasing, and importers are finding a ready sale for all available shipments. With the active painting season now in sight, consumption of this product should require a steady movement throughout the ensuing weeks. Following are unchanged local quotations:

TURPENTINE—	Imp. gal.
1 barrel lots	1 21
2 to 4 barrel lots, per gal.	1 20
Broken lots	1 31

PAINT AND VARNISH SHOW FAVORABLE PROGRESS

Montreal.

"We are very busy;"—"paint and varnishes are very active;"—"sales are attaining a favorable record;"—are the expressions of paint and varnish manufacturers in describing the present trade. The movement of these products has been well maintained since the opening of the year, with increased activity noted in the past few weeks. March closed with sales records comparing favorably with last season, and it is felt that the present month, and those immediately following will bring forth a record season. As soon as the weather permits outside painting, a series of repeat orders is expected as dealer stocks are by no means heavy, and this condition was experienced last year. Undoubtedly there will be a larger amount of painting this year, and dealers will find in the majority of cases that bookings are not ample to carry them throughout the spring period. The market in general is steady, with little signs of a revision until after the active season at least.

The same condition exists on white lead in oil, current business showing a steady increase with quotations steady to firm.

Barrett Roofings, Cements Industrial Paints etc.

It Always Pays to Keep in Stock These Popular Barrett Products

WISE dealers and their customers all over the Dominion have learned that the name "Barrett" signifies quality,—that Barrett products are backed by long years of manufacturing experience, and that each of them is the best on the market for its particular use. Here are two of these famous products which are fast sellers everywhere. It will pay you to keep them always in stock.

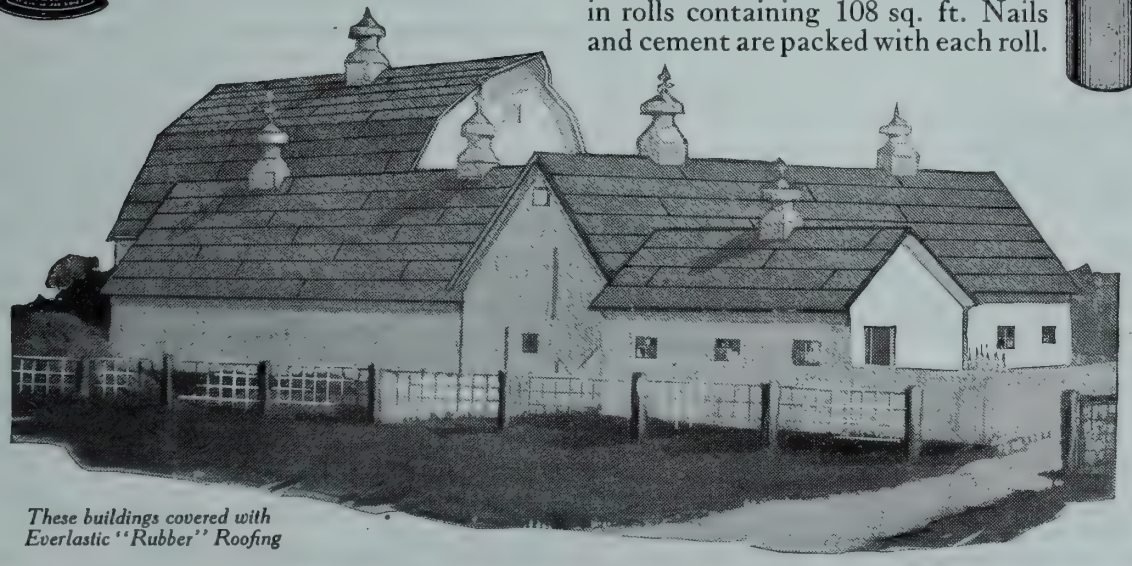
Everlastic Liquid Roofing Cement

Unequalled for resurfacing worn-out prepared and "rubber" roofing. Easily applied, and dries quickly into a tough, durable coating. Proof against weather, water, acids, alkalies, and fumes. Comes ready for use in containers ranging from 1-pint tins to 40-gallon barrels and steel drums containing 43 gallons. Our consumer advertising has created a big demand for this product. It's a fast seller and a big profit maker.

Everlastic "Rubber" Roofing

This is a popular-priced roofing of unusually high quality. It is made of high grade waterproofing materials, and will give your customers sure satisfaction.

There is a big market in every community for this roofing, and during the past few years its sales have increased enormously. Everlastic "Rubber" Roofing comes in 1-ply (light weight), 2-ply (medium weight), and 3-ply (heavy weight), in rolls containing 108 sq. ft. Nails and cement are packed with each roll.



These buildings covered with Everlastic "Rubber" Roofing

MONTREAL PAINT MARKETS

Continued from page 56

SHELLAC PRICES INCREASED IN SOME QUARTERS

Montreal

The continued firmness at primary centres in the shellac market has resulted in some firms increasing their quotations, while others maintain former levels. For some time past there has been a wide range in local prices, some firms quoting as much as 50 cents lower than others. This condition is now considerably improved, although some variation still exists. The situation in primary circles shows little, if any, improvement, and only limited supplies of gum shellac are available. Importers still claim that a shortage in the following weeks is not unlikely, as demand improves from week to week, and no signs of relief. Quotations on outside markets register an advance, with chances of further strength altogether probable. Following are quotations most general on the local market:

SHELLAC—

Orange shellac, in barrels	4 60
Do., in one gal. jugs	4 90
White, in 5 gal. jugs	5 10
Do., in one gal. jugs	5 40

Toronto

TORONTO, April 6.—The reduction of two cents per gallon in linseed oil quotations provides the premier change in the current paint markets, but the turpentine situation also attracts attention. The latter product now has developed a firmer undertone which is undoubtedly due to the shortage of ready supplies. Local stocks are reported to be nearly depleted, pending the arrival of new shipments from the south, while the primary distributing centres record the fact that stocks are in a lower condition than has been evident for some considerable time. This scarcity of turpentine is expected to remain for a week or two until the arrival of the new crop towards the latter portion of the current month relieves the situation.

Linseed oil reflects the trend of the flax markets, while at the same time indicating the moderate call for supplies being experienced. While a fair amount of domestic oil is being purchased, it is stated that large consumers are cautious in their attitude regarding new orders. Easier prices have developed on both eastern and local markets, while a quotation several cents below the average level has also been recorded here.

The movement of paint and the allied products is described as brisk, and both manufacturers and distributors of paint products are showing increased activity week by week. Dealer stocks throughout the country are considered low, and while preliminary orders have placed Spring stocks in fair shape, the consumer demand is expected to bring forth numerous repeat orders extending throughout the current season.

LINSEED OIL PRICES RECEDE TWO CENTS

Toronto

Another recession to the extent of two cents per gallon has been recorded in linseed oil quotations, this change bringing the nominal price level to $1.05 for raw and $1.08 for boiled in one and two barrel lots. It is noted, however, that some prices considerably lower than these are evident locally, a price of $1.01 being recorded. The general oil situation, however, reflects the trend in flax seed, recent reports on seed while showing a slightly easier tone, also still indicate some possibilities of lacking a ready supply when increased demand becomes evident in the near future. Other market centres report the current demand for oil to be just moderate, and this condition, coupled with the arrival of larger supplies of European oil, is stated as contributing towards the present situation. The linseed market has been featured by the light consuming inquiry, while competition is described as keen. In view of the prevailing prices for seed there is stated to be little inducement to make further price concessions on oil. The general undertone is described as barely steady. Following are the revised quotations:

LINSEED OIL—

	Per Gallon Raw	Boiled
1 to 2 barrel lots	1 05	1 08
3 to 4 barrel lots	1 04	1 07
6 to 9 barrel lots	1 02	1 05

Less barrels, add 15 cents per gallon.

PAINT BUSINESS ON SOLID FOUNDATION

Toronto.

Business in the paint industry in general appears to be on a sound foundation for future expansion. Recent improvement in the volume of current trade, especially in paints, varnishes, and similar products, has led manufacturers and distributors to anticipate a good season. In some cases, the market is described as spotty, but on the other hand some large dealers report that they are enjoying a good business, not only from old customers, but also through new channels. There is a sufficient element of competition to stimulate selling organizations into general activity. Contrasted with quotations in effect last Spring, the prevailing prices represent a considerable decline, and many merchants are basing their appeal to consumers on this reduction. For the present, prices are steady and unchanged levels prevail on paint products generally.

FIRMER TONE NOTED ON TURPENTINE MARKETS

Toronto.

The tone of the turpentine market has improved somewhat during the past few days, and fresh receipts are of a very light nature. This situation, combined with a temporary shortage of current supplies, both on the domestic and primary centres, has caused the firmer attitude noted in this product. Such a condition, however, will evidently be relieved with the arrival of the new crop during the latter portion of the current month. In the meantime, a number of local distributors of turpentine have advanced prices five cents per gallon, which brings the quotation in one barrel lots up to $1.30 per gallon. However, other sources of supply are still maintaining the previous levels, which are quoted below.

Stocks of turpentine on hand at Savannah and other southern points are described as exceptionally low, the receipts during the previous three months of the calendar year being smaller than during the same period for the last eight seasons. This condition is reflected on the local market, one distributor stating that stocks were practically exhausted and a scarcity was expected to be evident for a week or two. New shipments are expected to arrive almost daily, and while other dealers report some stocks available, these are admittedly also in a low state.

TURPENTINE— Imp. gal.

Turpentine steel drums galvanized, 5c per gallon less than barrel price. Drums charged $10 each, returnable in 30 days, freight paid.

All quantities sold f.o.b. Toronto, Hamilton, London, Brantford, Collingwood, Guelph Windsor, or Montreal but freight may be equalized from any of these points.

Car load lots of 70 bbls. Price on application.

1 barrel lots	1 25
5 gallon lots	1 40
2 to 4 barrel lots	1 24

Less than 1 barrel lots—15 cents per gallon extra

MAY BE TURNING POINT IN STEEL

(Continued from page 35)

than since the early months of 1916. It is noted that on January 1, 1914, bar steel prices on the domestic market were $2.25. The existing level of $2.75 base, compares exceptionally well with pre-war quotations, and a similar condition on other steel products. While little variation has been noted from week to week since the commencement of the present year, yet prices have been steadily on the downward grade. This applies to black and galvanized sheets, corrugated iron and other products. Speculation in steel centres, therefore, is centered around the problem as to whether the existing tendency will be merely confined to a "marking time" in the process of reduction, or may develop until constituting a "halt," however temporary, to easier price levels on basic materials of this nature. The lack of ready relief from high transportation rates, labor charges and general production costs, has undoubtedly retarded the easy liquidation in finished steel products, while at the same time acting as a barrier to periodical recessions in mill prices.

Hubert R. Johnston, recently associated with Butterfield and Co., Rock Island, Quebec, and formerly with E. and T. Fairbanks and Co., Ltd., Sherbrooke, Que., is commencing business as a manufacturers' agent, covering the province of Quebec.

Effective Cooperation

THE three newspapers you see illustrated here belong to the MacLean Technical Group.

If you are a manufacturer of equipment that can be used in machine shops, metalworking plants, power plants, or foundries, one or all of these papers can give you effective cooperation in increasing sales.

Tell the consumer about your products in the columns of these publications. The men who buy industrial equipment read them. Your products may have advantages over other products of their kind.

Tell the consumer what they are. Create a desire in his mind to buy your lines when ordering from the dealer.

An effective message in MacLean Technical Newspapers will prove effective cooperation for the promotion of sales, and the group you can use to greatest advantage includes:

CANADIAN MACHINERY
AND MANUFACTURING NEWS

POWER HOUSE

CANADIAN FOUNDRYMAN
AND METAL INDUSTRY NEWS

Canadian Machinery serves the iron and steel and general metal working industries.

Power House serves steam, electrical, water and gas power plants.

Canadian Foundryman serves the grey iron, steel and non-ferrous foundries.

Each of these papers covers their respective fields almost exclusively. They are "Canadian National" in scope and are read by the men you are anxious to reach—proprietors, managers, superintendents, purchasing agents and foremen. Attract the attention of these men with a strong appeal in their favorite technical newspaper—the MacLean service staff will assist you.

Tool Buyers Say The Starrett No. 146 is the Best Hack Saw Frame Sold at its Price

Show your customers the wide, rigid stock. That's a feature that makes a strong appeal to men who know hack saw frames. They know a frame like that won't cramp when the saw is tightened up, and won't tremble when it's used.

Show your trade the wide scope of this saw frame, too—how it takes 8, 9, 10, 11 and 12 inch saws—how it may be set to cut in any one of four directions, and tightened by simply turning the handle. Call attention to its fine finish—its polish and nickel plate. It's a hack saw frame that any mechanic would be pleased to own.

Starrett Hack Saw Frame No. 489 is another big value. Has extra rigid back made of heavy tubing. The frame telescopes into the tube engaging slots so spaced as to permit the frame to take saws 8 to 12 inches in length. May be set to cut in either of four directions. Fitted with "Easy Grip" hardwood handle and finely nickel plated.

OWL BRAND ROOFING

How is Your Stock?

Already we are having repeat orders, which indicates two things—an early demand and Owl Roofing first favorite. We say advisedly—don't let your stock run too low before re-ordering, because it's hard to say just how the supply may cope with the demand—present indications foretell great building activity, so get ready in real earnest to meet your trade requirements and you'll reap big profits. If you don't know about Owl Brand Roofing—write at once for samples and our proposition to dealers.

Write To-day for Samples and Prices

Owl Brand Strip Slates — size 36 x 12, red and green. They save time and will not curl.

Owl Brand Slate Surfaced Roofing, red and green, 108 square feet, 85-pound roll. Write for samples.

Owl Roofing is made in 1, 2, 3, 4, 5 ply—is fire resisting and free from taint in rain water. Each roll contains 108 square feet, 32 inches wide—enough to cover a space 100 feet square and allow sufficient lap. Nails, cement for seams and instructions for laying are included.

This is Owl Brand Roofing Year

TINKER TOM'S TALKS.

No. 353

Three Of A Kind

A mighty good hand for any dealer or user to "draw to" is

"PREMIER" GALVANIZED STEEL SHEETS

Made in Canada continuously since early 1915.
A good, workable, well-coated steel sheet.

"PREMIER" COPPER BEARING GALVANIZED SHEETS

The regular open hearth sheet with copper added in the making.
Gives long service at small cost.

TONCAN METAL GALVANIZED SHEETS

These pure iron time-tried sheets now carry a copper addition, thus doubling their power to resist corrosion.

Ask your jobber for prices. Now is the time to contract.

TINKER TOM.

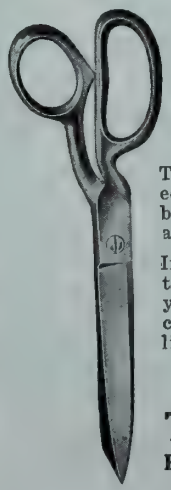
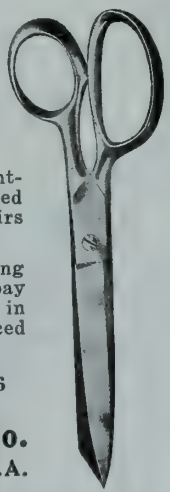
TRADE "Acme" MARK **SHEARS**

Strong Keen Durable

"Acme" Cast Shears and Scissors excel in quality and finish for low-priced cutlery. Acme blades are strong and durable, with keen, sharp cutting edges, familiar to all who have sold or used them. There are good sales for hardware merchants on Acme



SHEARS
SCISSORS
TINNER'S SNIPS



That "Acme" Shears are wanted, liked, and sold, is indicated by the fact that 35,000 pairs are produced daily.

If you are not already handling the "Acme" line it will pay you to do so, particularly in conjunction with a high-priced line.

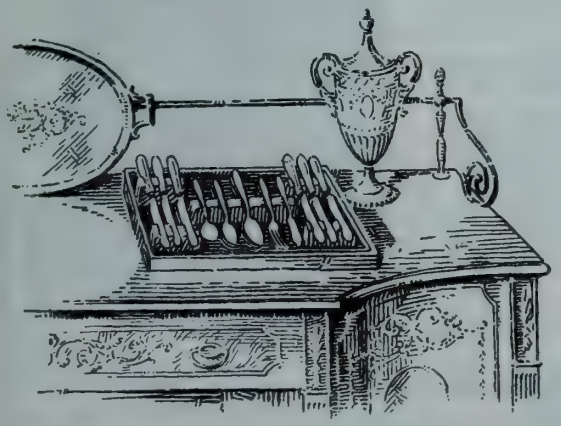
"Petit Buffet"
IN COMMUNITY PLATE



The new Community "Petit Buffet" is the most striking display feature ever offered to the silverware trade. It is given free when ordered with a 26-pc Set Community Plate.

This fascinating "Petit Buffet" will delight the housewife. Not only is it beautiful in itself, but it is also a practical, permanent container for the silverware. It slips easily into the Buffet or Sideboard drawer.

The 26-pc Sets with the "Petit Buffet" can be sold at the same price as a bulk set,—a big saving over the same 26-pieces with any chest.

Your wholesaler can supply you.

Q. D. Slip Covers are easily attached; can be removed in a few moments; are washable and quite inexpensive; they give a car the final touch of distinction; the Invincible Line of Covers and Curtains carried by us contains every conceivable requisite which can be used on any make of Automobile.

Let us know your requirements

Have you received the last issue of the Net Price List applying to this Catalog? If not, a postcard will bring it to you.

The J. H. Ashdown Hardware Co., Limited

Calgary WINNIPEG Saskatoon

We back you up

If for any reason whatsoever the user of a

NORTH STAR BATTERY

is not entirely satisfied, we stand the loss. It is this kind of service that is helping to establish the growing preference for North Star dry cells and multiples.

All North Star Multiples are equipped with our exclusive improved terminals. They ensure perfect contact and prevent loose connections.

Every battery bearing the North Star label is guaranteed to give full satisfaction to the consumer. Should a battery prove defective, simply satisfy the merchant from whom purchased. He is authorized to replace it.

TORONTO PUMPS

HARDWARE & METAL is the only weekly hardware paper in Canada and is read by practically every worth-while buyer, both wholesale and retail, in Canada. HARDWARE & METAL is the logical medium to use if you have a message for the Canadian hardware trade.

THE STANDARD BASEBALL OF THE WORLD

TO be sure it is the REACH ball. Wherever baseball is played the CORK CENTER BALL is used. The season is starting in with a rush and the dealer who is not prepared will undoubtedly lose business both on sporting goods and the other lines he handles. Why? There is no particular class which purchases athletic supplies. There is the professional, the semi-pro, the amateur, the kid, the boy's parents who purchase a ball and glove for him so that he might get out in the open, people in every walk of life. Is not such a vast scope of purchasers worth while preparing to supply? Every dealer knows conditions best in his own locality but if there is any information or service which we can render do not hesitate to write us.

THE BUYERS' GUIDE

If what you want is not here, write us, and we will tell you where to get it. Let us suggest that you consult also the advertisers' index, facing the inside back cover, after having secured advertisers' names from the directory. The information you may desire may be found in the advertising pages. This department is maintained for the benefit and convenience of our readers. The insertion of advertisers' headings is gladly undertaken, but does not become part of any advertising contract.

Hardware and Metal Circulation Dominates in Western Canada Because:—

Hardware and Metal is the *only* hardware paper giving a weekly market service from Winnipeg.

Hardware and Metal is the *only* hardware paper giving a weekly news section for Western Canada.

Hardware and Metal is the *only* hardware publication giving the trade in Western Canada a weekly market service from Montreal, Toronto, Hamilton, London and Pittsburgh —and Westerners are even more interested than any others in the activities in the primary markets of the East.

Hardware and Metal is the *only* publication in Canada giving the Western hardware trade a weekly service covering the activities of the hardware trade in a National way.

Hardware and Metal is the *only* hardware publication giving the Western Canada trade a weekly market service on paints, oils, varnishes, etc.

Hardware and Metal is the *only* hardware publication giving the trade any Western Canada weekly information regarding, "What Other Merchants Are Doing," Legislation, New Hardware Goods, Illustrated Articles on Display, Advertising, Etc.

Hardware and Metal during the twelve months of the year, supplies the Western Canada hardware trade with more market information, more new goods information, publishes more illustrations of window displays, store interiors, and retailers' advertisements than all the other Canadian hardware trade publications combined.

Incidentally, Hardware and Metal is the *only* hardware trade publication in Canada that will supply you with an Audit Bureau of Circulations statement, thus proving what it really has in the way of circulation in Western Canada.

MORAL—*If you are interested in Western Canada trade, advertise in the paper that is read by the Westerners and has gained its present dominating position in the West, as well as in other parts of Canada through 34 years of honest effort to give the trade each week the best in hardware trade newspaper service.*

HARDWARE AND METAL

"Canada's National Hardware Weekly"

143 University Avenue, Toronto, Canada

Montreal Branch, Southam Building **Winnipeg Branch, Confederation Life Building**

Published every Saturday since 1888. The only weekly hardware paper in Canada and the only hardware paper in Canada that gives you a circulation statement audited by the Audit Bureau of Circulations.

If interested tear out this page and place with letters to be answered

No. 208 Torch.
List price each $17.00.
Ask for Discount.

Make Work a Pleasure

Over 60% of all Burner troubles are caused by the old style Burners having Sharp Pointed Needles that quickly enlarge the gas orifice. Not so with the C. & L. Improved Double Needle Burner as both Needles are Blunt. Orifice is cleaned by upper Needle. Flame regulated by lower Needle. Jet Block is removable. Over 300 degrees more heat produced in No. 208 than any other quart Torch made, with less expense for upkeep. Jobbers supply at factory prices. Ask for a catalogue.

Why Hardware Mailing Lists Are Not Complete

WE ARE frequently asked why many of the so-called complete hardware mailing lists are incomplete and miss many hundreds of the best hardware stores in Canada. There is a reason.

If you take a complete list of the hardware firms rated in Dun's and Bradstreet's as hardware firms, you will be short upwards of 900 of the best hardware firms in Canada. This is due to the fact that upwards of 900 of the leading hardware stores in Canada, are the hardware sections of department or general stores. There is nothing in the commercial rating books to indicate which of the many thousands of department or general stores have hardware sections. For instance, in one Western Canada town there are four general stores and one exclusive hardware store. One of the general stores has a strictly modern hardware section. The only way in which you can find out which one of the four stores has this department, is to visit the town and call on all stores. The same condition exists in hundreds of other places in Canada. The cost of doing this for one mailing list or one publication would be absolutely prohibitive. The MacLean Publishing Company, however, have fifteen publications, and send crews of salaried circulation men into every city, town and hamlet in the Dominion from Coast to Coast. Representing fifteen publications these men call on practically every business man in a town or city. The MacLean Publishing Company have been working on this plan for upwards of 30 years. The result is that to-day HARDWARE AND METAL has as paid subscribers, in addition to exclusive hardware stores, upwards of 900 of these strictly modern, up-to-date hardware sections and very few of these names are on mailing lists, with the exception of the list used to mail out our paper.

Another important point is that on our mailing list several hundred copies go addressed personally to the men in charge of the buying. Circulars sent from the average mailing lists merely go to a firm name along with a large quantity of other circular matter and is somewhat of a hit or miss proposition. With HARDWARE AND METAL there are hundreds of cases where the name of the buyer also appears along with the company address.

Subscribers to HARDWARE AND METAL buy our paper because they need it in their business and because they study it each week for news

of the trade, new goods, market information and for additional information regarding goods which the merchants are carrying in stock. Several hundred merchants prepare their advertising in their local papers, from information which they take out of the advertisements in HARDWARE AND METAL. Window trimmers in hardware stores study HARDWARE AND METAL for ideas on seasonable goods which they can display in the show windows. The men behind the counter are among the closest readers of HARDWARE AND METAL because in it they find a vast amount of information regarding goods which they are called upon to sell each day. Dozens of leading jobbers' salesmen carry copies of the current issue of HARDWARE AND METAL along with their catalogs and go through these issues with their customers. One of the leading wholesale buyers, (name on request), stated that he "much preferred to buy lines advertised in HARDWARE AND METAL because he found that these lines were the quickest sellers and were the lines in which the travellers took the greatest interest."

It is therefore of the utmost importance that any advertising matter you wish to place before the trade, should reach as many of these hardware men as possible. It is an easy matter to claim that you cover the whole hardware trade but HARDWARE AND METAL knows from thirty-three years' experience that it takes many years of honest, intelligent effort to get a complete list of the hardware buyers in Canada. A large staff is also required to keep lists up to date, record business changes, new firms, etc. We offer you the most complete list through the advertising pages of HARDWARE AND METAL.

The hardware trade is undergoing rapid changes. With each succeeding year come new developments. It is our business to keep in close touch with the trade. We have a vast amount of information on almost every imaginable phase of the hardware trade. You may think your line is one that cannot be advertised. We may think differently. It will cost you nothing to secure our views. Drop us a line and our representative will call, or if you prefer it, we will, after making an investigation of the possibilities of advertising your lines, submit our proposition in writing.

"the Danger Hours" in your Business

SHOW us a business that has no "danger hours" and we'll show you a stagnant business.

Keep your eye on the "danger hours." They are well worth watching and studying. They're those hours in which you carry your peak-load of trade—when customers come with a rush that tests the capacity of your clerks and your equipment.

Such a peak-load is a precious asset. It offers you profits and prestige that you can't afford to lose. Why endanger these by trying to "get along" with too little equipment, with out-of-date equipment or with faulty new equipment?

Dayton Automatic Scales

not only assure lighter work and larger profits in the "normal" hours of the day but are the greatest of all helpers in carrying the peak load. But keep in mind: One Dayton cannot be expected to do the work of two, any more than 1912 equipment can be expected to meet the needs of 1922. The grocer who is prepared to turn peak loads into profits never fails to provide an adequate number of Daytons at convenient points in his store to enable his clerks to speed up service. Here is the reserve power that wins.

WISS
SHEARS and SCISSORS ARE NATIONALLY ADVERTISED

Over 550,000 Canadian families are going to learn through their newspapers why Wiss scissors and shears are *best* and most economical to buy.

There is already a good market for Wiss shears. Considerably more than a million pair are sold each year, simply because they satisfy customers—and because Mrs. Jones likes to tell Mrs. Brown all about it, whenever she discovers a good thing.

Now, we are going to tell 550,000 Canadian families exactly what Mrs. Jones tells Mrs. Brown—and a good many other interesting facts—and naturally the market for *Wiss* cutlery is going to increase.

If you want to know how you can take full advantage of this publicity, write for booklet No. 77.

J. WISS & SONS CO
ESTABLISHED 1848

World's largest makers of high grade scissors and shears.

"What I Tell 'em!"

Mr. SMP
Copyright Canada by
The SMP Co. of Canada

By Mr. SMP

All you have to do to make Diamond Ware or Pearl Ware go with a bang is to have a few hard-headed, reason-why, selling arguments tucked up your sleeve. Here are some of my selling points for Pearl or Diamond Ware boiled down. This is what I tell 'em about

SMP Diamond or Pearl WARE

1. It's Clean

(a) Just as pure and clean as porcelain or china;

(b) Soap and water will keep it bright;

(c) Dirt cannot cling unseen to its smooth, hard surface;

(d) It cannot absorb grease or odors;

(e) Its surface will not stain or discolor.

2. It is Efficient

(a) It heats far quicker and more evenly;

(b) It stays hot and concentrates the heat where it's needed;

(c) It brings out the true food flavor;

(d) Gives food a tender texture.

3. It's Durable

(a) Pearl or Diamond Ware, if properly treated, will last a life-time;

(b) Made only of the finest steel and enamel;

(c) Made from open hearth sheet steel;

(d) Alkali in water or food acids cannot injure Pearl or Diamond Ware;

(e) Scraping with a knife cannot harm it;

(f) You can't burn a hole in Pearl or Diamond Ware;

(g) Safe over the hottest stove or in the hottest oven.

4. It is Economical

(a) Diamond or Pearl Ware saves fuel;

(b) Heats more quickly than any other utensils;

(c) Comes to the boil in half the time;

(d) Concentrates the heat where it is needed to do the work;

(e) Will give longer, steadier service;

(f) Brings out the true food flavors from even the cheapest foods;

(g) Saves left-overs without waste, taint, discoloration or loss of flavor;

(h) Saves your time by cooking foods quicker.

5. It is Beautiful

(a) Pretty and attractive in color;

(b) It helps to make a kitchen light and cheerful;

(c) It is more pleasant to work with;

(d) It is a pleasure to keep such pretty ware clean.

'RICE LEWIS' NEWS

DIAMOND CORD

It's Time To Get The Motorists' Attention.—

Here is shown the new Diamond Cord Tire. The newest and best product of one of the oldest and most reliable tire makers. This is a splendid tire that will appeal to every car owner.

The quality of this line is absolutely supreme. It represents the climax of years of experience and building to highest standards.

If **Appearance, Performance** and **Economy** mean anything this line will prove a sure seller.

To assist you in selling this and other kinds of Diamond Tires, we can supply some very strong and unusual dealer helps.

Be prepared also to get the business that will be available in other lines that appeal to the motorist. A number of cars in your locality will have to be cleaned and gone over and you will have many opportunities to sell top dressings and radiator cements. We carry complete lines of Johnson's and Norwesco Auto Products.

How is your stock of batteries? We carry a complete stock of Columbia Ignitors and Hot Shot Batteries, also Ever-Ready Flashlights.

We are distributors for **DuPont Celluloid or Transparent Sheets.** Stock sizes 12½ and 15 thousandths, sheets 20 x 50 ins. A strong feature of this line is that it is very pliable. We can ship immediately from our large stock.

The Repeater 6 Fuse Plug

The illustration in the lower right-hand corner is the new **Repeater—6 Fuse Plug.** Here is an article that you need only display to make many sales. "A turn to the right brings back power and light." It takes the place of six fuses. Be sure and ask the Rice Lewis man about this or write us direct.

Rope Buyers—
It Pays to Handle the Best

Place your Spring order now with your Jobbing Traveler, and say you *must have Plymouth.*

Every wholesale dealer in Canada can supply you with the well-known Plymouth "Ship Brand."

Plymouth Rope will invariably give your customers a little more service than they reasonably expect. It has been doing this for nearly a hundred years; that is why the Plymouth Cordage Company is the largest cordage plant in the world to-day.

The most popular rope sizes for spring shipment are ¼", ½", and ⅞" diameter

DUNLOP

CORD TIRES FABRIC

¶ The Tire that means most in Long Mileage, Economy and Comfort to Canadian Motorists these days is:—

DUNLOP TRACTION CORD

¶ Dunlop Cords, with Dunlop Extra Heavy Service Tubes make the ideal tire equipment for every car, any place, and in all weathers.

¶ "Some two years ago I purchased two Dunlop Traction Cord Tires, 32 x 4. Since placing them on my Columbia Car I have covered 18,500 miles. In view of the almost uninterrupted service they have given, and still are giving, I feel it is my duty to inform you of the great satisfaction I have received from their use. Also, I must congratulate your Company on the high standard of quality that is put into the manufacture of tires, to enable them to give such service."

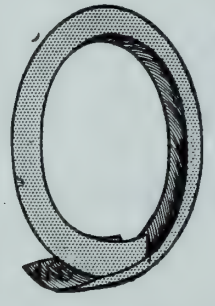
"GUTTA PERCHA"

"Boosters"

For Your Auto Accessory Department

SEALTITE PATCHES
For Permanent Repairs

When a tube requires permanent repairs, there is nothing quicker nor more easily applied than a Sealtite Patch. This makes a good demonstration for your customers. Just your two hands are all the tools required. The tube can be used immediately; the Sealtite Patch will not pull or creep with friction.

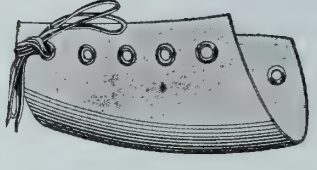


GUTTA PERCHA INTERLINERS
Prevent Blowouts

Show your customers that, when casings are wearing down, this handy accessory helps to get the last mile out of them. They strengthen the weak spots and do away with blow-outs. Show them and explain. That motorist will come to you when blow-outs become frequent. They should not be recommended for **new** tires.

BLOWOUT PATCHES
For Blowouts and Rim Cuts

These effective patches are specially feather edged to prevent the tube from being chafed or pinched. They are the most satisfactory patch ever designed. Give them your unqualified endorsement. They are suitable for either blow-outs or rim cuts.



LACE-ON BOOTS

A "first aid," and an invaluable one for preventing cuts or breaks from extending further until a permanent repair can be made. These reliable boots are fitted with heavy brass grommets and a sturdy leather lace.

Westinghouse

TURNOVER TOASTERS

THERE is always a demand for toasters, because toast forms an important part of the morning meal in almost every home.

Show your customers how convenient it is to make the toast on the table and how handy the Westinghouse Turnover Toaster is; how the toast is turned without being touched.

This toaster is very attractive and in perfect keeping with a neatly set table. The flat top will keep the toast warm, heat plates, keep the coffee hot.

DAVIDSON

Made in Canada

Always buy Goods bearing this label

ENAMELEDWARE

The **CLEAN** *Ware*

"MARATHON"	"PREMIER"	"COLONIAL"
Chocolate & White	**Blue & White**	**All Gray**

FOR sixty years and more Davidson's have been building up a name for durability for their products.

When you see the Davidson Trademark on any of these brands you are always sure of what you are buying. It really comes to this, that our "Seal of Durability" is the equivalent of a written guarantee on every single article which leaves our factory.

Similarly the housewife who buys Davidson's Enameledware is getting the best workmanship that money can procure at a price which is lower than many other much advertised and often inferior grades.

Always carry the full line of these brands, because it means better and more profitable business if you do.

Butterfield Tools

Sell because of their well-known Speed and Accuracy

In the prosperous provinces of Canada there are many purchasing agents of large industries who habitually order Butterfield Tools for their plants. They have made it a matter of routine, to specify Butterfield, because they know that they lower production costs by increasing each machinist's output, use less power, and require less grinding and tool-maker's attention.

The Butterfield variety includes almost every possible need, and we can assist you to supply any special requirement, because we make tools to order, from working drawings or customer's samples.

Pipeless.

Are You Getting the Cream of *the* FURNACE TRADE?

Don't allow your competitor to get the biggest slice of the pipeless furnace business in your territory. Outmatch competition—build up your business—by featuring the New Idea line and allowing us to help you through our co-operative selling plan.

Once introduced into a neighborhood the New Idea makes a strong appeal to those who are looking for a satisfactory solution of their heating problem, and it is an easy matter for an aggressive dealer to clinch further orders and obtain a huge volume of new business.

Write us at once for particulars of our attractive agency proposition.

"NEW IDEA"
Pipe and Pipeless Furnaces are Fully Guaranteed.

We also make the "Famous for Good Baking" line of Souvenir Stoves and Ranges.

Display Your Grindstones Now!

Easier Sales and more of them if your Customers See the Goods Displayed

The prosperous hardware merchant is a **salesman**—he wouldn't likely be prosperous if he merely took orders from the people who come into the store.

Farmers this year should be larger grindstone consumers than for many years because their buying of such things was last year restricted. Now they need them and the more often you display your grindstones—the more forcibly and more often you call their attention to grindstones the more sales you will make.

And this applies just as strongly to saws, files, axes and other goods as it does to grindstones. Whether you are carrying Cleveland Grindstones or not, we urge you to display your stock aggressively right now because now is the time to make grindstone sales.

We ask you to stock Cleveland Grindstones because there are no better stones produced. Cleveland Grindstones are of the famous Berea stone. It is a well known fact that no better stone has ever been found than our Berea stone.

We ask you to stock Cleveland Grindstones because you have a wide selection of sizes and styles. And no matter where you are located there's a jobber in your community who carries Cleveland Grindstones and who has an adequate stock and will supply you promptly.

And these reasons are abundantly rich in their assurance that when you carry Cleveland Grindstones you can always satisfy your customers at the time of the sale and that every grindstone sold remains a continuous source of satisfaction and good will.

The grindstone selling season is here now. By aggressive action you can double or even triple your grindstone sales of last year. Write us for name of jobber and generous discounts.

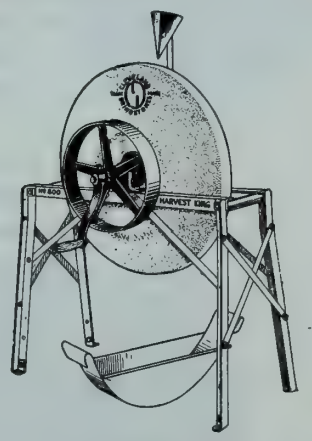
The Cleveland Stone Co.

814 Union Bldg. Cleveland, Ohio

NORKA BB
Fastest Selling Grindstone in Canada
Practically Indestructible

A big demand in Canada for the Norka BB. It is strong—practically no wear out to it—and is easy running. Frame is heavy tubular steel, strongly braced. Shaft of cold rolled steel and turns in a splendid ball-bearing device.

The stone is a Cleveland Grindstone of Genuine Berea or Lake Huron Stone, 19 to 22 inches in diameter, 1¾ to 2¼ inches thick. The frame is folded, strongly and compactly crated with the stone.



HARVEST KING
Power Grindstone for Farm Use
Popular Priced Outfit

Here is one of the fastest sellers among power grindstones and is carried by nearly all hardware dealers. It is substantial, sturdy and will last a life time, yet is low priced.

The frame, constructed in our own factory is of heavy angle steel 1¼" x 1¼", x ⅛". and is strongly braced.

The stone is our standard high grade selected Cleveland grindstone 24" x 2". Has a ⅝" shaft, 12 x 2⅜ pulley and heavy steel roller bearings, hand crank and drip cup. The frame is folded complete, stone crated separately to save freight. Be sure to carry a good stock of Harvest Kings—they sell rapidly.

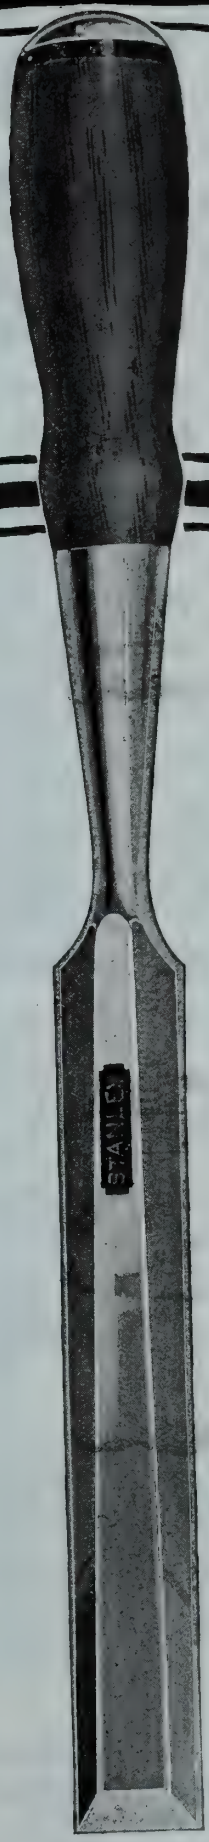
STANLEY "Everlasting" CHISELS

STANLEY S.W.



When a customer, whether a carpenter or amateur mechanic, buys a chisel he expects to get a keen cutting edge, a handle that will stand abuse and a head that will transmit the blow directly to the cutting edge.

All of these qualifications are found in Stanley "Everlasting" Chisels. The head, shank and blade are forged from one piece of tool steel. Painstaking care is used in the manufacture, especially in the heat treatment of the blade.

Point out to the carpenter, the leather washer that is placed between the handle and the steel head to serve as a cushion thus relieving the handle from the shock when the blow is struck. This construction also prevents the handle from splitting and as a further safeguard a brass ring is driven into the large end of the handle.

Point out these superior qualities to your customers as it all makes for better sales.

Do You Know Why A Baseball Glove Is?

¶ Baseball was first played, a little over a half century ago. The game to-day with its science and speed can not be compared with the slow games which were played in the early history of the sport.

¶ THE CORK CENTER BALL due to its absolute uniformity of standard quality has materially assisted in bringing about the highly developed exhibitions of skill which are witnessed in the present day game.

¶ The speed of the game was increased by the marked improvement in the ball, therefore more protection and practical equipment was required by the players. Reach supplies have met the demands of the most exacting athletes as our association with the game since its inception has given us opportunity to cull out freak features and perfect the practical ideas of the most famous players.

¶ A few distinctive Reach features are: The diverted seam in fielder's glove, The cork center ball, the full moulded face for catcher's mitts, the double palmed fielder's glove, the plugless tennis ball, the weatherproof throat tennis racket and many others.

¶ Consider the advantages of handling such a distinctive line. It is not too late to start. Let us supply detailed information.

BRANTFORD, ONT.

Starrett Quality Nail Sets

Your customers will find Starrett Nail sets "just right" in size—in the degree of hardening—the shaping of the oval tops—the concaving of the tips. Made of high grade steel. Ends finely polished. Centers nicely knurled. Starrett quality throughout.

Starrett No. 116 Nail Sets are made in four sizes having, respectively, the following diameters at the tip: A, 1/16 inch; B, 3/32 inch; C, 1/8 inch; D, 5/52 inch. All sizes 4 inches in length. Put up to sell separately or in neat wooden boxes containing one dozen A,B, or C. Also assorted.

For extra heavy Nail Sets sell Starrett No. 176. Size A, 3/8 inch thick, 3/16 at point. Size B, 7/16 inch thick, 1/4 inch at point. Both sizes 5 inches long.

Write for Starrett Catalog No. 22 "MA" showing 2100 fine Starrett Tools. Also be sure to ask for special Supplement to this catalog just from the printer's. Contains full information on new Starrett Tools of special present interest to tool dealers.

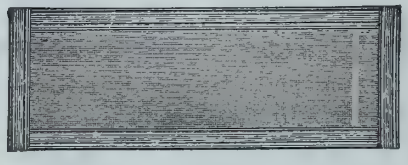
SUMMER NECESSITIES

SCREEN DOORS

WINDOW SCREENS

and REFRIGERATORS

Every dwelling, office, store or shop will want screen doors and windows now that old King Sol has warmed 'em up and they are beginning to buzz a bit. All live Hardware men will be ready with a good stock of Brantford Screen Doors and Window Screens—the complete line of quality goods.



The old reliable Ham Bros. Co., Brantford, make the most complete line of these goods produced by any one factory in the world. Screen Doors, Combination Screen and Storm Doors, Outside Casing Doors, Adjustable Window Screens, Flush Outside Screens. Everything for every need.

REFRIGERATORS

More Brantford Refrigerators in use in Canada than all other makes combined. There's a reason.

You can't buy a better refrigerator than a "Brantford." There's nothing better made.

Guaranteed to do everything a refrigerator should do. Best of food preservers, lowest temperature, more provision chamber space. Most economical ice users. Over 30 different sizes and styles to select from. Seamless one-piece porcelain lined, White Enamel Lined, Galvanized Lined. The most complete line.

Retail Trade Now Put to the Test

THERE are at the present time probably more important subjects before the retail hardware trade than at any time in the past. We have come to the stage in the general plan of readjustment when many problems are arising on which there exists a wide range of sentiment and opinion. An intelligent solution of these problems is necessary if the retailer is to successfully guide the destinies of his business. Many of these problems are dealt with in this issue and others will be dealt with in the forthcoming weekly issues of Hardware and Metal. Following is a brief outline of some of these articles in this issue:

"Retailers Lose Heavily on Freight Overcharges"

Due to a lack of efficient checking facilities and a tendency among freight clerks to pass mixed shipments through at the rate represented by the highest class of merchandise in the shipment, retail hardware and other merchants have been heavy losers. In view of the important influence of freight charges upon the cost of doing business retailers should assist in the plan suggested in this article for eliminating freight overcharges.

"Sale of German Hardware in Canada"

Labor organizations in Canada are spreading prapaganda against the retailer of certain hardware lines who is said to have shown a reversal of policy in that he now pushes German goods whereas he formerly expressed strong sentiment against the product of that country. Retailers and wholesalers express many interesting ideas on this subject in this article.

"Anti-Combine Legislation in Ontario"

Full details of a new Bill which is expected to become operative on July 1 governing price fixing, combines, etc., are outlined, along with some rulings specially provided Hardware and Metal by those who framed the Bill. This legislation will make illegal the fixing of resale prices.

"Interesting Doings at the Capital"

The Parliamentary correspondent of Hardware and Metal commences a series of articles which will appear in each issue on doings in Parliament of interest to the trade and which are not otherwise dealt with in detail. Some interesting points concerning the working of the drawback of certain customs duties, and concerning taxation on travelers, etc., are outlined this week.

"Broadening The Range of Auto Accessory Trade"
"April Fool Novelty Stimulated Sale of Hardware"
"Montreal Board of Trade Celebrates 100th Anniversary"
"Planning an Annual Spring Clean-Up Campaign"

These are titles of some of the other articles in the issue and which combine to make an issue which is so full of valuable information for retail hardware merchants as to justify a close reading.

Retailers Losing Thousands of Dollars Annually Through Overcharges on Freight

Injustice to Retail Merchants in Overcharging on Freight Shipments Due to Lack of Checking Facilities and Tendency Among Billing Clerks to Pass Through Whole Shipment in Highest Classification—Manufacturer Adopts New Bill of Lading Making Classification of Shipments

EDITOR'S NOTE:—Owing to lack of facilities for checking the classifications on Bills of Lading covering freight shipments, and also partly due to the tendency among freight billing clerks to neglect to put the various articles comprising a shipment in their various classifications, retail hardware merchants have for years past paid a great deal more in freight than was necessary. This matter has been taken up by trade associations and individual retailers have endeavored to correct this evil by endeavors to secure freight tariffs, but no general effort has been made to establish a fair policy which would give the necessary protection until now when one prominent manufacturer, realizing the losses being sustained by its retail hardware customers, has adopted a new Bill of Lading on which shipments are tabulated according to their classification and the rate applying to each grade. On a shipment of 700,000 lbs. of local freight annually the loss to retail hardware customers of one manufacturer in the Province of Ontario alone would amount to approximately $6,000 annually. The total loss to retailers throughout Canada, buying from a large number of manufacturers would be astounding. With retailers making every endeavor to lower overhead costs, this unnecessary leakage of revenue in connection with freight is important. Read of steps being taken to secure proper protection for retailers against these freight overcharges.

* * * *

"SPECIAL NOTICE:—SHIPPING BILLS MUST ACCOMPANY ALL INVOICES AND SHOW IN CLASS OR RATE COLUMN THE FREIGHT CLASSIFICATION UNDER WHICH EACH PIECE IS SHIPPED."

THE AVOVE stamp appearing on all orders being placed by J. R. Myers & Sons, of Stratford, Ont., is one of the first indications of real activity on the part of retail hardware merchants to secure classification of freight rates on hardware goods.

The question of overcharges on freight is one which has been discussed for many years at trade conventions and informally by retailers, but little or no definite action has ever been taken for eliminating this evil which is costing the retail hardware merchants as well as merchants in other lines of business, many thousands of dollars annually in the form of over-charges.

Where Difficulty Has Been.

One of the reasons for tolerating this, is the difficulty which merchants have had in checking up the proper classifications on the many lines of goods which they receive. In some cases where this has been tried out refunds running into many hundreds of dollars have been secured from the railways. Unfortunately however only a very small number of merchants have ever followed out any definite plan in connection with securing of refunds on overcharges on their freight shipments. It has always been felt that manufacturers and wholesalers of varied lines could greatly assist if they worked out some plan whereby their goods would be billed out at the proper rate and under the correct classification.

In an effort to find out what could be done or what has been accomplished in order to remedy the evil, HARDWARE and METAL has found dozens of manufacturers and many wholesalers who agree that this evil evidently exists, but they have not formed any definite plan for the elimination of it.

In the case of a manufacturer making only one or two lines on which classification is well known the problem is a simple one, but a great many manufacturers who supply the hardware trade make a wide range of goods which would come under, if properly billed, a great many classifications.

In view of the fact that J. R. Myers & Sons of Stratford have recently started to request the correct classification on each order placed by them, HARDWARE and METAL got in touch with Harry Myers of that company with a view to finding out how many manufacturers or wholesalers were supplying the retailers with a classification which would prove satisfactory to the retailers and enable them to check up their freight payments closely. Mr. Myers stated that while some of the plumbing supply houses had followed out this plan, the Sheet Metal Products Co., of Canada, Limited, Toronto, were the only large firm which he could recall who had adopted a new bill of lading which would enable the retailer to check up his freight payments.

A New Bill of Lading.

Inquiry by HARDWARE and METAL at the latter company brought forth the information that they had just adopted a new form of Straight Bill of Lading in which they had classified all of their goods, dividing them into thirty classifications.

Believing that the question is one of very great importance to manufacturers, wholesalers and retailers and one which if properly worked out will save many thousands of dollars annually for the readers of HARDWARE and METAL, complete information will be given in this article regarding the new Bill of Lading and the manner in which it is working out. While it is quite obvious that the Bill of Lading adopted by the Sheet Metal Products Company, would, owing to the nature of the goods, require a large list of classifications, the idea behind the plan is one which could no doubt, be followed out by many other companies and would enable retailers to check up their classifications and the charges made by the railways.

Mr. Myers stated to HARDWARE and METAL that the Sheet Metal Products Company Bill of Lading enables them to check up promptly and quickly all freight charges on an exceedingly wide range of goods. This was impossible under the previous plan owing to the fact that there was no

way of classifying the goods and the retailer had to pay pretty much what was charged by the railways with little chance of redress.

Paying Excessive Rates.

The officials of the Sheet Metal Products Company stated that from a careful scrutiny of receipts of expense bills which they had secured from their customers, they had formed the opinion that the retail hardware men are often compelled to pay very extravagant freight rates on their shipments of goods

The company therefore attempted to design a new shipping bill covering as comprehensively as possible the principal lines manufactured by the company. The new shipping bill which is reproduced in this article, shows that it is necessary to weigh each class of goods and put the weight on the Bill of Lading opposite the description of the article in the space indicated for the weight. In the next column it will be noticed that there is printed the class in the freight classificaion under which the commodity is authorized to move.

If therefore a customer feels that he has been overcharged, all that is necessary for him to do is to ask his local freight agent to inform him the rate from the point of shipment, applying to classification from 1 to 4 and he can then assure himself as to the accuracy of the freight bill and if an overcharge exists he can demand immediately a refund from his local agent.

According to this company the refund can be made from the local agent, thus eliminating the usual long delays which exists in making claims for refunds on freight charges. It is claimed that with this new form of shipping bill long delays would be avoided when a refund has been claimed.

One of the leading wholesalers when interviewed on the subject stated that his company had not taken up the subject of classification, but in his opinion the idea was one which could also be followed out to a great extent by wholesale hardware firms as well as by the manufacturers, and in his opinion there did not appear to be any great reason why this new plan could not be adopted by many manufacturers and wholesalers. In the opinion of this wholesaler the retailers are undoubtedly paying many thousands of dollars more than they should pay in freight charges, owing to wrong classification and owing to being charged the first class rate on many lines which should really go under third or fourth class. It would be almost impossible to figure out the total of the amount of over-payment made by the hardware trade throughout Canada in the course of a year, but a calculation based on 700,000 lbs. of local freight was worked out on a number of prominent hardware lines taking first, second, third and fourth class rates. If all of this freight had been charged at first class rates instead of the proper classification rates, the difference would amount to almost $6,000 per year. There are several manufacturers whose local shipments to the hardware merchants of Ontario would amount to this tonnage in a year. In other words mistakes on the part of billing clerks combined with lack of checking on the part of hardware merchants, could easily run into losses that would be astounding if the correct totals could be arrived at.

Aiding High Overhead Costs.

If this estimate is correct and represents only the figure for one province, on the product of one manufacturer, the total for the entire Dominion covering the hardware trade in its many branches, would undoubtedly run into amazing figures which, if they could be ascertained, would perhaps explain one of the reasons for the exceedingly high cost of doing business

Manufacturers and speakers at conventions for some time past, have been stating that the higher freight rates are one of the greatest obstacles to business at the present time. Add to the high freight rates, the overcharges which are being made through the hardware trade either through undue haste on the part of billing clerks or through an effort to put through as many shipments as possible at the first class rate, and there is an obstacle which is indeed a huge one to overcome.

How many retailers know that galvanized water pails take third class

Bill of Lading specially prepared by Sheet Metal Products Co., Toronto, showing columns for description of articles, weight, class or rate and checking. The classification as freight of the various products of this firm is printed opposite these articles on the bill, and the company's shipper enters the weight of the various articles in each shipment so as to protect the purchaser against overcharges by wrong classifications.

Sale Of German Hardware In Canada

Labor Unions Charge that Retailers of Hardware Lines in Canada Have Shown Big Reversal of Sentiment by now Pushing German Lines—Retailers Opine that it is up to the Government to Stop Importation if German Goods are not Wanted in Canada.

EDITOR'S NOTE:—In view of recent charges that have been made by labor organizations that merchants handling various lines in Canada have shown a reversal of policy in that they are now supporting and pushing German made merchandise whereas during the war and immediately thereafter they expressed strong sentiment against such goods, Hardware and Metal has made an extensive enquiry among retail and wholesale hardware merchants for the purpose of showing exactly what condition exists. A number of statements made to Hardware and Metal in interviews and in communications are outlined fully herewith from which readers can secure a knowledge of the attitude of others in the trade in regard to this line of merchandise. These letters are on file in Hardware and Metal office, signatures omitted in publishing them, by request.

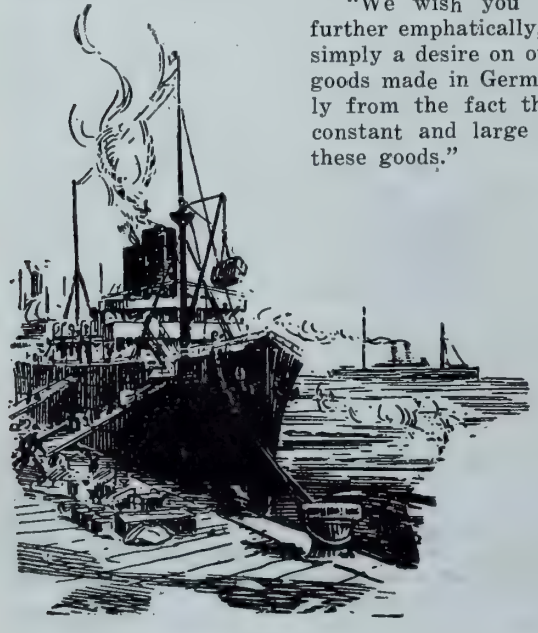
A WINNIPEG retailer gives the following opinion on this subject:—

We handled last year and this at Christmas time, fairly large quantities of German-made toys and for the last few months have had razors, pocket knives, scissors and other lines of cutlery of German manufacture. We carry these goods simply because, ever since they have been off the market there has been a demand for them, and while we would like very much to get along without handling these goods entirely, it seems impossible so far as our knowledge goes to secure goods of equal quality where prices are anyway near equal. We have customers come here who, when they see that the goods are made in Germany, will not buy. The percentage is very small however and we believe that the labor man is probably the biggest buyer of German-made goods of any customers we have.

Take Up With Other Countries.

"We might state further that we have had up with the French Government official and the British Trade Commission here two facts of the goods not being finished as supplied by these two countries, and also the fact that the prices are much higher. We believe that both governments are working on the problem and possibly in the course of time they will have improved quality and reduced prices which will make it possible for the placing of business with them rather than with Germany.

"We wish you to understand further emphatically, that it is not simply a desire on our part to buy goods made in Germany, but purely from the fact that there is a constant and large demand for these goods."



A Maritime retailer states, "Referring to hardware of German manufacture, and the attitude of the retail hardware merchant in pushing the sale of German-made goods as outlined in a cartoon published in the Labor Leader, it would seem that this publication has missed the mark, or has allowed imagination to take the place of realities.

"It is certainly a little premature in depicting the retail hardware merchant as pushing German made goods, considering that Germany is not yet in a position to place goods in Canada at a competitive price, and also because of the fact that the amount of German made goods in Canada is somewhat limited.

"From the writer's personal experience, the average consumer of hardware seldom considers the country of origin when purchasing, being controlled by the price or quality, as the case may be. The 'Labor Leader's' artist must have used considerable imagination. So far as Eastern Canada is concerned, there are very little German-made goods for sale, even in the department stores. The present prices are considerably too high to interfere with home made goods. The average labor man buys in an open market, and considers that his merchant has the same privilege."

Up to the Government

A large Western Ontario retailer states:—"We have purchased since the war $98.00 worth of Boker goods, being penknives and small shelf hardware lines. We find the price away down and that the public welcome the return of Boker merchandise again. Let me add here, that a great many people do not realize that Boker is German-made goods. They buy same because it is good value at a low price. I feel sure that you will find that those who talk loudest buy most. We take the stand that as long as the Government sees fit to allow German goods to enter Canada we should sell them to those who will buy and that it is for the consumer to say no.

"Department stores are not hesitating in buying. Four department stores last December sold German toys. One store did not, but advertised each night in big head lines their loyalty to the returned man and no German toys for sale here. When Christmas was over, the four stores with the German goods sold out and this one did not. It acted like a boomerang, or, in other words, every knock is a boost."

Don't Want to Continue the War

The buyer of one of Eastern Canada's largest hardware wholesalers states:—"The discussion of buying German-made goods opens up a big and important question needing thoughtful and careful consideration before any buyer forms an opinion or takes a stand as to what is the correct and proper attitude to assume. The war is now over, and to place a ban on German-made goods would seem like making an attempt to continue the war, or to seek for revenge in the mercantile world.

"Germany cannot pay her war indemnities unless she can sell her goods, and her goods cannot be consumed within her borders, so where will the allies secure their re-imbursements if they place a ban on her products? We may have our personal feelings on the matter, but if we allow them to predominate in this case, they may reflect back to our own disadvantage. If a buyer were to allow himself to be governed by personal feelings when buying stock, he would not buy from any traveller whose personality did not appeal to him. From a business standpoint I would say; all things being equal, buy Canadian, English or American made goods, but, when in the open market, if German made goods are offered

at competitive prices, which at the present time they are not, no business house can afford to allow sentiment to override judgment. The public is ever clamouring for low prices, and if the merchant has to buy from foreign markets in order to get these demanded lower prices in order to satisfy the demands of the public, the fault, if there is any, would seem to lie at our own doors."

He went on to say that he had every sympathy with the "Made-in-Canada" movement, and felt that it was good business to buy as much "Made-in-Canada" hardware as possible from a business standpoint, but considered it to be very inconsistent for a Canadian manufacturer to fix his prices so that they broke even with the landed costs of American manufactured goods. The Canadian manufacturer could only look for the same amount of co-operation from the buyers as he himself offers.

Only Specialty Lines Selling

A Montreal manufacturers' agent who specializes in German goods of all kinds states that while progress is slow, their sales are quite satisfactory, and he thinks they will continue to make headway. Dealing with the hardware lines that they specialize in he stated that up to the present the sellers were along specialty lines, and drew attention to a fence plier. This article retailed previous to the war at 50c, and they were now able to sell it to retail at 75c. Another line that was selling fairly well is scissors. These, however, they put out under their own brand name, and being in a position to sell at considerably less than U. S. lines, the success had been quite considerable. During a recent trip throughout the Western Provinces, there had been only one house who had refused to look at their samples.

Taking up the question of German goods with Montreal hardware wholesalers, it was found that only certain special lines were selling at present. This was the case in most houses, while one jobber stated that he absolutely refused to stock German goods and only recently refused to let a salesman, selling these lines, open his samples.

The attention of Hardware and Metal was drawn to such an item as dairy thermometers. These have been bought in recent years from the United States at approximately $6.00 a dozen, and the resale has been limited, no doubt owing to the high cost of these articles. They were now offered by German importers at $15.00 per gross, approximately pre-war prices, and owing to the large sale of these in pre-war years they were now being bought. Another item was fence-pliers. Up until 1914 the retailer was able to sell his farmer customer a plier at 50 cents, made by a German manufacturer. During the war, and up to the present, Canadian and American manufacturers were marketing pliers, the cheapest of which could not be sold for less than $1.00 and $1.25. This was a very stable article, and could be found in almost every hardware store throughout the country, and now that they could be replaced at the lower figure, there was considerable sale for them. It was pointed out, however, that the orders for these were not given to the German importer until every consideration was given Canadian manufacturers, who just recently came to them and told them candidly that they could not meet the price, or anything like it.

To sum up the situation, insofar as Montreal wholesalers are concerned, it would seem that while there is a great deal of reluctance, they are forced into the German market.

Not a Single German Article

"We have not, to my knowledge, one single German article on our shelves," said a Montreal retailer. "At the present time I can see no reason why we should foster German industries. We have our home industries, we have the English and American markets, and between them we are able to purchase satisfactorily for our trade here. And we are not losing custom."

In continuing he stated that there were certain lines that Germany specialized in, and previous to the war these were big sellers throughout the Canadian hardware trade, but up to the present there was no call for these, at least not in his store. It has taken the past five or six years to re-establish their trade along these lines, and now the public have been educated, and sold on Canadian, American and English goods. Why then make another alteration unless it was absolutely necessary? Just recently a case had come to their attention, and while the sale was lost, the instance was almost encouraging. A customer had written in for one dozen oyster knives and not having them in stock, they were purchased elsewhere. These were sent out to the customer without even opening the package, but the next day they were returned with a note enclosed, "When we want German goods, we will ask for them."

Although the time would undoubtedly come when hardware merchants would be again on the German market for some of their lines, there was certainly no indication of any necessity for this at the present time.

Has Purchased German Cutlery

Another Montreal retailer stated that while he always welcomed busi-

(Continued on Page 44)

"Remember the Lusitania!"

And Buy, Stock, and Sell Goods that are Made in Canada

Cartoon from "Labor Leader" of Toronto, a publication controlled by the Labor interests. Such cartoons and editorials along similar lines in that paper serve as propaganda aimed at the retailer who sells German-made products.

To Stop the Fixing of Resale Prices

New Anti-Combine Bill Introduced in Ontario Legislature to Come Into Effect on July 1 Would Make Illegal Any Agreement for Fixing of Resale Price—Will Provide Protection for Farmers' Co-operative Organizations

A BILL in relation to the fixing of prices were introduced into the Ontario Legislature by Hon. W. E. Raney, Attorney-General of Ontario, and was given its first reading. This bill provides that every agreement entered into between manufacturer, wholesaler or retailer, with the object of establishing or maintaining any set or fixed retail price which may later become a fixed or common price is declared unlawful.

It will make null and void any agreement entered into by any person engaged in trade, commerce or manufacture in Ontario with any other person which has a condition of purchase of any article that such other person—

(a) shall not sell or lease such article, except at or upon or at less than any stated, fixed or common price, or price which may become later fixed or common.

(b) Shall receive or be or become entitled to any bonus, discount, rebate, reduction in price, prize, right or privilege or any concession or reward whatsoever by reason of such other person undertaking to resell or having resold such article at any stated, fixed or common price which may later become stated, fixed or common.

(c) Shall pay or be subject to or be or become liable for any penalty, increased cost, loss, expense, deduction, disadvantage or disability whatsoever by reason of such other person not undertaking to resell or not having resold such article at any stated, fixed or common price—is declared to be unlawful.

Mr. Roebuck Explains Act

A. W. Roebuck, who conducted the case for the Board of Commerce in the trial of the Board of Commerce versus the Manufacturers and Wholesalers in regard to combines and price maintenance at Hamilton in 1920 and also for the Attorney-General's Department in the case of the Attorney-General of Ontario versus the Canadian Wholesale Grocers' Association and certain manufacturers held in Toronto in 1921, in an interview with a representative of Hardware and Metal, stated that "this bill does not prevent manufacturers from agreeing among themselves upon a price at which their goods should be sold, but it would prevent any agreement between manufacturers and wholesalers and wholesalers and retailers in regards to a fixed price on any article after that article has left the ownership of the manufacturer."

Mr. Roebuck pointed out that although manufacturers were not prevented from agreeing upon a fixed price among themselves, this bill did not permit them to do so unless it was lawful and at the present time, the law in this regard is not definite as Mr. Justice Orde has not yet given his judgment in the case of the Attorney-General's department versus the Wholesale Grocers' Association which has been standing since a year ago, and upon which this question hinges.

Public Has Right of Competition

Mr. Roebuck maintains that the public has the right of competition in all articles after manufacturers have parted with the ownership of the same, and that the manufacturers have no right to enter other lines of business, which they are doing when they compel a wholesaler and retailer to make a contract or agreement that they will sell their goods at a stated price or failing to do that, the wholesaler and retailer are penalized to the extent that they will no longer be permitted to sell those goods.

The bill provides for damages and penalties, Mr. Roebuck pointed out. Any person entering such an agreement whether within or without Ontario is liable to any person not a party of it, who is injured thereby, for three-fold the damages suffered, and an action for recovery of such damages may be entered in any court of competent jurisdiction, notwithstanding that the amount recovered may be within the competency of an inferior court.

Money owed as a result of any such agreements or transactions in consequence thereof is to be forfeited to the Crown.

In regards to a wholesaler or retailer buying goods from a manufacturer situated in another province, and who sells his goods on the price maintenance basis, Mr. Roebuck remarked, that such transactions become unlawful and that the manufacturer could not collect his money in any court in Ontario but that such money would be paid into the court and become the property of the Crown.

Thinks Manufacturers Have Right

W. C. Miller, provincial secretary of the Retail Merchants' Association in an interview with Hardware and Metal on the bill recently introduced by Hon. W. E. Raney which provides that manufacturers and others will be prohibited from naming a re-sale price on their products, declared that every manufacturer had a perfect right to name a price at which his goods should reach the consumer, providing of course, that the price was not exorbitant. Mr. Miller pointed out that if manufacturers were not permitted to set the re-sale price on their products it would mean that every price cutter would be able to take a well known advertised brand, upon which a manufacturer had spent a great deal of money to build up a big sale through quality and advertising, and use that line as a bait by cutting the price below the wholesale cost. "This would mean that the retailer who was getting a legitimate profit on that line would have to sell at a loss or eliminate that line from his stock entirely," said Mr. Miller. "There is no one better able to judge what is the true value of an article than the manufacturer and by putting a re sale price on his article he not only eliminates price cutters from using that line as a bait but assists the retailer in getting a fair profit."

RETAILERS PROTEST AGAINST COMBINE BILL

The Dominion Board, Retail Merchants' Association of Canada, is up in arms over Attorney General Raney's anti-combine bill, and is preparing to fight the measure to a bitter end. Discussing the matter with Hardware and Metal, E. M. Trowern, secretary of the board said: "When Attorney General Raney announced that he had introduced legislation to prevent the manufacturers from placing re-sale prices on their goods to the wholesale and retail trade, great excitement prevailed among the leading retail merchants of Ontario.

"As a result we wired the provincial office in Toronto to arrange an appointment with Mr. Raney, when delegates from all parts of Ontario, as well as the officers of the Dominion Board will be present to point out the great injustice a measure of that sort would be to commerce. The retail merchants of this country are strongly opposed to combines which are for the purpose of injuring the public, and if any such exist they should be put out of business immediately. But to put a rope around the neck of every little retail merchant, manufacturer and wholesaler in Ontario, simply because some person not acquainted with commerce may think a combine exists, is both unjust and foolish.

"If the proposed measure is of the character contemplated, it will be opposed with all the force the retail merchants of Ontario and the Dominion Board can bring to bear on it."

Sell Canadian Products Cheaper In U.S.

Debate in Parliament Concerning Drawback on Duties Shows That Iron and Steel Products Manufactured in Canada for Which Raw Material Was Imported Can be Sold Cheaper in U. S. Than in Canada

THE following excerpt from Hansard, the verbatim report of proceedings in the House of Commons, Ottawa, deals with a peculiar situation concerning the drawback of duties on certain products whereby Canadian manufacturers of certain products are enabled to sell their products cheaper in the United States than in Canada.

MR. KENNEDY (Glengarry): A little further down the list I notice a supervisor of refund claims and further on four checkers. Will the minister explain just what are the duties of supervisor of refund claims?

Mr. BUREAU: Those are refunds of overpaid duties. All those claims for refunds, after they have passed through the hands of customs officer at the port, come to the department, and they have to be checked and controlled. This supervisor certifies all claims that are made and the moneys paid back for refunds.

Mr. KENNEDY (Glengarry): Do I understand that those are corrections that have been made by officers of the department? In other words, are they mistakes that must be corrected?

Mr. BUREAU: Yes, very often a man will import some goods, and they turn out to be not according to the order. In that case, if, within the time allowed by law, he returns the goods, he is entitled to a refund, because he does not use them. There may be errors in the invoice or in the appraisal. Sometimes, machinery that comes to this country does not suit the purpose for which it was ordered. It is returned, and it would not be fair to keep the money collected as duty upon such goods. We refund the money to the importers. I understand that the money saved pays the salary of the officer in charge, and the staff as well, ten times over.

Mr. BROWN: Does the refund include the moneys that are paid back to certain manufacturers when goods are exported?

Mr. BUREAU: The manufacturer are given a drawback of 99 per cent. of the duty on raw materials entering into the manufacture of goods that they export.

Mr. EVANS: The minister says that the important thing is to collect the revenue. I would suggest that the really important thing is to retain the revenue, and not pay some $15,000,000 back to the manufacturers in the form of a drawback. What percentage of the duty is paid in the shape of drawback, and on what articles?

Mr. BUREAU: It would be difficult to answer that question in detail offhand.

Mr. EVANS: Does the minister think that it is good business to pay $10,000 for handling $15,000,000 in the way of drawback? My hon. friends to the right contend that we should have a tariff in order to get the revenue. Well, is it a sane policy to pay $15,000,000 in the form of a drawback on raw material when our own natural resources are undeveloped?

Mr. BUREAU: A rebate of 99 per cent. on the duty on raw materials entering into the manufacture of articles that are exported is allowed. The manufacturing of these goods provides labour in Canada, and we desire to encourage our export trade. We lose nothing. We did not have the raw material, but we had the benefit of the labour, and we keep one per cent. of the duty to pay expenses.

Mr. BROWN: I would ask the question put by the ex-Minister of Finance so persistently in the Tariff Commission: Where do you get your revenue?

Mr. BUREAU: We get it from the articles that are imported and remain in Canada for consumption. We get our revenue from the excise and income taxes and the sales tax. That is where we get our revenue; but we want to encourage Canadian industry.

Sir HENRY DRAYTON: Hear, hear.

Mr. BUREAU: If foreign material is required for the manufacture of goods in Canada we tell the manufacturer to bring in that material and pay the duty, and when he exports the goods we will fund 99 per cent., keeping one per cent. for the trouble of putting through the entry.

Mr. CREARER: I want to draw a point to the attention of the minister and also to the notice of my hon. friends to the right who appear to be getting a great deal of satisfaction out of his remarks. We import steel and iron from the United States for the manufacture of agricultural implements. On that material we pay a duty. **The Canadian manufacturer makes the implements and if he sells them in Canada the cost to the Canadian consumer is increased by the extent of that duty. I think my hon. friend will agree in that statement. If, however, the manufacturer exports those implements to the United States he gets a drawback on the duty.** So that the actual fact of the matter is that our Canadian manufacturers are thereby enabled to supply the American farmer with Canadian implements cheaper than the Canadian farmer can obtain them in Canada. Does the minister think that is a desirable policy?

Mr. BUREAU: Rolled steel and pig iron when used in the manufacture of mowing machines, reapers, harvesters, binders, and attachments for binders get a drawback of 99 per cent. The American does not enjoy the advantage of making the implements, and I do not think that Canadian implements, by reason of the drawback, sell cheaper in the United States than in Canada.

Sir HENRY DRAYTON: Hear, hear.

Mr. BUREAU: I am glad to have even one solitary voice in support of my remarks. My hon. friend says that these implements would be cheaper in the United States than in Canada. I am not able to go into that question now, because I do not know the price of agricultural implements in the United States, but it has been the practice to pay this drawback and it is intended to encourage manufacturing on this side of the line. If you have to import raw material it is only fair that when you do not consume the finished product here you should get a rebate upon it. We do not lose anything because our workmen are employed.

Mr. EVANS: What are the chief articles on which this drawback is paid?

Mr. BUREAU: There are various kinds of raw material on which the drawback is paid, but I cannot name them offhand. If the hon. member will put a question on the Order Paper I will see that he gets the information.

Mr. HALBERT: Does the minister think that one per cent. pays the full expense in connection with this matter?

Mr. BUREAU: I am not informed.

Mr. HALBERT: I was thinking that if it did, and you could run the whole department as cheaply as that, you could save money.

Mr. KENNEDY (Glengarry): Is it not a fact that a drawback is paid on the duty on raw materials that go into the manufacture of implements sold in Canada?

Mr. BUREAU: In the Customs Tariff Act, at page 96, under the heading "Goods subject to drawback for home consumption" in article No. 1002, there is a list of articles on which a drawback is given.

Mr. MEIGHEN: That provision was made at the time of the last reduction in duties on these articles. Is it not a fact that by means of the rebate or drawback as it is called on the raw material, the export trade thus developed adds to the scale of production that it brings down the cost of the manufactured article in the home country?

Some hon. MEMBERS: No.

Mr. EVANS: Why is it that we do not use our raw materials in the manufacture of these goods? Since we are told that we should develop our natural resources, why do we import such raw material as iron and steel and other things that enter into the manufacture of implements to-day when our own forests and mines abound in these things and 50,000 men are idle at home? Is this the policy that we are going to maintain as a national policy?

Travelers Protest New Tax Regulation

Delegation Voices Strong Protest Against Provision for Adding to Travelers' Income for Taxation, One Dollar for Every Day for Which Expenses Are Paid by His Firm

OTTAWA, Ont.—That extremely odd piece of legislation, concerning travelers and the income tax, which was dealt with in the April 1 issue of Hardware and Metal, has aroused a storm of protest, which has already broken over the heads of Hon. W. S. Fielding, Minister of Finance, and his colleagues at Ottawa. As pointed out before, in connection with the 1921 returns now asked, it is prescribed that men who travel, and whose expenses when traveling are paid by the firm by which they are employed, must add to their income for purposes of taxation, an amount representing one dollar for every day they are away and on which their living expenses are not paid by themselves. A delegation representing all organisations of commercial travelers in Canada, bore down on Hon. W. S. Fielding and his Cabinet colleagues this week and stated in no uncertain terms what they thought of the idea. The delegation numbered about twenty-five, who claimed they represented 40,000 Knights of the Grip in all provinces of the Dominion.

The delegation maintained that they had been discriminated against, and proceeded to explode the Government's theory that all commercial men spend at least one dollar each day of their firm's money on their own personal necessities. They pointed out that on the other hand they were nearly always actually out of pocket on expense money during their trips, so that any taxation would merely add to their losses.

They were given a favorable hearing and received the customary assurance that their representations would be given serious consideration.

While in Ottawa the delegation also had an interview with Hon. F. B. Carvell, chairman of the Railway Commission, on matters relating to excess charges on commercial travelers' baggage. They asked to have the rate lowered and claimed that the charges had remained at the same level as in force during the war.

THE MEANS *recently taken by J. P. Bush, hardware merchant of Erin, Ontario, to stimulate sales of guns, rifles, ammunition, etc., is depicted in the above picture. Mr. Bush is an enthusiastic sportsman and every year spends considerable time in the haunts of the big game, and he gets his share of deer too. He, therefore, knows what the sportsman wants, and realizes that the carcass of a bear and of a deer shown outside his store entrance will attract many persons interested in the lines of hunting equipment which he carries.*
Mr. Bush reports business in 1921 as equal in cash sales to the previous year, with seasonable lines. Auto' accessories he displays prominently in a showcase near the door and says this line has helped fill the gap when builders' hardware became less active.

SHOULD YOU BUY YOUR ADVERTISING MATTER?

Some manufacturers are of the opinion that much alleged waste of advertising matter supplied by them to the retail hardware merchants could be stopped if a nominal charge was made for such matter. Some manufacturers' salesmen are also said to have recently reported that the retail hardware merchants were getting too much advertising matter and that many of them were inclined to substitute such matter for real selling energy.

Hardware and Metal has secured some interesting matter on this subject, which will be outlined in an early issue. Meanwhile the Editor will be pleased to have a letter from YOU outlining your views on this important topic, your name to be omitted in the discussion if desired.

TINSMITHS MUST MAKE RETURNS IF LICENSE TAKEN OUT

In connection with the numerous articles which have appeared in Hardware and Metal from time to time concerning the status of tinsmiths, the point has been raised by a Montreal firm recently that having taken out a license and now refusing to make returns of sales tax pending the outcome of the test case, they have been advised by an official at Ottawa that legal proceedings will be taken unless the unpaid taxes are received.

Once the merchant takes out license as a manufacturer he places himself in that category and is liable for the returns of 2 per cent. sales tax collected from his customers on articles manufactured by him. Had he not taken out the license, as has been advised in these columns for some months, he would not be liable for the returns as a manufacturer pending the test case. If the case is decided in favor of the tinsmiths they will be relieved from the further necessity of collecting and returning sales tax even though they have taken out license for a year.

Widens Range of Auto Accessory Trade

Hardware Merchant Finds Customers for Automobile Accessories Can be Sold Radiators, Brake Lining, Motor Meters, Oil Gauges, Gaskets, Piston Rings, Etc., in Addition to Lines More Commonly Required—Every Customer a Paint Prospect in the Spring

BY FOLLOWING a policy of seeking to find out what the prospect requires and then attempting to meet that requirement, in price, quality and assortment, the Marks, Clavet, Dobie Co., Ltd., of Port Arthur, have developed an automobile accessory trade which is rated high in Northern Ontario. This extensive department of this hardware firm has been built up within the last two years.

The M. D. C. Co., as the firm is better known, are extensive wholesalers, as well as retailers, in every line handled. Besides carrying a full stock of auto accessories such as are given in detail in the window displays, they are distributors for certain lines of tires, tire chains, etc. Garage operators in the Twin Cities realize that this hardware firm competes successfully in this field, both in catering to the local and extensive tourist trade, and most automobile dealers willingly acknowledge the service rendered to them by the hardware trade in respect to accessories.

In Touch With Auto Owners

The advertising policy of the company in developing the auto accessory trade has been that of keeping directly in touch with the auto-owner. J. C. Dobie, president of the firm, believes that the manufacturer's advertising matter has a real value. The tendency is, so he claims, to leave much good publicity literature on the shelves for dust accumulation but results have proved that sending it broadcast has done much to increase their trade.

A great deal of credit for the growth also is given to H. J. Hanwell a hardware man of many years' experience. One of Mr. Hanwell's pleasures in business is to develop the young man. Being a prize-winner on many occasions in window displays. Mr. Hanwell is an able teacher along that line. At present an enterprising assistant, Mr. I. Pillor, has charge of the window dressing.

Active Accessory Business

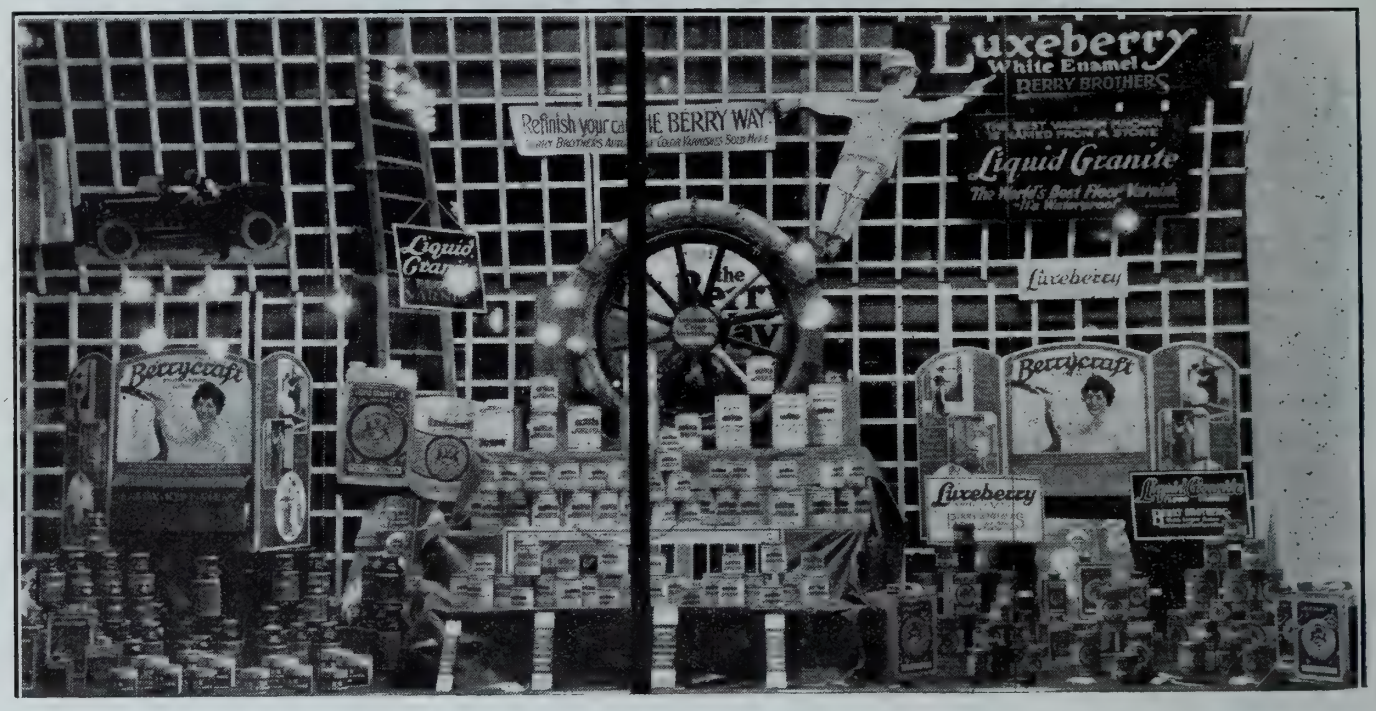
The automobile trade at the head of the Lakes for the 1922 season has every prospect of being above normal. Although the Twin Cities have a number of dealers devoting their whole energies to the trade yet it is expected the trade of the auto departments in the hardware stores will be much higher than last year. This will be augmented by the increasing tourist trade which is ever developing.

In developing automobile accessory trade with permanent citizens and with tourists who visit the district in the sum-

Selling a Wide Range of Auto Accessories

The automobile owner in Port Arthur and district has somewhat enlarged the range of ordinary requirements in accessories and automobile parts. This display by Marks, Clavet Dobie Co., Ltd., of that city shows an arrangement including radiators, brake lining, motor meters, lighting buttons and oil gauges for the dashboard, gaskets, vulcanizers, piston rings, etc. These are in addition to the lines more generally required such as repair kits, tires, pumps, jacks, spot lights, horns, steering wheels, etc. Window displays of auto accessories have helped greatly develop trade from both transient tourist and permanent customer.

Every Customer is a Spring Paint Prospect



Window displays have been very important in developing the paint trade of the Marks Clavet Dobie Co., Ltd., Port Arthur, Ontario. An appeal is made to the auto owner for enamels and other finishes for renewing his car in the Spring, and everyone who enters the store is considered a prospect for some paint, varnish or specialty for requirements of housecleaning, exterior painting, etc.

mer months, window displays aroused to good advantage to display seasonable needs. The display illustrated herewith shows radiators, spark plugs, tires, tubes, blow-out patches, repair kits, lighting buttons and oil gauges, brake lining, spot lights, jacks, steering wheels, horns, etc. Price cards are used extensively on most lines. The windows support the advertising done on accessories. The windows are particularly effective in dealing with tourist trade and other transients, but the permanent residents are well aware of the fact that this firm handles automobile accessories and it is found that frequent visits paid to the hardware store for various requirements, generally serve a double purpose for the customer who is also in need of automobile accessories.

Every Customer a Paint Prospect

Paint trade is developing actively in the spring season of this year, largely due to the splendid window displays which are arranged. A sample of these displays is shown herewith, this dealing with various lines of paints, varnishes, enamels, etc. In order to arrest the attention of the automobile owner in connection with auto varnishes and enamels, an automobile wheel is shown with the spokes painted various colors. Every person who enters the store for hardware requirements, is considered to be a prospect for paints, and no one of these prospects gets out of the store without hearing many suggestions whereby they can benefit by the use of some of the paints, varnishes, etc., shown.

SALE OF GERMAN HARDWARE IN CANADA

(Continued from page 39)

ness, he considered it rather unfortunate that he was again called upon to stock a line of German cutlery. In explaining this he said that previous to the war he had specialized on a certain brand of German cutlery and had pushed it to such an extent that it was one of their best sellers. During the war, of course, these were not obtainable, and in these years their cutlery stock had been reduced considerably. This trade, which is considered one of the best in the hardware store by this merchant, is again coming into light, and sales in the cutlery department are steadily increasing. The efforts they had put forth on this German line had resulted in persistent enquiries for same since the signing of the armistice. For some time they had been reluctant in stocking this but now that it could be purchased at reasonable prices, the line was again established. Price and quality were laid aside, and he was fully convinced that English manufacturers were to-day able to place their goods on the market, equal in quality, and practically as cheap. It was merely the fact that they had been successful in pushing this line before the war, and had repeated enquiries for same in recent months, that had induced them to again stock the goods.

He made it clear that they were governed by the enquiries and demands of their customers, and cutlery was the only line that was stocked for this reason.

Another large retailer in Montreal, when asked if he was again stocking German goods, replied that he was not, but he would be forced to if other branches of retailing did not quit infringing on their lines. In explaining, the attention of Hardware and Metal was drawn to a case where a month or six weeks ago German watches were placed among the local stores; tobacco stores, drug stores, departmental stores, etc., displaying these on their counters and in their windows. There was also the safety razor that was now being marketed in many retail establishments, but was the hardware store among them? No.

It was such cases as these that the hardware man was confronted with to-day, and if he had not already commenced to compete, there certainly was a temptation to do so, as both of the above items, and no doubt there were other lines, that were pure and simple hardware commodities.

April Fool Day Sale Stimulates Trade

Hardware Store and Another Retail Business of Woodstock "Swap" Window Displays as an April Fool Day Feature—The Innovation Attracted Interest of Many Prospects and Active Movement of Goods Followed

A NOVEL idea combining current interest was developed by two retail firms of Woodstock recently. Davison & McInnis, hardware merchants, arranged a window display of hardware in the window of Lewis & Son, shoes, groceries, etc., and the latter firm arranged a display of its lines in the hardware store window. The innovation naturally attracted many curious prospects.

The two stores involved are adjacent in a section of the city which is some blocks away from the downtown business section. The idea of "swapping" window displays was inspired as an April Fool day feature and a special April Fool sale was arranged. The advertisement which is illustrated herewith was used in the local newspaper on March 30th which gave ample time for it to reach all of the country patrons of the store who would be in the city on Saturday for market day. The sale was unfortunately handicapped by the severe sleet storms which tied up transportation and cut off lighting facilities and telephones, but still the sale went on and considerable merchandise was moved. Displays of goods were alternated in the windows and temporary signs were printed on the windows that the articles displayed would be sold in the adjacent store. Both stores recorded excellent business and were elated over the results obtained from providing an unusual feature to attract interest. The novelty of the idea struck the public and they unloosed their purse strings.

The combined ad run by the two firms was of a large size and was headed "Fooled Again," followed by the following wording: "Yes we have fooled the markets again but look who has done it. That's not all of the April Fool Sale which is on for Saturday. Lewis & Son and Davison & McInnis have not changed stores. They have only changed windows for their big April Fool Day Sale. Hardware is displayed in Lewis & Son's window while groceries and boots and shoes are displayed in Davison & McInnis window. They are on sale in their proper stores."

FOOLED AGAIN!

DAVISON & McINNIS

579 Dundas St Hardware, Plumbing and Heating Phone 454W

The ad used by Davison & McInnis, hardware merchants of Woodstock, Ont., in conjunction with another retailer who "swapped" window displays, is shown herewith under the heading "Fooled Again."

The portion of the ad devoted to hardware deals with brooms and mops, household specials, roller skates, nails, electric irons, aluminum ware, galvanized ware, paint, electric lamps, garden tools, etc. All lines were specially priced for the occasion.

RETAILERS ARE LOSING THOUSANDS OF DOLLARS

(Continued from page 37))

rates instead of first class? The first class rate to Lindsay from Toronto is 47c and the third class rate 36½c. If a Lindsay merchant paid the first class rate on galvanized pails from Toronto he paid about 30% too much for freight.

Simple Problem on Carloads.

For many years the hardware trade have been aware that great losses were being suffered through exorbitant freight charges and a specific instance of how the difficulty can be overcome has now been secured. It would seem as though the time has come when efforts should be made on the part of the hardware trade in all its branches to eliminate as far as possible great losses which are now being sustained by the retail hardware trade owing to overcharges on freight shipments.

Hardware and Metal would be very glad indeed to receive suggestions, or comments, on this article or on any other phase of the situation, as it is one of the biggest problems facing the hardware merchant to-day.

The problem on full carload shipments has of course been a simple one as the firms who buy in carload lots are usually well posted on rates and in any event it would be hard to fool them on carload shipments. On the smaller shipments, however, and there are many thousands of them each month, great losses are being suffered by the retail hardware merchants.

Some members of the trade have felt that the new freight classification which is now being considered at Ottawa would eliminate this evil. It is doubtful if the new classification which is expected, will overcome the difficulties referred to in the foregoing.

This new system of billing would appear to be a simple, practical and immediately effective method of saving a great deal of money.

Campbell Bros., who were engaged in the hardware and stove business at Stellarton, N. S., have dissolved partnership.

Intolerable Freight Problem Must Be Relieved

FREIGHT CHARGES have for some time been an important factor in connection with high prices on hardware and other lines. There have been many agitations for the lowering of freight rates and these may bear some fruit in the future, but it is possible for the high freight costs to be materially lessened without any general reduction in rates. This relief will come in the form of some new arrangement governing the billing of mixed shipments so that the correct weight of the various articles comprising that shipment will be given alongside its proper classification and thus apply to it the prescribed rate. This is merely as it should be but unfortunately through lax methods on the part of billing clerks in classifying whole shipments at the classification applying to the highest grade merchandise represented in the shipment, and also partly due to the inability of retailers to efficiently check the classifications and rates, much loss has resulted. On an average annual shipment of 700,000 lbs. of iron and steel got by one manufacturer in one province, the loss from following this policy would result in a loss to retailers of approximately $6,000. The total loss through overcharges to retailers throughout Canada on shipments from all manufacturers and wholesalers would be astounding.

Action has been taken by one manufacturer to remedy this evil by the preparation of a special bill of lading on which the goods comprising a shipment are entered with a notation of their classification. This provides a safeguard against overcharging of the nature outlined. At least one retail hardware merchant now requires a similar listing of all shipments received. This policy will probably soon be followed by many other retailers and the altered system of billing merchandise which will be necessary as result should save many thousands of dollars annually to retailers.

Must Not Sacrifice Retailers' Interests

MANY subjects of vital importance to the retail trade in Canada are now before merchants for a solution and declaration of policy. The whole system of merchandise production and distribution has undergone some drastic strains in the past few years, and now that the readjustment process is well on its way to the establishment of normal conditions there arise new problems for the consideration of retailers. At the present time the trade is faced with high overhead costs due to maintained scales, freight rates, rentals, taxes, interest rates, etc., and many movements are being initiated having for their object the reduction of some of these costs. Ideas for stimulating trade have been employed generally but it is found that the consequent diminishing of overhead costs per unit is not sufficient to bring prices to the level which will encourage more generous buying, and reduction of overhead charges therefore becomes of prime importance.

Then there is the question of pending legislation governing fixing of resale prices on merchandise. There is also the question of policy regarding the sale of German merchandise, which is becoming an increasingly important question. Already there is talk of tax and tariff changes in connection with the Budget soon to be presented by the Minister of Finance at Ottawa.

These current developments make necessary a close watch on the part of retailers in order that their interests will not be sacrificed for the benefit of others who exert stronger pressure. These subjects have been and will continue to be dealt with fully in each issue of Hardware and Metal and the co-operation of readers in the form of expressions of opinion and other suggestions, will help to support the interests of the hardware trade. Evidence that Hardware and Metal is regarded as carrying authority on these topics is found in the fact that it has frequently been referred to by government officials, its editorial data have frequently been used in preparation of government reports, and again this week a copy of Hardware and Metal was noticed prominently among the data which one member of parliament had on his desk at the Parliament Buildings. This important standing guarantees readers authoritative reports on these vital subjects, and offers an unique opportunity for their ideas to carry real weight when expressed through these columns.

New U. S. Tariff

THE TARIFF bill which the United States Government plans to adopt as a standard measure in place of the present Fordney emergency tariff was made public this week. The bill carries what are regarded as the highest duties of any tariff bill in recent years and gives the President power to enforce rates even 50 per cent. higher in case they are not sufficient. A leading feature of the bill is the high agricultural rates including higher rates on grains and livestock which it is said are aimed in part at Canadian competition. The Senate bill is based on foreign wholesale selling prices, not on domestic valuation as was formerly the case. If it becomes law the bill will hit Canada even harder than the Fordney measure for several of its tariff levies are higher than under the Fordney Bill. In the metals which Canada produces there is a slight decrease from the rates ruling in the Fordney tariff. Some of the proposed rates on metals are as follows: Pig iron $1.25 per ton; ferro-manganese $2.50 per ton; bars and bar iron 2-10c. to 1 1-2c. per pound; steel ingots, blooms, slabs, billets and bars 1-5c. a pound to 25 per cent. ad valorem; aluminum 5c. to 9c. per pound; copper 2 1-2c. per pound; nickel 3c. per pound to 25 per cent. ad valorem.

On the free list are included the following, binding twine, copper ore, iron ore, jet, timber, sulphur, turpentine and rosin.

The Bill will undoubtedly come in for much discussion at the end of this month when it is formally introduced in Congress and some of these provisions may undergo drastic revision, but a survey of the proposals indicates that while there are lower rates on metal products, the bulk of the duties are much higher than before.

Prepare Spring Clean Up Campaign

Lengthy Discussion Given to Plans for Launching Annual Clean-Up and Paint-Up Movement at Meeting of Toronto Retail Hardware and Paint Club—Gathering Addressed by an Authority on Manufacture of Enameled Ware

EDITOR'S NOTE.—As Spring Clean-Up, Paint-Up campaigns are now under consideration in many parts of Canada, the details outlined in this article showing how Toronto retail hardware merchants are working up such a campaign is of timely interest. Plans being adopted by the Toronto Retail Hardware and Paint Club for increasing its membership are also dealt with, and there is much helpful information to be gleaned from the report of the address of an authority on the subject of the manufacture and sale of enameled ware.

PREPARATIONS for the "Clean-up and "Paint-up" campaign to be conducted throughout Toronto during the week of May 8-13, provided one of the premier topics at the second monthly gathering of the Toronto Retail Hardware and Paint Club, held this week. Discussion of the various plans already outlined, together with suggestions and consideration of detail involved, occupied considerable time. Samples of clean-up and paint-up posters, window trim suggestions, parcel stickers and other matter advertising the campaign, were placed before the consideration of the meeting by President H. N. Joy. The chairman also read a letter from F. J. Penberthy, secretary of the Save the Surface committee, outlining the manner in which the Paint, Oil and Varnish Club of Toronto, were planning to co-operate in launching the "clean-up and paint-up" campaign, in conjunction with the retail hardware merchants.

Following the social activities of the evening, President Joy called the meeting to order for the consideration of regular business. He briefly outlined the benefits to be derived from membership in the newly organized retail club, and touched upon the interest aroused and the progress which the movement is expected to develop in the near future. A vigorous drive for increased membership was decided upon, with the city being divided up into districts and a captain allotted to each territory. An objective was also outlined for each section, regarding the number of merchants eligible, and the view was expressed that satisfactory rewards in this direction would result.

Educational Side of Movement

The educational effects of the "Clean-up and Paint-up" campaign and the fundamental principles underlying the movement, were brought before the attention of the gathering. Some samples of advertising for the use of merchants linking up with the campaign were presented, it being pointed out that paint and paint products were not the only lines being featured to special advantage in a drive of this nature, but that everything sold for use in house-cleaning could also experience material benefit. Much discussion was given to the possibilities of raising a sufficient amount of money to ensure the success of the venture, and in this connection it was pointed out that the Paint, Oil and Varnish Club was undertaking to raise double the sum contributed to this end by the retail club.

The nature of the collective publicity intended for retail merchants participating was also given some attention. Some doubt was then expressed regarding certain events which had transpired at a previous meeting, and to settle the discussion which arose, President Joy read extracts from a report which appeared in a recent issue of Hardware and Metal, pertaining to the matter at issue. For the benefit of new and intending members, it was also pointed out that the constitution of the Club had been reproduced in full in the same number of Hardware and Metal.

History of Cooking Utensils

A. E. Henry, assistant sales manager, Sheet Metal Products Co, of Canada, was introduced as the speaker of the evening, his subject being "Enameled Ware." The various phases of the industry were clearly enumerated by Mr. Henry, from its history and manufacture to selling the product. "The use of cooking utensils," stated Mr. Henry, "was first introduced when man commenced to prepare his food, instead of eating it in its raw or natural state. The original cooking vessels were undoubtedly made of stone, and these soon proved unsatisfactory, for a number of reasons. Later on, an enterprising ancestor discovered that certain clays in the ground, could be formed into a utensil for use in the preparation of foods, and thus the initial pottery ware became a fact. Glazing was the next step in advance, the first vessels of this nature being unglazed. At the beginning of the nineteenth century, the discovery that cast iron could be moulded into various shapes, again introduced another phase in the history of kitchen utensils. Of course, we must not overlook the brass and copper utensils which were handed down from the earlier days, but beaten products of this nature were expensive and rare. For general purposes, therefore, cast iron was found to be superior to the earlier clay products, but in 1885 the discovery of the Bessemer steel process, marked another milestone in this direction. The manufacture of sheet iron and sheet steel then experienced a rapid growth, but one drawback was generally pointed out, and that was that vessels of this nature rusted when made without a protective coating. Enamel, therefore is a protection against rust."

Describes Different Operations

It was stated that the enameled ware industry came to Canada around the year 1880. Samples of pots and pans in the various stages of manufacture were then introduced, the different processes from the raw material step by step to the finished article being carefully explained. The steel discs first went through the drawing and pressing operation in the stamping room, and then to the spinning lathes. The shape is then trimmed, the edges smoothed and rolled, thus eliminating wrinkles in the metal. It is then ready for the handles, these being fastened through an electric welding process.

"Previously," explained the speaker, "these were riveted on. Before being ready for enameling, the removal of scale is necessary for cleansing, so the embryo pot next visits the annealing furnace. Here the product passes slowly through on a carrier. It is then 'pickled' by immersion in a vat, and later is again immersed in a mild solution of acid. The vessel then passes through an alkaline solution, and hot and cold water alternately. After being dried, it is ready for the first stage of enameling."

According to Mr. Henry, the mixing of enamel was more or less a secret process developed by the individual manufacturers through study and experiments. It was described as a form of glass, the bare product being pure white sand, a kind difficult to secure. This is mixed with other ingredients, in certain proportions, these materials being thoroughly stirred, and later pass through tubes into a blast furnace, where the mixture naturally melts. When in a molten state in vat, the vat is tilted and the contents pass through water and are crystalized.

Producing Finished Article.

Different coats are applied for the various types of enameled ware. The first coat is black, the vessel being dipped, then passing on to the dry kilns.

Continued on page 60

Events in the Trade

BUSINESS CHANGES

E. C. Ricard, Timmins, Ont., has sold his hardware and furniture business.

NEW FIRM

G. W. Henderson, factory superintendent of Geo. W. Reed & Co., and E. Barwick, assistant, will open business for themselves under the firm name of Henderson & Barwick Co., sheet metal works. Upon severing their connections with the above firm a presentation was made by fellow employees.

DOMINION INCORPORATIONS

Thermos Installation, Ltd., head office Montreal, capital $15,000 to manufacture and install the "Thermos Heating System."

Antoine Chiris Co. of Canada, Ltd., head office Montreal, capital $25,000 to manufacture and deal in chemicals, minerals, spirits, explosives, etc.

The Spiral Nail Co. of Canada, Ltd., (amended notice), capital $100,000, head office Toronto, to manufacture and deal in nails, screws and other articles of iron or steel.

John Inglis Co., Ltd., head office, Toronto, capital $1,000,000 to manufacture and deal in iron and steel products, tools, hardware and to carry on business as brass founders, metal workers, steam and gas fitters, etc.

PERSONAL

Geo. E. James of James Bros., hardware merchants of Perth, Ont., was a Montreal visitor this week.

John Irwin, president McArthur-Irwin, Limited, Montreal, is on a business trip to New York and Philadelphia this week.

W. S. Fallis, vice-president and managing director, Sherwin-Williams Co. of Canada, is now visiting New York and other U. S. centres.

Walter H. Cottingham, president of the Sherwin-Williams Co. of Canada, arrived in New York on Wednesday of this week from England, where he has spent the winter months.

Jas. F. Strand, president of the Lake Erie Metal Products Co., Cleveland, and C. A. Adams of Geo. H. Buchheimer Co., Baltimore, called on the Montreal trade this week.

Col. Robert Starke, president, Starke-Seybold, Ltd., Montreal, represented the Montreal Board of Trade on a deputation which proceeded to Ottawa this week to urge upon the government the necessity for a second bridge from Montreal to the South Shore. This has been advocated for some time, and recently an active interest has been taken in the project by many municipal and other public bodies. W.B. Ramsay, president of A. Ramsay & Son, Co., represented the Montreal Bridge Committee.

MONTREAL PORT AGAIN ACTIVE

Montreal.—The port of Montreal is expected to again show signs of activity in the course of the next week. Navigation of the St. Lawrence River will recommence by passenger and freight vessels on April 24th, which will be a little earlier than last year. The ice is now breaking, and each day brings further small movements of the blockade.

The first ocean-going vessels are expected toward the end of the week, reports stating that three steamers will commence their initial trip to this port on Tuesday.

Towns on the St. Lawrence will have a better delivery of goods from Montreal this year, as a new boat freight service is planned from this port. Two big freight carriers will leave every Thursday for river points, this service being added to the former delivery facilities.

LATE EASTER HAS RETARDED BUSINESS

Kingston, Ont.—Spring business has been late in developing the volume normally experienced. In such lines as hardware, cutlery, builders' supplies and plumbing fixtures, there have been substantial reductions, and builders and contractors expect some activity owing to housing conditions. They report substantial reductions in their estimates compared with those of the past four or five years. This is regarded as an encouragement to persons contemplating building city residences or summer cottages.

It is the opinion of business men here that the lateness of Easter this year has had something to do with the comparatively slow sales experienced thus far. This week, the roads are in better shape, and a brisk business is looked for now for Easter.

ELECTRIC STEEL PLANT PASSES TO NEW HANDS

The Electric Steel & Metals, Ltd., plant at Welland, has been sold to an American organization. All details in connection with the transaction have been settled, and a contract for power has been arranged. The purchasers prefer to have their identity remain secret for a few days. It is understood that the purchase price, together with additions to the plant, will involve an expenditure of over $500,000.

The Electric Steel & Metals plant has been standing idle since the munitions industry dwindled. It is proposed to turn the plant into a steel rolling mill, turning out bars, sheets, etc. Some of the present equipment will probably be used at the outset, but eventually it is the intention to install a complete set of machinery. About three months will be required to install equipment and begin production. A portion of the new company's output will probably be exported.

RUDDY MFG. CO., LTD., TAKES OVER PART OF HAM BROS. BUSINESS

Brantford, Ont.—A new firm known as the Ruddy Mfg. Co., Ltd., has commenced business here having acquired that part of the plant of Ham Bros. on the north side of Elgin St. The Ruddy Company will confine its operations to the manufacture of kitchen cabinets, bed springs, and bee-keepers' supplies, and the Ham Bros. will continue on the south side of Elgin street the manufacture of refrigerators and window and door screens.

The inception of this new company in the city will bring back to Brantford as a permanent resident, Joseph Ruddy, who is well known here as the former vice-president and secretary of the Canada Starch Company.

The new company has been very strongly organized, with a capital of upwards of half a million dollars, and there will be no change in the factory or selling organizations other than the change in managers.

In addition to the general line of goods that has always been made in this plant, arrangements are said to have recently been completed with a large United States kitchen cabinet manufacturing concern whereby the Ruddy Company will be organized as their headquaters in Canada.

The following local men have become heavily interested with Mr. Ruddy in this new firm and are on the Board of Directors: George S. Matthews, Fred W. Frank, John S. Dowling, E. P. Park, Charles L. Messecar and John R. Varey, with Mr. Ruddy as chairman of the board.

For comment on Winnipeg hardware market tendencies see "WEEKLY HARDWARE MARKET REPORTS." For current prices see Winnipeg section of "CURRENT HARDWARE QUOTATIONS" in this issue.

Hardware Collections Improve in B. C.

Garden Tools and Other Seasonable Lines Moving Well—No Failures Reported Recently.

VANCOUVER, B. C.—While the wholesale distributing trade reports little fresh activity in the outward movement of hardware, retailers are displaying a greater degree of optimism. The weather is becoming much more seasonable with the result that there is an increasing demand for garden tools and the steadily increasing volume of house building is having a very desirable effect upon purchase of lock sets, door parts and plumbing material, to say nothing of stoves and ranges which are coming in for a fair trade also.

Some complaint is being heard over the practice of some contractors in plumbing lines agreeing to purchase goods for new houses from the wholesalers, taking their profit only on the work performed. In many instances recently, according to report, firms refuse to tender on certain work, knowing that the practice is in vogue. This applies particularly to plumbing lines.

Prices are showing little change but anything effected this week has been on a downward trend. Special inducements are being offered by one or two downtown firms one of which offers the stock of a retailer in Peace River. For instance he is selling certain solid copper nickel-plated tea kettles holding six quarts at $2.39 as against the regular price of $3.10 and one brand of double boilers at the same figure instead of $3.

The same house offers a brand of paint at $1.15 a quart which is a cut of 35 cents on the regular price. A first rate white paint is quoted at $4.19 as against $5.50 with the result that some of the other houses are obliged to make proportionate adjustments.

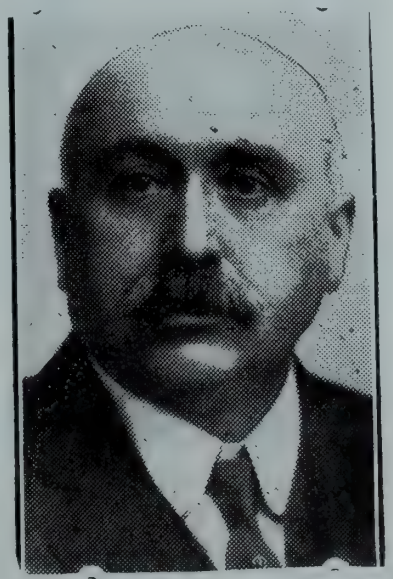
There is no noticeable change in the matter of collections. Accounts are being fairly well met and no failures are reported which indicates that business is on a fairly satisfactory basis on the coast.

DEATH OF W. G. MACKENZIE

Vancouver.—General regret was expressed by not only the hardware trade but the business community when it became known that W. G. Mackenzie, for twenty years vice-president of Wood, Vallance & Leggat, Ltd., here, had passed away, as briefly mentioned in last week's issue of Hardware and Metal. For the past couple of years he had been in ill health but strong hopes had been held that he would recover. J. H. Mackenzie of Toronto is a brother and Miss M. I. Mackenzie and Mrs. J. T. Crassick also of Toronto are sisters. The funeral was largely attended by representatives of all of the jobbing houses and most of the retail trade.

Born in Drumbo, Ont., sixty-one years ago, Mr. Mackenzie settled on the coast in 1886, starting business in Victoria, where he handled the agency for the Gurney Foundry Co., Sheet Metal Products Co., Benny Macpherson & Co., the Kent Manufacturing Co. and several other concerns. He later came to Vancouver and assumed the position he held at his death.

Mr. Mackenzie was an ardent sportsman and established at Victoria, the first lacrosse team in the west, being captain for several years. He saw service in the Northwest Rebellion. His only son, W. G. Mackenzie Jr., won distinction when serving in the Royal Flying Corps in the Great War and was awarded the Military Cross.



LATE WM. G. MACKENZIE

WESTERN CANADA NOTES

A. Greenberg, hardware merchant, of Willowbrook, Sask., has moved to Winnipeg, Man.

The sale of L. M. Coldwell, Hardware, of Rossburn, Man., to Adam Bros., has been announced.

The Sturdy Hardware Store of Revelstoke, B. C., was badly damaged by smoke and water. The cause of the fire was unknown.

Mr. McGregor who up to the present has been associated with Johnston & Salsbury, Vancouver, has resigned to open a new store at Strathcona, just this side of Kerrisdale, a suburb which is rapidly increasing in population.

Damage estimated at $30,000 was caused during the week by a fire which partly destroyed the plant of the Vancouver Rolling Mills, located at Bridgeport, B. C., on Lulu Island, near here. The firm manufactured bar iron, reinforced steel and chains.

At this week's meeting of the Vancouver Electric Club, F. E. Burke, general manager of the Wallace Fisheries, Ltd., gave an address on the fishing industry in which he intimated that legislation was desired to prevent the Americans from making further inroads upon British Columbia salmon and for which they paid no taxes.

The inroad which the Chinese of Vancouver are making on the white retail trade is further evidenced in the sale of the Fraser Hardware Company's store at 1042 Granville street, to a couple of Chinese who have been carrying on a grocery business in that vicinity. It is stated that the Chinese will conduct a groceteria in the basement of the new place and will sell hardware on the ground floor.

Frank Walsh, a traveler for McLennan, McFeely & Co., Vancouver, covering the district from Prince Rupert east along the G. T. P., was burned to death this week in a fire at Hazelton which started in the Hazelton Hotel, destroying four buildings in the business quarter. The remains were shipped to Calgary where a mother and sister survive.

Walsh entered the employ of "Mac & Mac" three years ago following his discharge from the army. He was formerly in the employ of Wood, Vallance & Adams at Calgary. Walsh was popular with the sales staff and of a very likeable disposition.

Montreal Bd. of Trade 100 Years Old

Past Week Marks Exact Anniversary Date of Organization of Montreal Board of Trade One Hundred Years Ago—An Established Reputation As An Important Commercial Body—Metal and Hardware Association an Influential Organization

THE MONTREAL Board of Trade this year celebrates its hundredth anniversary, the 11th day of April, 1822 marking the exact date of the organization of this institution. Celebration of the centenary will take the form of a banquet, which will be worthy of such an event, on April 28th, a postponement having been necessary to allow such notable guests as Lord Byng, Governor General of Canada, Hon. W. L. Mackenzie King, the Prime Minister, and others, to attend.

With a present membership of over 2,000, the growth of the Board has shown a continuous development both in membership and importance in the city, as well as in the general business community of Canada. Its activities have not been of a local nature by any means, and throughout the past century, particularly in the past 50 years, the Montreal Board has been recognized as a strong commercial body wherever represented, whether in foreign parts or at home.

The Committee of Trade

The Montreal Board of Trade is an outgrowth of an earlier institution—The Committee of Trade—which was organized in 1822. Work on the Lachine Canal had been commenced only the year before, and Hon. John Richardson, who turned the first sod of the canal on July 17th, 1821 presided on April 11th, 1822, at the preliminary meeting which gave birth to the Committee of Trade. At that time Montreal's population was 18,767.

Following is part of the entry on the records of this organization:

"Montreal, April 11th, 1822.

"At a meeting of merchants and others interested in the commerce of the city, held this day at the Exchange in St. Joseph Street, to take into consideration the propriety, and the means of establishing a Committee of Trade.

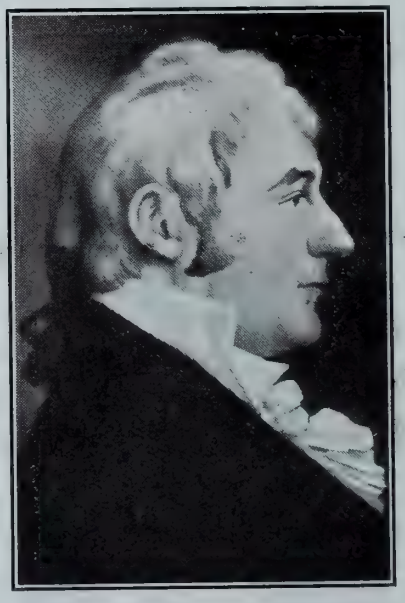
"The Honorable John Richardson, having been called to the chair, the following resolutions were first read and afterwards separately proposed and carried:

"Resolved that the ruinous consequences now apprehended from the growing embarrassments of Canadian commerce can no longer be averted or even delayed by the solitary exertions of individuals, or by the occasional hasty and inadequate deliberations of public meetings, and that the present alarming crisis demands the establishment of a standing Committee of Merchants, to be authorized by their constituents, to watch over the general interests of the trade of the country.

"Resolved that to conciliate public favor and confidence, and to obtain such a combination of experience, energy and perseverance as existing circumstances require, the said Committee shall be established on liberal principles, and be annually elected by ballot by such resident merchants of this city as shall contribute annually to the funds of the proposed institution the sum of three guineas, the first payment to be made at the time of subscription."

The first subscribers were fifty-four in number, and the following thirteen gentlemen were elected as the first Committee of Trade: Horatio Gates, George Auldjo, George Moffatt, Henry McKenzie Campbell Sweeney, John Forsyth, Peter McGill, D. A. Larocque, John Fleming, Samuel Gerrard, Thomas Blackwood, Charles L. Ogden, and James Leslie. The first meeting of this Committee was held on April 23rd, and Thomas Blackwood was elected chairman, pro tem; thus becoming the first presiding officer of the Montreal Board of Trade.

Although the Committee of Trade commenced their labors in a modest way, their influence was soon felt and three years later, in 1825, the work of the Committee began to show, for a strong effort was made to induce the Government, through a petition, to deepen the channel in Lake St. Peter, so that vessels of 250 tons burthen (!) might reach Montreal fully laden during the whole season. This was one of the first steps taken and a series of questions followed, some very important, which were dealt with in a manner that proved the worthy existence of this body of business men.



THOMAS BLACKWOOD

First chairman of the Montreal "Committee of Trade," later the Board of Trade, from 1822-1825, which organization this week marked the 100th anniversary of its formation and which will celebrate this event on the 28th of this month.

Board of Trade is Incorporated

The last meeting of the Committee was held on June 24th, 1839, after which the Association ceased to exist and the more active members took steps to re-organize as the present Board of Trade. The first meeting to organize was held on April 6th, 1840, a chairman and committee being appointed to take the required steps for incorporation. The Act of incorporation was procured in 1841 and proclaimed on March 19th, 1842. The first meeting of the incorporated Board was held on April 4th, and in the election of officers, J. T. Brondgeest was elected president. At a following meeting on the 22nd of June, the president submitted a draft of a set of by-laws for the Board, which were adopted. A synopsis of the minutes of this meeting gives an idea of the aims and activity of the new organization. Thus the passing of the Committee of Trade and the incorporation of the present Board of Trade.

Passing to the year 1886, an important event in the history of the Board is recorded when the Corn Exchange Association was federated with the Board of Trade. This important body was an association of produce merchants organized in 1862, and incorporated the following year. The year 1890 will also be especially remembered as the year when the site and requirements of the first Board of Trade building were decided upon, and in 1892 a building was erected which worthily commemorated the Semi-Centennial year of the Charter of the Board of Trade.

Following the 50th anniversary, the more recent development of commerce, city and country as a whole was closely followed by the Board. They were now settled in their more spacious quarters, and the organization was recognized as a unit of great importance, and absolute necessity, for the welfare of trade and commerce. Progress how-

Weekly Hardware Market Reports

STATEMENTS FROM BUYING CENTRES

Markets at a Glance

ANOTHER fairly large budget of price developments is recorded on the current hardware markets. Reductions are noted on practically all styles of drills, screen door hinges, the No. 2 combination vise, steel squares, wire lawn rakes, post hole augers, common clothes pins, the carborundum line of grinders, cast iron chaudrons both plain and flanged and egg crates. On the other hand, an advance appears on wood screws, through a revision in discounts, which development was outlined in last week's issue of Hardware and Metal. Some higher prices on certain wire products have also been recently made effective in southern markets, but such changes have not yet been reflected on domestic centres, this generally being considered as depending upon the probability of the new levels being uniformly adopted.

Practically all steel and iron quotations have now developed a firmer tone, with the sheet markets continuing to register noticeable activity. The stiffening of prices recently reported, has reached the stage at southern mill centers where some advances on certain steel products have been made. The general condition of scrap materials has not greatly improved, although steel scrap is slightly firmer. The movement of spring merchandise is now generally described as registering brisk activity, with improvement in this direction specially recorded in districts where weather conditions have been seasonably favorable. Certain summer sport requisites are experiencing an early call, while household lines, paint and allied products, tools, together with spring specialty lines are now included among those goods registering special popularity at this season.

Montreal Markets

MONTREAL, April 13.—The current hardware markets are again featured by quite an extensive list of price revisions, and lower prices on practically all lead products is one of the outstanding changes. A reduction of 50 cents is made in the list prices on lead pipe and waste, traps and bends are reduced approximately 8 per cent., and sheets are one-half cent per lb. lower. Prices on wood screws are now higher through revised discounts. Another important reduction is made on hammers, nail, machinists', blacksmiths', etc., showing a price decline of 12½ per cent. No. 20 screen door hinges are lower in price, and are now quoted at $21.25 per gross, while common clothes pins have a new lower quotation of $1.65 per box. "A," "B" and "C" Carborundum grinders are revised in price, and cast iron chaudrons are reduced in all sizes.

Iron and steel products in general continue on the road to improvement, this condition being particularly noted in sheets. The firmer tone in these markets has reached the stage where higher price levels are considered likely on the domestic markets in the near future. The English sheets are also in a much stronger position. Hardware jobbers describe the present movement of general lines as quite satisfactory, spring trade now having commenced in earnest.

GENERAL REDUCTION IN LEAD PRODUCT PRICES

With the exception of solders and lead wool, all lines of lead products show a reduction in price. List prices on pipe and waste are reduced 50 cents per 100 lbs., discount remaining at 10 per cent. Traps and bends are now quoted at less 17½ per cent., former discount being 10 per cent. Lead sheets in all weights are ½c per lb. lower.

It will be remembered that recent revisions were made on zinc sheets and solders, and products listed in foregoing paragraph have up until the present remained unchanged. The current reduction, therefore, brings all lines to lower levels in sympathy with metals in primary markets where an easier tendency has been displayed. Other virgin metals are slightly steadier, and it is felt that the finished products will be on a more stable basis, now that revisions have been made. Following are revised quotations:

LEAD AND ZINC PRODUCTS

Lead pipe, per 100 lbs.	12 00
Lead waste, per 100 lbs.	13 00
Note—Lead pipe is subject to a discount of 10 per cent.	
Lead traps and bends	17½%
Lead wool, lb.	0 13½
Lead sheets, 2½ lbs.	0 10
Lead sheets, 3 to 3½ lbs., sq. ft., lb.	0 09¾
Do., 4 to 8 lbs., sq. ft.	0 09
Cut sheets ¼c. lb. extra, and cut sheets to size, ¾c. lb. extra.	
Solder, guaranteed, lb.	0 25½
Do., strictly, lb.	0 23½
Do., commercial, lb.	0 20½
Do., wiping, lb.	0 21½
Do., wire, lb.	0 34
Zinc sheets, casks	0 11
Do., broken lots	0 11½

LOWER PRICES ON NO. 20 SCREEN DOOR HINGES

Montreal.

A reduction has been made in the quotations on the No. 20 screen door hinges, and these are now quoted at $21.25 per gross, or $1.80 a dozen.

EASIER PRICES ON CARBORUNDUM GRINDERS

Montreal.

Revised quotations are given on some of the Carborundum line of grinders and "A" is now quoted at $3.00, "B" at $3.85, and "C" at $5.10 each.

NO. 2 COMBINATION VISE REDUCED TO $3.10 EACH

Montreal.

The No. 2 combination vise has a new lower price and is now quoted at $3.10 each.

MODERATE DEMAND FOR PIPE FITTINGS

Montreal

There is no change in pipe fittings, quotations remaining at former discounts and current business continuing in fair proportions with a slight improvement noted as the season advances. With more activity in construction work to follow, a better movement of pipe fittings is looked for. Following are unchanged prices and discounts:

PIPE FITTINGS—	
Cast iron fittings	30%
Bushings, cast	32%
Do., malleable	32%
Flanges	40%
Plugs	30%
Flange unions	30%
Malleable unions	47%
Dart Unions, black	33%
Do., galvanized	13%
Nipples, 1/8 to 4 in., close and short	60%
Do., long	65%
Do., 4½ to 8 in., close and short	50%
Do., long	55%
Couplings, 4 in. and under	30%
Do., 4 in., and longer	10%

	Black	Galvanized
Class A	0 54	0 67
Class B	0 20	0 28
Class C	0 13	0 20

AWAIT BETTER MOVEMENT OF BOILER TUBES

Montreal

Distributors of tubular products now anticipate an improvement in boiler tubes, and are somewhat more optimistic in predicting the future trend in the following months. Tubes have shown a somewhat irregular movement in the earlier months this year, but on the whole only a moderate trade has been in evidence. Quotations are unchanged, and whether the firmer tone in other steel products will reflect on boiler tubes is at present problematic, but it is pointed out that quotations have remained on a higher basis than almost all other lines. Present prices are as follows:

BOILER TUBES—	Seamless	Lapweld
1 inch	24 70	.....
1¼ inch	24 50	.....
1½ inch	24 00	.....
1¾ inch	26 00	26 00
2 inch	24 50	20 50
2¼ inch	27 75	23 50
2½ inch	32 50	24 50
3 inch	40 00	30 50
3½ inch	52 50	34 75
4 inch	65 00	44 00

SOIL PIPE MOVEMENT CONTINUES TO IMPROVE

Montreal

The movement of soil pipe is described by local distributors as gradually improving as the spring season advances. With reports of a fairly active building program during the remaining spring months, continued activity is looked for in this product. Quotations on both pipe and fittings remain unchanged and while some dealers predicted some weeks ago that increased business after the winter season might have a tendency to stiffen prices, there is no indication at present of a revision. Local prices are considered comparatively low, especially with levels existing in other western domestic markets, but on the other hand, outside competition must be met, meaning that the chances of an advance in prices are uncertain. Prevailing discounts are as follows:

SOIL PIPE—	
2 and 3 inch	47½%
4 inch	50%
5 and 6 inch	47½%
Fittings—	
2 to 6 inch	50-10%

ONLY MODERATE DEMAND FOR RANGE BOILERS

Montreal

Although the current trade in range boilers is somewhat improved over the past quiet weeks, there is said to be room for a great improvement still. Buying continues for small quantities only, and notwithstanding reports of contemplated building in the following months showing that boilers, as well as other products used in construction work, should be in better demand, dealers are apparently willing to take care of immediate requirements only. The condition of the local market shows very little change, and both the newer list prices with discount, and older net prices are quoted. Following are list prices and prevailing discounts:

RANGE BOILERS—	
5-gallon	$ 13 50
12 to 15 gallon	14 00
18-gallon	15 00
25-gallon	16 50
30-gallon	17 50
35-gallon	20 50
40-gallon	22 75
52-gallon	38 00
66-gallon	60 75
82 gallon	74 00
100-gallon	103 00
120-gallon	117 00
144-gallon	164 00
168-gallon	187 00
192-gallon	210 00

Discounts, Standard weight, 50 per cent. Extra heavy, 40 per cent.

GENERAL REDUCTION IN HAMMER QUOTATIONS

Montreal.

A reduction of approximately 12½ per cent. is announced on practically all kinds of hammers including nail hammers, sledges, blacksmiths' hand hammers, mauls, machinists' hammers, riveting hammers, etc.

LOWER QUOTATIONS ON CAST IRON CHAUDRONS

Montreal.

Revised quotations are announced on the various sizes of cast iron chaudrons, both in plain and flanged. Following are new lower prices:

Plain, No. 8, $0.80, No. 9, $0.95, No. 10, $1.20, No. 11, $1.35, No. 12, $1.65, No. 13, $1.85, No 14, $2.10 each.

Flanged, No. 8, ..., No. 9, ..., No. 10, $1.25, No. 11, $1.40, No. 12, $1.75, No. 13, $2.10, No. 14, $2.20 each.

MAY BE HIGHER SHEET PRICES AT EARLY DATE

Montreal

Improvement in the sheet markets and the firmer tone at primary centres has advanced to the stage where higher prices are looked for by local distributors in the near future. In Southern markets the advanced quotations, are now more generally adopted, and the industry is continuing to make satisfactory progress with reports of capacity production in certain quarters.

For imported products from England it is stated that the market here is also firmer, and in the case of English galvanized sheets, prices show signs of stiffening. Opening of direct navigation to Montreal is expected in a few weeks, and new shipments will arrive. With these conditions prevailing in both American and English markets, any example in this respect will no doubt be followed by domestic producers. Following are present quotations:

BLACK SHEETS

10 gauge	4 00	4 50
12 gauge	4 10	4 60
14 gauge	4 40	4 70
16 gauge	4 50	4 80
18-20 gauge	4 55	5 05
22-24 gauge	4 60	5 20
26 gauge	4 65	5 25
28 gauge	4 75	5 35

Sheets 3 in. wide, 20 cents per 100 lbs. extra.

ACTIVE MOVEMENT IN DIFFERENT WARES

Montreal

Manufacturers of wares now pronounce the movement of their various lines as quite active, particularly enameled ware and aluminum ware. The former has shown a steady improvement since the first of the year, and sales records show a decided increase over last year. Aluminum ware has also shown a corresponding increase, this line becoming more popular each season. Tinware is holding its own, seasonable lines selling in satisfactory volume. There is no particular change in quotations on any products, the market in general being on a fairly steady basis.

PRICE REDUCTION IN COMMON CLOTHES PINS

Montreal.

Lower prices are given on common clothes pins, and the new price is $1.65 per box of 5 gross.

INCREASED QUOTATIONS ON WOOD SCREWS

Montreal

A revision has been announced in the discounts on wood screws, resulting in an advance all through the list of around 12 per cent. Following are the new discount levels:

WOOD SCREWS—	
Flat head bright	82-½-/5
Round head bright	80/5
Oval head bright	80/5
Flat head brass	77½-/5
Round head brass	75/5
Oval head brass	75/5
Flat head bronze	72-½-/5
Round head bronze	70/5
Oval head bronze	70/5

Discounts quoted above, off standard list, adopted August, 1, 1908.

BETTER TONE EVIDENT IN CORRUGATED SHEETS

Montreal

A somewhat firmer tone exists in the corrugated sheet market owing to the improvement noted in flat galvanized sheet. While this is not yet of sufficient extent to directly reflect on corrugated sheets, according to a local dealer, it tends to offset the easier tendency displayed in recent weeks owing to certain distributors offering a price concession, especially on the heavier gauges. Future developments in the galvanized sheet markets will be closely watched by those interested, and it is thought that if the strength continues locally, it would not be long before a corresponding firmness would be noted in corrugated. Following are present list prices and discounts

CORRUGATED SHEETS	Per 100 sq. ft.
No. 28 gauge	6 50
No. 26 gauge	7 00
No. 24 gauge	9 00
No. 22 gauge	11 00
No. 20 gauge	12 50
No. 18 gauge	16 00

Less 10 per cent.

Lighter than 24 gauge and wider than 27 ins, 75c a square extra.

GASOLINE AND COAL OIL AT UNCHANGED FIGURES

Montreal

Although motor oils and lubricating oils have shown a reduction in recent weeks, gasoline and coal oil remain at unchanged price levels. Crude oil shows slight fluctuations, with little material change in the past few weeks. With increased sales of gasoline since the opening of more open weather, the undertone of this product is strengthened somewhat in comparison with its allied product, coal oil. Further activity, however, is expected in the latter as soon as the weather permits the use of oil stoves. Gasoline is quoted at 32½ and 35½ cents, coal oil at 22 cents.

STEEL IMPROVEMENT NOW MORE PRONOUNCED

Montreal

The firmer undertone displayed in iron and steel products generally is more pronounced this week. Stiffening of prices at primary centres becomes more general from week to week, this movement being continually encouraged by necessary increased production. One local distributor stated to Hardware and Metal that he would not be surprised if a general price increase was quoted within the next week or ten days. Apart from the improvement at the mills, consuming demand continues to expand, and during the past week sales increased appreciably. It is apparent that the present healthier state of the market is considered more than a temporary condition, and while the improvement has taken quite a time to make its appearance, it is felt that the industry is now definitely on the road to recovery. Current prices follow:

Common bar iron, 100 lbs.	2 65
Refined iron	4 15
Irish finish machinery steel	2 70
Mild steel	2 65
Single reeled machinery steel	4 75
Band steel	2 65
Spring steel	4 25
Sleighshoe steel	2 65
Tire steel	2 85
Toe caulk steel	3 55
Harrow tooth steel, per lb.	2 80
Mining tool steel, per lb.	0 21½
Black Diamond tool and cast steel, per lb.	0 21½

NOTE—Refined iron is approximately $1.50 per 100 pounds over base, but fluctuates owing to unsettled market.

Band steel in scroll bundles, 50c per 100 lbs. extra.

NO FURTHER CHANGE IN WASTE MATERIALS

Montreal.

Current quotations on waste materials are nominally unchanged since the revision of last week. It will be remembered that in these revisions, the boiler plate price was increased, which is really the first advance in quotations for some months past. It is now stated by dealers that with the opening of Spring weather, and the improvement in the steel industry, a better tone should soon be in sight for scrap metals, especially those of iron and steel. The market remains in a very quiet state, but heavier consumption is looked for during the following weeks. Following are unchanged nominal quotations:

Automobile tires	0 50
Rubber shoes	0 02¾
Yellow brass	0 05
Red brass	0 08¼
Light brass	0 03½
Scrap zinc	0 03
Lead, heavy	0 04
Lead, tea	0 02
Light copper	0 08
Heavy copper	0 10
Wrought iron, R. Rd., No. 1 per gr. ton	9 00
Malleable scrap (ton)	8 00
Pipe scrap (ton)	6 50
Heavy melting steel	6 50 7 00
No. 2 busheling	3 00
Boiler plate	7 00
No. 1 machinery cast	26 00

SLIGHT SLACKENING IN MOVEMENT OF EAVESTROUGH

Montreal.

While trade in eavestrough and conductor pipe has shown a gradual improvement through past weeks, a slight slackening in the movement has been noted in the past week or so. This, however, is only considered temporary, and dealers anticipate an active season in the following spring and summer months. The firmer tone in galvanized sheets is being watched with interest by manufacturers, and although a stiffening of prices in the sheet market would take a little time to reflect on these products, a continuance of strength in sheets, assisted by a more active market would firm the situation considerably for the active season later on. Unchanged prices and discounts are the following:

EAVESTROUGH—

O. G. round and half-round, per 100 ft.

8 inch	10 inch	12 inch	15 inch	18 inch
$16 90	$18 70	$22 20	$29 80	$37 80

O. G. Square bead, per 100 ft.

8 inch	10 inch	12 inch	15 inch	18 inch
$15 90	$17 70	$21 20	28 80	$36 80

CONDUCTOR PIPE:—round, plain and corrugated, per 100 ft.

2 inch	3 inch	4 inch	5 inch	6 inch
$18 40	$22 30	$29 60	$40 00	$49 00

Discount 70/10 per cent.

CONDUCTOR ELBOWS—

3 inch	6 00
4 inch	10 50
Plain or corrugated.	dozen
2 inch	$ 5 25
5 inch	24 00
6 inch	29 00

Discount 60 per cent.

INGOT METALS CONTINUE TO SHOW IMPROVEMENT

Montreal

The slightly better tone in the ingot metal markets referred to last week remains, and several lines have shown a certain amount of firmness. It cannot be said that this has been followed by any great volume of buying locally, but the improvement shows signs of greater confidence.

TIN.—This metal showed a sharp advance in the early part of the week, but it is considered doubtful whether the advance will hold. The local market, however, is quite firm and stocks are rather light pending further arrivals upon the opening of navigation. The market locally is firm at 35½ cents.

COPPER.—Copper is strong both in London and New York, without any marked change in the situation. It is not likely that the situation will change materially until stocks are lessened. Locally the market is quiet at 16¾ cents for casting.

SPELTER.—This metal has been quite strong at East St. Louis, but no marked revisions have been recorded in either primary or domestic centres. Locally spelter is firmer in sympathy at 7½ cents.

LEAD.—This is the strongest metal on the list, and the price in southern circles has advanced slightly during the past few weeks. The London market is also firm. The local trend is based on English lead, and with navigation soon opening direct to Montreal, the price is not appreciably changed. Local price is firmer at 7 cents.

ANTIMONY.—There is no particular change in the price of antimony, but the market is steady with a little more activity. Locally prices are unchanged at 6½ cents for Chinese and 7½ for high grade English.

ALUMINUM.—This metal fails to make any impression either on the local or outside markets. Quotation remains unchanged at 24 cents.

Toronto Markets

TORONTO, April 13.—The general price trend is still in a downward direction, with a number of reductions again recorded this week. Lower prices have been announced on wire lawn rakes, post hole augers, egg crates, steel squares, and spring hinges, while practically all makes of drills have easier quotations through revised discounts.

On the other hand, higher prices have been recorded on wood screws, a development which was outlined in last week's issue of Hardware and Metal. Some advances are also noted on various wire products in southern markets, but such changes have not yet been reflected on domestic centres, although it is generally considered that there is a possibility of the new levels being uniformly adopted.

The sheet markets continue to register activity, while a firmer tone has developed in practically all steel and iron quotations. Boiler tube prices, however, are described as still nominal, quotations ranging according to specifications and delivery. Marked activity is noted in tin plate circles. Scrap steel is now slightly firmer, but the general condition of waste materials is not much improved. Construction work creates an active movement in builders' hardware, and the advent of Spring has brought an increased demand for baseball supplies, as well as an early call for other summer sport goods.

LOWER PRICES ON WIRE LAWN RAKES

Toronto.

New lower prices have been announced on wire lawn rakes. The revised quotations on these products follow:

WIRE HAND RAKES—

Sizes	per doz.
20 teeth	$5.50
24 teeth	5.85
36 teeth	10.80

CHANGE QUOTATIONS ON POST HOLE AUGERS

Toronto.

The Rodgers line of post hole augers have now experienced a slight price reduction. The new quotations are as follows: 8 inch, $29.40: 9 inch, $30.00.

SLIGHT CHANGE IN WIRE SAWDUST PRICE

Toronto.

A slight reduction has been recorded in the current prices on wire sawdust, this product now being quoted at thirty cents.

EGG CRATE PRICES REGISTER REVISION

Toronto.

Revised price levels have been announced on the H & D line of egg crates, these products now being quoted at $5.80 per doz.

SOME ADVANCES NOTED ON WIRE PRODUCTS

Toronto.

An advance in prices on certain wire products has been recently announced by some of the wire manufacturers in the south. The various items recording an increase in quotations are, wire nails, cement coated nails, polished staples, galvanized staples, painted barb wire, and galvanized barb wire. Other lines, such as plain wire and galvanized wire, remain unchanged in price at present. Whether these advances will be reflected on the domestic markets is stated as depending upon the uniformity of such revised levels, and the possibility of these being generally adopted by other producers.

PRICE DECLINE NOTED ON STEEL SQUARES

Toronto

Lower quotations also appear this week on steel squares. The revised levels on the products follow: No. 3, $21.-60: No. 14, $19.60: No. 100, $24.00; with the usual extras on nickel-plated and blued.

DRILL PRICES LOWER THROUGH NEW DISCOUNTS

Toronto.

A general revision has been announced in the discounts of practically all makes of drills. This change results in prices being on a lower level. Bit stock drills, jobbers, blacksmiths', straight shank, and wood boring drills, are all quoted at sixty per cent off, compared with the former levels of 47½ and 50. However, some of the quotations recorded locally differ slightly, 55 and 5 per cent. being also noted.

PRICES REDUCED ON SPRING HINGES

Toronto.

Certain makes of spring hinges are now lower in price, the revised quotation announced on the No. 20, screen door hinges, being $21.25 per gross, or $1.80 per dozen.

HIGHER PRICES APPEAR ON WOOD SCREWS

Toronto

As outlined in last week's Hardware and Metal market report, an advance has now been announced in quotations on wood screws. The discounts have been revised all through the list, the change resulting in an increase on the current market quotation pages.

SHEETS CONTINUE TO REGISTER ACTIVITY

Toronto.

In sheet production centres, the proportion of new tonnage still continues on an ascending ratio, and certain mills report heavier bookings than since the war years. The sheet tonnage on the whole has not been equalled for almost two years. While the coal strike in the south has so far failed to produce any major disturbance in manufacturing activities, and is not generally regarded with any degree of apprehension, yet a feeling is noted that much of the present activity is for stock purposes, with the demand from manufacturing consumers of sheets having been somewhat hastened because of the coal situation. On the domestic markets, sheets continue to record improved activity, with prices considerably firmer. While no general advances have yet been recorded, viewed in the light of recent increases in the south, a slight comparative change is considered not unlikely in some quarters. Following are the average current prices:

BLUE ANNEALED—

10 gauge, base	3 50	4 25
12 gauge	3 65	4 30
14 gauge	3 60	4 35
16 gauge	3 65	4 40

BLACK—

18—20 gauge	4 05	4 80
22—24 gauge	4 10	4 85
26 gauge	4 15	4 90
28 gauge	4 25	5 00

Charge of from 25c per 100 lbs. is made for less than case lots. An extra 10c per 100 lbs. is also charged on sheets 26 in. wide.

GALVANIZED—

	Queen's Head	Fleur-de-lis
28 gauge	7 50	7 00
26 gauge	7 25	6 75
24 gauge	6 85	6 35
22 gauge	6 40	5 90
18 and 20 gauge	6 25	5 75

	Premier and Apollo
10¾ oz.	6 75
U. S. 28 base	5 35
U. S., 26 gauge	5 05
22 and 24	4 90
18 and 20	4 75
16	4 60
12 and 14	4 45

An extra 40c. per 100 lbs. is charged for Keystone and Premier brands copper-bearing sheets.

An extra is now charged on galvanized sheets, 10 3-4 oz. and 28 ga., when shipped out in sheets 3 feet wide. The extra charged over prices shown above is 20c. per 100 pounds.

ADVENT OF SPRING BRINGS EARLY CALL FOR BASEBALL GOODS

Toronto

The current demand for baseballs and baseball supplies is described as surprisingly good for so early in the season. Some dealers are looking forward to fresh records in the movement of such products, especially in view of the fact that the few earlier spring days recently experienced, aroused keen interest in baseball and similar summer pastimes.

FIRM TONE DEVELOPS IN STEEL QUOTATIONS

Toronto

Throughout the iron and steel market, a strong stiffening tendency as regards prices continues plainly in evi-

dence. While some steel products have definitely higher quotations, other commodities such as bar iron and steel have reflected this movement in the practical elimination of price concessions previously noted. Structural steel is stated to be in better demand on the domestic markets, but as large construction work is not numerous, it is considered that some buying is for stock. Local quotations are now considerably firmer at the following levels, which cannot be looked upon as nominal any longer:

IRON AND STEEL—	
Mild steel bars base	2 75
Mild steel bands, 3-16 in. base	3 25
Bar iron, base	2 75
Angle iron, base	2 85
Horseshoe iron	3 60
Tire steel	3 00
Spring steel	6 00
Sleigh shoe steel	2 85
Hoop steel	3 75
Norway iron	12 50
Toe caulk iron	4 00
Crucible cast sheet steel	30 00
Mining drill steel	18 50
Cast tool steel, high grade	80 00
Cast tool steel, medium	18 00

BOILER TUBE PRICES STILL NOMINAL

Toronto.

Distributors state that although current business is coming along in fairly satisfactory volume for this time of the year, yet the boiler tube market has not attained the stabilization hoped for. Prices are still entirely nominal, being made according to the individual order and on the length and sizes required. Each specification is generally being treated on its merits, and local dealers claim that competition from various outside points, has kept quotations in a more or less unsettled condition. Following is an average list representing approximate levels in effect locally:

BOILER TUBES—	Seamless	Lapweld.
1 inch	$21 00	$.....
1¼ inch	21 50	.....
1½ inch	22 00	.....
1¾ inch	23 00	.....
2 inch	22 00	17 00
2¼ inch	26 00	18 00
2½ inch	30 00	20 00
3 inch	34 00	25 00
3¼ inch	43 00	27 00
3½ inch	47 00	28 00
4 inch	58 00	35 50

TRADE SLIGHTLY BRISKER IN LEAD PRODUCTS

Toronto.

The activity recorded in lead and zinc products during March is generally described as larger than the previous month. Prices on these goods remain at recently revised levels, with trade slightly brisker, and better prospects now reported. Distributors state that more business is in sight, a situation which has not been apparent for some months. Following are the prevailing quotations:

LEAD AND ZINC GOODS—		
Lead pipe, list, per lb.		0 12
Lead waste pipe, list, per lb.		0 13
Do., over 8 in., list, per lb.		0 14
Lead pipe is subjected to a discount of		10%
Lead traps and bends		0 17½%
Lead sheets 4 to 6 lbs. sq. ft in rolls, lb.		0 09
Cut sheets. ½c to ¾c lb. extra and cut sheets to size 1c lb. extra.		
Solder, wire, per lb.		0 30
Do., strictly. lb.		0 22½
Do., commercial, lb.		0 21
Do., guaranteed, lb.		0 24
Do., wiping, lb.		0 21
Zinc sheets, per lb.	0 09	0 10

MARKED ACTIVITY IN TIN PLATE CIRCLES

Toronto.

A remarkable degree of activity is noted in tin plate production circles, recent reports from the southern mills indicating that the tonnage has not been equalled since June, 1920. Demand is also recorded as satisfactory, with the domestic trade registering improvement since the recent reduction in prices. It is stated that Canada has been taking a considerable share of Welsh tin plate. One order included 250 boxes. In connection with the Welsh tin plate industry, it is noted that workers associated with the steel trade in South Wales have lately agreed to a marked decline in wages. Following are local tin plate quotations:

PLATES, CANADA—	
Dull 60 sheets	5 30
Ordinary, 52 sheets	5 25
PLATES, COKE TIN—	
IC, 20 x 28, 112 sheets	12 50
IX, 20 x 28, 112 sheets	16 00
IX, 20 x 28, 56 sheets	8 50
PLATES, CHARCOAL TIN—	
IX, 20 x 28, 56 sheets	10 00
IXX, 20 x 28, 56 sheets	12 00
PLATES, TERNE—	
IC, 14 x 20, 112 sheets	11 60

MARKET OUTLOOK FOR CORRUGATED IMPROVES

Toronto.

The market for corrugated sheets has recently shown signs of improvement, with industrial building reflected in the demand for the heavier gauges of corrugated. The fact that there was practically no activity as regards industrial erection last year, resulted in a generally depressed situation in these products. According to manufacturers and distributors, however, the movement of lighter gauges is also recording increase, and the outlook is generally described as much improved.

CORRUGATED SHEETS—	Per 100 Sq. Ft.
No. 28 gauge	6 50
No. 26 gauge	7 00
No. 24 gauge	9 00
No., 26 U. S., gauge	8 00
No. 22 gauge	11 00
No. 20 gauge	12 50
No. 18 gauge	16 50

Less 10 per cent.
Lighter than 24 gauge and wider than 27 ins., 75 cents per sq. extra.

CURRENT TRADE FAIR IN ROPE AND CORDAGE

Toronto

In discussing the prevailing business in rope and cordage with manufacturers and distributors, the opinion was expressed that current trade is not up to standard, when compared with some previous seasons. However, it was stated that taking prevailing market conditions into consideration, business is generally looked upon as fair under the circumstances. Improvement as regards both the volume and size of orders, is looked for in the near future. Quotations remain unchanged on all grades of cordage.

SCRAP STEEL NOW SLIGHTLY FIRMER

Toronto

Scrap materials show little change. Copper scrap is most wanted and around 10.50c is still obtainable for heavy copper and wire. Yellow grades sell but prices are rather irregular. White metals hold firm, and are in slightly better demand.

Scrap iron and steel is sympathetically stronger with rising markets in the south, but domestic consumers are not offering any higher prices, and only cast scrap is moving with any degree of freedom.

The following are averages of dealers' buying prices for large quantities:

SCRAP MATERIALS

Gross Tons— Scrap Iron		
Heavy melting steel (Hamilton)	$11 50	$12 00
Borings and turnings	2 00	3 00
Rerolling rails	10 50	11 50
Scrap pipe	6 00	7 00
No. 1 railroad wrought	10 25	11 25
Steel turnings (Hamilton)	6 50	7 50
Agricultural malleable	10 00	11 00
Railroad malleable	11 00	12 00
Net tons—		
No. 1 cast	15 75	16 75
Stove plate	11 50	12 00
Grate bars	10 50	11 00
Standard car wheels	14 50	15 00
Scrap Metals.		
Heavy copper and wire	10 50	11 00
Light copper	8 00	9 00
No. 1 composition	9 00	10 00
No. 1 comp. turnings	6 00	7 00
Light brass	3 00	3 50
Heavy yellow brass	5 50	6 00
Heavy lead	4 50	4 75
Tea lead	2 00	2 60
Scrap zinc	4 00	4 25
Scrap Rubber		
Boots and shoes	2 25	2 50
Lumbermen's rubber boots	1 50	1 75
Solid tires	0 75	1 25
Auto tires	0 50	0 60

OPTIMISTIC OUTLOOK IN WROUGHT PIPING

Toronto

List No. 54, still governs the domestic pipe markets, with current conditions in this industry registering very little variation. Some development is noted in the primary steel markets where price shading between opposing interests is again reported, but domestic manufacturers and distributors report that no changes are, at present, being contemplated. Current business is described as comparing very favorably with the volume of trade last year, while increased activity is generally reported during recent weeks. With an improvement in basic market conditions during the ensuing months, the outlook is stated as generally optimistic.

BRISK DEMAND FOR BATHROOM FIXTURES

Toronto.

Wholesalers report that the large number of new homes heing erected has created a better demand for bathroom fixtures of various kinds. One merchant stated to Hardware and Metal that the volume offering in this direction is very pleasing as well as providing leads for the sale of other seasonal needs. Some minor price adjustments have recently been made in some of these products, and dealers therefore look for a brisk movement during the current season.

London Markets

LONDON, April 13.—A reduction in the quotations on jobbers' and blacksmiths' drills, through revised discounts, furnishes the principal price development on the current hardware markets. Other changes include an increase of five cents per gallon in turpentine prices, while a recession to a similar amount is recorded in linseed oil. Quotations on other seasonal lines generally remain unchanged.

The warm weather has had a stimulating effect on trade and business is reported good during the last part of the week. Garden tools, fencing, poultry netting, house-cleaning supplies, paints, oils, etc., are all in good demand.

REVISED DISCOUNTS BRING LOWER DRILL PRICES

London, Ont.

All jobbers' and blacksmiths' drills are now reduced in price through a revision in the discounts. The new quotation is list less 57½ per cent. Bit stock and wood boring drills, however, remain unchanged at the previous discount of 47½ per cent.

LINSEED OIL PRICES RECEDE FIVE CENTS

London, Ont.

Another recession to the extent of five cents per gallon has been recorded in linseed oil quotations, this change bringing the nominal price level to $1.05 for raw and $1.08 for boiled in one and two barrel lots. The current sale of this product now shows considerable improvement:

LINSEED OIL—	Raw.	Boiled.
1 to 2 bbls., per gal	1 05	1 08
3 to 5 bbls., per gal.	1 04	1 07
6 to 9 bbls., per gal	1 02	1 05
Less barrels, add 15 cents gal.		

ANOTHER INCREASE IN TURPENTINE PRICES

London, Ont.

The tone of the turpentine market has improved somewhat during the past few days, and fresh receipts are of a very light nature. This situation, combined with a temporary shortage of current supplies, both on the domestic and primary centres, has caused the firmer attitude noted in this product. Prices locally have now recorded an advance of five cents per gallon, this change bringing quotations to the following levels:

TURPENTINE—	Imp. Gal.
1 bbl. lots	1 30
2 to 4 bbl. lots	1 29
5 gal. lots	1 45

BUILDING STIMULATES ACTIVE NAIL DEMAND

London, Ont.

With the added stimulation of brisk building activity, the seasonable movement of nails, usually noticeable at this time of the year, has recently been more accentuated. There have been no further revisions in price, the following quotations prevailing:

NAILS	
Wire, base	3 65 per keg
Cut, do.,	4 35 per keg.

SUMMER IS HERALDED BY MOVEMENT OF TENNIS RACQUETS

London, Ont.

Signs of spring and warmer weather are accentuated by the recent movement of tennis racquets. These goods are now selling, together with a number of other sport supplies. Quotations on the Bentley make of racquets are as follows:

TENNIS RACQUETS—	Each
Leader	1 80
Triumph	3 25
Defiance	4 50
Queen	4 85
Dreadnought	6 50
Championship	8 35

IMPROVEMENT NOTED IN ROPE AND CORDAGE

London, Ont.

With the opening of spring weather, the sales of rope and cordage are generally reported as on the road to improvement. Distributors describe the outlook as fairly good, with current trade as well as can be expected, taking into account the general circumstances surrounding trade. Following are the unchanged price levels on these products:

ROPE—	lb. base
Pure Manilla	23c
Beaver Manila	20c
New Zealand Hemp	20c.
Sisal	18c.

BRISK SEASON IN AUTO ACCESSORIES

London, Ont.

Automobile tires and tubes, together with many lines of auto accessories are experiencing good sales at present. Spring has brought increased opportunities for sales of these products, and many hardware merchants are featuring them as leaders and specials in their seasonal sales.

Winnipeg Markets

WINNIPEG, April 13.—Changes in quotations recorded on the current hardware markets are all in a downward direction. Reductions are noted this week on such products as cotton clothes lines, steel stencil figures and tubular rivets. Quotations on other primary markets at present remain generally unchanged.

Reports covering business conditions continue to indicate gradual improvement. A steady volume of small orders is being received, but the forward buying in quantity is the chief complaint from jobbers and also manufacturers. However, this condition is expected to last for some time pending more stabilized market conditions.

REVISED PRICE LEVELS ON STEEL STENCILS

Winnipeg.

A reduction price on steel stencil figures is shown in latest quotations. Following are the revised prices:

STEEL STENCILS—
⅛ in., $1.00 per set.; ¼ in., $1.20 per set.; ⅜ in., $2.30 per set.

REDUCED QUOTATIONS ON TUBULAR RIVETS

Winnipeg.

Prices are lower this week on tubular rivets. Following are the latest quotations:

TUBULAR RIVETS—
¼ in., $2.47 per doz. pkgs.; ⅜ in., $2.73 per doz. pkgs., ½ in., $2.90 per doz. pkgs.; ⅝ in., $3.17 per doz. pkgs.

IMPROVED DEMAND FOR STEEL PRODUCTS

Winnipeg.

The demand for iron and steel shows a slight improvement during the past week. It is felt however that on account of no great movement in larger building construction, sales will not be as large as in previous years. However, it is thought that a greater improvement will be realized than exists at the present. Quotations locally are unchanged, but generally considered firm. Following are the unchanged prices:

BAR IRON—	Per 100 lbs.
Rounds and Squares 3-16, ¼ and 5-16 base	4 15
Rounds and Squares ⅜ to 2 and Flats up to and including 1 x 4 base	4 00
Rounds and squares over 2 up to and including 2¾ and Flats over 1 x 4 up to 6 wide. base	4 75
Rounds over 2¾ to 6 base	5 25
Band steel, base	4 50
Sleigh Shoe Steel, base	5 25
STEEL—	
Soft or mild rounds and squares 3-16, ¼ and 5-16 base	4 15
Rounds and squares ⅜ to 2 and Flats up to and including 1 x 4, base	4 15
Rounds and squares over 2 up to and including 3 and Flats over 1 x 4 up to 6 wide, base	4 75
Rounds over 3 to 6, base	5 25
Tire Steel,	5 50
Spring Steel	9 30
Harrow Tooth Steel	6 55
Cant Hook	7 30

ONLY FAIR DEMAND FOR RANGE BOILERS

Winnipeg.

There is very little change in the range boiler situation, sales continuing at just a fair rate, and quotations of an

unsettled nature. Prices are generally quoted at a net figure, but a few are still quoting discounts off list prices.

It is thought business will improve in the near future, the opening of the spring months usually producing more activity in lines pertaining to the building trade. There is little or no change in the boiler markets. Following are the unchanged prices:

RANGE BOILERS—
30 gal., $9.60.; 35 gal., $13.25; 40 gal., $16.25; 52 gal., $23.45; 66 gal., $33.15; 82 gal., $40.60; 100 gal., $62.50.; 120 gal., $75.00.

SLIGHT IMPROVEMENT NOTED IN MOVEMENT OF EAVESTROUGH

Winnipeg

An improvement is noticed in the movement of eavestrough and conductor pipe, although current business is still described as moderately light in this line. There is, however, an optimistic feeling that a fairly good trade will be anticipated owing to the season opening up early and the prospects of a fair amount of building activity.

Stocks are reported to be in a fairly low condition, with the following unchanged quotations at present in effect:

EAVESTROUGH—
8 in., $5.06 per 100 ft.; 10 in., $5.63 per 100 ft.; 12 in., $6.75 per 100 ft.; 15 in., $9.38 per 100 ft.

CONDUCTOR PIPE—
2 in., $6.19 per 100 ft.; 3 in., $7.13 per 100 ft.; 4 in., $9.00 per 100 ft.; 5 in., $12.75 per 100 ft.

ROLLER SKATES POPULAR

London, Ont.

A brisk seasonal sale continues to be recorded for roller skates, with prices remaining at the present season's levels. Following are quotations on one make of roller skates:

ROLLER SKATES—
No. 3 Steel Wheel, $1.10 pair.
No. 5 Ball Bearing, $2.65 pair.

WHEEL BARROWS NOW IN SPRING MOVEMENT

London, Ont.

Dealers now report that wheel barrows are in fair demand, the advent of spring weather having stimulated the demand for these goods. Prices are as follows:

WHEEL BARROWS—
City Pattern Garden, $4.85 each.; Regular Size Garden, $6.75 each.; Regular Size Farm, $6.75 each.

GARDEN SYRINGES NOW IN SEASONAL DEMAND

London, Ont.

Brass garden syringes are now recording a seasonal selling movement. Prices on these products remain unchanged at the following levels:

1½in. x 18in. .....$21 50 doz.
1½in. x 16in. ..... 20 50 doz.

LOWER PRICES ON COTTON CLOTHES LINES

Winnipeg.

A reduction in price is recorded on cotton clothes lines. Following are the latest quotations on these products:

48 ft. .....$3.20 per doz.
60 ft. ..... 4.00 per doz.

Hamilton Markets

HAMILTON, April 13.—The feature of the current market reports still centres around the recent firmness in practically all phases of the steel industry. This strength is not alone confined to the market undertone, but is apparent through the development of higher price levels on galvanized and black sheets in southern primary centres, and also in the stiffening of prices on various finished and semi-finished steel products.

Improvement as regards the volume of demand experienced during the past few weeks, provides one of the pivots of the present situation, this being the turning point in the market as well as marking an increase in production activity. Recent purchasing for stock requirements has added considerably to the confidence in future developments, displayed by both producers and consumers alike. There have also been many inquiries of a more substantial nature evident during the latter portion of March and the early days of the present month; but although seasonal improvement in this direction was naturally anticipated during the Spring, discussion has arisen as to whether the present degree of activity can be proportionately maintained throughout the ensuing months.

Good Weather Stimulates

In seasonable hardware lines the advent of more suitable weather was hailed as a stimulant for added briskness in the movement of the products by practically all phases of the trade. Indeed, the hardware industry was beginning to feel the need of incentive in this direction in order to maintain the normal ratio of prevailing activity expected. Retail merchants record the fact that consumer demand is more in evidence, and both manufacturers and distributors of Spring goods are looking for repeat orders to develop.

The touch of warm weather recently experienced in this district also brought forth an active call for many summer lines, especially baseball requisites, fishing supplies, and other summer sporting goods generally. During the past few days, Hamilton merchants have been engaged in attracting Easter trade through the careful display of new and seasonable merchandise. Household goods of various kinds have proved extremely popular in certain quarters, while tools, building supplies, paints, builders' hardware, electrical products and garden necessities are included among those products registering special activity.

Market Stabilization

Recent price developments tend to demonstrate the fact that certain markets are still somewhat unstable, and the policy of moderate commitments is generally being adhered to. Outside of the stiffening recorded in steel prices, and the firmness recorded in shellac and turpentine, other quotation changes have provided easier price levels. One wholesaler, when discussing this phase of the prevailing markets with Hardware and Metal pointed out that while some reductions continue to appear at different intervals, yet the new range of quotations announced on these various products now generally remain in effect for a longer period than formerly. In other words, current changes cover different lines, and are not so frequent as have been noted during the past few months.

Pittsburg Markets

PITTSBURG, April 13.—An advancement in prices in certain wire products, provides additional evidence of the stiffening in southern steel price levels generally. Quotations on bar products continue to firm up, while production activity continues to maintain a satisfactory degree of increase.

Encouraging Increase.—The rapid increase in production is very encouraging to the entire trade, sellers and buyers alike, but at the same time it sounds a note of warning. At the middle of last July the rate was barely over 10,000,000 tons, July as a whole having shown a rate of 11,000,000 tons. It is obvious that actual consumption has not tripled in less than nine months. General business has undoubtedly improved rather steadily, but there could be no such change as indicated by the figures. The extremely low production of last July was explained by buyers of steel being in the act of reducing their stock, and it is just as reasonable to assume that of late they have been replenishing their stocks.

The pace of increase cannot be maintained, for a continuance would in three months, i. e., by the middle of June, bring a rate equal to the record high rate ever seen, and in two months more the entire capacity would be in operation. Underlying conditions are not thus far justifying any such exhibition.

Viewing the matter in another light, experienced observers are practically a unit in asserting that actual consumption is at nothing like a rate commensurate with the production. The conclusion is that buyers have been adding to their stocks.

Real Economy Basis of "Save the Surface"

A. J. WEBB

Some Suggested Leads for Paint Business for the Rural Hardware Merchant—Exposing Weather Worn Surface in the Window Alongside Freshly Painted and Well Protected Surface is Effective

Written for Hardware and Metal by A. J. WEBB

THIS article is being written more particularly for the rural hardware merchant, who can do much towards making a success of the "Save the Surface" campaign, the result being in accordance with just how much enthusiasm and interest he will put behind it.

We would suggest to this dealer that he start the spring of 1922 first and foremost by painting and brightening up the exterior of his own store. It will well repay the dealer many times over by the smart and attractive appearance his premises will present and which will indicate that the dealer is a practical believer in what he is preaching. You cannot expect to develop a paint business from a dilapidated or weather beaten store, and it certainly is highly to the dealer's advantage to commence the spring season of 1920 by taking some of his own medicine.

Let us suggest an extra special display of paints, varnishes, brushes, etc., in his window, devoting more time and space to this effort than possibly has been done in the past. A well laid out window, showing a good display of color cards showing the various tints and combinations will go a long way towards interesting the general public in the use of paints and varnishes, while if the dealer circularizes his neighborhood, or gets the manufacturer of his paints to do this for him, sending him a list of all good prospects, much work can be accomplished in this way also.

There is a great difference between the business that can be developed by the dealer who is content to stay at home in his store, as against the dealer who will interest himself in the various prospects that are always on hand in his own town, and which can be gotten after by either personal effort, or through the mails.

Economy Is Big Factor.

We believe that if the very great economies that are derived by the use of paints be brought home to the owners, more so than the decorative effect, that the dealer will find he can obtain business which he might otherwise have thought almost impossible. Slowly and surely is the public of Canada coming to realize that to paint up, or to varnish, is nothing more or less than the best form of economy, but it is up to the dealer to keep the ball rolling by his own efforts in this regard. Let him believe fully, implicitly in the importance of "Paint-Up"—and varnishing, and he will then be in a much better position to hand over this same spirit to the prospective customer. We can all talk much better about a proposition when we actually believe in it ourselves, and if the dealer will keep this in mind the wonderful savings, running into many millions of dollars, that are effected in Canada yearly, by the "Saving the Surfaces" of the various buildings, homes, etc., which exist in Canada he will surely be able to put up a pretty strong argument to any of his "would be customers," who possibly are wavering as to whether they are going to paint or not. There is nothing however, that puts this message across quite so clearly, quite so convincingly, to the property owner, as actual, visual evidence of the losses sustained by not properly painting the surface by a coat of paint or varnish. In each locality there are, unquestionably, houses that are simply ruins through this neglect, and we would suggest wherever possible that the dealer obtain a piece of the weather-beaten side of the house, or the porch which has simply rotted through, owing to the fact that it has never been painted, and expose it in his window together with another piece of wood that has been painted regularly, and which has possibly stood the test of time for perhaps twenty years. Get some of those old curled up shingles off the barn or out-building, that has never been shingle-stained, and show it side by side with a new shingle, newly stained, or better still a shingle taken off a barn or outbuilding that has been treated properly with shingle stain, and which will be in perfect condition. When shown side by side the argument is driven home with irresistible force while displays of this nature can be assisted very materially by the dealer's own personal touches, or possibly by some little printed card stating, for example, "does it pay to paint?" or something of that nature. Nothing appeals more strongly to the property owner, than to see the two results side by side and there is no question that it sinks right home—far more than merely talking about the matter will ever do.

Economy of Saving the Surface.

The "Save the Surface" campaign is effective because the basic foundation on which it is built, contains real economy which cannot be denied, while the more the campaign is advanced the more

The Brush Department

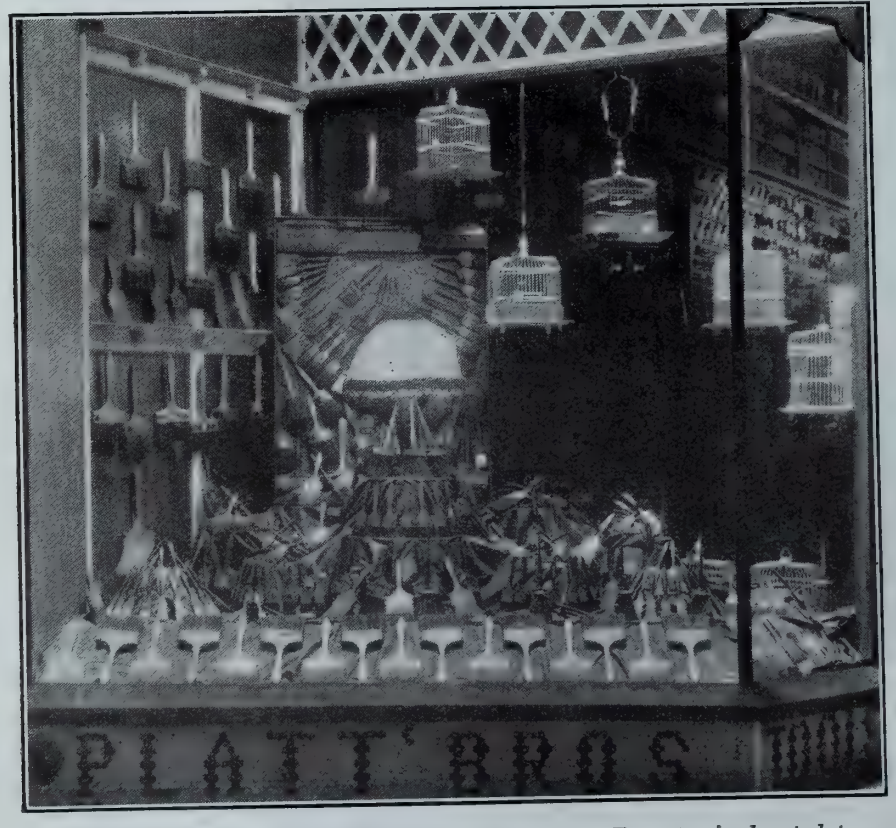
Links Brushes With Spring Clean-Up

Platt Bros., Toronto, Devote Window to Special Display of Wide Range of Brushes—How Brush Sales Are Made to Prospects in Connection With House-cleaning Work

TANGIBLE results in the form of increased sales and a greater degree of consumer interest were obtained from a special window display of brushes by Platt, Bros., Hardware, St. Clair Ave., W., Toronto. The display, which is reproduced herewith, occupied the full left-hand window, or half of the entire store front. It grouped an extensive number and many different sizes and styles of brushes in a pleasing manner, and succeeded in doing this without any effect of crowding.

Painters' and decorators' brushes were arranged in an artistic manner to form the background, while kalsomine, dusters, and brushes of miscellaneous types comprised the body of the display. Individual groups composed of different sizes and styles of bristles, were arranged in neat formation, giving the appearance of freedom and yet combining a uniform display of paint and varnish brushes, while at the same time eliminating any impression of congestion.

According to Mr. Platt, the window remained unchanged for a period of around ten days, and during that time brought in a considerable number of Spring brush sales, both from the paint trade and householders who evidently intended to do their own decorating. J. Dorion arranged the display, and a further ready supply of brushes of all kinds were available in the centre of the store to meet customers' requirements. In conjunction with this display, it was pointed out to Hardware and Metal by Mr. Platt, that special attention had also been devoted to impressing the passer-by with the importance of Spring clean-up and paint-up, and a share of the current advertising was also given over to house paint lines. A generous grouping of ready-mixed paints attracted the prospective customer just inside the store, while household brushes in varied types and bristles, were in close proximity to the interior supply of painters' brush requirements.



One of the chief windows of Platt Bros., Hardware, Toronto, is devoted to an effective arrangement of brushes for housecleaning and painting. The window attracts prospects and once inside the store other arrangements of brushes in close proximity to paints results in stimulating trade in both lines.

PREPARE SPRING CLEAN-UP

(Continued from page 47)

From there, until the utensil enters another furnace where the initial coat is baked on. Later on, it is allowed to cool, and then glazed. "The first coat," explained Mr. Henry, "anneals to the iron. The second coat is one of white over the black, which must likewise be baked on, and then the third produces the various brands of the finished product."

Various pertinent features, including selling points and comparative values, were then outlined, and at the close of his address, Mr. Henry answered a number of questions on various points. An invitation was then extended to the members of the Toronto Retail Hardware Club to visit the manufacturing plant of the Sheet Metal Products Co., and witness the processes described. After a vote of thanks had been accorded the speaker, the suggestion was made that the executive of the club consider the advisability of engaging more or less regularly in educational outings in the nature of visiting available plants where the manufacture of hardware products was the principal feature.

Tribute To Retailers.

Geo. E. May, president of the Ontario Retail Hardware Association, referred briefly to the decision to hold the 1923 convention in Toronto, and in reply W. Crawford, sales representative of the Sheet Metal Products Co., pledged to endeavour to secure the generous support of Toronto salesmen in making the 1923 convention the best in the history of the provincial organization. Tribute was also paid to the initiative displayed by the retail merchants in organizing the club, and also upon the splendid condition of the city stores in general. An interesting comparison was made regarding the proportion of business being attracted to the retail hardware stores to-day, with the percentage enjoyed in previous years. One speaker expressed the opinion that the proportion was slightly better than in the earlier days, due to the progress achieved by the retailer.

Mr. Henry pledged the support of the hardware manufacturers in furthering the aims of the retail association. The next regular meeting was announced by the chairman as May 8, and President Joy further indicated that a discussion on the manufacture of brushes is under consideration, and the executive would endeavour to arrange for a manufacturers' representative to attend.

Boeckh's Brush News

Consumer Confidence--- Means Increased Turnover

The successful dealer is the one who has the confidence of the consumer—and in order to gain consumer confidence, the dealer, in turn, must have confidence in the goods he is selling.

So much, then, depends on the quality, the service, the durability of the brushes you sell to your customers, that it will pay you to sell Boeckh's Brushes at all times.

They will measure up to our claims and to your claims for their durability, quality and service. We guarantee it. A man who buys one from you, will in time need another, and in nine cases out of ten, he will come back to you for it. When you sold him a brush that lived up to your claims and his expectations, you ***gained his confidence.***

Greater Turnover—Greater Profits

The greater your consumer confidence, the greater your turnover—for satisfied customers are excellent advertisements. You should, therefore, utilize every possible method in building up consumer confidence.

Boeckh's Brushes are a profitable line —and the dealers who find them most profitable are those who keep them attractively displayed right out front where everybody can see them.

Brush Department Sells Other Merchandise

Brushes play an important part in the selling of other merchandise, such as paints, varnishes, enamel, kalsomine, whitewash, stain, floor polish, mops, dust pans, floor brooms, etc. Many dealers have opened regular Brush Departments, so important has their brush trade become. These wise men are reaping worthwhile profits.

Get your Boeckh Brushes out from under the counter and place them in a conspicuous spot. Tell your customers about their quality, their durability, their service. It will create greater and faster turnover, greater net profits.

Just requires a little extra effort at first—that's all—try it.

Weekly Paint Markets

Montreal

MONTREAL, April 11.—Linseed oil again attracts attention in the paint markets, a further reduction of 2 cents per gallon being recorded. Lack of interest on the part of buyers, and purchases for immediate requirements only, brings the present demand below expectations for this season of the year. This condition, coupled with keen competition of European oil, has eased the flax situation on American markets considerably, and although the latter is not directly reflected on the local market it has an indirect bearing on the position of both seed and oil. There is, however, a slight improvement in the past two days and a gain of 6 points in the seed market is recorded. It is claimed that a continuance of this better tone for only a very short time is required to firm oil prices, and one local crusher stated that he would not be surprised if the turn in the market was passed. There is a somewhat firmer tone in the turpentine market owing to small stocks at primary centres, but with the new crop expected at any time, new receipts will in all probability be more ample. The market locally is firmer, after a softer tone during the week, but prices remain at last week's figures.

The opening of navigation will witness new shipments of window glass from Belgium, these being expected towards the latter end of the month. There is very little change in the market locally at present, the newer list still being quoted. Shellac continues firm with no change in prices. Paint, varnishes and specialties are now enjoying an active movement, with the undertone of all products steady.

LINSEED OIL PRICES AGAIN REGISTER DECLINE

Montreal

Linseed oil continues on its gradual decline, and current quotations this week are 2 cents per gallon lower in most quarters. Lack of interest on the part of buyers, who seem little concerned over future requirements, is said to be a feature of both the oil and seed markets in recent weeks. Foreign oil competition continues to play no small part in American markets, and while this does not directly affect the domestic situation, it has an indirect bearing locally. Unless more interest in domestic oil is displayed, it is stated that crushers need have little cause for worry over the question of seed crops.

For the local market it can be said that demand shows a gradual increase, but there is room for a great improvement, considering the active season is practically at hand. It is admitted that there is little inducement for buyers to enter the market, an easier tendency being displayed when it was least expected.

However, there are signs of improvement, and at the beginning of the week seed prices advanced 6 points in two days. It would take but little of this strength to again stiffen oil prices, and one local crusher stated that he would not be surprised if the turn was passed and quotations advanced within the next few days. Following are prevailing prices.

LINSEED OIL—	Raw.	Boiled.
1 to 2 barrel lots, per gal	1 98	1 00
3 to 5 barrel lots, per gal ...	0 96	0 98

Less barrels, add 10 cents per gallon.

OPENING OF NAVIGATION MAY STIMULATE GLASS

Montreal

A fairly satisfactory situation now prevails in the local window glass market, earlier building construction requiring a fair amount of supplies for this season of the year. The opening of navigation is expected to stimulate buying, and advices have been received that first shipments will arrive towards the latter end of the month. Whether this will mean an easier tone in the market is yet hard to determine, but the opinion was expressed by one large importer, at time of last revision, that a recession in prices would not be surprising when navigation opened. The newer list is fairly well maintained, although a slight price concession is offered by a few firms for immediate shipment.

PRESENT STOCKS OF TURPENTINE ARE SMALL

Montreal.

Owing to reports of small turpentine stocks at primary centres, the market is somewhat stronger than in the last few weeks. It is stated that present holdings are much lower than was generally believed, and the new crop will come at a very opportune time. With favorable weather conditions, earlier supplies from the new crop are expected within a short time, and the effect this will have on the market is yet problematic. It is thought, in some quarters, that an easier tendency will follow during the coming weeks. Demand will play an important part, however, but it is questionable whether this will be sufficient to take care of new receipts.

During the past week certain local jobbers reduced their prices in sympathy with the general situation, but with the firmer tendency now displayed, quotations are again revised to their former levels, and prices are unchanged from one week ago. The demand for turpentine, while quite active, is for smaller quantities for the most part, and one barrel shipments are being made, where formerly purchases were of considerably larger quantities. Following are unchanged quotations:

TURPENTINE—	Imp. gal.
1 barrel lots	1 21
2 to 4 barrel lots, per gal.	1 20
Broken lots	1 31

FIRM TONE CONTINUES IN SHELLAC MARKET

Montreal.

Current quotations on shellac are again unchanged this week, and the firm undertone in the market continues. Reports from India are still discouraging, and this naturally tends to keep the market in a strong position. Most of the larger users are said to be under cover for their requirements, and smaller users are protected to an extent, and there is little concern felt over the question of a shortage, up to the present time at least. Locally, demand shows activity usual at this season, with no apparent scarcity as yet, although supplies are reported as none too ample. Unchanged quotations are as follows:

SHELLAC—	
Orange shellac, in barrels	4 60
Do., in one gal. jugs	4 90
White, in 5 gal. jugs	5 10
Do., in one gal. jugs	5 40

Toronto

TORONTO, April 13.—The variance which is apparent in both linseed oil and turpentine quotations, provides one of the feature developments on the current domestic paint markets. While no general announcement has been made regarding changed price levels, yet the nominal quotations on both products are experiencing more or less shading. The linseed oil situation shows some signs of betterment due to the rise in flax seed. Whether this indicates

(Continued from page 62)

merely another minor fluctuation, or the commencement of general improvement, cannot, of course, be determined. However, crushers generally look for an expansion in the demand for oil during the ensuing months.

Turpentine at primary quarters is described as considerably stronger, with a shortage of ready supplies being the most notable feature. Calls have been made upon tanked reserves in some centres. Locally, some distributors indicate a shortage while others claim stocks are just moderately low. Commitments are, however, mainly of a small nature, a factor which is attributed to the pending arrival of fresh seasonal receipts.

The shellac market continues firm, with little improvement reported in the primary centres, although an average call for this product has not witnessed any marked price developments on the domestic markets. Paint and specialties are enjoying a good active movement at this time of the year, while the window glass situation is unchanged at present, although predictions as to the future trend are difficult to secure.

SHADING STILL NOTED IN TURPENTINE PRICES

Toronto.

The firmer tendency in the turpentine markets, which was indicated in last week's Hardware and Metal, has continued in evidence during recent days, and both domestic and primary centres are described as considerably stronger. No rapid price developments, however, are looked for, due to the impending new crops in the south, but a rise of around two to three cents at Savannah has been noted. Locally, quotations are somewhat unsettled, the average price being around $1.30 per Imperial gallon in one barrel lots, but shading of this level has resulted in the appearance of prices from five to ten cents lower. However, the shortage of turpentine locally, is still reported in certain quarters, while other distributors record stocks on hand.

TURPENTINE—	Imp. gal.
1 barrel lots	1 30
2 to 4 barrel lots	1 29
5 gallon lots	1 45

Less than 1 barrel lots—15 cents per gallon extra

Turpentine steel drums galvanized, 5c per gallon less than barrel price. Drums charged $10 each, returnable in 30 days, freight paid.

All quantities sold f.o.b. Toronto, Hamilton, London, Brantford, Collingwood, Guelph Windsor, or Montreal but freight may be equalized from any of these points.

Car load lots of 70 bbls. Price on application.

VARYING PRICES ALSO RECORDED ON LINSEED

Toronto.

While no general price change on linseed oil has been recorded locally, yet prices show a little variance. The average level remains at $1.05 for raw, and $1.08 for boiled in one and two barrel lots, but quotations varying up to five cents per gallon lower than this, have appeared locally. In other domestic markets, a recession is recorded, of two cents. This development is described as due to the lack of interest in oil on the part of large consumers, combined with the more or less general policy of purchasing for immediate requirements only. Keen competition of European oil is also reported in certain southern centres, but this feature is not apparent where the freight haulage has to be considered. Flax seed has been improving during recent days, with more interest generally displayed in the seed markets. The anxiety regarding the future supplies of flax seed are now gradually vanishing, owing to the current quiet condition of the oil demand. Improvement in linseed oil requirements are generally looked for, but the opinion was expressed to Hardware and Metal that while there is certainly no extra abundance of seed, yet the shortage is not so acute as to cause rapid price developments. Following are representative quotations on linseed oil appearing on the local market, but as stated above, these levels are being shaded:

LINSEED OIL—

	Per Gallon Raw	Boiled
1 to 2 barrel lots	1 05	1 08
3 to 4 barrel lots	1 04	1 07
6 to 9 barrel lots	1 02	1 05

Less barrels, add 15 cents per gallon.

REAL ECONOMY BASIS OF SAVE THE SURFACE

(Continued from page 58)

do the property owners of Canada benefit. It is no mere selfish campaign inaugurated by any particular body of men, but is one of far reaching benefit to every person in Canada who owns property of any shape whatever.

Too long has the merely decorative effect of painting and varnishing been dangled before the noses of prospective buyers, thus leaving them the loop hole of saying they "cannot afford it" just now and so forth. When the **real** objects of painting or varnishing are driven home, then no such excuse can be offered, it cannot be accepted, as instead of the customers saying they "cannot afford" to paint, just now they will, in common truth, have to state that they "cannot afford **not** to paint." This is the idea we want to get over to the great public of Canada, and the more effort we put behind it the sooner we will do it. It has already taken root and the fruits of the campaign have been felt.

A great deal more however, can be done, and much greater benefits can be accomplished, if the work is carried along with the utmost enthusiasm and the utmost interest, which is certainly due to it.

MONTREAL BOARD OF TRADE

(Continued from page 50)

ever, was checked, temporarily at least, by the destruction of the Board's building by fire in 1901. The delay in reconstruction was temporary, for in 1902 Alex McFee, then president, laid the corner stone of a new building which both Board and tenants occupied in the following year. This building now stands as one of Montreal's most imposing office buildings, a credit to the organization whose home it is.

The Board of To-day

Standing to-day as one of Canada's most prominent civic institutions, the present Board of Trade can probably be best described in a brief way by stating that present membership totals over 2,000, with every branch of industry well represented. Apart from the main body with its council, there are separate associations each under its own executive. Among these are the following: Transportation Bureau; Montreal Corn Exchange Association; Montreal Wholesale Dry Goods Association; Montreal Metal and Hardware Association; Montreal Wholesale Grocers' Guild; Montreal Lumber Association; Montreal Produce Merchants' Association; Wholesale Merchandise Brokers' Association of Montreal; Canadian Board of Marine Underwriters; Bankers' Section; Montreal Egg Dealers' Association; Montreal Millinery Association and Montreal Real Estate Board.

Metal and Hardware Association

The birth of the Metal and Hardware Association was on February 12th, 1894. This was formed in connection with the Board of Trade, and following is resolution passed on that date:

"That it is desirable that all firms in the Province of Quebec, doing business at wholesale, in shelf and heavy hardware, or as agents for Canadian or foreign manufacturers of these goods, and the manufacturers of pig iron, and all rolling mills, iron founders and iron workers, should form themselves into a Branch Association of the Montreal Board of Trade under the title of The Metal and Hardware Association, in order to take counsel together regarding matters pertaining to the conducting of those branches of business."

At a subsequent meeting the following officers were elected:

James Crathern, president; Thos. J. Drummond, vice-president; J. B. Learmont, treasurer; F. Fairman, Jas. Phymister, Wm. McMaster, A. C. Leslie.

Following is a list of the presidents of the Association since its commencement:

Jas. Crathern, 1894-5-6; Geo. E. Drummond, 1897-98; Wm. McMaster, 1899; T. H. Newman, 1900; N. N. Near, 1901; J. N. Pyke, 1902; J. C. McCormick, 1903; Geo. A. Caverhill, 1904-05; Geo. A. Kohl, 1906-07; J. R. Kinghorn, 1908-09; Wm. Starke, 1910-11; H. J. Fuller, 1912-13; Geo. J. Crowdy, 1914; Alex Gibb, 1915-16-17-18; A. Prud'-Homme, 1919-20; Edward Goodwill, 1921; Robt. Starke, 1922.

every home needs B-H FRESCOTA

COLD WATER FINISH

THIS decorative coating for walls and ceilngs has been in great demand throughout Canada this Spring. Many dealers have repo ted record sales.

FRESCOTA Cold Water Finish is a B-H P.oduct manufactured in the usual dependable B-H way and is a profitable line for the deal r to handle.

LAIDLAW'S WIRE BOYS

Their Chat No. 26

Another Good Point Nailed

You will recall, B.T., in our last talk that we spoke of the importance of good nails—the kind we make. A hardwareman told me this week, that another point of vital importance to the retailer is the manner in which the nails are packed. There is nothing that gets under a hardwareman's hide more than to receive a shipment of poorly packed nails. They scatter all over the place and cause dissatisfaction and loss of time. He never has any trouble with the nails or packages supplied by our company. A good product well packed appeals to good hardwaremen.

Now Is The Time To Get Into The Bicycle Business

Spring is here—the big season for bicycles.

There are boys and girls, school teachers, clergymen, carpenters, working men, agents, farmers and others in your locality who need bicycles.

There isn't a town so small but there are lots of prospects that a live dealer can find and turn into sales.

It is really surprising how many sales enterprising dealers make who carry a good assortment of C. C. M. Models.

The business is there if we **go after it.** The new reduced prices will make the business easier to get this season, too.

Enter these 2 Important Contests

"Save the surface and you save all"- *Paint & Varnish*

Window Display Competition

CONDITIONS.—This competition is open to any dealer or dealer's clerk. The "Save the Surface" window trim and slogan must be a part of the display. Preference will be given to those windows which illustrate to the greatest advantage the idea of protection and preservation as embodied in the "Save the Surface" idea.

1st Prize $50
2nd Prize $40
3rd Prize $25

Send photographs of window trims with your name on back

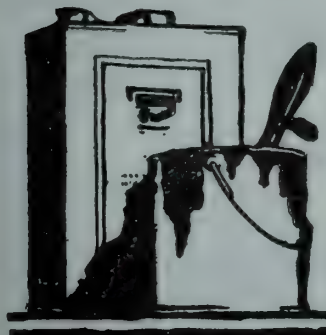
Newspaper Competition

CONDITIONS.—Open to any dealer or dealer's clerk. For the best Paint and Varnish advertisement appearing in your local newspaper. The "Save the Surface" slogan must form a prominent part of the advertisement. Awards will be based on the uses of the Save the Surface arguments in the most unique and novel way to attract the attention of the local trade.

1st Prize $50
2nd Prize $40
3rd Prize $25

Send copy of newspaper in which your advertisement appears

The Save the Surface Committee will act as judges of both contests.
Merchants or clerks may contend for one or both of these contests.
Photographs and newspapers must be in the Committee's hands on or before July 1st, 1922.



Save the Surface Campaign

"The Finish that Endures"

Art Shades

(The Can with the Maroon and Yellow Label)

The store-rooms and garrets of almost every home contain unlimited opportunities for the use of FLOGLAZE ART SHADES.

These beautiful, delicate shades find no end of uses for the finishing and decoration of practically all articles of interior use, such as furniture, baby buggies, bric-a-brac, woodwork, etc.

Floglaze Art Shades enjoy a lively and perpetual demand by the amateur finisher about the home. Eight delicate tints including gold and aluminum with flat and gloss white make up a very complete range.

Floglaze M L FINISHES THAT ENDURE QUALITY

Our dealers' booklet, "A Guide to Larger Profits," describes Floglaze Art Shades fully. Write us for this book.

SUN VARNISHES

Beautiful—Rich—Waterproof

For Your Customers' Every Varnishing Need

SUN VARNISH. A durable, transparent varnish for all interior or exterior woodwork. An economical, long-wearing and easily applied varnish that dries hard in 24 hours. Proof against hot, soapy water, rain or snow. A safe varnish to recommend.

SUN FLOOR VARNISH. Another widely known and popular C. P. varnish. Especially suited for use on hardwood floors. A tough, elastic varnish that will not crack, chip nor show heel marks, proof against leaky radiators or dripping umbrellas—will not turn white.

C. P. agents should feature SUN VARNISHES regularly. If you are not already a Canada Paint dealer, write our Montreal office now for full particulars of our agency proposition.

An All Purpose VARNISH

REDUCE your varnish inventory by carrying FLINTSPAR—the all-purpose varnish. It is adapted for use on porch doors, bathrooms, interior woodwork and for marine uses.

FLINTSPAR will not turn white under the action of either fresh or salt water. Its *DURABILITY* and its *QUICK-DRYING* qualities are exceptionally well balanced for a varnish of this character. A test will convince you.

Write for our proposition to-day.

TINKER TOM'S TALKS.

No. 354

Remember!

That when you specify to your jobber or manufacturer—"PREMIER" GALVANIZED STEEL SHEETS you get sheets

Without Salt Water Stains
Without Expensive Wooden Crates
Without Buckles and Twists

And of course you get the home product much quicker than the sheets from across the water.

For going on eight years we've carried you over many a rough spot—don't forget that—either!

You'll be glad to know we're running absolutely full — day and night — on orders for "Premier" Sheets.

TINKER TOM

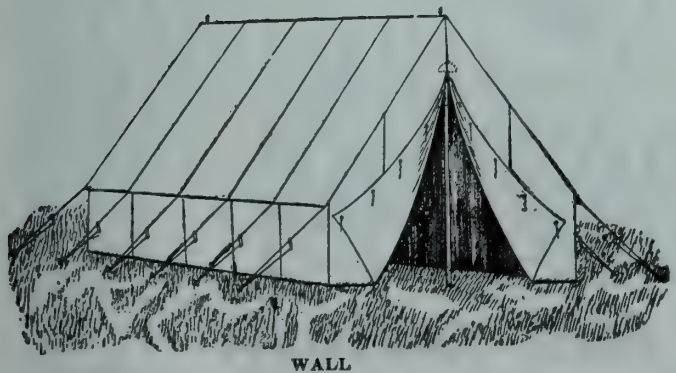
DIAMOND A BRAND ASHDOWN'S GUARANTEE

The Largest Wholesale Hardware Dealers in Canada

TENTS



WALL

WITH the opening of Spring will come the demand for Tents. In anticipation of this trade we have a very fine line, both as to quality and price. Do not let the business go past your door. If you don't get it the other fellow will.

These Tents are of the best quality. We will gladly furnish you with more details if you so desire. We are here to serve, and to give you every consideration. Ask us for latest prices, they are the lowest possible consistent with quality.

THE BUYERS' GUIDE

If what you want is not here, write us, and we will tell you where to get it. Let us suggest that you consult also the advertisers' index, facing the inside back cover, after having secured advertisers' names from the directory. The information you may desire may be found in the advertising pages. This department is maintained for the benefit and convenience of our readers. The insertion of advertisers' headings is gladly undertaken, but does not become part of any advertising contract.

TRADE MARK
LACQUERET
HOUSEHOLD LACQUER

VARNISH STAIN

It Sells, Satisfies and Pays The Dealer a Handsome Profit

Lacqueret is a household lacquer designed to beautify and preserve old, marred or scratched furniture, dingy wood work, dirt-stained floors and the hundred and one odds and ends around the home.

Composed of soluble, permanent colors, combined with a special elastic, hard drying floor varnish Lacqueret will not cloud or disfigure the natural grain of the wood. It possesses exquisite color richness and retains its beauty for an exceedingly long time.

Lacqueret is put up in cans with an eye-catching label that gets attention quickly and makes displays resultful. It is one of our most powerful sale producers.

In addition to Lacqueret, International Varnish specialties include a varnish, paint, stain or enamel for any and every requirement.

May we send you price list and full particulars on our complete line of Elastica products.

Obscure Lines As Good As Meakins?

There may be one, but we doubt it. Anyhow, think of the additional cost to you in using your selling time to convince a prospect that some obscure, little-known brand of brushes is as good as Meakins!

While you are succeeding in winning one argument and sale, of this kind, you could have made several sales of Meakins Brushes.

The sales are quick, short, and profitable with the popular Meakins Brushes, because you are making more sales per hour with consequent lowered costs.

Consumers recognize Meakins Brushes as leaders.

Make More Sales at Greater Profit

Increased building activity, which is already beginning to be evidenced, means that a great number of painters will be busy. And painters in turn mean a brisk demand for highest grade brushes. You'll find our line complete and our prices right—and with careful buying still the order of the day, increased sales and profits will come to all dealers who stock and feature CANADA brushes.

Ours are the only solid centre, straight, compressed Rubber Set brushes made in Canada—this method gives a perfect working brush without any bushing or flaring of the bristles.

They can be used in any liquid and all carry our guarantee.

If your sales have been lagging behind instead of leaping ahead the CANADA LINE will help to bring them back to normal.

Manufactured By

Canada Brush Co., Limited
St. John, N.B.

Mix in Hot or Cold Water

Alabastine

Avoid Imitations. There is only one Alabastine

Sell All Its Uses

The Alabastine salesman will show you many uses for Alabastine that you have probably never thought of before. Tell your customers about them and you can definitely increase your sales.

It is ideal and economical for:

Plain white work,
Tinting,
Stenciling,
Priming under paint,
Opaline effects,
Renovating cotton signs, movie screens, window shades, etc., show-window backgrounds and scenic effects.

Alabastine can be applied on new walls, old walls, over wall paper, beaver board, plaster board, tar paper, etc., etc. It is only about 1/3 the cost of wall paper and 1/5 the cost of paint. One coat is sufficient to give a rich, beautiful tint. It is easily and quickly applied, does not leave brush marks and will not rub off.

Retail prices:

2½-lb. package 40c
5-lb. package 75c

The Alabastine Co., Paris, Limited

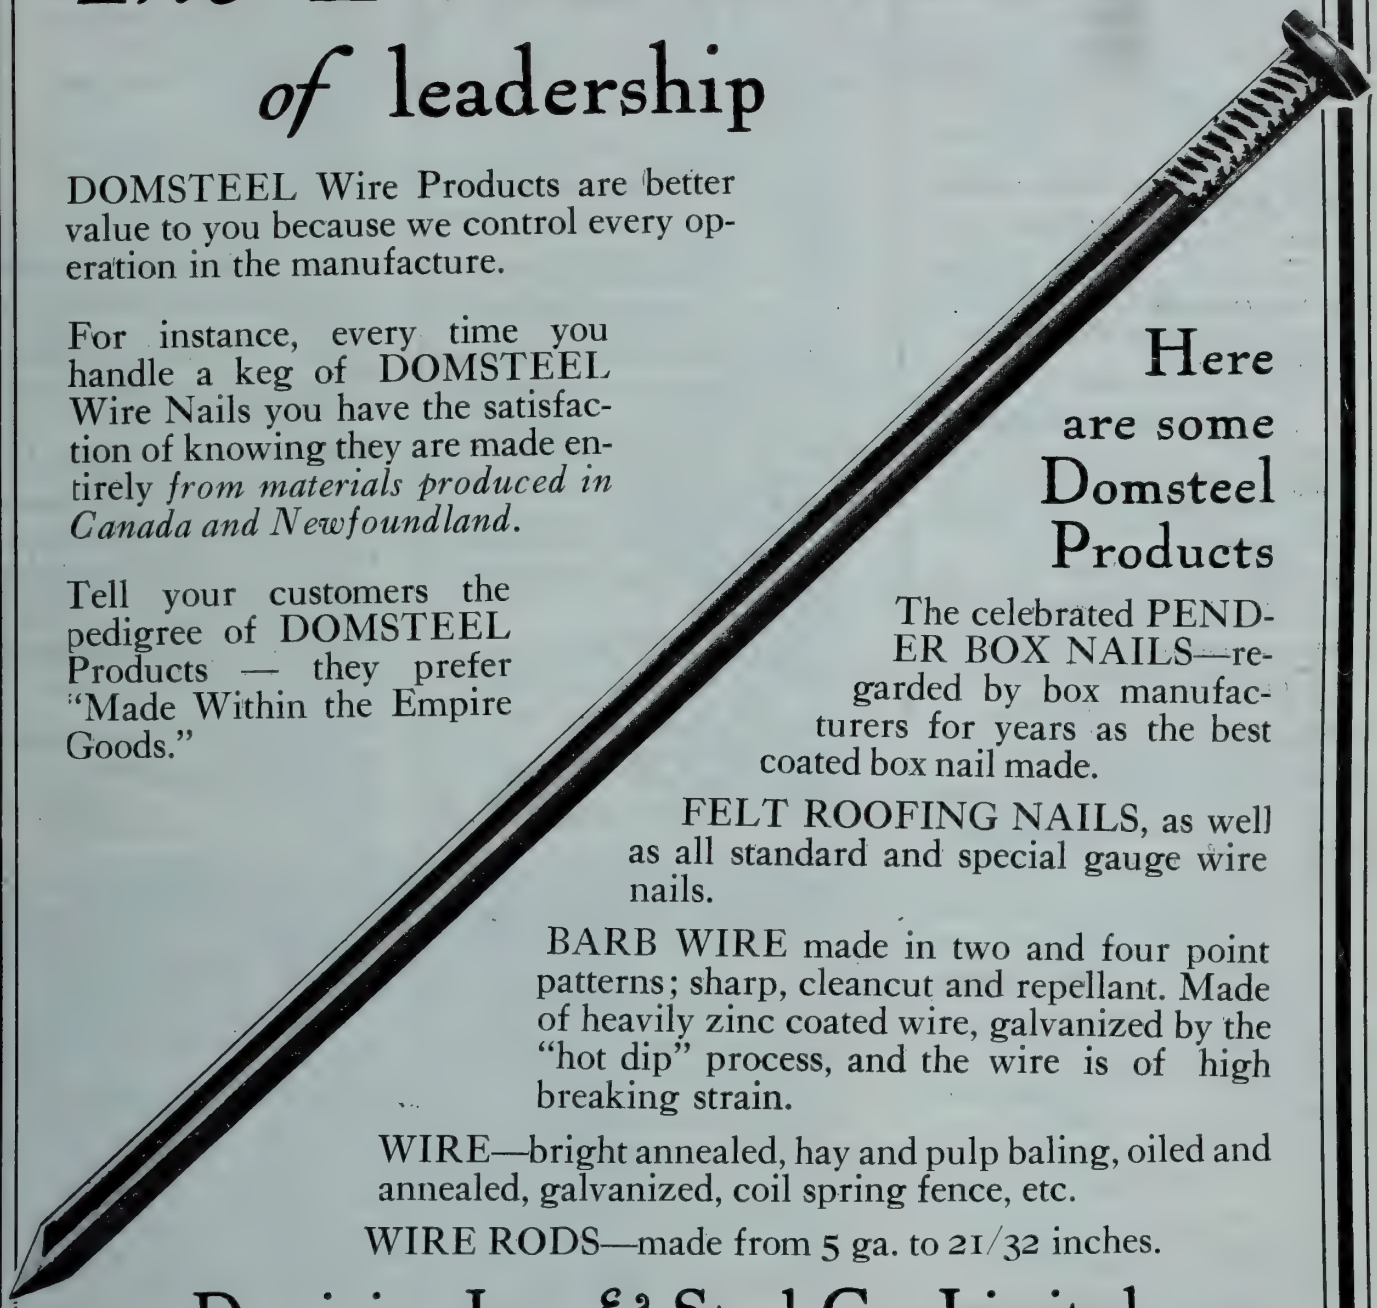
The EVIDENCE *of* leadership

DOMSTEEL Wire Products are better value to you because we control every operation in the manufacture.

For instance, every time you handle a keg of DOMSTEEL Wire Nails you have the satisfaction of knowing they are made entirely *from materials produced in Canada and Newfoundland.*

Tell your customers the pedigree of DOMSTEEL Products — they prefer "Made Within the Empire Goods."



Here are some Domsteel Products

The celebrated PENDER BOX NAILS—regarded by box manufacturers for years as the best coated box nail made.

FELT ROOFING NAILS, as well as all standard and special gauge wire nails.

BARB WIRE made in two and four point patterns; sharp, cleancut and repellant. Made of heavily zinc coated wire, galvanized by the "hot dip" process, and the wire is of high breaking strain.

WIRE—bright annealed, hay and pulp baling, oiled and annealed, galvanized, coil spring fence, etc.

WIRE RODS—made from 5 ga. to 21/32 inches.

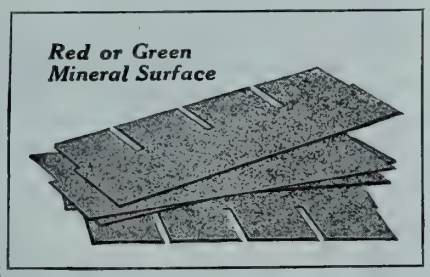
Everlastic Liquid Roofing Cement.
Plastic Elastigum Patching Cement.

Everlastic Multi-Shingles — *A Fast Selling Barrett Product*

DEALERS everywhere are making big profits on Barrett Everlastic Multi-Shingles—they're the most popular asphalt shingle in all parts of the Dominion. They are everything that a good shingle should be. They're moderate in cost, handsome in appearance, very durable, and easy to lay.

The wearing surface is heavily mineral-surfaced in permanent natural shades of red or green. This makes them highly fire-resistant, as well as strikingly beautiful. The underside is protected from the action of moisture, fumes and mould by a special "Seal Back."



Everlastic Multi-Shingles are made four shingles in a strip, which insures a big saving in time, and also a neat, good-looking roof, even though laid by unskilled workmen.

Continuous advertising in all the important magazines, technical journals and farm papers throughout the Dominion is telling your customers about the big advantages of Everlastic Multi-Shingles.

When you sell Everlastic Multi-Shingles you give your customers an honest product at an honest price. For the Barrett trade-mark is a badge of roof dependability.

Each package contains enough shingles to cover 50 square feet. These shingles are 32¼" long by 10" high. Self-spacing cutouts are 8" apart, 4" deep and ½" wide. Colors packed separately. Weight of package ready for shipment, 90 pounds.

1. Winthrop Asphalt Tapered Slates are the big butt Asphalt Slates. They are the only Asphalt Slates that give a shadow line, which so improves the appearance of a roof—something architects have long wanted in Asphalt Slates.

2. They are scientifically constructed. *They are tapered.* Being thicker at one end, the butt of the overlapping slate lies flat on the upper part of the slate in the row below. No rain or snow can accumulate underneath — wind cannot get under them and blow them off.

3. A glance at the illustration will show another very decided advantage of the taper—great wear resistance. *Being tapered* extra thickness and weight are distributed where extra thickness and weight are needed—in the butt, the part exposed to the weather.

We have obtained a special license to manufacture these slates under the brand

Brantford

Winthrop Tapered Asphalt Slates

-the Big Butt Shingle

THE same careful selection of materials and experienced workmanship are employed that have given other Brantford Roofing products their high reputation.

Distributed under Brantford Roofing trade marks, through Brantford Roofing Dealers. Stock carried, information furnished and service rendered by our dealer in your district.

Write for our valuable history of roofing "Shelter." On every page is a photograph of a different kind of a roof, in a different part of the world. It will be mailed free to responsible parties.

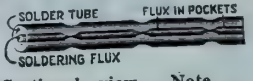
The demand is steady. Are you getting your share of this business? We co-operate with you.

Have you a copy of our Catalogue?

We also manufacture Wire Cloth, Iron Stairways, Fire Place Screens, Window Guards

CANADA WIRE & IRON GOODS CO.
HAMILTON

— a self-fluxing solder for automotive and general work. Flux and solder are applied in one operation, because the flux is contained inside the hollow wire of genuine tin-and-lead solder. In great demand by all solder users because it saves two-thirds of the workman's time and gives a strong bond the first time. Comes in convenient packages and spools that are easily stocked. Write for free sample—investigate this easy-to-sell, easy-to-use, easy-to-stock solder.



Sectional view. Note flux in pockets.

Kester Rosin-Core Wire Solder is also manufactured for delicate electrical work.

BUILDING BOOMS AND CARBORUNDUM SHARPENING STONES

IT doesn't take much investigating to prove that this Spring is to see an inspiring activity in building operations.

Carpenters everywhere will be busy and they will want tools and supplies.

They will want Carborundum Sharpening Stones.

And they will come to you to get them.

For years carpenters have been using Carborundum Sharpening Stones. They know what it means to have a sharpening stone that always cuts free and clean—a stone that, with proper care, will not glaze—a stone that will wear uniformly keeping edge tools always in working shape.

PUT A CARBORUNDUM STONE IN THE TOOL KIT OF EVERY CARPENTER WHO PATRONIZES YOUR STORE

Take these as profit producing suggestions—Feature Carborundum Sharpening Stones in your tool display windows.

Illustrate and describe them in your newspaper copy. Use the displays, cuts and advertising matter we will be glad to send you.

See that you have a good stock of the various sizes in both the combination and straight grit stones—And then just ring up the sales on the cash register.

"America"
Trolley Hangers

The Hanger For Winter

"America" operates in the Hatch snow and ice-proof track. It is an ideal hanger for winter service.

"America" is for warehouse, factory, garage and barn doors. It has tandem trucks, hardened roller bearings and an apron 6 in. long, 3¼ in. wide. This hanger sells because of the simple adjustments, and ability to stand hard usage.

With each pair of Hangers are included two End Caps and Bolts for Hangers.

Packed one pair in a box complete with Screws and Bolts.

Weight, per dozen pairs, 95 pounds.

STEEL BELT LACING

The Strongest on Earth

A Separable Hinge Joint in Sizes for Any Thickness Of Belting

"Never Lets Go"

Putting the Clinch in the Alligator Story

In our intensive sales promotion work in the field and in national advertising in over thirty influential publications, we are spending thousands of dollars in bringing out this one great point:

When the teeth of Alligator Lacing are clinched down flat they bind the long fibers of the belt like a vise.

This "pressure grip" of Alligator is in direct contrast with the unequal pull of other types.

Jobbers and Dealers will be well repaid for pushing their 1922 Alligator sales. Investigate!

Millers Falls Jacks

Laugh at MILLERS FALLS TOOLS the Load

1868

Jack up your Jack sales

MILLERS FALLS Jacks lift more than automobiles and motor trucks—they lift a heavy load of inventory worry off your mind.

The illustration shows Millers Falls Auto Jack No. 145—adjustable base, long handle and all. Roller-bearing and worm-driven. Few parts. Easy to operate. The extension handle folds up and the jack tucks snugly away in any tool-box.

If you want to do a bigger jack business, put Millers Falls Jacks in your stock and in your 1922 catalog. It's a good way to jack up your jack sales.

Galvanized Garbage Cans

A Davidson Corrugated Garbage Can is extra strongly made in a special way to withstand the very roughest usage. It has heavy japanned iron bands at top and bottom to counteract the natural tendency to bend or dent when being dumped. The corrugations around body, too, add extra strength.

These cans are heavily galvanized and consequently rustless. They have heavy seamless overlapping covers and are made in several styles.

Prices and particulars sent on request.

Domsteel BARBWIRE

Domsteel Barb Wire is made from heavily zinc-coated wire, galvanized by the "hot-dip" process. It is made in the two and four point patterns, and the barbs are sharp, clean-cut and repellant. They are firmly secured, absolutely immovable and evenly spaced.

Domsteel Barb Wire, from the ore to the finished wire, is an all Canadian product. It is built to last even under the severest of conditions.

Large stocks are carried at Montreal, Sydney, St. John, Fort William and Port Arthur, from which we can make immediate deliveries.

STAR Hack Saws

Proven Values

It is the part of wisdom, right now, when every customer is looking closely into values, to stick to goods of proven value.

It is no time to take chances on goods of doubtful or unknown reputation, just because they offer a few cents more profit—IF, and it's a big "if" they sell.

That's why so many dealers find it good business to stick to Star Hack Saws, and stock as few other brands as possible.

Star Saws are now sold direct from the factory at Middletown, New York, where they have been manufactured for 38 years.

Making Good Business Better

You know how your sales of tires and other automobile necessities pick up with the coming of Spring. Automobile owners brush up their old busses for the out-door months. They need a lot of new equipment, paints, varnishes, etc.

Why not go after more of this good business than you are getting now? A Wayne Honest Measure Gasoline Pump on the curb **outside** your store will make business better **inside.**

When automobilists stop for gasoline, call their attention to your stock of accessories. The result will be many sales not otherwise thought of, and perhaps new friends who can be developed into regular customers.

A Wayne Honest Measure Pump in front of your store will stop more than its share of passing motorists. Most drivers, wanting honest measures of filtered, water-free gasoline, naturally prefer to buy from a Wayne Pump.

Wayne Pumps are not expensive. One will quickly pay for itself in the sales of gasoline alone. And it will prove a mighty big help in the selling of all your other merchandise. Send for descriptive bulletins of Series HM.

"I received your sample of Kester Acid Core Wire Solder and have tried it out and like it fine. Have bought a spool of it from my dealer and find that it saves a lot of trouble. All I have to do is to heat my soldering iron and the solder will do the rest.

"I am glad I found your advertisement and sure appreciate it very much."

—JOHN C. BUCK
Harrison, Neb.

APPLY the heat—and from the inside of the *hollow* Kester Acid Core Wire Solder, the acid will run on to the article you are soldering. After it—*always* after it—will come the solder, it's perfect flux formed. Remember, it's simply high grade flux and high grade solder—the same as you are using now, but far, far easier to apply. Fill out the coupon below and get a free sample to try for yourself.

In the illustration below the black spot indicates the flux that fills the inside of the hollow wire solder. Notice the crimps in the solder shown above. They keep the flux from running out except as you wish to use it, and keep the amounts of flux and solder always in proper proportion.

Listening to the Voices in the Air

Development of Radio Telephony Marks Commencement of Another Specialized Industry—Provides New Source of Business for Hardware Stores—Popular Enthusiasm Gives Incentive to Distributing of Both Sets and Parts

EDITOR'S NOTE.—Hardware merchants are rapidly becoming radio-phone enthusiasts. This week has marked a number of wholesale and retail hardware firms enter upon the sale of sets and parts. For the benefit of readers, complete details will be given in the next issue of Hardware and Metal concerning the methods suggested by wholesalers and manufacturers, and also concerning the plans of certain retailers for developing business in radio-phones. The following article is preliminary, explaining what is being accomplished. what type of sets and parts are in chief demand, what steps are being taken to encourage their use, suggestions re forming radio clubs locally, etc. It will pay every hardware merchant to make a thorough study of the possibilities of this field and Hardware and Metal will be glad to have any enquiries on the subject which are not answered in the articles.

WITH THE public showing keen interest in the various features of radio phones and with a widespread demand among radio enthusiasts for both parts and sets, the universal importance of this new phase of wireless communication contains a strong appeal to the merchant taking full advantage of the market thus created.

Not only are the recent developments of radiophone considered as the initial steps towards the final erection of a specialized and extensive industry, but it also opens a new merchandising field for aggressive retail hardware merchants.

The fact that hardware stores in general already handle a large number of supplies and articles needed in the installation of radio sets, provides a concrete foundation for considering the hardware industry as a legitimate distributing channel for radio equipment. Among such items referred to are noted nails, bolts, screws, buzzers, dry cells, bell wire, switches, rope, pulleys, tacks, tape, galvanized wire and copper wire, as well as the tools required for use in assembling and erecting receiving outfits.

Great Possibilities Involved

According to F. D. MacKay, general manager, Independent Telephone Co., Toronto, the importance of radiophone development both from the scientific and also business, as well as the purely recreative viewpoint, has hardly yet been fully recognized, because of the rapid strides made in this direction during recent months. In discussing radiophones with Hardware and Metal, Mr. MacKay pointed out that this new industry constitutes one of the most prominent discoveries of a century which is already notable for inventions and achievements of all kinds, especially in scientific research. The entertaining phase of radio communication, however, is considered as one of the primary features of wireless telephony in its present stage of development. Lectures, speeches, concerts, and similar attractions of all kinds can be distributed to gatherings and individuals over varying distances.

Referring to the use of radiophones for commercial purposes, however, it was stated that certain elements tended to curtail its adoption in this direction. The fact that the operation of transmitters requires expert knowledge and much technical training, combined with the close restriction on the issuing of licenses to operators by the government, are factors tending to make business institutions somewhat cautious in using radio.

Another handicap is the confined area of communication, although it is generally understood that scientific experiments in this direction are fast overcoming the handicap of greater distances.

Hardware Merchants Buying Sets

Radio sets have already been supplied to numerous hardware merchants throughout the country, and while it was stated that the final distributing policy has not yet been decided upon by the manufacturers, it is expected to be through the recognized regular wholesale and retail channels, and discounts are quoted by the producers accordingly. The original demand was spasmodic, but individuals interested in radio outfits are now usually in communication with merchants regarding their requirements, and rapid strides in sales activity by retail hardware men is generally looked for.

Electrical manufacturers are naturally taking advantage of the sensational spread of wireless telephony, and new factories for the production of parts are frequently noticed. In spite of this, however, it is stated that producers of radio equipment and supplies are at present taxed to their limit in meeting the demand.

One exceptional element, however, in connection with radiophone is the fact that while resembling a fad in several ways because of its sudden popularity, yet the industry contains unique possibilities of serviceable value and that also of a permanent nature.

Receiver is Most Popular

The receiver is the most popular portion of the outfit or set, the transmitters —as outlined—only being required in special instances. Receivers can be purchased complete, or in many cases assembled from parts by the amateur for personal use, and hardware merchants who have participated actively in this new department, report that a fairly large and rapid turnover is evident in the movement of parts, as members of Boy Scout and similar organizations are especially keen in assembling their own outfits.

Charts showing the method of erecting sets and installing radio systems, are supplied by the manufacturers. The average radio enthusiast, however, will frequently purchase a complete set, especially where the incentive or time to assemble parts is lacking. Radio receiving sets show a varying range in price, the inexpensive sets while giving satisfaction in respect to "listening in," naturally have their limitations. The more expensive sets give greater radius, or receiving capacity, and cost more

(Continued on Page 48)

Attribute Increasing Prices on Iron Partially and Steel Products to Effect of Coal Strike

Division of Opinion as to Cause of Higher Prices on Pig Iron, Galvanized Sheets, Shapes, Bars, etc., But Agreed That Coal Strike Has Had Some Influence—Unexpected Participation of Many Non-Union Miners in Strike—Curtailed Coke Supply a Big Handicap

EDITOR'S NOTE:—While early reports tended to discount the immediate importance and effect of the coal strike upon the iron and steel industry it has become evident within the past few days that whether from this or not there is developing a very firm tendency in iron and steel prices, which producers are more or less directly attributing to the coal strike conditions. Considerable advances have already been made by United States mills on pig iron, galvanized sheets, bars, shapes, etc. To what extent this movement is likely to develop and how it will affect these products in Canada are points dealt with in the following article.

WHAT IS described in some quarters as the "greatest strike in the history of the coal industry," now threatens to result in increasing prices on iron and steel products generally. Incidentally, there also exists the possibility that a shortage of other commodities, or attendant difficulties in transporting ready supplies, may cause higher prices on various classes of merchandise.

At the commencement of the strike on April 1, little concern was manifest in the steel industry, as preparations against such a situation had generally been carried on by producers with the result that additional stocks of coal were evident on almost every hand. Such accumulations were estimated to be of sufficient volume to keep mills and other large consumers operating anywhere from three to six months.

Factors which have contributed towards altering the complexion of the strike's effect on the steel trade are numerous and varied, but one of the principal elements is noticeable in the somewhat unexpected participation in the strike of the majority of non-union miners. While it was more or less expected that the union coal mines would be shut-down, as the walk-out was practically one hundred per cent. effective, yet the continuance of operators in non-union fields was generally looked for. The importance of existing circumstances revolves around the curtailment in the current supply of crude steel, due to the restriction in pig iron supplies, which is in turn dependent upon coke. It is pointed out that should the strike continue, mills may not be able to operate in full, owing to insufficient crude steel, while such plants may still have sufficient coal.

Failure of Coke Supply

The failure of the independent coke supply, therefore, with its resultant effect upon pig iron, has developed signs of anxiety in several directions. In certain quarters, the feeling was also noticeable a few weeks ago that the coal strike, if called, would not be of lengthy duration. But the dead-lock which has arisen between mine operators and miners, has brought about a steady continuance of the strike.

Briefly stated, the disturbance is centred in the American coal mining industry, although Canadian mines are also affected to a certain extent. The labor organizations at domestic mines are stated to be in direct sympathy with the southern miners, not only through certain international affiliations—where such exist—but also because of the similarity in the interests involved.

Over half a million miners have been out on strike for nearly a month, with all of the anthracite mines and most of the bituminous fields consequently shut down. The hard coal miners have acted in conjunction with their contemporaries in the soft coal areas, although a slight difference is apparent in the primary aims of their respective organizations. The hard coal miners have been agitating for a twenty per cent. advance in the prevailing wage scale, and various conferences aimed at a mutual agreement have been evident between the miners representatives and the anthracite operators. On the other hand, the soft coal miners are fighting for the retention of their present rate of pay, in the face of the operators' call for a reduction. In this case, however, both sides have been reluctant or unwilling to discuss the basis for a settlement.

Influence on Steel Prices

How the culmination of these factors may influence steel prices in the near future, is evident from the recent increase in the ratio of operation at southern mills. The demand has increased rapidly and in far greater proportion to the rate of consumption. Large consumers and other dealers in steel, are therefore buying for stock requirements, it generally being admitted that some anxiety regarding the effects and duration of the coal strike has assisted in reaching this decision.

It has also been pointed out that as the capacity of steel producers is being more heavily called upon for the first time since the war years, the consumption of coal in such quarters is consequently greater than was originally estimated. Increased mill operations were naturally looked for during the spring season, but with the increasing demand for coke in the primary sources of steel production, from stocks which are at best greatly restricted since the participation of non-union miners in the strike, the resultant situation is rapidly becoming acute.

Delivery from the mills is noticeably less prompt than during earlier weeks, and with the policy of purchasing for immediate requirements, there developed the dependence of consumers upon fresh supplies. The replenishment of stocks has, therefore, become necessary to a certain extent, and with restrictions in delivery has also developed a stiffening in prices on nearly all steel products.

May Affect Transportation

It is also stated that a continuance of the strike may possibly lead to the tightening of steam transportation facilities, with

its attendant results. As approximately five tons of ore and raw materials are required in the production of one ton of steel, the primary importance of transportation of both coal and ore is strikingly apparent. Such a factor also controls the shipment of the finished, or semi-finished products, which may be a later development of the situation should the strike continue to the point where railways in general commence to husband their available coal supplies, such as recently announced by the larger companies operating lines in both Canada and the United States.

As reflecting the thin end of the wedge in the direction of rising prices may be noted the increase in the quotations on pig iron. In addition, there has now developed a higher tendency in quotations on galvanized sheets, bars, shapes and other steel goods at primary U. S. points, which is frequently construed as heralding the possibility of similar advances being reflected in Canada in the near future.

The stiffening of prices during recent days has also developed a reluctance among steel producers to take orders at prevailing levels. The belief is more or less evident at the mills that the turn in prices has arrived, with producers naturally desiring to eliminate the price-shading tactics which were apparent between competitors in the desire to attract additional business.

Attributed to Coal Strike

Many of these factors were touched upon by G. T. Pepall, director of Samuel & Benjamin, Ltd., Toronto, when discussing the coal strike from the angle of steel prices, with Hardware and Metal. Mr. Pepall attributed the greater degree of firmness in the steel markets directly to the coal strike, a firmness which as pointed out, was previously lacking.

The belief has also been expressed that any movement in the direction of additional price advances on basic materials would also sooner or later be reflected in similar price changes on manufactured steel products. Among the lengthy list of such commodities, manufacturers of which may be forced to increase quotations if the steel costs advance, may be noted, blue annealed, galvanized and black sheets, corrugated sheets, range boilers, eavestrough, conductor pipe, wrought piping, boiler tubes, galvanized products, and tinware; while numerous other hardware lines in which steel supplies the primary foundation may feel the influence of higher costs.

According to recent metal market reports, the belief has developed in some quarters that steel magnates under-estimated the full importance of the coal strike, especially in its present magnitude. The fact that earlier statements of leaders in the industry contributed to the belief that no anxiety should be displayed and little effect anticipated for a number of months, is evidently taken by some as skillful anticipation of the present situation, which as noted above, has been accentuated by the cessation of many non-union mines which were expected to continue operations.

Due to Two Causes

The firmer tone now evident in the steel industry, with its far reaching effect on almost all products pertaining to the industry, is, according to a large distributor in Montreal, due to two causes; first, it is a natural tendency following a better feeling owing to increased demands and heavier consumption; and secondly, the much discussed coal strike. The latter is perhaps playing a more important part in the market than was at first anticipated. Reports received from their principals when the strike was declared told of ample coal supplies for from three to four months hence at least, but they are now informed that certain producers will have exhausted supplies in the course of the next four to six weeks. This, of course, does not apply to the industry as a whole, for other mills report enough coal for them to continue operations well into the summer. The reason for this is that some of the larger producers own their own mines, some operated outside of the union, while smaller independent mills are dependent on dealer supply for their coal. Unfortunately, much of the coal reported on hand in the country is in the hands of dealers, and as soon as the pinch is felt the natural result, that of boosting prices, will take place. Again, some mills are not as close to the mines as others and producers in Eastern Pennsylvania will suffer because of smaller accumulations and transportation difficulties. The coal shortage is to-day, in this dealer's opinion, a very serious obstacle, and there is little doubt but what it is one of the chief factors responsible for the present stiffening of prices.

Take Advantage of the Situation

A steel company official stated that in his opinion the coal strike was not responsible to any great extent for the strong tone in the market up to the present. A continuation of the strike would undoubtedly have its drastic effects at a little later date, but mills were now operating at an increasing rate of production, with an estimated supply of coal for the next 90 days. A factor which is contributing more to the stronger tone at the present time is that producers have realized that liquidation has been too far extended in the past months, that no money has been made by the mills for some time past. Records would show that commodity prices on almost all steel products had been further liquidated than many other lines. If mills were operating at a loss up until the more active period of spring, it was only reasonable to assume that producers would now take advantage of increased consumption and increase prices to a level that would at least show a reasonable amount of profit.

As representing the views of one of the most prominent and usually well-informed firms in Canada, the following expressions were made to Hardware and Metal, when discussing the relativity between the steel industry and the coal strike.

"Higher prices on several instances in the south, are not attributable to the coal strike, but due to the fact that the industry as a whole is now on the road to improvement and the prevailing trend is a healthy one. Consumption has expanded, demand has increased, and the mills were naturally on an increased production basis. With this improvement,

A Prospect List for Household Lines

Separate Department for Household Goods No Longer an Experiment and Has Proved Effective—How An Active Prospect List of Household Hardware Customers Can Be Compiled—Reciprocal Arrangement With Other Stores Helps Summer Tourist Trade—Gun Demonstration Brought Ten Prospects for Every Dollar Spent

REALIZING that an increasing number of women are becoming shoppers in retail hardware stores for various household lines, and that such customers desire special facilities to aid them in shopping, Mr. Gilverson, jr., manager of the retail department of Rice, Lewis and Son Ltd., Toronto, has contrived the idea of conducting the sale of household requirements in a department absolutely separate from the rest of the store. This department was opened some time ago and its record has shown the value of the underlying principle. It has been conducted long enough now to be more than an experiment and Mr. Gilverson looks upon the household goods department of the store as one of the most important from the standpoint of turnover and profit as well as a department which lends itself readily to stimulative measures when special sales are contemplated.

The household goods department of this store is located on the floor above the store and access is made to it by means of stairs and elevator. Here a good sized room is available with a smaller room adjoining, the elevator being in the smaller room. This room is illustrated, in the view, which shows a display of washing machines, kitchen cabinets, refrigerators, gas stoves, wringers, etc. In the large room, shown in the other picture, an extensive grouping of fireplace furnishings is made in the centre of the floor toward the rear, this including fire screens, irons, fenders, grates etc. A number of portable electric heaters are also shown in conjunction therewith because of their adaptability to the changing seasons of spring and fall at the time when the fireplace is a source of comfort until the winter chill is out of the house.

Sees All of Display

On tables arranged toward the front of the room are shown a number of smaller household articles such as enamel ware, bread boxes, kitchen utensils of various kinds. Along the wall are a number of compartments in the shelving in which neat arrangements of various kitchen utensils in enamel ware, aluminum, tinware etc. appear. Two entrances are made from this large room into the smaller room as shown in the illustration. The layout of these rooms is such as to encourage the customer to see all parts of the display. Entering the small room by elevator or stairway, the prospect is conducted through the near door into the large room and around the circle returning to the front of the large room and through the far door into the smaller room.

Discussing the use of separate rooms for the household goods, Mr. Gilverson advised Hardware and Metal that the conducting of a special department for these lines, absolutely distinct from the

The smaller room of the Household Goods Department in the Rice Lewis and Son Ltd. store, Toronto, is where the entrance is made to the department by both stairway and elevator. Here the electric washers, kitchen cabinets, refrigerators, gas stoves, etc., are shown. These rooms are well lighted and conductive to a leisurely examination of the various household lines on display.

Where Customers Inspect Household Goods

The larger room of the two devoted to Household Goods in the Rice Lewis and Son Ltd., store Toronto, has an arrangement of fireplace furnishings, portable electric heaters and kindred lines in the centre. These articles sell well at this time of year to bridge the few weeks between the winter and summer months. Toward the front is a table devoted to small kitchen utensils and along the wall are grouped various articles of enamelware, aluminum, tinware, etc.

rest of the hardware stock, was very effective in increasing their sale. Customers, particularly women, were said to be much taken with the clean appearance and quiet atmosphere of this department and when in such a mood it was much easier to sell them. It was found that many women customers like to visit this department and take their time examining the various lines without any prompting of retail salesmen and when a list was made of their requirements this list was handed over on leaving the store, to be filled. Then too it enables the customer to make a thorough and uninterrupted examination of such lines as washing machines, kitchen cabinets, refrigerators, gas stoves, etc.

How Ads are Planned

Regular use is made of good sized advertising space to deal with certain articles in the store, and household lines are very often featured attractively. Demonstrations are occasionally given of some household line, and here again the separate department is found valuable in aiding the concentration of interest. In connection with the firm's retail advertising, Mr. Gilverson makes a list of the articles he wishes to advertise on a certain day and gets the ad writers of the various newspapers in which it will appear to draw up a layout ad for it. He takes these suggestions and then draws up his own ads from those suggestions. In this way he is able to get the most effective "copy."

This store makes quite a specialty of summer resort requirements such as tents, camp outfits, motorists' supplies, etc. It is found that being in a downtown location near the hotels, a great number of tourists visiting the city in connection with some motor trip are brought into close contact with the store. Throughout the summer this line of goods is advertised and displayed in the windows. Another feature of assistance has been an arrangement with another large downtown grocery store which is in a prominent location and which develops a large business in the summer months with tourists who wish to replenish their supplies before passing along. This arrangement is reciprocal and is merely one by which each store recommends the other for the supplying of its particular lines. It has been found that many customers are brought to each store through this plan of recommendaton.

Selling Motor Tourists

A large number of motor tourists visited Canada from the United States during 1921, to say nothing of the large number of Canadian tourists who went long distance trips themselves. During the forthcoming year it is expected that there will be even more touring done by Canadians and visitors from the south. The Motor Leagues of the various provinces state that early enquiries being made indicate a big increase in the amount of motoring to be done by the tourists this summer. In view of this condition, many hardware merchants may be able to take advantage of some of the suggestions made by Rice Lewis and Son, Ltd. as to means for developing this trade.

In connection with camp requirements, looms up the need for rifles, guns, ammunition etc. In this connection it is interesting to note that a special demonstration of a number of guns, conducted by experts on the various lines, was highly successful. Mr. Gilverson estim-

RICE LEWIS AND SON, LTD.

Toronto, April 19, 1922

Dear Madam:

In making preparations to enter your new home, we believe it will be welcome news to know that there is one store in Toronto where you can secure whatever you may require in the way of kitchen equipment and household necessities in one department.

Our new Household Appliance Department has been opened with the idea of making it possible for you to select the things you need with the greatest convenience. Our very complete stock offers you a wide variety of choice in the various lines mentioned. A comparison of prices will prove that our values are unequalled.

For more than 73 years this store has maintained an envied position in the confidence of the people of Toronto. If you are not already one of our regular customers, we hope you will accept this invitation to come and get acquainted.

Yours very truly,

Manager,

Cutlery and Household Appliance Dept.

ates that 400 letters were sent out to propects. The sum of $60 was spent on advertising it and $40 was spent on letters. That results justified this special endeavor is indicated by the fact that Mr. Gilverson reports ten people visited the store and attended the demonstration for every dollar that was spent, and many sales of guns and kindred equipment were made. The demonstrations proved the fact that many men are interested in guns and rifles but want to know more about their construction. In the camping season and early fall such demonstrations prove effective in stimulating interest.

Fireplace furnishings have enjoyed an active trade since last fall and many sales are being made now to tide over the few weeks when the furnace is let out and until warm weather comes. The biggest season of the year is in the fall, but there is a steady turnover in this line throughout the year in this store. Mr. Gilverson has been evolving a plan of guarantee and collection in connection with the sale of electric washers, power mowers and other lines which run into considerable money. He is of the opinion that the sale of such lines should be encouraged and the difficulties of large cash payments can be eliminated with safety.

Of distinct value in stirring up business and new prospects has been a plan of watching society columns of the local newspapers closely and following up engagement, wedding and anniversary notices with a suitable letter. Elsewhere in this article is shown a letter as sent out to prospective brides announcing the household goods department and enclosing a list of lines handled in that department which serve as suggestions. This plan makes it very easy for the prospect to make sure that her home will be provided with all the various small appliances necessary.

STEEL PRICES AND THE COAL STRIKE

Continued from page 29.

As representing the views of one of the most prominent and usually well-informed firms in Canada, the following expressions were made to Hardware and Metal, when discussing the relativity between the steel industry and the coal strike.

"Higher prices on several instances in the south, are not attributable to the coal strike, but due to the fact that the industry as a whole is now on the road to improvement and the prevailing trend is a healthy one. Consumption has expanded, demand has increased, and the mills were naturally on an increased production basis. With this improvement, it is only natural that prices should advance, and this situation bears out the predictions made during recent months by men well-informed in the industry that as this condition became apparent in the steel markets, some higher prices would be the natural result.

"Buyers in general are extending their purchases, some of them having had in view the duration of the strike. The present movement, however, indicates the return of the industry to normal. In normal times a buyer would not only meet prevailing requirements, but would also stock warehouses to a reasonable extent according to the anticipated future demands."

It was pointed out that if buyers were now firm in their belief that the industry was improving and gradually returning to normalcy, why would they not again adopt this plan and increase their purchases over what they have been in the habit of doing in the past months? Undoubtedly the majority of buyers are well-informed as to the conditions as they now exist and are, with few exceptions, fully convinced that lower prices could not, and would not, prevail if the industry was to continue in a healthy state.

Referring to supplies of coal stocked by the mills in anticipation of labor unsettlement, it was stated that the majority of southern producers have sufficient coal on hand for some time yet, and while the continuation of the coal strike would be a serious menace in a few months hence, the present gains made in the industry were not attributable to this, to the extent that many people thought.

Dealing with the coal strike, Iron Age says:—

The coal strike's effect upon the iron and steel market in the past week has been seen chiefly in advancing pig iron prices and in increased demand and stiffening of prices for rolled products. Ac-

Tinsmiths' Status is Still Indefinite

Judgment Just Rendered in Favor of Retailers in Government Case Against a Job Printer Would Seem to Make Clear Cut Status for Tinsmiths—Expect Early Ruling on This Point

By Ottawa representative of Hardware and Metal

OTTAWA, Ont.—The retail trade as a whole, including hardware merchants and tinsmiths, are at present at sea as regards the operation of the sales tax and the government's proposals in that direction, so an outline of the situation is timely. When the present Sales Tax Act was placed on the statute books of the Dominion Parliament, it clearly was not intended that a sales tax should be collected from retail merchants. During the carrying out of the operations of the Act by the Department of Customs and Excise the officials of the department, however, included a number of retail merchants in it and called upon them to pay a sales tax as manufacturers.

The principal ones included hardware merchants, tinsmiths, electrical dealers and contractors, etc.

Objection was made by the Retail Merchants' Association of Canada to the action of the department and in order to test the validity of the Act a suit was taken by the Government against Messrs. Pedrick and Palen, merchant tailors, Ottawa. The case came before the Exchequer Court and Judge Audette gave judgment in favor of the retailers. Following this judgment the Act was amended by adding a clause which excluded all those retail merchants who made goods to the order of their customers.

Retailers Again Win

Another suit, however, was instituted by the Government against P. Karson, confectioner, Ottawa, and Judge Gunn of Ottawa rendered judgment in favor of the retailer. A further case was taken against Mr. Karson in the Exchequer court and judgment was rendered in favor of the Government. The amount in dispute was about $200 and the court costs were $409, not including the solicitors' costs on both sides. An appeal was taken by the Association against this judgment just recently to the Supreme Court, but the court having the right to decide whether to go on with the case or not if it is less than $500, decided not to take it up, important and all as the issue was.

While the above cases were proceeding, another case was taken by the Government against Messrs. Aunger and Robertson, Limited, job printers in Saskatoon, Saskatchewan, who are also members of the Retail Merchants' Association. This was a case wherein the Government claimed that a job printer who printed articles for stock or for sale in his retail store was subject to a sales tax. The Retail Merchants' Association who defended the case, contended that they had no right to pay a sales tax, and the judge decided in the retailer's favor. This judgment has just been rendered.

Little Excuse for Taxing Tinsmiths

In rendering this decision, Judge McLeod said: "On the facts agreed on in this case by counsel, and they appear to me sufficient for the purpose in question, I am of the opinion, following the judgment of the King vs. Pedrick and Palen, that the defendants are not liable; and the only doubt I have in mind was caused by the fact that in the Regulations the nature of the business carried on by the defendants, namely that of job printers, is given as an illustration of the status of manufacturers. It appears to me, however, from the judgment to which I have referred that the defendants cannot be said with any degree of real accuracy to be manufacturers within the meaning of the Act."

This being the view taken in regard to job printers, there does not seem to be the least excuse for the Government calling upon tinsmiths to pay the manufacturers' tax, as they are in exactly the same position as the job printers.

Owing to the uncertainty of some of the clauses of the Act, merchants in general are hopeful that it will be amended during the present session of parliament so as to avoid any further litigation or uncertainty. Retail merchants as a class do not object to pay any portion of their fair share of taxation; in fact they pay the largest share of any class in every municipality, and all taxes that are paid to the Government by manufacturers or importers are passed on to the retail trade and in fifty per cent. of their purchases and sales they are unable to collect it but are forced to absorb it in their overhead expenses. They say their chief desire is to see that all systems of taxation are levied equitably.

Disapprove Word "Sheffield" as Trade Mark

When Used as a Mark for Silver Plated Hollow Ware—Word Signifies Having Origin in Sheffield, England, and Signifies Quality—Has Had Much Abuse.

FOLLOWING is copy of U. S. report of "Trade Practice Submittal" as to the use of the word "Sheffield." This contains the decision of the Commission fairly well in detail, from which it will be noted that they have not made any definition of what should be considered Sheffield Plate and do not approve the use of the word "Sheffield" as a trade name or mark for silver plated hollow ware.

Trade Practice Submittal. The trade practice submittal is used by the Federal Trade Commission in order to help it in determining what are unfair trade practices by the trade in which those practices are used. To such a submittal the Commission invites representatives of all members of the industry in question who in conference are supposed to arrive at conclusions as to what they consider fair and unfair. These conclusions the Commission does not hold as binding upon it, although they are used as a guide. There have been a number of such trade practice submittals, the most outstanding of which were those on the question of the fairness of maintaining resale prices, and the guarantee against price decline.

Such a submittal was held by the Commission with manufacturers of silver plated hollow ware, on January 19th. Information with respect to the conclusions at the submittal have just been announced. The submittal was held to consider the use of the word "Sheffield" as a descriptive trade name for silverplated hollow ware. The consensus

Income Tax 21 Per Cent. of Revenue

GOVERNMENTAL figures for the fiscal year ending March 31 give some interesting sidelights on developments in Canada during that year. Customs duties declined from $162,000,000 to $102,000,000. The War Tax Revenue showed an increase, the reason being the gain in income tax receipts. Business profits tax on its last lap fell below that of last year by $15,000,000 and inland revenue, that is the sales tax mainly, was down nearly $4,000,000. For the present year the income tax revenue is expected to show a decrease of 40 per cent. Income Tax, which in 1921, was only 8½ per cent. of the whole revenue, was 21 per cent. of the whole for the year ending March 1922.

A Sinister Propaganda

AN APPEAL is being made for the business press of the United States to bring pressure to bear against the practice of such economical measures on the part of the government of that country, as will necessitate reduction of military and naval forces. The origin of this propaganda indicates that while very laudable sentiments are expressed in regard to the prestige, patriotism and protection of the people of the country, there underlies it all the sordid influence of business interests.

There is plenty of outlet for the products of the iron and steel industries of America in connection with peaceful pursuits without overdoing the production of weapons for military and naval forces. Adequate protection is needed but if any good result is to come from the world conferences on limitation of armaments such propaganda should not be spread. The mad race for armaments in which Germany indulged, coaxed on by Krupp's and other such business interests has brought that country into a most unenviable position which no other country will wish to emulate.

The Coal Strike And Higher Steel Prices

A FIRMER tendency was noted in the iron and steel markets at the close of last week, as briefly noted in the last issue of Hardware and Metal. During this week the situation has developed still further and is reflected in increased pig iron prices and increased demand and firmer prices for most rolled products. This tendency is said by some people to be chiefly attributed to the effect of the coal strike proceeding in Canada and the United States. If this is the case there have probably developed some new factors in the situation which have rendered it more acute than at first thought, for when the strike was first threatened most producers stated that the strike would have little effect upon them unless it was protracted, due to the fact that the peak load season for the consumption of coal was getting over, that considerable surplus stocks were available to both industries and railways, and that the production of non-union mines would be sufficient to help tide over the strike period.

It is doubtful, however, if the coal strike is wholly responsible for the firmer tendency in steel. For some time there has been improvement in demand and consumption and a steady increase in mill production. In view of the fact that for some time many products have been selling at a very small margin above cost, it is only to be expected that improved buying would bring higher prices. That higher prices would be felt when this improvement took place has been noted frequently in Hardware and Metal. There is no doubt but that the coal strike has helped develop a seller's market in which prices will be dictated by producers, but the present situation probably reflects a combination of the two factors rather than any one of them.

For the time there has been little effect upon operations, the production of steel works and rolling mills being about 75 per cent. for the U. S. Steel Corporation and 75 per cent. for independent companies. Actual production of coal has altered little with the exception of one district where it is a little less. One result of the present situation has been to stimulate the buying of steel, due to the increasing inability of mills to make prompt deliveries, thus discouraging the practice for some time past of buying from hand to mouth. Evidence of the improvement in buying recently is noted by the figure of 139,300 tons representing the volume of fabricated steel business closed by U. S. mills in the month of March. This was almost as much as that of January and February combined and was over 30 per cent. greater than the March average for the preceding ten years. In Canada as well an improved tone is noticeable in this industry with buyers showing a tendency to lay in stocks for the first time in many months. With this situation prevailing and in view of certain factors tending to increase prices on iron and steel, it is reasonable to believe that these stocks will be replenished at prices higher than those recently experienced.

A Big Field For Business

A RECENT survey made of conditions in farm homes in America indicates the extensive possibilities that exist for business in modern household and kitchen equipment in the rural districts. An average of nine thousand records were secured to form the following survey.

As to the work the farm wife is called upon to do, it was shown that on the average she has 7.8 rooms to look after and 1.6 stoves to care for; 79 per cent. have kerosene lamps, 61 per cent. have to carry water an average distance of 39 feet; 96 per cent. of them wash and iron and 92 per cent. do sewing, spending a daily average of 6 hours in mending; 94 per cent. engage in bread making.

Now for the facilities which those farm wives have to do this work; 32 per cent. have running water; 22 per cent. have power machinery; 48 per cent. have water in the kitchen; 60 per cent. have a sink and drain; 57 per cent. have washing machines; 47 per cent. have carpet sweepers; 95 per cent. have sewing machines; 96 per cent. have screened windows and doors; 90 per cent. have outdoor toilets, and 20 per cent. have bath tubs.

Manufacturers of such equipment do not need any urging for greater effort to educate the farm wife but where the need lies is for the merchants with prospects in the rural districts to connect up with the national sentiment which is being encouraged and turn this sentiment into actual business for himself.

Improvement Tendencies in B. C. Coast Trade

Improvement in Logging Operations, and Placing of Orders for Siberia Post of Hudson Bay Co. Have Brought More Active Movement—Mining Rush Brings Trade in Other Lines

VANCOUVER, B. C.—A gradual betterment in trade conditions is reported this week by both wholesale and retail hardware distributors on the coast. This is due to opening up of spring which is much later than usual and an improvement in logging operations. A Japanese vessel in the harbor this week loaded a sizeable shipment of short logs which are to be sawn up into lumber on arrival in Japan. Shipments of this kind which are showing a slight increase are having a favorable effect upon all trade lines, although it is not as fast as anticipated.

Probably the feature of the week is the placing of a number of orders for the Hudson's Bay Post in Siberia, particularly corrugated iron, enamelware and the heavier lines. It is interesting to note in this connection that last year the orders were chiefly placed in Winnipeg but this season buyers found more favorable prices obtainable at coast distributing houses. The shipment goes forward toward the end of the month.

Collections are reported better by some of the houses while others say they are having just as much trouble as ever to keep their accounts up to normal. It depends to a certain extent on the locality where the accounts are located and the industry upon which the life of the community depends. The Okanagan, for instance, is still slow and it is stated that much of the payments for last year's fruit is finding its way into the banks for liquidating purposes. However, it is believed this condition will be relieved within the next two months.

On account of the rush of miners into the Williams Lake and Mayo districts, particularly the former, there has been a rush to buy gold pans, none of which were obtainable toward the end of last week. A new stock is, however, being rushed there.

Due to the strengthening of the steel market on the American side, steel screws have followed the course of the east and have been advanced this week about ten per cent. This is the only change of consequence in the list price although it is expected that nails will follow within a very short time.

Sporting goods are starting to move in livelier fashion in keeping with the season. One of the enterprising Granville street retailers had a special this week on fish baskets. The ten, eleven and twelve inch sizes, regularly quoted at $2, he sold at 75 cents and the three larger sizes were moved at 90 cents instead of the regular figure of $2.25. There was a big demand as the stream and lake fishing here is just nicely starting.

J. Taylor, manufacturers' agent of Winnipeg, was on the coast this week in connection with one of his periodical selling trips.

John Dunsmuir of Mackenzie, White and Dunsmuir, Ltd., has been appointed chairman of the hardware section of the Vancouver Board of Trade. Mr. Dunsmuir is also president of the local Canadian Credit Men's Trust Association.

H. B. Greening, president of the B. Greening Wire Co. of Hamilton, who, with Mrs. Greening, has been spending the winter in California, was in Vancouver, this week on his way home. He was met here by his general manager, D. Griffiths, who returned east with the party via Calgary, Edmonton, and Winnipeg.

B. C. Executive of R. M. A. Meets in Vancouver

Provincial branches were well represented at the meeting recently of the head office executive and advisory committee of the Retail Merchants' Association, in Vancouver. Reading from left to right the names are:

Front row—J. L. Ward, secretary at Nanaimo; G. H. Jacobson, vice-president B. C. Board, New Westminster; G. H. McRobbie, Dominion executive council, Vancouver; W. J. Ball, Dominion executive council, Saskatchewan; D. H. Kent, provincial treasurer, Vancouver; H. Murphy, vice-president B. C. Board, Nanaimo; J. T. Crowder, provincial president, Vancouver; H. C. Wilson, president Vancouver branch; T. F. McDowell, past president B. C. Board, Vancouver; E. Gamlin, vice-president B. C. Board, Victoria.

Second row—W. Keir, Vancouver; Geo. S. Hougham, provincial secretary; R. L. Young, Ladner; Mr. Hartle, Vancouver; R. H. Ormonde, president Nanaimo branch; S. R. Kirkham, president Duncan branch; R. Thompson, president North Vancouver branch; E. McTaggart, Vancouver; C. D. Bruce, hon. secretary Vancouver branch; R. H. Fairley, secretary Vancouver branch.

Third row—F. Cluff, Mr. Storey, D. Rose, A. A. Blain, R. M. Millar, T. H. White, all Vancouver; G. B. Armstrong, Armstrong; W. M. Kerr, New Westminster; H. B. Neilson, automotive section, Vancouver; J. N. Harvey, clothiers' section.

Fourth row—B. S. Ross, New Westminster; G. Clement, Ladner; A. B. Derifield, Vancouver; W. E. Ford, North Bend; F. C. Philip, White Rock; R. H. McDuffee, Vancouver.

Top row—J. Phillipps, R. MacMillan, J. J. Johnston, P. J. Burch, E. Almas and Ed. Byers, all Vancouver.

Hardware Letter Box

Information on trade topics will be gladly supplied to subscribers through this department.

LOCK WASHERS

Ant. Bernier, Trois Pistoles, P.Q.—Will you please let us know the names of Canadian manufacturers of lock washers?

Answer.—The Union Iron & Metal Company, 1951 Dundas Street West, Toronto, Ontario.

OIL STOVES AND HEATERS

Charles Caswell, Hardware Merchant, Tillsonburg, Ont.—Please give me the name of a Canadian Manufacturer of an oil stove or heater.

Answer.—The Perfection Stove Company, Limited, Sarnia, Ont.

PORTABLE GREENHOUSES

C. F. Moore, Merville, P.O., B.C.—Could you kindly give us the names of some firms who make portable greenhouses?

Answer.—The King Construction Co., Toronto; Lord & Burnham Co., Limited, St. Catharines, Ont.; The Metal Shingle & Siding Co., Preston, Ont.

TILE PIPE MANUFACTURE

W. G. Edge, Limited, Toronto, Ont.—Can you tell us the name of a manufacturer in St. John, Quebec, who produces tile piping?

Answer.—The Dominion Corrugated Steel Pipe Co., Ltd., are located at St. Johns, Quebec.

HOCKEY STICKS

Cash Sales System, Limited, 428 Gladstone Avenue, Toronto, Ont.—Would you kindly give me the name of a manufacturer of hockey sticks?

Answer.—The St. Marys Wood Specialty Co., Ltd., St. Marys, Ontario.

CLOSET SEAT HINGES

Messrs. E. T. Wright Company, Limited, Hamilton, Ontario.—Can you give us the names of manufacturers of closet hinges in Canada?

Answer.—The Canadian Brass Company, Galt, Ontario. The Stratford Brass Company, Stratford, Ontario.

"WONDERSHINE"

John B. Foley, secretary, New York State Retail Hardware Association.—We have been requested by one of our members to locate the name of the makers of a silver polish called "Wondershine." Would you be good enough to send me the name and address?

Answer.—Messrs. Stuart & Foster, Limited, of Toronto, Ontario, control "Wondershine" Limited.

WELDING APPARATUS

Messrs. Geo. G. Bucher & Son, Kitchener, Ont.—Kindly give us a list of manufacturers of Welding Apparatus in Canada.

Answer.—The Compressed Gas Company, Limited, Vancouver, B.C.; Davis Bournonville Company, Niagara Falls, Ont.; The Liquid Air Society, West Toronto, Ont.; The Prest-O-Lite Company of Canada, Toronto, Ont.

FRETWORK TOOLS

The Iroquois Falls Merchandising Company, Limited, Iroquois Falls, Ont.—Will you kindly advise us where we can buy fretwork tools and material?

Answer.—The Millers Falls Company, of Massachusetts, U.S.A., manufacture Fret Saw Sets and Machines. Supplies of wood and fret saw designs, are furnished by H. L. Wild, 171 Avenue A., New York City, U.S.A.

POULTRY COOPS

Carter Brothers, Hardware, Picton, Ont.—Would you kindly give us the name of a Canadian manufacturer of poultry coops?

Answer.—The Neverfail Products, Limited, Hamilton, Ont.

MANUFACTURERS OF "ZOG"

The Hamilton Advertisers' Agency, Limited, Hamilton, Ont.—Can you tell us who are the manufacturers of "Zog," which is a preparation for cleaning paint?

Answer.—This is manufactured by Hargraves Canada Limited, Wellington Street West, Toronto, Ont.

CRESCENT WRENCHES

The Geo. Taylor Hardware, Limited, Timmins, Ont.—Will you kindly advise us who are the manufacturers of the original Crescent Wrenches?

Answer.—The Crescent Tool Company, of Jamestown, N.Y., U.S.A.

GASOLINE COCKS.

Messrs. Fennell & Chandler, of Charlottetown, P.E.I.—Kindly give us the address of a firm in Canada, who make gasoline taps for Steel Barrels.

Answer.—The Empire Brass Manufacturing Co., Limited, London, Ont.

GALVANIZED STEEL SINKS

Messrs. R. T. Holman, Limited, Summerside, P.E.I.—Would you kindly give us the names of some Canadian manufacturers of galvanized sinks?

Answer.—The Sheet Metal Products Co. of Canada, Limited, Toronto, Ontario, and the Toronto Hardware Manufacturing Co., Toronto, Ont.

MARTIN GRAIN CRUSHER

The Nellis Hardware Company, Vermilion, Alta.—Could you inform us who are the manufacturers of the Martin Grain Crushers?

Answer.—This grinder was made by the M. R. Martin Company, St. Louis Park, Minnesota, U.S.A., and was handled by the Kansas City Hay Press Company, Minneapolis, Minn., U.S.A.

Trade Enquiries

Names and addresses of enquiries can be obtained only by those interested in such lines upon application to Department of Trade and Commerce, Ottawa, Canada. Please quote reference number when requiring addresses.

3605. **Hardware.**—A London engineering company are desirous of handling meat choppers, coffee grinding machines, gas stoves, ice cream freezers and conservators, refrigerators, etc., provided they are given the sole agency or distribution for Great Britain and Ireland.

3606. **Twine.**—A manufacturers' agent in Barbadoes would like to secure a Canadian agency for twine and requests samples and quotations at once. Best references can be supplied.

3610. **Iron and steel products.**—A Glasgow firm of iron and steel merchants and metal brokers will be glad to get in touch with first-class Canadian manufacturers or merchants of iron and steel, etc., with a view to doing business as merchants or acting as their agents in Scotland—angles, billets, bars, tubes, bolts, and nuts; rivets and chains, etc.

3611. **Asbestos, Graphite, etc.**—A Glasgow firm of import merchants of standing, who import principally asbestos, chrome, manganese and iron ores, beauxite nickel, magnesite, tale, graphite, and all minerals; fertilizers, and all heavy chemicals, and who have already a good connection with Canadian exporters, are still open for further business with reliable firms.

3612. **Iron and Steel Materials.**—A London company with agents in Australia and South Africa, are prepared to act as agents for the United Kingdom for responsible Canadian manufacturers of iron and steel in angles, bars, billets, plates, drop forgings, tubes, bolts and nuts, wire rods, wire and cut nails, tacks, screws, rivets, chains.

3630. **Trade with West Indies.**—A London firm dealing with the West Indies is open to receive exporters of lines suitable for that market.

3637. **Pig iron and hematite.**—An important English firm in Milan are anxious to receive quotations c.i.f. Genoa for grey and mottled pig iron, hematite, etc., from Canada.

3628. **Motor car and cycle accessories.**—A London firm of importers are open to receive particulars from Canadian manufacturers of motor car and cycle accesseries, suitable for the United Kingdom market.

3633. **Hardware and tools.**—The London office of a leading South African hardware house is anxious to receive catalogues (if possible five copies) and other particulars from Canadian manufacturers of builders' hardware, joiners' and engineers' tools, hand pumps, domestic hardware, aluminum goods, brushware, domestic woodware, lampware (for oil), crockery and glassware, chairs and office furniture, dairy appliances, bee-keeping appliances, poultry appliances.

3629. **Household articles.**--A London firm of importers are open to receive particulars from Canadian manufacturers of all kinds of household articles such as carpet sweepers, ice-cream freezers, refrigerators, egg beaters, bread knives, can openers, towel rollers, rolling pins, food choppers, housework gloves, chair seats, ironing boards, mouse traps, blind rollers, flour sifters, moulds, pails, other kitchen utensils, hammers, tack lifters, padlocks, door bells, dog chains, harness snaps, wrenches, curtain rods, soap boxes, tobacco novelties, clothes hangers, plumbers' supplies, etc.

Catalogues and Booklets

Those interested in any of the catalogues described below can procure a copy of the same by writing direct to these firms. Mention that you noticed this in Hardware and Metal

WRIGHT PRODUCTS

A new general 424-page illustrated catalog is now being sent out by E. T. Wright Co., Hamilton. This catalog covers all lines mane by the three factories of the E. T. Wright Co., and is prepared in a very compact and convenient form for the buyer, at the same time giving information of the goods in fine detail.

The catalog is subdivided into 26 sections, any of which may be easily referred to by a thumb cut side index.

The new feature is the numbering system, which runs consecutively through the catalog, and identifies each individual article. For convenience of the trade the old numbers are still retained.

Accompanying each catalog is a net price list, from which the current price of any item may be ascertained. It is the intention to issue corrected net price lists from time to time.

Events in the Trade

BUSINESS CHANGES

Montreal—Lamoureux & Mercier, hardware, have dissolved partnership.

PERSONAL

G. H. Hunter, formerly with the Canada Metal Company, has taken a position with Scarfe Bros. Brantford and is now calling on the Ontario trade.

R. P. Dickson, Manager of the Sumner Company, Ltd., Moncton, N. B., is visiting Montreal and Toronto and other Upper Canadian cities this week.

C. E. Adcock of Adcock & Co., Montreal, is leaving this week on a seven week's trip through the Western provinces to the Pacific coast.

Morris Wheeler, of Sargent & Co., New Haven, and Clive Hatch, of Hatch Mfg., Co., Whitby, Ont., were among those calling on the Montreal trade this week.

U. Boucher has been appointed a representative of Pratt and Lambert Inc., and will cover the Montreal territory. Mr. Boucher was formerly with Gurney-Massey Co.

M. W. Matheson, 205 Confederation Life Building, Toronto, is leaving to tour Australia, New Zealand and elsewhere in the interests of ten Canadian manufacturers among which is R. McDougall Co.

G. Rutherford Caverhill, son of George Caverhill of Caverhill Learmont & Co., was married on Monday of this week to Miss Gwendolen Holmes Hampson of Montreal. Since returning from the war he has been associated with his father in the above wholesale firm.

A. J. Johnson, chairman and managing director of Rd. Johnson, Chapman & Morris, Limited, of London and Manchester, and who have branches in various parts of England, Australia and South Africa, was a visitor to Hardware and Metal office. Mr. Johnson, accompanied by Mr. Shaw his assistant, is visiting the United States and Canada with a view to securing supplies of Canadian products.

ONTARIO INCORPORATIONS

Canadian Rubber Cushion Bumper Co. Ltd., head office Toronto, capital $40,000 to manufacture automobile accessories.

Queen City Tools Ltd., head office Toronto, capital $100,000, to manufacture and deal in tools, hardware merchandise, etc.

O. W. COOK IS PRESIDENT OF DEXTER LOCK CO.

O. W. Cook, formerly general manager of the Canadian Cartridge Company, who achieved much distinction during the war has recently become president and general manager of the Dexter Lock Company, Ltd. This company have acquired the rights to manufacture the Dexter Lock for the British Empire. Their plant and general offices will be located at Hamilton, Ontario.

HOCHELAGA CEMENT COMPANY

Montreal.—Reference was made a few weeks ago to a new cement company to be located in Montreal, East. This company assumes the name of Hochelaga Cement Co., and plant construction is now under way, to have a daily capacity of 2,500 barrels, or 750,000 barrels per annum. The company declares that contracts have already been closed for one-half its output for the next five years. It is estimated that they can produce cement for $1.30 a barrel, which is considerably lower than market price.

OBITUARY

Mr. Reider, president of the Ames-Holden-McCready Company, Montreal, is dead.

Mr. Rieder was born at New Hamburg, Ont. He engaged in general store business with his father, 1892-1897. He was later bookkeeper and director of the Kitchener Rubber Manufacturing Company, 1900-1903. He organized and built and was managing director of the Merchants Rubber Company, Limited, 1903-1906. The Kitchener Rubber Manufacturing Company and the Merchants Rubber Company, Limited, were absorbed in 1907 by the Canadian Consolidated Rubber Company, Limited, at which time Mr. Rieder became vice-president and manager of both Kitchener companies. He was elected vice-president of the Canadian Rubber Company, Limited, 1908, directing all operations of the company. In 1915 he was made vice-president and general manager, and president and general manager in 1917. In the year 1919 he resigned from the rubber and felt companies to accept the presidency of the Ames-Holden-McCready, Limited and its subsidiaries.

NEW FORM OF STEEL DISCOVERED IN ENGLAND

The construction of telephones and the making of motor car and airplane engines is likely to be revolutionized by a Sheffield discovery of cobalt magnet steel, according to the opinion of experts. The new steel, which is the invention of J. Kuehnrich, of the Cobalt Steel Company, contains fifteen per cent. of cobalt, which is said to be enormously superior to tungsten steel for the making of a magneto. The magnetos, by the use of this cobalt, could be made half the present size and cheaper, and would give the same results as are obtained at present.

Managing Director Kayser of the Cobalt Steel Company, says the new metal will enable motor car manufacturers to provide combined lighting and ignition sets, something which they have been trying to attain for years.

CREDIT BUREAU IS ORGANIZED

Windsor, Ont.—J. C. Scofield was elected president of the Border Cities Credit Bureau at the first general meeting of that organization which was formed about two months ago. Other officers elected were: W. F. Andrews, vice-president; D. B. Fisher, secretary-treasurer; A. D. Green, George Cross, A. E. Roach, G. A. Edwards, W. H. Cunningham and F. J. Kinzinger, directors.

The bureau is purely mutual and non-profit sharing, and is incorporated under the Ontario Companies Act, and has been in operation since February 1. It has a large representative membership, comprising the largest dealers and manufacturers in the lumber, building supply, electrical, hardware, paint, plumbing, roofing and sheet metal lines.

The objects of the Bureau are to encourage and promote a higher degree of stability in the granting of credits; to handle collections for its members; to protect its members from losses through unworthy credit applicants; to educate, help and protect worthy and unfortunate customers, and to establish closer ties of business relations between members of the bureau and the customers that the welfare of all may be best conserved.

F. Mitchell, who has been in the plumbing and heating business for the past 16 years in Winnipeg, has opened a hardware store at the corner of Kennedy and Portage avenues. Besides carrying a complete line of paints and brushes, Mr. Mitchell is stocking a complete line of hardware.

New Hardware Goods

OFFERED TO CANADIAN HARDWAREMEN

"QUEEN" FRUIT JARS

The Consumers Glass Co. announce their "Queen" fruit jars, which are now being marketed for preserving, etc. Some of the salient points of this jar claimed by the manufacturers are as follows: They are scientifically constructed for the cold process method, the adjustable fastener forming an air valve to permit steam and air to escape. Fitted with Kant Krack lids, the wire trimmings exert pressure directly over the rubber and at the strongest part of the lid where cross sections of glass reinforce same. They are easy to handle either for the old or new method, as they may be operated entirely by pressure on the clasps without touching the jar; or under the old method when full of hot fruit the clasps serve admirably as handles without any danger of burning the hands. Another feature is the flat covers, the jars when inverted standing level.

NEW DRAFT AND SQUARE

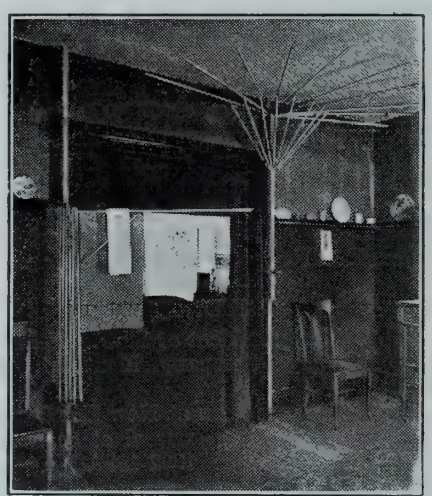
The Lopez Mfg. Co., Chicago, Ill., have placed on the market a new drawing instrument known to the trade as the "Draftsquare." The instrument is made of transparent material. Sixty-degree "V" slots and twenty-nine degree slots for drawing "V" threads and Acme threads are provided. Circles from ⅛ in. diameter to 1 in. diameter by sixteenths can be scribed. Sets of three arcs, arranged so as to represent the arcs used when drawing the three-sided view of a hexagon nut, are provided for all standard sizes of nuts from 3/16 in. to 1 in. Aids to lettering and thickness of nuts are also incorporated.

BRACE RITE TRUSS ROD

Brace-Rite truss rods are designed to increase the rigidity of the Ford rear axle. The braces are made in both the single and double truss pattern, the former being applied beneath the axle while the latter braces it across both the bottom and the back. The collars or brackets of the double truss rod are of the two piece type, having three points of tightening. The rods are secured to the differential housing by means of specially designed clamps and bolts. The makers say the truss rods will not interfere with the application of any shock absorber or the action of the spring. Manufactured by the Master Products Co.

"CANADIAN MAID" CLOTHES DRYER

The new Canadian Maid clothes dryer is one of the latest products of the Everett Manufacturing Co. of Sault Ste. Marie, Ont. Its chief purpose is to enable the drying of an average size washing inside of an ordinary kitchen, at the same time without inconvenience to the housewife. This object is attained by raising the whole washing when on the clothes dryer clear to the ceiling. It is attached to the wall, and has ten four-foot arms which can be easily operated up or down as desired. One single bar



Canadian-Maid Clothes-Dryer

or more can also be used when needed, without using the entire product. The Canadian Maid clothes dryer is said to be simple to operate, and can easily be attached to the wall or taken down in a very short time.

ELECTRIC VAPORIZER

The Kase Electric Co., of Duluth, Minn., have added an electric vaporizer to the long list of automobile accessories. This vaporizer consists of a set of four metal grids in a heat insulating case, made in the form of a gasket. This device is placed between the carburetor and intake manifold flanges. One terminal of the grid is connected with the battery, and the other is grounded. The snap switch is placed in any convenient location. The manufacturers describe the object of the heater being to dry and also warm the gasoline vapor as it passes into the manifold, so that prompt ignition will result.

REVERSIBLE TOASTER

An improved Hotpoint reversible toaster is now being introduced to the trade by the Canadian Edison Appliance Co., Limited, Stratford, Ont. The feature of this new toaster is the "turn-over" construction, with the additional improvement that the element provides an even distribution of heat. Another factor pointed out by the makers is, that the toast is kept hot while both sides of the bread are being toasted.

SCREWDRIVER SET

The Consolidated Tool Works, New York City, have placed on the market a screwdriver set that consists of one handle and four blades. The blades fit into the handle, two at one end, and two at the other. These blades are of tool steel hardened and ground. The handle is made from cold rolled steel, knurled on the outside, and the ends of the blades are ⅛ in.; 3/16 in.; ¼ in. and 5/16 in. wide, respectively, and the length is 3⅛ in. When a blade is inserted in the handle the length of the screw driver is about 6½ in. The blades are held firmly in the handle and are easily interchanged.

SOUVENIR SUPERHEATERS

The Souvenir Superheater is the name given to the parlor type of heater by the Hamilton Stove and Heater Co., of Hamilton and Winnipeg. The manufacturers claim that the name is derived from the fact that the air is superheated by passing through the louvers, up around the fire pot and over the superheating fins. It is then distributed through the principle of re-circulation. As the superheated air rises from the heating chamber within the casing, a vacuum is created, thus automatically drawing the cold air into the louvers. The construction and specification features of the Souvenir include the following: Height over all, 48 inches; depth of firepot, 15 ins.; size of body, 23 ins. square; size of feed door opening 6½ x 8½ ins. It is made in one size only and is designed on the same lines as a hot air furnace. In appearance the makers claim that the Superheater will harmoniously blend with the furniture design in the home, being finished in gunmetal with rich copper trimmings. The complete design and effect is to resemble a modern piece of furniture.

Weekly Hardware Market Reports

STATEMENTS FROM BUYING CENTRES

Markets at a Glance

ADDITIONAL price developments recorded on the current hardware markets include lower quotations on bath compression cocks, standard brass steam cocks, nickel-plated bath supplies, contractors' hand sets and the Lincoln line of hand sets. Prices are slightly higher on caulking cotton, while the general improvement noted in the steel industry has been reflected in several finished products such as wire goods and rivets. Although no price advances have been announced on the domestic markets, sheets, bar steel and similar goods continue to stiffen, due to the rising trend at primary centres. This firmer undertone has also been reflected in corrugated iron, wrought piping, and similar lines. The spread of the coal strike to non-union fields has resulted in this situation assuming more serious proportions from a production standpoint, as the practical unbroken operation of such soft coal areas was formerly counted upon. A slight improvement appears in certain sections of the scrap material market, notably in copper grades and ferrous waste. Signs of recovery are again evident in ingot metals such as copper, and spelter, while lead remains the steady feature of the group. An active movement continues in builders' hardware, while Spring goods record a swinging stride with the accompaniment of more seasonal weather. Early shipment of many summer lines is now reported, and a general hum of activity denotes brisker trade in practically all phases of the hardware industry.

Montreal Markets

MONTREAL, April 20.—The firmer tendency in many lines of iron and steel products now feature the hardware markets. While actual price changes are few this week, there is a strong undertone in many lines, and some revisions would not be surprising. Much interest is now attached to such commodities as bar iron and steel, sheets, wire nails, staples and other wire products. The reflection of this stronger tendency is also slightly noted in such lines as corrugated sheets, eavestrough and conductor pipe, and wrought piping. The coal strike is now considered by some as one of the chief factors responsible for this movement, while others maintain that the industry is on the road to a healthy recovery, it being only natural that prices should stiffen, with the strike not yet a disturbing factor. Ingot metals continue in an improved position, while scrap metal markets are still dull, although there are slight indications of an improvement.

Increasing demand is undoubtedly greatly assisting toward the general betterment in most markets pertaining to the hardware trade, and activity in jobbing circles becomes more evident each week. Business is now described by wholesalers as seasonably good, with every indication of an active trade in the remaining months of Spring and early summer.

SOME PRICE CHANGES LOOKED FOR ON WIRE NAILS AND STAPLES

Montreal

The market for wire nails and staples, also other wire products, is now very firm, and jobbing houses state that they would not be surprised if a revision upwards was announced in the very near future. Manufacturers of these lines in southern markets recently announced higher prices, and it would seem, from present indications, only a question of time before the advanced quotations reach the local market. Both of the above products are reported as active throughout jobbing circles at the present time.

NO FURTHER CHANGE IN LEAD PRODUCTS

Montreal.

Lead products remain at the revisions recently recorded, when practically all lines, with the exception of solders, were slightly reduced. This movement was in sympathy with metals on primary markets which have, in recent weeks, been displaying an easier tendency. Following this, however, some slight improvement in metals has been noted, and both tin and lead are now stronger. Whether this improved tone will continue is hard to determine as the metal markets for some months past have been very irregular. However, the market for the finished product is improved and a continuance of metal strength would add to this factor. Following are quotations at the recent revision:

LEAD AND ZINC PRODUCTS

Lead pipe, per 100 lbs.	12 00
Lead waste, per 100 lbs.	13 00
Note—Lead pipe is subject to a discount of 10 per cent.	
Lead traps and bends	17½%
Lead wool, lb.	0 13½
Lead sheets, 2½ lbs.	0 10
Lead sheets, 3 to 3½ lbs., sq. ft., lb.	0 09¾
Do., 4 to 8 lbs., sq. ft.	0 09
Cut sheets ¼c. lb. extra, and cut sheets to size, ¾c. lb. extra.	
Solder, guaranteed, lb.	0 25½
Do., strictly, lb.	0 23½
Do., commercial, lb.	0 20½
Do., wiping, lb.	0 21½
Do., wire, lb.	0 34
Zinc sheets, casks	0 11
Do., broken lots	0 11½

NEW DISCOUNTS QUOTED ON MOST DRILLS

Montreal.

Through a change in discounts, all drills with the exception of bit stock and wood boring brace bits, are reduced in price. The change brings blacksmiths', straight shank, taper shank, round shank and jobbers to a lower level, and these are now quoted at less 60 per cent. Bit stock and brace bits remain at 50 off.

MORE ACTIVE MOVEMENT IN CORRUGATED SHEETS

Montreal.

A more active market is recorded in corrugated sheets. A gradual improvement has been noted with the advancing season, and dealers are now quite optimistic toward business for the ensuing months. Building operations will undoubtedly reflect on the movement of these products, and with an extensive program to follow, continued increased trade in corrugated should follow. There is little change in the undertone of the

market, although the stiffening of sheet prices has caused a firmer tone. Unchanged prices and discounts are the following:

CORRUGATED SHEETS	Per 100 sq. ft.
No. 28 gauge	6 50
No. 26 gauge	7 00
No. 24 gauge	9 00
No. 22 gauge	11 00
No. 20 gauge	12 50
No. 18 gauge	16 00

Less 10 per cent.

Lighter than 24 gauge and wider than 27 ins., 75c a square extra.

BRASS AND COPPER GOODS ON STEADIER BASIS

Montreal

The market for brass and copper products, such as sheets, rods, and tubing, shows some signs of improvement, owing to copper on the primary market being reported stronger. Dealers, however, look for little change in these products in the immediate future, unless some strong reaction occurs in the virgin metal. Business continues along satisfactory lines, improving as the season advances. Unchanged quotations are as follows:

	Base.
BRASS—	
Sheets, base	0 24
Rods, base ½ to 1 in., round	0 22
Tubing, seamless, base	0 30
F. o. b. Montreal.	
COPPER—	
Rods, ½ to 2 in.	0 29
Soft sheets, plain, 16 oz., and heavier	0 32
Plain tinned, 16 oz. and heavier	z0 36
Polished, and tinned, 16 oz. and heavier, lb.	0 41
Tubing, lb.	0 32

Above prices are full sheets and bars. Cut sheets and bars are 5c. per lb. higher.

MORE ACTIVITY IN RANGE BOILERS ANTICIPATED

Montreal

Manufacturers and distributors of range boilers state that current business is progressing along fairly satisfactory lines, a gradual improvement being noted with the advancing season. With an active building program for the ensuing months, especially of the dwelling house class, sales of this product should continue to show increased volume, and a fairly optimistic outlook is forcast. Dealing with quotations on boilers, one local dealer stated that there is practically no change from conditions that existed some months ago, new list prices and discounts being quoted by some distributors while others again are maintaining the older net prices. Between the two, however, there is little variation, and the market is much steadier than it was in the earlier weeks of the year.

RANGE BOILERS—	
5-gallon	$ 13 50
12 to 15 gallon	14 00
18-gallon	15 00
25-gallon	16 50
30-gallon	17 50
35-gallon	20 50
40-gallon	22 75
52-gallon	38 00
66-gallon	60 75
82 gallon	74 00
100-gallon	103 00
120-gallon	117 00
144-gallon	164 00
168-gallon	187 00
192-gallon	210 00

Discounts. Standard weight, 50 per cent. Extra heavy, 40 per cent.

IRON AND STEEL MARKET CONTINUES VERY FIRM

Montreal

Current quotations on iron and steel remain unchanged, but there is still a very firm tone to the market. A rumor now exists to the effect that higher prices are considered likely within the next week or so on the local market. Undoubtedly there is a much stronger tendency throughout the industry, and a general improved demand is also assisting towards stiffening the situation. There is some difference of opinion as to the effect the present coal strike will have on future prices. While up to the present this has not been a serious obstacle, it is now believed by some that a continuation of these labor difficulties will play no small part in the future condition of the market. One local distributor stated to Hardware and Metal that reports from their principals in the South indicate that while some mills are sufficiently stocked to carry them for some time yet, others have only enough coal to last from four to six weeks. In the case of the latter there was little encouragement to increase production when having to face a coal shortage in the near future. The effect this might have on the industry in the next few weeks will be watched with interest. Unchanged local quotations for the present are the following:

Common bar iron, 100 lbs.	2 65
Refined iron	4 15
Irish finish machinery steel	2 70
Mild steel	2 65
Single reeled machinery steel	4 75
Band steel	2 65
Spring steel	4 25
Sleighshoe steel	2 65
Tire steel	2 85
Toe caulk steel	3 55
Harrow tooth steel, per lb.	2 80
Mining tool steel, per lb.	0 21½
Black Diamond tool and cast steel, per lb.	0 21½

NOTE—Refined iron is approximately $1.50 per 100 pounds over base, but fluctuates owing to unsettled market.

Band steel in scroll bundles, 50c per 100 lbs. extra.

SLIGHT IMPROVEMENT IN WASTE MATERIALS

Montreal.

Waste materials are practically unchanged, but with the market described as slightly improved in certain lines. Scrap copper is perhaps the most active metal, while lines of iron and steel are somewhat better than in past weeks. Although the trend of the market for some months past has been downward, there are now indications that a stronger tone will prevail, especially in iron and steel materials. Higher quotations have appeared in these in outside markets but locally dealers have made no change from the following quotations:

Automobile tires	0 50
Rubber shoes	0 02¾
Yellow brass	0 05
Red brass	0 08¼
Light brass	0 03½
Scrap zinc	0 03
Lead, heavy	0 04
Lead, tea	0 02
Light copper	0 08
Heavy copper	0 10
Wrought iron, R. Bd., No. 1 per gr. ton	9 00
Malleable scrap (ton)	8 00
Pipe scrap (ton)	6 50
Heavy melting steel 6 50	7 00
No. 2 busheling,	3 00
Boiler plate	7 00
No. 1 machinery cast	20 00

FIRM TONE CONTINUES IN SHEET MARKETS

Montreal

Much the same can be said of the sheet market as is reported in iron and steel. A strong stiffening tendency as regards prices continues in most lines, more especially perhaps in galvanized and black sheets. Although higher prices were expected in some quarters before this date, up to the present former quotations are ruling. It is reported that the coal strike is now being taken more seriously by producers in the South, and apart from a stronger tone owing to a better feeling in the industry, it is felt that this may play a more important part in the market during the following months. A local importer of English sheets stated this week that while the opening of navigation would lessen transportation costs, there was the improvement in English markets where recent advances have been recorded.

BLACK SHEETS

10 gauge	4 00	4 50
12 gauge	4 10	4 60
14 gauge	4 40	4 70

FEW CHANGES IN INGOT METAL QUOTATIONS

Montreal.

Ingot metal markets this week have to some extent been dominated by the holiday season, especially in England where there is a general cessation of business for about several days. Prices generally show little change, and have held fairly well considering the two possible unsettling factors, i.e., the coal strike in the U.S.A. and the European situation.

TIN.—The London market has held most of its recent advance, but it is thought doubtful if it can go much higher. Should the tin plate mills be compelled to close, it will mean a falling off in consumption. Apart from this, buyers do not believe in higher prices. Local market is quiet at 35½ cents.

COPPER.—The American market is fairly steady with prompt electro available at about 13 cents delivered. London is somewhat nervous owing to possible events at Genoa, and lower prices in that market would not be surprising. There is little activity locally with quotations unchanged at 16¾ cts. for electro, 16½ cts. for casting.

SPELTER.—East St. Louis is steady at the recent advance, but the 5 cent mark has not yet been reached. The position of this metal however is sound, and it is felt that it will eventually reach higher levels Locally, this metal is a little more active with price unchanged at 7½ cents.

LEAD.—Lead is quite firm on the London market, and it is thought possible that higher prices may be seen over the balance of the month owing to temporary shortage. It is doubtful, however, whether the advance will be sustained. The American market is strong at $4.95, and demand continues good. The market is firm locally at 6¾ cents.

ANTIMONY.—There is little more activity in this metal owing to American buying on account of possible imposition of duty. This does not of course affect domestic markets, but prices are somewhat firmer in sympathy. Chinese is quoted at 6½ cents, high grade English at 7½ cents.

ALUMINUM.—Aluminum on the local market remains quiet, with no particular feature to record. Quotation remains unchanged at 24 cents.

CEMENT BUSINESS IS SOMEWHAT BRISKER

Montreal

Activity in building circles is now demanding a good amount of cement, the movement becoming more active in the past two or three weeks. With a good building program during the summer months promised, a future increased volume of trade in cement is expected. Quotations are remaining unchanged as follows:

CEMENT—	
Car load lots, per bag, f.o.b. cars	$0 92
Per bag, delivered	1 00
Less car lots, per bag, f.o.b., yard	1 00
Per bag, delivered	1 10
Less 5 per cent.	
Rebate of 20 cents for empty bags.	

NAVIGATION STIMULATES ACTIVE ROPE DEMAND

Montreal.

Current trade in rope and cordage is described as seasonal, a recent improvement being noted with the return of activity in navigation. This branch of the industry was backward last year, owing to various reasons, and a revival is welcomed by manufacturers and distributors who are convinced that it promises better business for the whole of the season. Dealer trade has been a little slow in the earlier part of the year, but a gradual improvement is looked for from now on. Quotations on all grades of both rope and cordage are steady, raw materials holding the markets in this position.

ROOFING AND PAPERS IN BETTER DEMAND

Montreal.

Manufacturers and distributors of prepared roofings and building papers now state that business has taken the active turn usual in the spring months. The recent open weather has stimulated sales considerably, whereas trade in the earlier months was somewhat backward, dealers apparently paying little heed other than to present requirements. Building construction in the following summer months also offers encouragement, and active sales are anticipated well into next Fall. There has been no change in prices of these products.

Toronto Markets

TORONTO, April 20.—The earlier discounts announced on bit stock and wood boring drills are now stated to be in error and the discount of fifty off still governs these products. The recent revisions are confined to jobbers and blacksmiths' drills. Among the other price announcements this week are noted reductions on contractors' hand sets, easier prices on the Lincoln line of saw sets, lower quotations on nickel-plated bath supplies, while revised discounts bring similar changes in quotations on bath compression cocks and also on standard brass steam cocks. Slightly higher prices have been recorded on caulking cotton, while a firmer market tendency is noted in both structural and boiler rivets. A slightly stronger tone has been recorded in certain scrap materials, with signs of improvement again recorded in the metal markets. The stiffening of prices and the general improvement both in demand and consumption remains the feature of the steel industry. The coal strike has now assumed greater importance from an operating viewpoint than was originally calculated upon, but domestic centres have not yet reflected any immediate price changes, beyond the firmer tendencies in such products as bar steel, sheets and plates, wire goods, wrought piping and corrugated iron.

FURTHER REVISION IN DISCOUNTS ON DRILLS

Toronto

It is stated that an error was made in announcing the revised discounts on bit stock and wood-boring drills. Quotations on these products generally remain at the level of fifty per cent. off, although some variations in discounts are still recorded locally. However, the new quotations remain as announced on blacksmiths, jobbers, half-inch shank, taper shank and round shank drills.

PRICES ON CONTRACTORS' HAND SETS REDUCED

Toronto.

Contractors' hand sets show a slight reduction in price the current quotation on these products having been lowere to $13.50 per dozen.

LINCOLN SAW SETS REVISED IN PRICE

Toronto.

A reduction has been announced this week on the Lincoln saw sets, the revised level being $7.60 per dozen.

PRICES SLIGHTLY HIGHER ON CAULKING COTTON

Toronto

A slight advance in quotations is noted on caulking cotton, this product now being priced at twenty-nine cents per lb.

UNIFORM PRICE ADOPTED ON TARRED PAPER

Toronto.

A more uniform price is now quoted on tarred paper No. 2, this product being priced at eighty-five cents per roll.

MICA PRICES FOR NEXT SEASON UNCHANGED

Toronto.

No changes are announced as regards the prices the prices on sheet mica for next season, quotations being the same as prevailing levels.

REDUCTIONS ON NICKEL PLATED BATH SUPPLIES

Toronto.

Some revisions have been announced on iron pipe nickel-plated bath supplies, the ⅜ inch, now being quoted at $1.90 per pair, and the ½ inch size at $2.00 per pair.

REVISED DISCOUNTS ON BATH AND STEAM COCKS

Toronto.

Some additional revisions in discounts on certain brass compression goods now appear on the local market. These changes particularly affect bath compression cocks, the quotation having been changed from 38 to 41 per cent. off, while a similar reduction is noted on the standard brass steam cocks, discount now being 50 per cent., compared with the former figure of 43.

Current trade in these products is described as fair, and improvement in this direction is generally hoped for, due to

the reflection of activity in building circles. Folowing are prevailing quotations on these products:

COMPRESSION GOODS—	
Compression work, standard	45%
Fuller work, standard	30%
Bath cocks, compression	41%
do., Fuller	25%
Flat way stop and waste cocks, standard	54%
Brass steam cocks, standard	50%
Globe, angle and check valves, standard	25%
J. M. T.	20-10%
J. M. T. C.	25-10%
J. M. T. Gate Valves	25-10%
Jenkins gate or straightway	25|10%
Jenkins Globe	19|10%
Radiator valves, standard	58%
do., removable disc	58%

Emco, J. D. rad. valves, screwed	33%
Emco, swing check, ⅜ in. and ½ in.	40%
Do., Do., Do., other sizes	33%
Webber gate valves	33%
Basin Cocks:	
No. 0 and 1, Fuller pattern	30%
Quick opening, No. 3633,	50%
No. 3623, plain or index handle,	34%

FIRMER TENDENCY NOTED IN RIVET QUOTATIONS

Toronto

Quotations on rivets are stated as considerably firmer, this being a reflection of the general stiffening in prices on steel products. The shaded quotations on both structural and boiler rivets have practically disappeared from southern markets, while the advance in rods has had some influence in this direction. With some activity noted in commercial construction circles, rivet producers report a larger volume of current business.

REVISED PRICE LIST ON FORGED PRODUCTS

Toronto

A revised price list applying to catalog No. 51, is being distributed by the Canada Foundries & Forgings Ltd., and gives new trade quotations and discounts on the various products manufactured by this firm.

COAL STRIKE AFFECTING PRIMARY STEEL CENTRES

Toronto.

The local bar iron and steel market continues very firm, with prices generally unchanged, although the elimination of shading at southern mill centres has practically introduced higher price levels through the adherence to nominal quotations. Whether this move will be accentuated in the near future owing to recent coal strike developments and the manner in which these events affect the steel industry, is a problem receiving close attention. The general opinion is that coke, rather than coal, is the issue at the moment. The coal strike at the union mines is of comparatively small importance as consumers laid in stocks. Other large consumers, however, dependent upon coal and coke from the non-union mine districts, failed to stock to the same extent, as little labor trouble was looked for. As the non-union strikes proved greater than was anticipated, some blast furnaces have had to restrict operations. This affects the supply of crude steel and its stated that the continuance of these strikes would introduce the possibility of interruptions in mill operations. The activity among steel centres, remains practically the same as the earlier portion of the month, while prices continue to stiffen. Locally prices are considered as considerably firmer, with $2.75 being more than a nominal base price.

IRON AND STEEL—	
Mild steel bars base	2 75
Mild steel bands, 3-16 in. base	3 25
Bar iron, base	2 75
Angle iron, base	**2 85**
Horseshoe iron	3 60
Tire steel	3 00
Spring steel	6 00
Sleigh shoe steel	2 85
Hoop steel	3 75
Norway iron	12 50
Toe caulk iron	4 00
Crucible cast sheet steel	30 00
Mining drill steel	18 50
Cast tool steel, high grade	**30 00**
Cast tool steel, medium	18 00

SHEET MARKET STILL DESCRIBED AS FIRM

Toronto

The situation regarding galvanized sheets is still described locally as firm, but distributors state events have not yet reached the stage where higher prices are justified, although the tendency remains headed in this direction. The southern mills are now looking more seriously at the coal strike, and this is generally becoming a big factor in the situation, both on the domestic as well as primary markets. Where the labor unsettlement enters into the problem is in the supply of crude steel to the mills, the curtailment of coke having had some effect in this respect. The base on galvanized continues at $5.35, although some quotations slightly higher than this have already appeared.

BLUE ANNEALED—		
10 gauge, base	3 50	4 25
12 gauge	3 55	4 30
14 gauge	3 60	4 35

FAIR SALE IN COPPER AND BRASS GOODS

Toronto.

The recent improvement recorded in the movement of copper and brass products is stated to be fairly well maintained. Some slight fluctuations have been noted in quotations governing metal in the primary stage, but such minor changes have failed to reflect in prices on the finished products, such as sheets, rods and tubing. The following levels which have been in effect during the past few weeks generally govern the local market:

BRASS	
Sheets, base, per lb.	0 21
Tubing, base, per lb.	0 23
Rods, base, per lb.	0 19
COPPER	
Rods, base, per lb.	0 27
Soft sheets, plain, 16 oz. and heavier, lb.	0 28
Do., plain tinned 16 oz. and heavier, per lb.	0 35
Do., polished and tinned 16 oz. and heavier, lb.	0 40
Tubing	0 27

FIRMER UNDERTONE TO CORRUGATED PRICES

Toronto

A somewhat firmer tone is recently evident in the corrugated sheet market, this development being attributed to the improvement noted among flat galvanized sheets. The stiffening of prices on steel products generally, has been a factor calculated to produce a firmer undertone in corrugated. Both manufacturers and distributors report better activity, especially in the lighter gauges, while quotations remain unchanged at the following nominal list prices and discounts, with some special concessions reported offered on certain heavier sizes:

CORRUGATED SHEETS—	Per 100 Sq. Ft.
No. 28 gauge	6 50
No. 26 gauge	7 00
No. 24 gauge	9 00
No., 26 U. S., gauge	8 00
No. 22 gauge	11 00
No. 20 gauge	12 50
No. 18 gauge	16 50

Less 10 per cent.

Lighter than 24 gauge and wider than 27 ins., 75 cents per sq. extra.

TRADE STILL QUIET IN RANGE BOILERS

Toronto.

A moderate degree of trade is recorded in range boilers, with buying in somewhat meagre quantities for immediate requirements only, being the policy generally adhered to by purchasers. A better demand for these products is hoped for, especially with the apparent activity in construction work. The following list prices and discounts are generally in effect, although the previous net quotations are reported in certain quarters:

RANGE BOILERS— Size	List Price
5 gallon	$13 50
12 gallon	14 00
18 gallon	15 00
25 gallon	16 50
30 gallon	17 50
35 gallon	20 50
40 gallon	22 75
52 gallon	38 00
66 gallon	60 75
82 gallon	74 00
100 gallon	103 00
120 gallon	117 00
144 gallon	164 00
168 gallon	187 00
192 gallon	210 00

Discounts:—Standard weights, 50 per cent. Extra heavy, 40 per cent.

GRADUAL IMPROVEMENT IN FITTINGS TRADE

Toronto.

Distributors state that business in pipe fittings is coming along in fair proportion for this time of the year, with a gradual improvement having been recorded as the season advances. Building activity is expected to reflect an increase in this movement during the ensuing months. Little variation has been recorded in quotations, discounts and prices remaining at the recently revised levels, which follow:

PIPE FITTINGS—

Cast iron fittings	30%
Plugs, cast iron	30%
Do., solid	30%
Do., countersink	30%
Bushings, small	32%

Class C	0 13	0 20

SLIGHT IMPROVEMENT AGAIN SEEN IN METALS

Toronto

A better feeling is evident in some of the ingot metal markets this week, but whether this is simply due to the effect of the usual Spring demand is described as a problem. While reports of improvement and slightly firmer tendencies are evident as regards copper, antimony and spelter, yet metals in general and copper in particular are as erratic as ever. Lead remains the steadiest of the group, with quotations well held.

COPPER.—This metal is as erratic as ever, and while local quotations remain unchanged, some fluctuations have been reported at primary centres. The market is described as a little firmer, due to some export business and the fact that brass and wire mills have been consuming more metal. In some centres the belief evidently prevails that with mines resuming, there should be no marked uptrend in quotations. Domestic prices at 16½ cents.

TIN.—Tin is still below pre-war levels, and although London prices have recently advanced, the rise in exchange has assisted in this direction. Generally speaking, the markets are described as quiet. The price of 34 cents continues to be the average local quotation.

LEAD.—The lead market is firmer and prices are well held. An active demand is generally evident for this metal, with some reported booking in advance on primary centres, lending an encouraging outlook to the general situation. Domestic quotations are steady at $6.50.

SPELTER.—On the local markets, spelter is dull, but outside markets are reported as firmer. The volume of current business has been light, but the statistical position of spelter is stated as tending towards a firmer undertone. Prices locally average around $6.75.

ANTIMONY.—Although antimony is still somewhat dull locally, a firming tendency is noted. Reports from the south indicate that the situation of this metal is gaining some strength. Quotations remain between 6 and 7 cents on the local market.

ALUMINUM.—This metal is only moving in small volume, but primary markets record a slightly firmer trend in aluminum also. Local prices still hover around 26½ to 27 cents.

LONDON MARKETS

LONDON, April 20—Numerous price developments are recorded on the current hardware markets, including a ten per cent. advance in wood screw quotations, and reductions of varying extent on such products as japanned screen door hinges, the Gem line of furniture castors, molasses gates, petroleum faucets, blind and bed staples, veneer chair seats, the Rochdale line of pruners, and one brand of metal polish. Slightly higher quotations are recorded on corn planters for this season.

Current business in London and throughout this district is reported as good, especially during the past week, although the erratic weather somewhat retards the sale of summer lines, as well as creating spasmodic trading in some quarters.

INCREASED QUOTATIONS ON WOOD SCREWS

London

A revision has been announced in the discounts on wood screws, resulting in an advance all through the list of around ten per cent. Following are the new discount levels:

LOWER PRICES ON NO. 20 SCREEN DOOR HINGES

London

A reduction has been made in the quotations on the No. 20 japanned screen door hinges, and these are now quoted at $21.00 per gross pair or $1.85 a dozen pair, when ordered in smaller quantities.

LOWER PRICES NOTED ON GEM CASTORS

London

Quotations on the Gem line of furniture castors have been revised, and following are the lower prices:

GEM CASTORS—

No. 351	0 38
No. 352	0 31
No. 355	0 38
No. 356	0 31
No. 451	0 42
No. 452	0 34
No. 455	0 42
No. 456	0 34
No. 651	0 51
No. 652	0 40
No. 655	0 51
No. 656	0 40
No. 751	0 53
No. 752	0 45
No. 755	0 53
No. 752	0 45
No. 851	0 85
No. 852	0 75

PRICE DECLINE ON VENEER CHAIR SEATS

London

The local quotations on veneer perforated chair seats have been revised, the new prices being around fifteen per cent. lower. Following are the prevailing quotations:

VENEER CHAIR SEATS—
All Shapes:

	Per Doz.
14 inch	1 65
15 inch	1 90
16 inch	2 10

REDUCED QUOTATIONS ON MOLASSES GATES

London

New lower prices are now quoted on molasses gates, these revisions appearing as follows:—

MOLASSES GATES—

	Per Doz.
No. 1	4 50
No. 2	5 20
No. 3	5 75
No. 4	6 40

PETROLEUM FAUCETS HAVE EASIER PRICE

London

Reduced quotations are also noted this week on petroleum faucets, these products being quoted at the following new levels:

PETROLEUM FAUCETS—
Threaded for Iron Pipe.

	Ped Doz.
½ inch	12 [illegible]
⅝ inch	14 50
¾ inch	15 40
1 inch	18 60

BLIND AND BED STAPLES ALSO REDUCED

London

A reduction of approximately twenty per cent. has been announced in quotations on blind and bed staples. These products are now quoted at list, less 35 and 12½ per cent. Following are list prices with discount and packing extras:

STAPLES—

	Bed Per 100 lbs.	Blind
⅜ inch	36 00	41 00
½ inch	33 00	36 00
⅝ inch	29 00	35 00
11 [illegible]	29 00	..
¾ inch	26 00	33 50
⅞ inch	24 00	33 00
1 [illegible]	24 00	..
Discount	35 — 12½ %	
Net Extras for Packing:		
25 and 50 lb. Boxes	1 00	
10 lb. Boxes	1 50	
1 lb. Papers	2 00	

PRICES ON ROCHDALE PRUNERS SLIGHTLY LOWER

London

The new price levels recently announced on the Rochedale line of pruners are slightly lower. Quotations

on these products at present are as follows: No. 35, $8.25 per doz; No. 38, $23.25 per dozen.

METAL POLISH PRICES UNDERGO REVISION

London, Ont.— New lower prices have also been noted on Brasso metal polish. The revised quotations follow:

METAL POLISH—	Per Doz.
No. 3 tins	1 35
No. 6 tins	2 25
No. 12 tins	4 50

HIGHER PRICES NOTED ON CORN PLANTERS

London, Ont.—The King of Field make of corn planters are slightly higher in price this season, the present quotations on these products being $15.75 per dozen.

PRICES ON LINSEED OIL REMAIN STEADY

London, Ont.—A fairly good sale is reported for linseed oil, with quotations unchanged this week. Following are the prevailing levels:

LINSEED OIL—	Raw.	Boiled.
1 to 2 bbls., per gal	1 05	1 08
3 to 5 bbls., per gal.	1 04	1 07
6 to 9 bbls., per gal	1 02	1 05

Less barrels, add 15 cents gal.

TURPENTINE QUOTATIONS SHOW NO CHANGE

London, Ont.—Turpentine is reported as selling in seasonable volume, with prices on this product recording no change this week. The current quotations follow:

TURPENTINE—	Imp. Gal.
1 bbl. lots	1 30
2 to 4 bbl. lots	1 29
5 gal. lots	1 45

MORTAR STAIN ALSO RECORDS IMPROVED SALE

London, Ont.

As the building movement increases in momentum, the current sale of mortar stain also increases in volume. Prices on this product are at the following levels:

MORTAR STAIN—
Red (400 lbs. to barrel) $2.00 per 100 lbs.; Black (300 lbs. to barrel) $3.90 per 100 lbs.

SEASONAL ACTIVITY IN SPADES AND SHOVELS

London, Ont.

A good spring sale for spades and shovels is now generally recorded, although the movement of these products was a little delayed owing to the unseasonable weather somewhat restricting farmers, building contractors and others from customary operations at this season. However, with the advent of improvement in this direction, a corresponding briskness in the demand for these products is generally looked for. Discount remains at 55 per cent.

INCREASING CALL FOR BASEBALL GOODS

London, Ont.

There is a steadily increasing and good demand for baseball requirements in preparation for the current season. A shortage on some lines has already been reported in certain quarters. Repeat orders are looked for in these products, and other sporting requisites are also commencing to move in satisfactory volume.

Winnipeg Markets

WINNIPEG, April 20.—The budget of price reductions recorded on the current hardware markets is more extensive than has been evident for a number of weeks. Lower quotations have appeared on linseed oil, turpentine, lead pipe and waste, double-pointed tacks, leather belting, galvanized range boilers, and lamp wick. Business in general is now reported on the road to improvement, with an active movement of Spring lines. Early developments in construction circles, combined with an extensive program during the ensuing months, has stimulated the sale of builders' hardware and tools, while numerous other products reflect the general improvement in this direction.

FIVE CENT DECLINE IN LINSEED OIL PRICE

Winnipeg.

Owing to a recent recession in flax seed prices, quotations on linseed oil record another drop of five cents per gallon. Raw oil is now quoted at $1.10 per gal. and boiled at $1.13 per gal. in barrel lots.

NEW LIST PRICES ON DOUBLE POINTED TACKS

Winnipeg.

Through a revision of list prices on double pointed tacks, quotations on these products, are on a slightly lower basis. The discount remains unchanged, but following are the revised list prices:

DOUBLE POINTED TACKS—	List price per doz. papers.
N. 3	1 00
No. 9	1 00
No. 10	1 20
No. 11	1 30
No. 12	1 40
No. 14	1 50

Discount 70 per cent.

REVISED QUOTATIONS ON LEAD PIPE AND WASTE

Winnipeg.

A decline has been announced in quotations on lead pipe and lead waste. These changes place lead products on a lower basis in anticipation for an improved demand during the summer months. Following are the revised quotations:

Lead Pipe ..... $11.61 per 100 lbs.
Lead Waste ..... 12.51 per 100 lbs.

TURPENTINE QUOTATIONS SUBSTANTIALLY REDUCED

Winnipeg.

Although the general impression during recent weeks was that turpentine would be fairly steady, the price has now dropped ten cents per gallon. The local demand is steadily increasing and with the active painting season now in sight, consumption of this product is expected to record a steady movement throughout the ensuing weeks. The prevailing quotation is $1.45 per gal. in barrel lots.

ACTIVE MOVEMENT NOTED IN BUILDERS' HARDWARE

Winnipeg.

Owing to the early start in building activities and the prospects of a greater amount of construction work than last year, business in builders' hardware and tools is expected to be exceptionally brisk. In fact the sales of these lines are now exceeding expectations. This condition is particularly encouraging to all phases of the trade.

EASIER PRICE LEVELS ON LEATHER BELTING

Winnipeg.

Prices are reduced on leather belting through a revision of discounts. Following are the new quotations recorded this week:

LEATHER BELTING—	
Agricultural or No. 1	30, 10, 10 & 5%
Standard	30, 10 & 5%
Extra	30 & 10%

LOWER PRICES APPEAR ON RANGE BOILERS

Winnipeg

Quotations on galvanized range boilers have now been reduced. This change places these products on an easier basis, with the approach of the active building season when a better demand is naturally looked for. Present stocks are said to be in fair shape. Following are the revised prices:

RANGE BOILERS—	
30 gal., each	9 60
35 gal., each	12.50
40 gal., each	13.75
52 gal., each	22.60
66 gal., each	35 00
82 gal., each	42 50
100 gal. each	60 00
120 gal., each	65.00

PRICES ON LAMP WICK ALSO REVISED

Winnipeg.

Prices on lamp wick are recorded lower in keeping with other cotton products that have shown similar price changes during the past few weeks. Following are the revised quotations:

LAMP WICK—	
No. O	0 75
No. A	1 05
No. B	1 50
No. D	2 25
Rochester:	
No. 2	5 75
No. 3	23 40

Hamilton Markets

HAMILTON, April, 20.—The number of price developments recently recorded on the hardware markets indicate that the general tendency is still in a downward direction as regards the finished products. The commencement of the second quarter of the year has witnessed a slight increase in the range of price changes, but still fall short of the extensive budgets of revisions which were recorded at the beginning of the year. It is also noted that recent announcements regarding new quotations or revised discounts, do not affect the same products so frequently as was previously the case. The extent of reductions, or in some cases advances, have generally been of minor proportions also, a consideration which has served to brighten the market outlook in certain directions.

On the other hand, the stiffening recently recorded in the basic steel markets, has reflected a firmer tone throughout prices on practically all steel and iron products. This movement has now reached the stage on primary quarters where quotations are rising, but whether the trend will be sustained and reflected on domestic markets is described as dependent upon its uniformity and duration. Some apprehension due to the coal strike in southern fields has resulted in a marked increase in the demand upon the mills, which, combined with the usual seasonal improvement in this direction, has resulted in a more or less rapid rise in the ratio of operation among steel producers. This increase in steel production, however, is not generally construed as an argument that the rate of mill operation will continue to develop, but rather as an indication that it may soon cease to increase; while during the summer period when the market is usually dull the percentage of capacity may not be so great.

One instance of the price trend to the south is noticeable in the sheet market, where having entered at the old prices all the desirable business offered in sheets, the mills withdrew the old quotations and substituted prices at the advanced level which they recently announced would be made effective. It is reported that a heavy tonnage was booked through this method of meeting the current situation.

The coal strike is now reported as entering more prominently into the prevailing steel developments, than was originally estimated. The walk-out of strikers at non-union coal mines has evidently been more effective than was anticipated, which, coupled with the looked for tie-up in union producing fields, has caused some anxiety to become apparent in certain quarters. Mills and furnaces have therefore been forced to draw more heavily upon their stocks of coal, while the increased demand for steel has had its contributory effect in the consumption of coal.

How the price tendency in steel will affect finished products in general and the manufactured hardware lines in particular, which rely upon steel as the primary basic material, can only be gauged by the extent and rapidity which these developments register, combined with the duration and resultant influence of the strike.

Pittsburg Markets

PITTSBURG, April 20— The coal strike is affecting the iron and steel industry more than was expected, because there has been a considerable amount of striking in non-union fields, particularly in Western Pennsylvania. Something of this sort was expected, but not nearly as much as has occurred. The union coal strike was expected to last several months, and what was thought to be sufficient provision was made against it. In particular, the strikes in the lower Connellsville region affect iron and steel, because normally, coke as made in the Connellsville region just as the coal is mined, is shipped as fast as drawn from ovens, and used by blast furnaces practically as received there being no stocks.

There have not been many strikes in the Connellsville region, or "old basin," but the lower Connellsville or Masontown field is nearly all down. Normally, the Connellsville region has more coke production than lower Connellsville but the former is largely a Steel Corporation affair, the merchant ovens being located largely in the latter mentioned territory. The Steel Corporation has partly made up for its loss in production in the lower section by starting additional ovens in the Connellsville but even the corporation has had to bank or blow out a few blast furnaces, perhaps half a dozen or more.

Pig Iron Demand:—Not many merchant furnaces have had to bank thus far, but there is danger that many will have to do so, and as they have pig iron obligations already, they have been withdrawing as sellers. Consumers on the other hand, appear to have discovered suddenly that they need iron and are not particular as to the price. Foundrymen who a month ago could not be coaxed to buy pig iron are now sending in orders, with the price space left blank.

No regular pig iron market is quotable, but prices would be not under $21 for Bessemer, $20 for basic and $21 for foundry, f. o. b. valley furnaces, or $1.50 higher on Bessemer, $2 higher on basic, and $2 higher on foundry, than the market ruling a fortnight ago. A small part of the advance in basic and foundry was reported a week ago, but the $21.50 figure given for Bessemer was an error, as the market had been $19.50 for quite a while.

Steel Supplies:—The turnover in steel products is considerably decreased. Part of the decrease is due to the reserve of sellers, exemplified chiefly by their stiffening up in prices, while part is due to buyers, who had undoubtedly been buying more freely in February and March than would have been the case if no coal strike had been expected. Undoubtedly consumption of steel has been increasing, but it is inconceivable that consumption should increase in three months in the way production has increased. In the last week of December steel ingots were being produced at less than 18,000,000 tons a year, while on March 31 the rate of production was in the neighborhood of 36,000,000 tons.

On the other hand, some buyers of steel seem to have been drawn into the market by the coal strike, but this disposition to buy on account of the coal strike is not noticed in steel to anything like the extent it is seen in pig iron.

The remaining independent wire mills have advanced nails, staples and barb wire $2 a ton, while the American Steel and Wire Co., has not yet taken action. It is expected that it will eventually advance. The advance that seems to be in progress does not involve plain wire or wire fence. The market is quotable as follows: Plain wire, 2.25c; cement coated nails, $1.90 to $2; wire nails, $2.40; to $2.50; polished staples, 1.55c to 1.65c; galvanized barb wire, $3.05 to $3.15; wire fence, 68 per cent off list, in carloads.

Bars, and structural small shapes are up $2.50 a ton, but attractive orders might still go at almost the old figure. There is no buying in sheets, as buyers have ample opportunity to cover before the $3 a ton advance that occurred early this month. It is said that the advanced prices are being firmly held, $2.40 for blue annealed, $3.15 for black, $4.15 for galvanized and $4.50 for automobile sheets.

Coal Strike Prospects:—The Connellsville and lower Connellsville regions were supplying coke to make between 20 and 25 per cent of the country's pig iron, and a large part of this supply has been shut off, possibly between one-third and one-half, while coke supplies elsewhere are menaced to a slight extent. Some of the by-product coke plants are well stocked with coal, but those that were depending chiefly on non-union coal are not so well stocked.

The strike as a whole is divided into two parts. The trouble at the union mines was expected all along to last two or three months, some observers expecting it to be late in the Autumn before it was entirely settled. Then there are the non-union strikes, which are quite unlikely to last long. The union miners are quite accustomed to striking, having had one pretty regularly every two years for a long time as the biennial scale came up for adjustment.

Makes Paint Department Lead the Way

Active Solicitation of District Conducted by G. Wickham When New Store Was Opened in Toronto a Year Ago—Using Paint and Varnish as a Leader Many Accounts Were Opened—Now Necessary to Open Larger Store—Expects 1922 Paint Trade Will Treble That of Last Year.

THERE are some business men who wade in where angels fear to get their feet wet and get away with it. Others who, when they find that they cannot budge the mountain over to where Mahomet sits, pick up Mahomet and set him over against the mountain.

Figuratively speaking, this is about what G. Wickham did with his paint department when he opened up the Wickham Hardware store at 2424 Danforth Ave., Toronto, the latter part of May 1921.

Mr. Wickham didn't recognize that he had started to sell paint a little late in the season or rather he didn't acknowledge it, but waded right in to get paint business from the drop of the hat.

The position of his paint department and the arrangement of his stock was the first thing that struck the eye of the incoming customer. In fact, a wide expanse of plate glass window permitted every passerby to see that the stock of the Wickham Hardware paint department was right up front, ready to do business.

But Mr. Wickham did not stop with a well arranged display. He knew that his advent into the community would not be heralded by the community's brass band, and here is where he began to give Mahomet his trolley-trip to the mountain.

Big Response to Business

As Mr. Wickham says, "I might have sat behind my counter waiting for trade to come to me, but I wasn't in any waiting humour, so I started shuffling sole-leather to let the community know who I was, where I was, and what I had and I must say that I was welcomed with a volume of business that has compelled me to start the erection of a new store long before my first year is up, and that will not be till the end of May 1922."

"How did I do it!" he answered in reply to the enquiry of Hardware and Metal.

"I made my paint department my leader, I got in touch with an experienced and very diplomatic solicitor who canvassed the whole community from stem to gudgeon, using paint and varnish as a leader, and incidentally giving one many leads for glazing, tinsmithing, furnaces, hardware and so forth.

"He hadn't been on the street a day before people began looking me up, eyeing my store up and down, walking in and asking my prices, and buying. I soon found that the interest aroused by my canvasser led them direct to my paint department. It was up to me and the quality of my line to do the rest and we did it.

Personal Touch with Community

"This method of introducing myself got me in personal touch with the com-

Paint Dep't Seen From the Street

What is meant by keeping the paint department well to the front of the store is indicated in this photo of the store interior of G. Wickham Hardware, Danforth Ave., Toronto. The passer-by can see the extensive paint stock from the street and the customer has plenty of light under which to choose colors—Active business followed in this department from personal solicitation and this business has practically been the foundation of the firm's business in other hardware.

AUTO ENAMEL

The Flint line of Auto Enamels is designed especially for the car owner who desires to refinish his car himself. This line is made under the same supervision as the finishes we turn out for the automobile industry. Flint Auto Enamels flow out evenly, have good hiding power and do not show brush marks.

Have this line on your shelves and be ready to supply the increasing demand of car owners for refinishing material. Write us for our attractive Spring proposition.

munity, and I learned their habits and needs in much shorter time than in any other method of advertising I could have devised. I found that women, especially, are always interested in some surface or other about their home that needs the brightening touch of an enamel or a varnish stain, and that by selling them a line of the first quality, I obtained an introduction to their other needs in a comparatively easy manner."

"What about 1922?" Mr. Wickham was asked.

"I believe I can treble last year's business, especially in my paint department," replied Mr. Wickham, "at any rate, I'm not going to take any chances in being left behind so I have started to feature paints and varnishes early. They are good leaders to get into the home and I'm not forgetting my obligation to my paint department in giving me a good start."

"The fact that within less than a year I have found it necessary to build a larger store of my own is sufficient evidence of the fact that it pays to go out and tell people that you have settled in their midst to do business that gives both value and service that they can appreciate."

"If you had to start in a new community, would you repeat the same method?" asked Hardware and Metal.

"I sure would, only more so," was Mr. Wickham's reply, which only goes to show that an aggressive merchandiser can cast his lot in any locality and come out above board if he wants to set his mind and feet to the task.

Probably Mr. Wickham's method of using his line of paint and varnishes as an introduction can be used to advantage by other Hardware and Metal readers who wish to make 1922 their greatest paint and varnish year.

Developing Bigger Paint Sales

Present Year Away to a Good Start—Paint Manufacturer Cites Instances Where Customers Have Benefited by "Save the Surface" Campaign—Sales Increased Many Times Over.

MONTREAL.—Discussing the activity in paint and varnish circles in the earlier months of this year, and the possibilities of a record season, John Irwin, president of McArthur-Irwin, Limited, stated that without exception, lines of their manufacture were away to a good start, showing an encouraging increase over sales of last year. Curtailment of buying in the winter months was now being reflected on the manufacturers, orders now on hand necessitating a capacity run for some weeks to come. With the active painting season now at hand there seemed no obstacle in the way of a continued busy period well up until the time when the extreme heat of mid-summer months necessitated the usual slackening in demand.

"Unfortunately, export trade is not making the same progress as our domestic field, all countries, with the exception of perhaps the West Indies, falling behind the record of previous years," said Mr. Irwin. It was pointed out, however, that there were many reasons for this, and the West Indies was really to be congratulated on its present showing. Efforts were now being put forth to improve conditions for export from our Canadian ports, and it was hoped that other countries would soon be on the road to recovery.

White Lead Also Active

Speaking as a corroder of white lead in oil, Mr. Irwin stated that they were now very busy in the manufacture of this product. Factors, such as the extensive need of painting, lower prevailing prices, and efforts on the part of those engaged in the industry, that were stimulating paint sales, were also speeding the movement of white lead. The booking date had now been extended to June 30th, and dealers in some instances were holding back on their deliveries, but this was working out quite satisfactorily both for merchants and themselves. The tone of the market was continuing on a steady to firm basis, with little chance of any price change during the spring season, and this also was assisting toward a satisfactory working basis.

"Save The Surface" Movement

"If a retailer gains through bigger sales, we as manufacturers also benefit. The 'Save the Surface' campaign, more extensively carried out each year, is working for both the dealer and the manufacturer, and for this reason I am thoroughly 'sold' on the idea. Distributors of our products, both large and small, have taken a hold of the movement, and we have found that bigger business has resulted," continued Mr. Irwin. An instance was cited of a small merchant whose purchases in previous years totalled approximately $400 for the whole year. He had now adopted a "Save the Surface" department, and his purchases of paint and sundries were averaging $300 a month. A larger retailer had been in the habit of buying in the neighborhood of $1,800 worth of paint and varnishes in the year. This store had paid little attention to their paint department, and considered it more or less as a side line. Possibilities were seen in bringing it to its proper standing, and two years ago a complete change was made, adopting last year a "Save the Surface" department. Their purchases were now averaging $1,200 a month. Added interest in this direction was now manifest in the amount of correspondence received requesting window trims, transparencies and other literature, and it is Mr. Irwin's opinion that this year will see an appreciable advancement in the "Save the Surface" selling idea.

TINSMITHS' STATUS IS STILL INDEFINITE

(Continued from page 33)

of opinion was that the trade and the purchasing public were injuriously affected by the indiscriminate use of the term as now being applied. One element in the trade contended for the elimination of the name; the other asserted that there was no deceptive quality in the name itself, but that it was necessary to establish a standard of quality to which the term should properly apply. The difficulty as found is that the word has no real meaning but is indiscriminately applied by manufacturers to all grades of silver-plated ware. To the public it was found that the word however, has the meaning of origin in Sheffield, England, and signifies quality.

The Commission, without attempting to express a conclusive judgment upon the merits of any particular case, in general disapproves the use of the word "Sheffield" as a trade name, or mark for silver-plated hollow ware, and will proceed in individual cases as they come before it upon this basis, with due regard to the merits of any particular case.

LISTENING TO THE VOICES IN THE AIR

(Continued from Page 27)

Small sets for receiving only can be purchased for $15 to $35, these having an average radius up to 30 miles. Sets costing about $100 have a radius up to about 300 miles.

The standard stets, however, are fairly moderate in price and meet the needs of the average radio "fan." Additional telephone receivers, through which messages broadcasted by the transmitting radios are brought to the ears of the listeners, are in great demand. Certain wireless telephone sets are so arranged as to allow the connection of several receivers so that a group of radio enthusiasts can listen simultaneously. To encourage the use of radio sets, newspapers, electrical firms, etc., are sending out periodically concerts, lectures, etc., on which all persons with sets may listen to if within radius.

ACTIVE MONTH FOR MONTREAL BUILDING

If the remainder of the month produces as good a record as has so far been shown, April will set a high record for the year. Since the beginning of the month 230 permits have been issued, representing a total of $950,475, which exceeds that for whole month of March. Dwelling houses feature the program, most of the permits being for this class of construction.

Velvet Finish

(The Can with the Orange and Black Label)

There is no limit to the sales possibilities of a decorative material such as **Floglaze** Velvet Finish. This dull mat enamel is in strong demand for the finishing of walls, ceilings, woodwork, etc., of homes, hospitals, schools, churches and such like.

Owing to its unique composition, **Floglaze** Velvet Finish produces a dull lustre in a natural manner. This dispenses with the usual necessity of rubbing or polishing. Being readily washable without injuring the finish, enables bright, sanitary conditions to be maintained at all times.

Floglaze Velvet Finish furnishes a powerful lever for the increasing of profits in your paint department.

Our dealers' booklet, "A Guide to larger Profits," describes Floglaze Velvet Finish fully. Write for this book.

Weekly Paint Markets

Montreal

MONTREAL, April 20.—A somewhat stronger tone in both linseed oil and turpentine feature the paint markets this week. The oil market commenced to improve last week, after a period of an easier tendency, and advances are now recorded in some quarters. This movement is said to be directly in sympathy with flax seed, which has gained approximately 8 points in the last week. Current quotations are unchanged at this time, but a revision upwards is anticipated within the next few days.Increased demand is also assisting in the firmer tone on this product. Turpentine is, as stated, also slightly firmer, with the market described as active. Stocks are comparatively light at present, and deliveries are expected to improve in the very near future. The new crop will, in all probability, be the next factor to consider in the market at primary centres. A somewhat easier tendency is usually apparent following the appearance of this, and the future trend of turpentine is beyond accurate forecast. Shellac is little changed this week, the undertone of the market remaining in a strong position, but no actual changes are recorded on the local market. Paint, varnishes and sundries, also white lead in oil, are now very active, the season for these products commencing in earnest. Window glass is also unchanged locally, although some developments may appear in the near future owing to the opening of navigation.

FIRMER TONE DISPLAYED IN LINSEED OIL

Montreal

Following a period when an easier tendency has been displayed, the linseed oil market is now described as firm. The improvement commenced towards the latter end of last week, when the seed market showed a gain of 6 cents in the last two days. This is followed this week by a further advancement of 8 cents, with indications of a better tone from now on. This present movement is in accordance with the prediction made some weeks ago that the oil market would continue in a fairly strong position during the active weeks of spring. Although a set-back has been recorded in past weeks, and the market registered a continued slump, those well informed are still firm in their ideas.

Locally, quotations at this time remain at last week's figures. Demand improves and with the continuance of this comes the question of seed supplies. While there is little fear of a serious shortage at a later date, it is stated that supplies will be none too ample, and this factor will be of sufficient importance to maintain a firm situation. Unchanged quotations for the week are as follows:

LINSEED OIL—	Raw.	Boiled.
1 to 2 barrel lots, per gal. ..	0 98	100
3 to 5 barrel lots, per gal ...	0 96	0 98
Less barrels, add 10 cents per gallon.		

SOMEWHAT STRONGER TONE IN TURPENTINE

Montreal

Turpentine on the local market is described as considerably stronger, chiefly owing to present low stocks, both locally and at primary centres. According to local importers this condition may be only temporary, as the time of the new crop is now practically at hand. For some weeks past the deliveries have not been the best, demand having improved locally and supplies at southern centres being none too ample. With the new crop, however, the question of supplies should be improved to a great extent. Again, the usual occurrence at this period is an easier tendency, following receipts from the new crop. For this reason a somewhat softer tone may be expected in the turpentine market for the coming weeks, but the extent and duration of this tendency at present is impossible to judge accurately, as the seasonal demand will likely be a contributory factor. While no general price change on turpentine has been recorded on the local market, certain distributors who were quoting slightly under market levels, have not advanced their prices, and following are most generally adopted:

TURPENTINE—	Imp. gal.
1 barrel lots	1 21
2 to 4 barrel lots, per gal.	1 20
Broken lots	1 31

ACTIVE MOVEMENT NOW RECORDED IN WHITE LEAD

Montreal.

The movement of white lead in oil is now said to be seasonably active, the weather in the past two weeks having stimulated sales considerably. The undertone of the market remains steady, owing to both pig lead and linseed oil showing a little change. Pig lead, which is a more important ingredient in this product than linseed oil, has continued fairly strong all during the winter and earlier spring. While other metals recorded an easier tendency, lead continued the steadiest metal on the list. There is a report that price-shading has appeared in certain quarters, but up to the present this is not very extensive, and the market on the whole is fairly steady. Present quotations are $12.00 in five-ton lots, $12.75 in one-ton lots and $13.10 in less quantities.

SHELLAC MARKET FIRM; NO PRICE CHANGES

Montreal.

Little further change is recorded in the shellac market this week, quotations generally remaining at former figures with the undertone of the market still firm. There is still a variation in prices existing among the various distributors, but it is noticed this week that some firms have increased their quotations, bringing them to a more uniform level. Following are prices most generally quoted:

SHELLAC—	
Orange shellac, in barrels	4 60
Do., in one gal. jugs	4 90
White, in 5 gal. jugs	5 10
Do., in one gal. jugs	5 40

SEASONABLE DEMAND EVIDENT FOR PUTTY

Montreal

The present movement of putty is now described as seasonable, building construction requiring fair supplies. Present quotations are said to be on a fairly stable basis, with little change thought likely during the remaining active months of spring. Following are prevailing prices:

PUTTY—			
Bulk barrels 800 lbs.	4 00	4 50	4 75
Bulk drums, 100 lbs.	5 00	5 50	5 75
Do., or tins, loose, 25 lbs.	5 25	5 75	6 00
Drums or tins, cased, 25 lb.	6 00	6 50	6 75
5 lb. tins	9 25	9 75	10 00
1-lb. tins	11 25	11 75	12 00
Standard, per 100 lbs.	5-ton lots	1-ton lots.	Less

Toronto

TORONTO, April 20.—Price developments in the paint markets this week, are noticeable by their absence, this being the first week for some time that either reductions or advances have not been announced. However, certain market tendencies attract keen interest, particularly in turpentine, linseed oil and shellac. Some shading of prices on turpentine are still apparent locally, while the supply of turpentine both on the domestic and primary cen-

Que.,

Gentlemen;-

A little over thirty years ago the writer started his career as Painter & Decorator. Realizing that the only way to build a successful business,was to first establish a reputation by giving the public the best workmanship possible coupled with the best products obtainable.

My first selection,as to material was " Elephant Brand White Lead" as I considered it at that time stock that could be recommended to my customers and which I could use also with entire satisfaction.

"Elephant Brand White Lead" was then noted for its intensity of whiteness,covering and lasting qualities,making it the most durable lead on the market. What was true of it thirty years ago can be said of it to-day,and I do not hesitate to pronounce "Elephant Brand White Lead" absolutely the best.

Yours very truly.

TORONTO PAINT MARKETS

(Continued from page 50)

tres continues to be more or less of a restricted nature. The new crop has been slightly delayed through cold nights and stormy weather, and prices are fairly steady at southern points. More buying activity has recently been recorded, but buyers are adhering to a moderate policy, as the feeling is prevalent that some easier price levels may develop with the arrival of fresh seasonal receipts Linseed oil has developed a firmer tone due to the upward trend in the flax seed markets. Whether this movement will hold, is dependent upon varying elements, such as the call for seed, and the seasonal activity in linseed. Shellac continues to register a firm tone, and while some advances were reported at primary centres, local prices are nominally unchanged, although quotations are still withheld in certain quarters. No relief has been reported from Calcutta in conditions governing available supplies, but on the other hand the situation has apparently not reached the stage where the scarcity of shellac is acute. White lead in oil and putty are in seasonal demand, with paints and varnishes registering increased activity as the Spring months advance. The stronger tone in the primary lead markets has been reflected in the general tendency of white lead in oil, this metal being one of the chief elements in manufacturing costs. Window glass quotations are locally unchanged, but some uncertainty is expressed regarding future prices in certain quarters, owing to the re-opening of navigation points in eastern Canada.

TURPENTINE SUPPLIES OF MODERATE NATURE

Toronto.

Little fundamental change has been recorded in the turpentine markets during the past week. Locally, stocks are still reported as low, with fresh shipments expected to be quickly distributed owing to the general demand. Prices continue to show a range, the level of $1.30 recorded recently being generally maintained, although prices several cents below this level have also been recorded.

It is stated that some storms and cold nights at southern producing centres have delayed the new crop, and current purchases continue in excess of fresh receipts. Whether easier prices will develop with the arrival of the new crop is described as depending upon the demand and the extent of offerings. Some lowering in prices from the winter levels is customary. Distributors point out, however, that the Spring demand for turpentine is generally improving, while local supplies are somewhat restricted.

Supplies in the south are also reported as very limited, with the current demand resulting in a call upon the tanked reserves. The prevailing requirements are described as far heavier than the early new receipts, as with the nights still cool, the crop is running slowly, at present. Both the domestic and foreign volume of demand is stated to have improved, a movement which commenced with buying for European shipment. Under these circumstances, certain consumers of turpentine are said to be short on supplies, a fact which has resulted in the present activity. While many purchases are still for immediate needs, the total aggregate creates an improvement over recent market activity.

The anticipated nearness of the new season's crop, is considered as deterring many buyers, the feeling having developed that some easier prices may become apparent with the advent of fresh supplies. Following are the average local prices, which, however, are being shaded, as reported above:

TURPENTINE—	Imp. gal.
1 barrel lots	1 30
2 to 4 barrel lots	1 29
5 gallon lots	1 45

Less than 1 barrel lots—15 cents per gallon extra

Turpentine steel drums galvanized, 5c per gallon less than barrel price. Drums charged $10 each, returnable in 30 days, freight paid.

All quantities sold f.o.b. Toronto, Hamilton, London, Brantford, Collingwood, Guelph Windsor, or Montreal but freight may be equalized from any of these points.

Car load lots of 70 bbls. Price on application.

FIRMER TONE IN OIL REFLECTS SEED TREND

Toronto.

With a gain of several points in the flax seed markets, this improvement has been reflected in the undertone on linseed oil. Quotations on oil, however, generally remain at the recent revised levels, with the current demand of fair proportions for this season of the year. The supply of seed is described as one of the dominant factors in linseed oil, and with the demand for seed registering improvement and prices consequently developing an upward trend, a similar tendency is expected to be reflected in oil during the ensuing weeks. As pointed out above, however, the prevailing movement of linseed, is only moderate. Crushers refer to the fact that when flaxseed markets weakened, linseed oil showed a sympathetic downward trend. Therefore, in the event of firmer seed prices, some similar developments are looked for in certain quarters. The average local oil quotations follow:

LINSEED OIL—

	Per Gallon Raw	Boiled
1 to 2 barrel lots	1 05	1 08
3 to 4 barrel lots	1 04	1 07
5 to 9 barrel lots	1 02	1 05

Less barrels, add 15 cents per gallon.

SPRING BRUSH TRADE OF FAIR PROPORTIONS

Toronto.

The Spring brush trade is now described as well under way, with manufacturers and distributors reporting that they are fairly busy. Current business in these products has been stimulated by the general adoption of paint up and clean up programs in various localities. Retail stocks of brushes, however, are generally smaller this year than during past seasons. This condition is attributed to the natural reticence of buyers in practically all phases of the trade, and distributors state that the policy is reflected in the numerous hurry calls for small quantities, more or less frequently repeated, which have featured the present season's activities. General reports, indicate, that trade has registered an improvement. however, with prices at present steady and unchanged. There has been little change in the raw products markets, and quotations have therefore been staple for some time. An even ng-up process is anticipated in brush prices towards the middle of the year, but no general revision, or decline, is looked for in view of the firmness evident in the bristle markets.

LOOK FOR BUILDING ACTIVITY TO REFLECT DEMAND FOR GLASS

Toronto.

The present market for window glass is described as somewhat spotty. Certain distributors report a fairly brisk demand, while others state that the movement is of more moderate proportions. Both manufacturers and distributors, however, look for improvement to develop in the future, and point towards the general building activity as one of the principal factors in developing improvement in the demand for window glass. Such buildings will hardly reach the stage where glass is required for a number of weeks, but a couple of months is generally given as the period when brisker activity should be recorded. Prices are fairly firm, with little variation noted in this direction. The recent new net list remains in effect, with the customary small discount for 25 cases and over.

NOT ATTRIBUTED TO COAL STRIKE

(Continued from page 32)

tual production of coal has changed little outside of the Connellsville district, where it is somewhat less, and the rate of steel works and rolling mill operations is about 75 per cent. for the Steel Corporation and close to 70 per cent. for independent companies.

In the Connellsville field many of the idle non-union men are still out without making demands. The present week is expected to show their real intentions, and another week may see the beginning of a drive to re-open non-union mines.

Buying of steel has been stimulated by the increasing inability of mills to make prompt deliveries, and consumers have found that they must lay in stocks instead of drawing on the mills week by week as they have done for months.

In brief, the price changes of the week are $1 to $2 per ton on pig iron in most districts and as high as $3 in eastern Pennsylvania on limited sales, while several finished steel products are up $2 per ton.

The volume of fabricated steel business closed in March, 139,300 tons, was almost as much as that of January and February combined, and was over 30 per cent. better than the March average for the preceding ten years.

Rush Shipments From Stock

All the painting, varnishing and general cleaning up that goes on in the Spring means Big Brush Sales.

How is your stock of Rubberset Brushes? Check it over carefully. Bring it up to strength. Rubberset quality and reputation draw trade, and if your stock needs replenishing, we can rush you supplies from stock.

Alabastine Opaline Effects

A new development in artistic wall decoration has been perfected. All the beauty—all the harmonious coloring—all the effect of the most expensive wall papers can now be combined with the sanitation and economy of

Mix in Hot or Cold Water

Alabastine

Avoid imitations. There is only one Alabastine.

Beautiful, colorful walls that not only match the colors of furnishings and draperies but resemble their very texture can be produced. A suitable Alabastine tint is used as a background and harmonious colors are dabbed on this with a sponge. An attractive flecked effect is the result.

There are no expensive tools to buy. Very little time is required and no special skill.

See the samples our salesman carries and write for some to display in your store. The Opaline Effects are going to increase the sales of Alabastine tremendously.

Retail prices:

5-lb. package	75c
2½-lb. package	40c

We Have the Goods that Sell

It is a great time to be well stocked with established goods that are satisfactory and sell readily. In view of the pronounced boom in building, the merchant who stocks—displays—and sells the dependable and salable lines procurable through the wholesale house of W. Walker & Son, Ltd., is earning an advantage that means greater business and increased profits — 1922 promises to be a big year in Builders' Hardware and Mechanics' Tools. We have the fullest assortment—suppose you write us for prices and information about your needs.

TINKER TOM'S TALKS.

No. 355

THE TIME IS HERE!

Beginning in the issue of Hardware and Metal February 25th, and every week since, the burden of our song has been

GET YOUR ORDERS FOR "PREMIER" GALVANIZED STEEL SHEETS IN EARLY!

Every sign pointed to firmer prices and delayed deliveries and if you followed our advice

YOU'RE WAY AHEAD OF THE GAME!

There will be a tremendous demand for sheets during the next sixty days at least, and notwithstanding any imports. This is due to two years delayed buying covering the period of high prices. Sheets are as cheap now as farm products and this is the time to buy.

ASK ANY CANADIAN JOBBER.

THE PROGRESSIVE MANUFACTURING CO.
Torrington, Conn., U. S. A.

FORSTNER BITS

bore their way right through tough, hard, knotty, cross-grained wood and leave a smooth hole and clean surface. That's performance. THEY DIFFER FROM ALL OTHER BITS, BEING GUIDED BY THE RIM INSTEAD OF THE CENTRE. That's scientific construction. They bore any arc of a circle and can be guided in any direction. That's adaptability. Made for Brace-made Machines. Packed singly; packed in sets. That's convenience. And they sell to Wood Workers, Carpenters, Cabinet Makers and others. That's why you should sell them. Order through your jobber to-day.

OUR EAVETROUGH AND CONDUCTOR PIPE ARE NOTED FOR THEIR EASY FITTING QUALITIES.

Now is the time to order conductor elbows, ridge roll, valley iron, corrugated galvanized iron roofing and siding. All kinds of eavetrough and conductor pipe accessories, galvanized iron sheets, etc.

We ship while others are thinking about it.

WHEELER & BAIN, LTD. TORONTO

HARDWARE & METAL is the only weekly hardware paper in Canada and is read by practically every worthwhile buyer, both wholesale and retail, in Canada. HARDWARE & METAL is the logical medium to use if you have a message for the Canadian hardware trade.

BURLAP DECORATIVE WALL
The Dominion Oilcloth & Linoleum Co., Ltd.

A typical farm building showing effect secured after covering with Everlastic "Rubber" Roofing

Are You Ready for Spring Business?

All indications point to a record year in the sale of Barrett Roofings and Roof Repair Materials; for people are going to spend their money carefully. If they can patch the old roofs to last another season, they're going to do it. And if they have to buy new roofs they're going to demand roofing of proved dependability.

Seventy-five years' experience has given The Barrett Company, Limited, a thorough knowledge of roofing requirements. All over the Dominion, the name "Barrett" stands for honest goods at honest prices.

Better be ready — place your order now for these popular Barrett products!

Everlastic "Rubber" Roofing

The recognized standard among "rubber" roofings. Famous for its durability. Made of high grade, waterproofing materials, it defies wind, weather and time and insures dry, comfortable buildings under all weather conditions. Everlastic "Rubber" Roofing is the most popular roll roofing sold in Canada. It is tough, pliable, elastic, moderate-priced and very economical. It is so easy to lay; no skilled labor required. Comes in three weights in rolls containing 108 sq. ft. Nails and cement included in each roll.

Everlastic Multi-Shingles

Made of high grade felt thoroughly waterproofed and mineral surfaced in beautiful natural colors, either red or green. Come in strips of four shingles, and so can be laid quicker and at far less cost for labor than ordinary shingles. Produce a roof of artistic beauty worthy of the finest buildings, and one that resists fire and never needs painting.

Everlastic Liquid Roofing Cement

In a class by itself among roof repair materials. A big seller everywhere—a sure repeater.

Unequalled for resurfacing old and worn-out prepared and "rubber" roofings. Comes ready for use, is easy to apply, and forms a smooth, tough, durable surface which stubbornly resists moisture, acids, alkalies and fumes. Adds years of service to a worn-out roof at small expense.
